---

Hi Sophia.

As discussed earlier this week, I am interested in "benchmarking" the extensive stormwater retrofit work we have planned here against the efforts of some other communities. Here are the types of information I would be interested in learning about their programs:

- Number of acres targeted for water quality retrofits;
- How long the retrofit program will need to run in order to achieve its goals;
- Annual budget for the retrofit program;
- Typical timeline from project identification to completion of construction for individual projects;
- How "urban" is the area being retrofit (maybe by % impervious (or hard) surfaces?);
- Typical cost per acre for treatment;
- Any programs, grants or credits that are specifically targeted to projects on private property;
- Any formal program for asset management or similar to track on-going operation and maintenance?

And here are a list of communities/organizations I would love to hear answers from (I've included links to relevant websites to help get you started in tracking down someone to talk to:

.

- Philadelphia (http://www.phillywatersheds.org/what_were_doing/documents_and_data/cso_long_term_control_plan)
- Washington, DC (http://www.sustainabledc.org/)
- Kansas City (http://ww5.rainkc.com/)
- Milwaukee (https://www.mmsd.com/what-we-do/green-infrastructure)
- Onondaga County/Syracuse, NY (http://savetherain.us/)

Thanks again, and please don't hesitate to reach out with any questions you might have.

Best,
Julie

Hi Sophia. Something has come up and I am wondering if it would be possible for us to connect at either 4pm

(somewhat preferable for me) or 2pm instead of 1.

Thanks!
Julie

Fantastic! Sophia, nice to meet you. I am in Chicago much of this week but wondered you'd have time for a quick phone chat. I have some time Wednesday at 8:30am and 1pm. I expect in 15-20 min I could give you a sense for what I am looking for help with.

Best,
Julie

Hello Secretary Moore,
Meet Sophia Duplin, one of our Governor's Office interns, who is looking forward to working with you on the Lake Champlain research project you wrote about today. Sophia, meet Secretary Moore of the Agency of Natural Resources. It would be great for the two of you two meet and discuss what's needed for this project and some more of the specifics, and Sophia will take that ball and run with it.
All my best,
Rachel
