Hi Julie. Attached is a spreadsheet that includes a few **example sites** for the legislative districts we discussed, as well as Brattleboro and Bennington. By no means are these all the 3 acre sites for the areas of interest. We did not include the impervious area because there is a range of accuracy depending on the locale. In some cases we have permit information, in others it was just a rough estimate to ensure the project had more than 3 acres. We will of course refine the information before designating any affected property. Relatedly, has the meeting been scheduled? Last we spoke you mentioned Thursday 11/9 as a possibility. Thank you. -Padraic

It has not. There were some confounding issues with schedules. I will follow up with Brittney tomorrow and see where she landed.

Hi Julie. Has the schedule for meeting with legislators firmed up at all? Last we discussed this there was mention of the week of 11/6. Thanks. -Padraic
