

Greetings Senators, Representative and the Senate Health & Welfare Committee.

I am ABSOLUTELY opposed to the proposition in this Bill to allow a minor 12 years old or older to consent to the medical care for the PREVENTION of a sexually transmitted infection. **This includes the vaccines known as Gardasil and Cervarix, and any subsequent vaccines.**

According to Merck's Gardasil 9 package insert, 3.3% of participants who were given Gardasil during the most recent clinical trials " experienced new medical conditions potentially indicative of autoimmune disorders."

This vaccine will cause serious adverse reactions in 3,300 girls per 100,000, and prevent only two fewer deaths if the vaccine is assumed to prevent 100 percent of cancer cases in vaccinated individuals.

This a vaccine that has never been proven to actually prevent even ONE case of cervical cancer.

And it's not just girls experiencing adverse reactions.

A boy named Joel Gomez, a 14 year old with no previous health issues, died in his sleep the night after the 2nd scheduled injection of Gardasil, of myocarditis.

Through a Freedom Of Information Act request, correspondence showed that the global health officials knew that HPV vaccines Gardasil and Cervarix cause a dangerous inflammatory response greater than other vaccines but nevertheless reassured the public that the HPV vaccines were safe.

Although not included in this bill I also oppose allowing minors to consent to ANY vaccines for ANY reason. With the overwhelming propaganda, media hype and peer pressure, there is no way for a minor to make an informed decision. **And with no liability on the part of the manufacturer....there is a very real reason to be skeptical of their "Safe and Effective" claims.**

We are learning just how dangerous vaccines are, and the extent that the pharmaceutical companies and government agencies will go to minimize these dangers.

If you have the time, thumb through a copy of, "Cause Unknown" The epidemic of sudden deaths in 2021 and 2022.

Thank you for taking the time to read this, and I hope you too will do more research into real vaccine safety.

I vote for Informed Consent, the Freedom to Choose, the Right to Refuse,
And parental rights,

Janet Weaver
