# The Treasury by the Number\$ 

Vermont State Treasurer's Office Presentation to the General Assembly November 2016

## Agenda

- Retirement Operations and Pension Obligations
- Capital Financing and Debt Management
- What's next?
- Legislative Initiatives

## Treasury Functions

- Unclaimed Property
- Retirement Operations
- Treasury Operations/Banking
- Investments/Pensions
- Debt Management/Bond Issuance

## Retirement Operations and Pension Obligations

## Retirement Customers

- Serves 51,211 active, retired, inactive, and vested members
- $\$ 299.5$ million in pension benefits paid in FY 2016
- $\$ 58.9$ million in healthcare premium payments made in FY2016

## Annual Required Contribution

- Method by which UAL is eventually paid off (assuming it is funded)
- Annual Required Contribution (ARC):
- A measure of needed plan funding
- The actuarially determined pension fund contribution in a single year
- The ARC has two parts:

1. The Normal Cost

- The normal cost generally represents the portion of the cost of projected benefits allocated to the current plan year
- The employer normal cost equals the total normal cost of the plan reduced by employee contributions

2. Amortization, which is the annual amount needed to eliminate the unfunded liability over the plan's amortization period

## Upward Budget Pressures on Funding of the ARC

- Historical
- Great Recession Impact
- Lack of Funding of the ARC in past years, especially the teachers' system
- Demographic/Experience and Economic Assumptions vs. Actual
- Experience Study
- Interest Rate Assumption
- Mortality
- Other
- Retirement Incentive
- Teacher Retirements/Education Workforce Changes

## FY 2016 VSERS Valuation Results

- Incorporates an FY 2018 ARC recommendation of $\mathbf{\$ 5 2 , 0 6 5 , 3 9 7}$
- Normal
\$14,037,814
- Accrued Liability Amortization
\$38,027,583
- Increase from prior year of $\mathbf{\$ 3 . 6}$ million
- Normal Cost: 2.88\% of projected payroll
- Recent experience study incorporated upward pressures due to the changes in interest rate and new mortality assumptions.

## FY 2016 VSTRS Valuation Results

- Incorporates an FY 2018 ARC recommendation of $\$ \mathbf{8 8}, \mathbf{4 0 9}$,437
- Normal
\$8,346,261
- Accrued Liability Amortization
\$80,063,176
- Increase from prior year of $\mathbf{\$ 5 . 7}$ million
- Normal Cost: $1.33 \%$ of projected payroll
- Recent experience study incorporated upward pressures due to the changes in interest rate and new mortality assumptions
- Increasing amortization payments have greater impact on VSTRS
- Increase in retirements, local workforce changes
- Overall, the number of active teachers continues to decline

## Funding History

## History of Disciplined Incremental Steps to Reduce Pension and Retiree Health Care Costs To Taxpayer

- 2005 Teacher Study made changes to the state's actuarial methods and put full funding of ARC on track. Legislature has consistently adopted a budget with full funding of the ARC since 2007.
- 2008 Committee restructured state system (VSERS)Group F benefits, lengthening age of retirement, effective in FY 2009, in concert with health care changes.
- 2009 Pension and Health Care Study completed providing basis for negotiated savings over the next few years for both state (VSERS) and teachers (VSTRS) system.
- 2010 VSTRS: Lengthen age for normal retirement, contribution increases, and other changes, effective in FY2011, resulting in $\$ 15$ million in annual pension savings to taxpayer. In addition to pension costs, additional health care savings accrued.
- 2011 VSERS: Employee contribution rate increases beginning FY2012, \$5 million in savings per year.
- 2011-2012 VSTRS: Secured one-time revenues in excess of $\mathbf{\$ 5}$ million for VSERS and VSTRS under the Federal Early Retirement Reinsurance Program.
- 2012- 2015: Incremental increases in employee and employer contributions to municipal system, demonstrating shared responsibility by all parties. Put the municipal system on a stronger financial track.
- 2014 VSTRS: additional contribution increases for new and non-vested members, effective FY 2015, \$1 million initial annual savings, increasing each year.
- 2014: VSTRS: Statute change permitting the charging of pension costs to federal grants, effective FY 2016, estimated \$3 to \$4 million savings per year.

## History of Disciplined Incremental Steps to Reduce Pension and Retiree Health Care Costs To Taxpayer (cont.)

- 2015: Created Retired Teachers' health and Medical Benefits Fund starting FY2015
- Since the 1980s, health care premiums for teachers paid out of a sub-trust of teachers pension fund; by 2014 costing over $\$ 20$ million per year in interest costs to taxpayer
- Collaborative solution: Successfully convened over a dozen stakeholders, including employee group, to address the problem including combined pension/health care changes. In addition to pension and health care changes previously stated, a new health care assessment for LEAs, linking local employment decisions to the benefit costs.
- Projected to save taxpayers $\mathbf{\$ 4 8 0}$ million in unfunded liability interest costs through FY2038.
- 2016: Changes to the amortization financing schedule for the State and Teacher systems. Will result in saving the taxpayer \$165 million in interest from present to 2038 . See next page for explanation.
- 2016: Increased employee contributions will result in $\$ 1.2$ million in annual savings, with savings growing larger in future years.

At the same time creating additional Transparency and Accountability

- 2013: Pension forfeiture statute, applicable to all three systems (state, teacher and municipal).
- 2015: VSERS Disability retirement reform permitting wage verification of disability pensioners.

## Collaborative Approach Key to Success

- All benefit changes made though collaborative efforts involving Administration, Treasurer's Office, General Assembly and Employee Groups.
- No court litigation/disruptions in planned implementations.

