

Equipment Self-Repair

We know uptime is critically important to our customers. It's also important to John Deere and our dealers. From Do-It-Yourself tractor repairs to John Deere Connected Support™, we're committed to keeping our customers' machines up and running when they need them the most. We also know our customers want to repair their equipment in their own shop and on their own time. That's why repairability is designed into every tractor that we build.

Maintenance, diagnostic, and repair tools are made available to our customers through the following means:

Manuals (Operator, Parts, Service)

All technical and operator manuals can be purchased by customers online through the [Technical Information Store](#).

- [Manuals and Training](#)
- [John Deere Parts & Service](#)

Product & Quick Reference Guides

- [Quick Reference Guides](#)

Product Service Demonstrations, Training, Seminars or Clinics

- [Training and Safety Videos](#)
- [Simulators](#)

Fleet Management Information

- [John Deere Connected Support™](#)
- [JDLink™](#)

Other publications with information on service, parts, operation, and safety

- [Safety Information](#)
- [Operation Training](#)
- [Warranty & Protection Plans](#)

On-Board Diagnostics via diagnostics port or wireless interface

Machine issues are identified by a specific Diagnostic Trouble Code (DTC) that can be accessed through the machine display or dash. Some machines allow for the basic description of the DTC to be viewed.

- [Remote Display Access](#) (view of operator's display in cab)
- Mobile Apps (access through the John Deere App Center app, available in both [Android](#) and [iOS](#) app stores)
- Provide operating tips and basic troubleshooting information. Some apps also provide the ability to look up DTCs for more information.

Electronic Field Diagnostic Service Tools and training on how to use them

- [Customer Service ADVISOR™](#) Access to operator and technical manuals, look up diagnostic codes, machine diagnostic connectivity with Electronic Data Link (EDL) and perform machine calibrations.
- For access – visit [JohnDeereStore.com](#) or contact a customer's [local John Deere dealer](#) for purchase and support information.

Interested customers are encouraged to contact their local John Deere dealer for more information on those resources. All tools/resources outlined on this page are currently available to customers, independent repair personnel and end users – and will continue to be available in the future.

For more information on Deere's commitment to ownership and repair visit [Deere.com/repair](#).

Equipment Designed with Repairability in Mind

From the Beginning

Our design engineers keep user serviceability top-of-mind during product development, crafting the entire machine – including machines like the 8R tractor – easy to access so serviceability is easier for our customers.

Routine Maintenance Guides, Manuals, Safety and Training

Customers can get access to a digital database of Do-It-Yourself instructions – everything they might need to resolve an equipment issue independently.

- [Ag, Turf, and Engine Operator Manuals](#)
- [Training and Safety Videos](#)
- Training and Reference Guides
 - [Simulators](#)
 - [Online Training](#)
 - [Ag and Turf Quick Reference Guides](#)
 - [Educational Curriculum](#)

Access to Thousands of Parts

Access to thousands of replacement and maintenance parts for all makes and machines are accessible at any budget. Genuine, remanufactured, and alternative parts are [all available online](#).

[PARTS OnSite™](#) even provides an inventory of parts where customers need them most – in their own shops.

This program is available through participating John Deere dealers who partner with customers to develop a parts inventory strategy that makes the most sense for a customer's machines. There are several different storage options and financing is available through John Deere Financial.

Formalized Commitment with American Farm Bureau

In January 2023, John Deere and the American Farm Bureau Federation jointly signed a [Right to Repair Memorandum of Understanding \(MOU\)](#). The MOU formalizes John Deere's longstanding commitment to ensure customers' continued access to certain tools in order to diagnose, maintain, and repair their machines. John Deere looks forward to working alongside the AFBF and our customers in the months and years ahead to ensure they have the tools and resources they need to diagnose, maintain, and repair their equipment. This MOU serves as a living, breathing document and through ongoing conversations with the AFBF, John Deere is committed to ensuring customers have access to the tools and resources they need to diagnose, maintain, and make many repairs to their equipment. This agreement is years in the making and is the result of ongoing conversations between Deere and the American Farm Bureau Federation.

How We Support Our Customers

The Most Responsive Dealer Network in the Industry

Nobody cares more about keeping our customers' equipment up and running than John Deere dealers. With a complete inventory of genuine John Deere parts, highly trained service technicians and a thorough understanding of our customers' businesses, John Deere dealers are committed to keeping their equipment up and running. Plus, they're the most connected dealer network in the industry. Trained, knowledgeable technicians stand ready to support our customers when it matters most.

