House Committee on Transportation
Vermont State House
115 State Street
Montpelier, VT 05633

Dear Committee Members:

Thank you for the opportunity to weigh in on H.287, an act relating to ways used for vehicular travel. I am writing in support of this bill and hope that the Committee on Transportation will advance it during this year's session.

As Vermont's Academic Medical Center and only Level I Trauma Center, we care for the most severely injured. We are also focused on measures to improve public safety to avoid accidental trauma. Because of our experience and our role in public safety advocacy, I am fully supportive of H.287.

Thank you for discussing this important issue, and please let me know if there is anything I or my colleagues can do to assist you during your deliberation.

Sincerely,

John R. Brumsted, MD
Chief Executive Officer
