

Here in Vermont, one of the top five most heavily taxed states, we are fast becoming a state controlled by the 1% , due to absurd policies and a significant and entwined “Old Boys Network”.

I ask that our legislators work diligently to rectify the path we are on, before more damage to Vermonters occurs.

It has come to my attention that Vermonters are getting abused by the entitlement systems which encourage, even advertise to bring in low / no income folks from out of state to live here in Vermont . Hard working, “Vermont Families”, cannot afford more taxation for these entitlements. We need legislation that includes residency requirements before qualifying for these extensive benefits.

At this point, the work force/ middle class Vermonters are being devastated by these policies.

Please work for a balanced and logical solution to these issues.

Where are the jobs coming from to support the influx ?

We will continue to remind our legislators of their duty to serve their constituents, not just themselves and their Old Friends.
