

# Cultural Facilities Grant Program Project samples from FY24....

## New England Youth Theater, Brattleboro

\$13,223 to support redecking the flooring in the main theater space.

[vermontartscouncil.org](http://vermontartscouncil.org)

New England Youth Theater

*This project is necessary to improve the safety and quality of NEYT's performance and education programming. Our new floor will mitigate tripping hazards while performing on stage or accessing seating. We know teaching, learning, and performing happen best with access to safe spaces and the appropriate tools. NEYT's theatre is the primary space where we work with groups of young people and host public audiences.*

## Town of Franklin

\$27,000 to support the replacement of an ADA accessible lift and heating system in the Haston Library

[vermontartscouncil.org](http://vermontartscouncil.org)

Haston Library, Franklin

*The proposed project will improve the ADA access to the facility. Without the lift system access to the library is difficult at best and some patrons are not able to attend cultural events and happenings at the library due to access. The heating system will allow those using the facility to be comfortable while attending events and programs during the winter months.*

## Paramount Center

\$30,000 to support the expansion of the stage counterweight system and installation of a new main curtain

[vermontartscouncil.org](http://vermontartscouncil.org)

Paramount Center, Rutland

*With support from this grant, we were able to increase our stage counterweight system by 35% and increased our ceiling height (by way of a new main curtain installation) by 30%. This investment will allow the organization to not only increase the variety of programming but to sustainably grow the quantity of such productions.*

## Greensboro Historical Society

\$1,665 to support  
the installation of  
light-protecting  
window shades.

[vermontartscouncil.org](http://vermontartscouncil.org)

Greensboro Historical Society

*Light protecting shades will make rotating displays more possible in the main exhibit space, creating a more suitable environment for exhibits that would feature more fragile archival materials and artifacts that currently are kept in our environmentally controlled storage. Community members and visitors may gain new insights and perspectives into their own family history and genealogy.*
