7	Sec. 3. 10 V.S.A. § 6093 is amended to read:
8	§ 6093. MITIGATION OF PRIMARY AGRICULTURAL SOILS
9	(a) Mitigation for loss of primary agricultural soils. Suitable mitigation for

11	6086(a)(9)(B)(iv) of this title shall depend on where the project tract is located.
12	(1) Project located in designated downtown, growth center, or
13	neighborhood development area. If the project tract is located in a designated
14	downtown development district, growth center, or neighborhood development
15	area designated under 24 V.S.A. chapter 76A, an applicant who complies with
16	subdivision 6086(a)(9)(B)(iv) of this title shall deposit an offsite mitigation fee
17	into the Vermont housing and conservation trust fund Housing and
18	Conservation Trust Fund established under section 312 of this title for the
19	purpose of preserving primary agricultural soils of equal or greater value with
20	the highest priority given to preserving prime agricultural soils as defined by

1	the U.S. Department of Agriculture. Any required offsite mitigation fee shall
2	be derived by:
3	(A) determining <u>Determining</u> the number of acres of primary
4	agricultural soils affected by the proposed development or subdivision;.
5	(B) multiplying Multiplying the number of affected acres of primary
6	agricultural soils by a factor resulting in a ratio established as follows:
7	(i) for For development or subdivision within a designated $\frac{1}{2}$
8	downtown development district, growth center, or neighborhood development
9	area, the ratio shall be 1:1;.
10	(ii) for For residential construction that has a density of at least
11	eight units of housing per acre, of which at least eight units per acre or at least
12	40 percent of the units, on average, in the entire development or subdivision,
13	whichever is greater, meets the definition of affordable housing established in
14	this chapter, no mitigation shall be required. However, all affordable housing
15	units shall be subject to housing subsidy covenants, as defined in 27 V.S.A.
16	§ 610, that preserve their affordability for a period of 99 years or longer. For
17	purposes of this section, housing that is rented shall be considered affordable
18	housing when its inhabitants have a gross annual household income that does
19	not exceed 60 percent of the county median income or 60 percent of the
20	standard metropolitan statistical area income if the municipality is located in
21	such an area.

Ν

1	(C) multiplying <u>Multiplying</u> the resulting product by a
2	"price-per-acre" value, which shall be based on the amount that the secretary
3	of agriculture, food and markets Secretary of Agriculture, Food and Markets
4	has determined to be the recent, per-acre cost to acquire conservation
5	easements for primary agricultural soils in the same geographic region as the
6	proposed development or subdivision.
7	(2) Project located outside designated <u>downtown</u> , growth center, or
8	neighborhood development area. If the project tract is not located in a
9	designated downtown, growth center, or neighborhood development area,
10	mitigation shall be provided on site in order to preserve primary agricultural
11	soils for present and future agricultural use, with special emphasis on
12	preserving prime agricultural soils. Preservation of primary agricultural soils
13	shall be accomplished through innovative land use design resulting in compact
14	development patterns which will maintain a sufficient acreage of primary
15	agricultural soils on the project tract capable of supporting or contributing to
16	an economic or commercial agricultural operation and shall be enforceable by
17	permit conditions issued by the district commission District Commission. The
18	number of acres of primary agricultural soils to be preserved shall be
19	derived by:
20	(A) determining the number of acres of primary agricultural soils
21	affected by the proposed development or subdivision; and

1	(B) multiplying the number of affected acres of primary agricultural
2	sons by a factor based on the quality of those primary agricultural soils, and
3	other factors as the secretary of agriculture, food and markets Secretary of
4	Agriculture, Food and Markets may deem relevant, including the soil's
5	location; accessibility; tract size; existing agricultural operations; water
6	sources; drainage; slope; the presence of ledge or protected wetlands; the
7	infrastructure of the existing farm or municipality in which the soils are
8	located; and the N.R.C.S. rating system for Vermont soils. This factor shall
9	result in a ratio of no less than 2:1, but no more than 3:1, protected acres to
10	acres of impacted primary agricultural soils.
11	(3) Mitigation flexibility.
12	(A) Notwithstanding the provisions of subdivision (1) of this
13	subsection pertaining to a development or subdivision on primary agricultural
14	soils within a designated downtown, growth center, or neighborhood
15	development area, the district commission District Commission may, in
16	appropriate circumstances, require onsite mitigation with special emphasis on
17	preserving prime agricultural soils if that action is deemed consistent with the
18	agricultural elements of local and regional plans and the goals of 24 V.S.A.
19	§ 4302. In this situation, the approved plans must designate specific soils that
20	shall be preserved inside designated downtowns, growth centers, and
21	neighborhood development areas. For projects located within a these

Λ

1	designated growth center areas, all factors used to calculate suitable mitigation-
2	acreage or fees, or some combination of these measures, shall be as specified
3	in this subsection, subject to a ratio of 1:1.
4	(R) Notwithstanding the provisions of subdivision (2) of this
5	subsection pertaining to a development or subdivision on primary agricultural
6	soils outside a designated <u>downtown</u> , growth center <u>, or neighborhood</u>
7	development area, the district commission District Commission may, in
8	appropriate circumstances approve off-site mitigation or some combination of
9	onsite and off-site mitigation if that action is deemed consistent with the
10	agricultural elements of local and regional plans and the goals of 24 V.S.A.
11	§ 4302. For projects located outside a these designated growth center areas, all
12	factors used to calculate suitable mitigation acreage or fees, or some
13	combination of these measures, shall be as specified in this subsection, subject
14	to a ratio of no less than 2:1, but no more than 3.1.