## 2016 Amortization Change Explained

- While the State has a date set in statute, 2038, to pay down the unfunded liability, the payment schedule was established with increases in $5 \%$ increments each year
- This has the effect of increasing interest costs associated with the payment of these liabilities
- Leveling out the payment schedule would:
- increase ARC payments in the short-term but have the effect of saving the taxpayers millions of dollars over the long-term
- more rapid reduction of the unfunded liability
- Changes to amortization schedule phased-in to cushion budgetary impact
- Adopted by the Legislature in 2016
- Treasurer's Office proposed and the Legislature adopted phasing in a payment schedule with increases at $3 \%$ increments each year, closer to the projected long-term rate of inflation. Interest savings through 2038 estimated at $\$ 165$ million.

## Capital Financing and Debt Management

## History of Vermont's Debt Policies

- In the early 1970s, Vermont lost its Triple-A bond rating, largely because of a significant accumulation of bonded indebtedness. There were three principal causes for the increase in outstanding debt... interstate highway construction, extensive school construction and renovation, and sewage treatment plant construction.
- In 1975, Vermont enacted in statute the so-called " 90 percent rule" as a policy device to reduce its large amount of accumulated tax supported debt.
- New general obligation debt authorization was restricted to 90 percent of the debt being retired in the same fiscal year.
- The ratio of debt as a percent of personal income, a key benchmark for rating analysts, was reduced from about $11 \%$ in the mid-1970s to about 3\% in 1989.
- The 90 percent rule policy was not sustainable and policymakers recognized it would eventually lead to unrealistically small amounts of allowable new debt.
- In 1990 the "90 percent rule" was repealed and the Capital Debt Affordability Advisory Committee was created to provide a new framework for determining the appropriate level of new debt issuance for the State.
- CDAAC Progress: In 1996, Vermont's debt as percentage of personal income was twice the national median and we ranked $9^{\text {th }}$ highest in the country. In 2012, the State is under the national median for that ratio and ranked $36^{\text {th }}$ highest in the country; Vermont's debt per capita ranked $34^{\text {th }}$ highest in the country.
- Debt guidelines strengthened in 2004. State now benchmarks against triple-A rated states.
- In February of 2007, Vermont rejoined the ranks of Triple-A rated states when Moody's raised its rating for the State from Aa1 to Aaa; in April 2010, Fitch "recalibrated" Vermont's rating from AA+ to AAA; and in September 2012 S\&P improved its outlook on Vermont's AA+ rating from stable to positive although returned it to stable in November 2012.

## Overall Debt Strategy....

- State has substantially reduced outstanding debt since 1990 s, $\underline{\text { but }}$
- Need to manage recent trend vs. recent national trend of reductions in bond issuance
- Uncomplicated debt profile, almost entirely general obligation debt
- Transportation Infrastructure Bonds
- $100 \%$ fixed rate
- Level principal produces rapid amortization (reducing debt by quick installment payments)
- Capital Appropriation Changes adopted by the General Assembly have improved the process:
- Two year recommendations
- Use of bond premium
- Review and use of residual dollars from prior capital projects

## Capital Debt Affordability Advisory Committee

- The CDAAC was created by State statute in 1989
- Annually reviews affordability of Vermont's net tax-supported debt
- Recommends annual debt issuance to Governor and General Assembly
- Recommendation is advisory; in practice, Governor and General Assembly have always adopted
- Reviews amount and condition of bonds, notes and other obligations the State has a contingent liability or moral obligation

# Vermont's Credit Ratings History (Highest Credit Ratings in the Northeast) 

| MOODY'S INVESTORS SERVICE |  |
| :--- | :--- |
| RATING ACTION | DATE |
| Aaa | 1971 |
| Aa | $9 / 20 / 72$ |
| $\mathrm{Aa} 2^{*}$ | $10 / 20 / 97$ |
| Aa 1 | $9 / 29 / 99$ |
| AAA | $2 / 05 / 07$ |

* In 1997, Moody's began refining ratings with numerical modifiers. The shift to the "Aa2" rating was part of this process.

## FITCH RATINGS

| RATING ACTION | DATE |
| :--- | :--- |
| AA | $8 / 18 / 92$ |
| AA+ | $10 / 25 / 99$ |
| AAA $^{*}$ | $4 / 5 / 10$ |

* Resulted from Fitch's "recalibration" of public sector credit ratings.

STANDARD \& POOR'S

| RATING ACTION | DATE |
| :--- | :--- |
| AAA | $10 / 2 / 63$ |
| Rating withdrawn | $3 / 23 / 71$ |
| AA | $2 / 28 / 73$ |
| Rating withdrawn | $10 / 16 / 73$ |
| AA | $4 / 25 / 86$ |
| AA- | $6 / 10 / 91$ |
| AA | $10 / 14 / 98$ |
| AA+ | $9 / 11 / 00$ |
| AA+ | $9 / 18 / 12$ |

## Credit Rating Priorities for Legislature

- Pension Funding: Continue $100 \%$ funding of the annual required contributions ("ARCs") of the Vermont State Employees' and State Teachers' Retirement Systems pension funds
- Reserves: Continue to maintain the 5\% budget stabilization reserves, and build the newly-created General Fund Balance Reserve (or "rainy day reserve") to a target level of $3 \%$ of the general fund incrementally and over time
- Debt Recommendation: Continue unbroken record of adopting the Capital Debt Affordability Advisory Committee's (CDAAC) biennium recommendation of $\$ 132.5$ million net tax-supported debt
- Teachers' Healthcare: Continue to fund retired state teachers' healthcare costs from the annual budget, not from pension funds

## CDAAC Recommendation

- This is the first year of the 2018-2019 biennium and the Committee recommended a 2-year debt authorization of $\$ 132,460,000$
- This represents a reduction of $8.01 \%$ from the previous recommendation of $\$ 144,000,000$