Customers can quickly and easily find their local dealer through our [Dealer Locator tool](#).

Our support to customers by the numbers:

- Over 1,800 agricultural and turf dealer locations
- Over 500 construction and forestry dealer locations
- Over 16,000 service technicians
- Over 9,000 parts employees
- Over 1,000,000 part numbers
- 9 distribution centers

Dealer Supported Remote Tools

Additionally, remote tools such as [Expert Alerts](#), [Service ADVISOR™ Remote](#), and [Remote Display Access](#) allow dealer technicians and farmers to identify and address issues before they impact operations.

Expert Alerts

[Expert Alerts](#) is a proactive monitoring system that notifies dealers (with a customer's permission) of potential machine issues. This allows technicians to diagnose issues remotely and fix them before they become a problem.

Service ADVISOR™ Remote

With [Service ADVISOR Remote](#), a customer's dealer can remotely analyze Diagnostic Trouble Codes (DTCs) in near real time to isolate potential issues with a customer's machine. Once received by a dealer, DTCs are analyzed to identify the potential cause and initiate a solution, which can include:

- Customer Contact
- Remote Diagnostics/Service
- Possible Service Visit

Customer Service ADVISOR™

Customer Service ADVISOR™ is a digital database of operator, diagnostic, and technical manuals for John Deere products. This subscription allows a customer to connect machines with an Electronic Data Link (EDL) to clear and refresh codes, take diagnostic readings, and perform limited calibrations. Customer Service ADVISOR is available for purchase through [JohnDeereStore.com](#) or through a customer's local [John Deere dealer](#). A customer can also request more information by filling out [this form](#).

For more information on Deere's commitment to ownership and repair visit [Deere.com/repair](#).

Self-Repair Supported through Mobile Apps

John Deere's App Center is a tool that organizes all John Deere mobile apps. It is available for download through both [Android](#) and [iOS](#) app stores and is **free for use**. Our mobile apps provide operating tips and basic troubleshooting information, with some even providing customers with the ability to look up Diagnostic Trouble Codes (DTCs). The mobile apps outlined below are most relevant to customers who would like to self-repair their equipment.

Operations Center Mobile – This app allows customers to view their machine and agronomic data and easily manage field operations and equipment remotely.

- Easily analyze all planting/seeding, Application, Harvest, and Tillage data across an organization
- Dashboard of area worked by operation type and field summary cards
- View agronomic information while in poor cell connectivity
- View machine location, hours, fuel levels and performance and efficiency measurements
- View machine security and health alerts including Diagnostic Trouble Codes (DTCs)
- View operator's in-cab display with Remote Display Access (RDA), a desktop and mobile application

EquipmentPlus - This app is intended to provide a quick reference overview of key adjustments, maintenance, and procedures.

- Optimizes a customer's machine through proper machine and monitor setup, as well as maintenance and infield procedures
- Provides setup information for Displays, Receivers, AutoTrac™ Universal
- Provides tools for connecting MTG 4G LTE to a wireless network, or configuring MTG 4G LTE to receive wireless connections
- Equipment Types: Air Seeders, Balers, Cotton Harvesters, Forage Harvesters, Planters, Sprayers, Sugarcane Harvesters and Tillage equipment

TractorPlus - This app provides information and tools which help customers maintain their equipment more effectively.

- Provides detailed upcoming maintenance recommendations with quick access instructions from Operator's Manual or links to relevant tutorial videos
- Provides updates on fluid capacities and parts information with options to easily purchase via an online shopping cart
- Tracks engine hours, records maintenance history, and quickly links to parts diagrams when a customer might need to identify a repair part
- For Compact Utility Tractor customers there is also a new option to record and visualize work and additional information using your phone's built-in GPS when looking up DTCs
- Equipment Types: select John Deere 1, 2, 3, and 4 family Compact Utility Tractors and 7R, 8R, 8RT, 8RX, 9R, 9RT, and 9RX model tractors (MY19 & MY20)

MowerPlus - The app helps customers determine the best time to mow, communicates expert pre-mow tips, offers maintenance reminders, and provides walk-through guides

- Equipment Types: supports residential lawn equipment such as 100 Series, S240, X300, X500, X700, Z200 through Z600, and many similarly-sized older products. It does not presently support tractor models numbered 1000 and larger, such as 1025R.