19	substantive standards that were applicable before the tribunal appealed from,
20	shall hold a de novo hearing on those issues which have been appealed, except
21	in the case of:

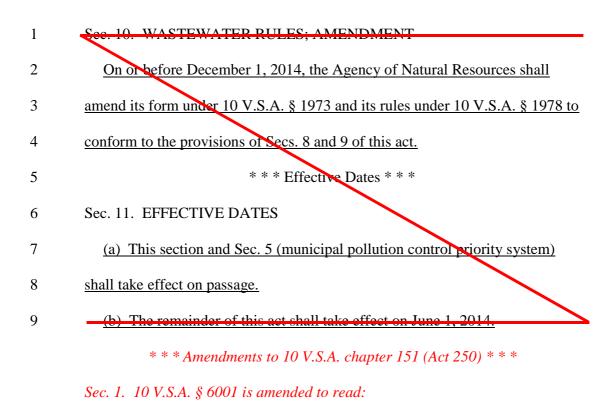

1	(1) a <u>A</u> decision being appealed on the record pursuant to 24 V.S.A.
2	chapter 117 <del>;</del>
3	(2) $\frac{1}{4}$ A decision of the Commissioner of Forests, Parks and Recreation
4	under section 2625 of this title being appealed on the record, in which case the
5	court shall affirm the decision, unless it finds that the Commissioner did not

(2) Project located outside <u>certain</u> designated growth center <u>areas</u>. If the project tract is not located in a designated growth center <u>area described in</u> <u>subdivision (a)(1) of this section</u>, mitigation shall be provided on site in order to preserve primary agricultural soils for present and future agricultural use, with special emphasis on preserving prime agricultural soils. Preservation of primary agricultural soils shall be accomplished through innovative land use design resulting in compact development patterns which will maintain a sufficient acreage of primary agricultural soils on the project tract capable of supporting or contributing to an economic or commercial agricultural operation and shall be enforceable by permit conditions issued by the district commission <u>District Commission</u>. The number of acres of primary agricultural soils to be preserved shall be derived by:

(A) *determining* <u>Determining</u> the number of acres of primary agricultural soils affected by the proposed development or subdivision; and.

(B) multiplying <u>Multiplying</u> the number of affected acres of primary agricultural soils by a factor based on the quality of those primary agricultural soils, and other factors as the <u>secretary of agriculture</u>, food and markets <u>Secretary of Agriculture</u>, Food and <u>Markets</u> may deem relevant, including the soil's location; accessibility; tract size; existing agricultural operations; water sources; drainage; slope; the presence of ledge or protected wetlands; the infrastructure of the existing farm or municipality in which the soils are located; and the N.R.C.S. rating system for Vermont soils. This factor shall result in a ratio of no less than 2:1, but no more than 3:1, protected acres to acres of impacted primary agricultural soils.

(3) Mitigation flexibility.

(A) Notwithstanding the provisions of subdivision (a)(1) of this subsection section pertaining to a development or subdivision on primary agricultural soils within a certain designated growth center areas, the district commission District Commission may, in appropriate circumstances, require

onsite mitigation with special emphasis on preserving prime agricultural soils if that action is deemed consistent with the agricultural elements of local and regional plans and the goals of 24 V.S.A. § 4302. In this situation, the approved plans must designate specific soils that shall be preserved inside growth centers a designated area described in subdivision (a)(1) of this section. For projects located within such a designated growth center area, all factors used to calculate suitable mitigation acreage or fees, or some combination of these measures, shall be as specified in this subsection, subject to a ratio of 1:1.

(B) Notwithstanding the provisions of subdivision (a)(2) of this subsection section pertaining to a development or subdivision on primary agricultural soils outside a designated growth center area described in subdivision (a)(1) of this section, the district commission District Commission may, in appropriate circumstances, approve off-site mitigation or some combination of onsite and off-site mitigation if that action is deemed consistent with the agricultural elements of local and regional plans and the goals of 24 V.S.A. § 4302. For projects located outside such a designated growth center area, all factors used to calculate suitable mitigation acreage or fees, or some combination of these measures, shall be as specified in this subsection (a), subject to a ratio of no less than 2:1, but no more than 3:1.
