Sec. C.112 PUBLIC SAFETY COMMUNICATIONS SYSTEM;
DISPATCH; INVENTORY; DESIGN

(a) The General Assembly finds that protecting public safety and welfare is an essential function of State government and it is in the public interest to establish a statewide reliable, secure, and interoperable public safety communications system, comprising integrated 911 call-taking and regional dispatch systems, and to ensure that the system is equitably and sustainably financed and universally accessible by all persons throughout the State.

(b) It is not the intent of the General Assembly to establish a public safety communications system that disrupts or in any way jeopardizes the exceptional dispatch services currently in place or the existing 911 system, but rather to support, enhance, strengthen and build upon those efforts and initiatives.

(c) The transition to a public safety communications system as specified in subsection (a) of this section shall be overseen and managed by the Enhanced 911 Board, in consultation with the Commissioner of Public Safety, the Secretary of Digital Services, the Commissioner of Public Service, and relevant State and local public safety and government stakeholders. In addition, the Board is authorized to retain a project manager and one or more additional consultants with relevant expertise in public safety

communications technology, design, and financing to assist with the requirements of this section.

(d) The establishment of a statewide public safety communications system shall occur in essentially three phases that include data collection and analysis, design, and implementation. Certain aspects of each phase may occur simultaneously as deemed appropriate by the Board.

(1) Data collection and analysis. On or before January 15, 2024, the Board shall conduct a complete inventory and assessment of all aspects of dispatch service currently provided in Vermont and, to the extent possible, dispatch service currently provided outside Vermont for response agencies located in Vermont, which shall include:

(A) an inventory of all existing dispatch infrastructure and equipment, including facilities, hardware, software, applications, and land mobile radio systems, referring to and incorporating any existing relevant data collected by a State or municipal entity;

(B) the number of full-time and part-time personnel currently performing dispatch service, taking into account personnel who have other responsibilities in addition to providing dispatch service;

(C) the current total spending on dispatch service in Vermont, taking into account all federal, State, and municipal appropriations and fees;

(D) in consultation with the Commissioner of Public Service and to the extent feasible, identification of the communications dead zones in the State, meaning those areas that lack the infrastructure to support public safety land-mobile-radio communications or cellular voice and data service, or both, and taking into consideration all cell towers that are part of the FirstNet statewide public safety radio access network; cellular mapping efforts conducted by the Department of Public Service; and any existing, relevant mapping data collected by a dispatch center or other entity;

(E) with the assistance of the Vermont League of Cities and Towns, a needs assessment to determine where and to what extent there are gaps in dispatch service or significant challenges to the delivery of dispatch service and to identify those municipalities that are likely to be most affected by either the curtailment of dispatch service from the two State-run public safety answering points or from a new financing mechanism for the continuation of such service;

(F) an assessment of the service provided by each dispatch center and identification of particular challenges or vulnerabilities, if any, including with regard to workforce, failover procedures, communications technology, costs, and governance; and

(G) collection and assessment of any other information the Board deems relevant.

(2) Design. On or before January 15, 2024, the Board shall develop findings and recommendations related to draft elements of a preliminary design for a public safety communications system, including identification of an implementation timeline and any additional data and resources needed to develop a final design on or before January 15, 2025. The final design shall include:

(A) technical and operational standards and protocols that ensure an interoperable and resilient system that incorporates computer-aided dispatch systems and land mobile radios;

(B) technology life cycle standards to ensure system and database upgrades are timely, sufficiently financed, and properly managed;

(C) system and database security and cybersecurity standards;

(D) continuity of operations standards and best practices that encompass failover procedures and other system redundancies to ensure the continuous performance of mission-critical operations;

(E) workforce training standards and other staffing best practices that support the retention and well-being of dispatch personnel;

(F) a resource allocation plan that ensures dispatch service is available in all regions of the State, including the establishment of new dispatch centers or expanded capacity and capability of existing dispatch centers, if deemed appropriate by the Board;

(G) a process for annually reviewing the budgets of dispatch centers;

(H) a recommended governance model to ensure effective State and regional oversight, management, and continuous improvement of the system, including identification of staffing or operational needs to support such oversight and management of the system by the Board or by another State agency, if deemed appropriate by the Board;

(I) cost estimates for implementing the system in Vermont, including operational and capital costs;

(J) an overview of sustainable and equitable financing mechanisms, taking into consideration:

(i) existing budgets for regional and local dispatch;

(ii) the population, grand list, and call volume of each municipality;

(iii) existing and potential State funding streams;

(iv) available federal funding opportunities for public safety agencies and emergency communications systems, including equipment, network infrastructure, and services;

(v) financing models adopted in other jurisdictions for public safety communications systems; and

(vi) any other standards or procedures deemed necessary or appropriate by the Board.

(e) On or before January 15, 2024, the Board shall submit the findings and recommendations required by subdivisions (d)(1) and (2) of this section in a written report to the Senate Committees on Government Operations and on Finance and the House Committees on Government Operations and Military Affairs, on Ways and Means, and on Environment and Energy.

Sec. E.514.2 VERMONT STATE TEACHERS' RETIREMENT SYSTEM;
CALENDAR YEAR 2023–2024 SUPPLEMENTAL COST OF
LIVING PAYMENTS; INTENT; ACTUARIAL COST
ANALYSIS

(a) Intent. It is the intent of the General Assembly that:

(1) The maximum percentage value methodology set forth in 16 V.S.A. § 1949 that applies to the postretirement adjustment allowances for the Vermont State Teachers' Retirement System (VSTRS) shall be actuarially evaluated to determine the cost required to revert to the methodology used prior to the enactment of 2016 Acts and Resolves No. 114.

(2) The General Assembly further intends to make such a reversion by future legislative action amending 16 V.S.A. § 1949, provided that the present value of changes to the postretirement adjustment allowance methodology be fully funded at the time the change is made and not increase the unfunded liability in VSTRS.

(3) The General Assembly further intends that if the June 30, 2023, change in the Consumer Price Index exceeds the statutory maximum percentage values set forth in 16 V.S.A. § 1949 (b)(1), the General Assembly will provide a sufficient appropriation in the 2024 Budget Adjustment Act to make a one-time supplemental payment, similar in form to that described in subsection (b) of this section, to qualifying VSTRS retired members and beneficiaries in calendar year 2024.

(b) Calendar year 2023 supplemental payment. (c) Actuarial cost analysis. Following the completion of the next experience study, expected in fall 2023, the State Treasurer shall conduct an actuarial analysis to evaluate the cost of changing the current methodology for calculating the postretirement adjustment allowance for the Vermont State Teachers' Retirement System to a methodology calculated by applying the maximum percentage values set forth in 16 V.S.A. § 1949(b)(1) to the postretirement adjustment allowance rather than applying the statutory maximum percentage values to the net percentage change in the Consumer Price Index. The actuarial analysis shall take into account any changes to actuarial assumptions that may occur following the experience study to be performed at the end of fiscal year 2023, as required by 16 V.S.A. § 1942.

(d) Report. Based on the actuarial cost analysis described in subsection (c) of this section, on or before January 15, 2024, the State Treasurer shall submit a report to the House and Senate Committees on Appropriations with an actuarial cost estimate for changing the VSTRS postretirement adjustment allowance methodology as set forth in subsection (c) of this section.
