

Dear Representative Durfee,

I wanted to express my support for Bill H-706 to ban/restrict the use of neonicotinoids in Vermont.

I want to feel confident that our wonderful Vermont government is supporting our farmers & our natural resources including all pollinators. As the mother of an organic farmer I understand the need for regenerative & sustainable practices to protect our resources for future generations. Studies have shown that this pesticide & seeds treated with this chemical has little effectiveness.

Please share my email with your committee.

Thank you,

Eugenie Delaney
