

Hello,

Please understand that the Town of Benson does Not have fiber internet. Our Internet is very, very poor. We currently have GONETSPEED as our only provider and it is worse than poor. The service is terrible, actually beyond terrible. We have explored some other options but the cost is prohibitive for us.

The Otter Creek Consortium Union is not available to us at this time. Hopefully within the next 2-3 years we will have some options for fiber cable.

Please, please be considerate of the towns that have such limited options.

Thank you for your consideration
