

Please vote yes on H.70

Please vote yes on H.70 to facilitate the arrival of wireless service to rural Vermont . The town of Worcester was adamantly opposed to the strong-arm, duplicitous tactics employed by the telecom company that proposed a tower in our town last year. H.70 works to discourage those tactics. Wireless installations imposed on rural communities without mandatory consideration of town input is an affront to the good citizens of small towns and the over-worked volunteer leaders who govern them.
