(1) Procedure. At the request of the court, the Department of Corrections, the prosecutor, or the defendant, the status of a defendant who is detained pretrial in a correctional facility for inability to pay bail after bail has been set by the court may be reviewed by the court to determine whether the defendant is appropriate for home detention. The review shall be scheduled upon the court's receipt of a report from the Department determining that the proposed residence is suitable for the use of electronic monitoring. A defendant held without bail pursuant to section 7553 or 7553a of this title shall not be eligible for release to the Home Detention Program on or after June 1, 2018. At arraignment or after a hearing, the court may order that the

defendant be released to the Home Detention Program, provided that the court finds placing the defendant on home detention will reasonably ~~assure his or her appearance in court when required~~ mitigate the defendant's risk of flight and the proposed residence is appropriate for home detention. In making such a determination, the court shall consider:

~~(1)~~(A) the nature of the offense with which the defendant is charged;

~~(2)~~(B) the defendant's prior convictions, history of violence, medical and mental health needs, history of supervision, and risk of flight; and

~~(3)~~(C) any risk or undue burden to other persons who reside at the proposed residence or risk to third parties or to public safety that may result from such placement.

~~(e)~~(2) Failure to comply. The Department of Corrections may revoke a defendant's home detention status for an unauthorized absence or failure to comply with any other condition of the Program and shall return the defendant to a correctional facility.

(d) Defendants who violate conditions of release.

(1) Procedure. At the request of the court, the prosecutor, or the defendant, the status of a defendant who has allegedly violated conditions of release may be reviewed by the court to determine whether the defendant is appropriate for home detention. The review shall be scheduled upon the court's receipt of a report from the Department determining that the proposed residence is suitable for the use of electronic monitoring. A defendant held without bail pursuant to section 7553 or 7553a of this title shall not be eligible for release to the Home Detention Program on or after June 1, 2024. At arraignment or after a hearing, the court may order that the defendant be released to the Home Detention Program upon the court's finding that the defendant poses a significant risk to public safety, placing the defendant on home detention will reasonably mitigate such risk, and the proposed residence is appropriate for home detention. In making such a determination, the court shall consider the factors listed in subdivisions (c)(1)(A)–(C) of this section.

(2) Failure to comply. The Department of Corrections may report a defendant's unauthorized absence or failure to comply with any other condition of the Program to the prosecutor and the defendant, provided that a defendant's failure to comply with any condition of the Program for a reason other than fault on the part of the defendant shall not be reportable. To address a reported violation, the prosecutor may request:

(A) a review of conditions pursuant to section 7554 of this title;

(B) a prosecution for contempt pursuant to section 7559 of this title;
or

(C) a bail revocation hearing pursuant to section 7575 of this title.

Rep. Bartley of Fairfax explained her vote as follows:

“Madam Speaker:

Today I vote in support for our agricultural laborers and our farms. This body needs an understanding of how we can provide and establish fair labor laws for all Vermonters so that all can experience prosperity.”

Rep. Branagan of Georgia explained her vote as follows:

“Madam Speaker:

I vote yes on S.102 in order to move along the section in the bill which allows a study of unionized agriculture workers.”

Rep. Dodge of Essex explained her vote as follows:

“Madam Speaker:

I rise in support of the labor protections in this bill and beseech our legislature to extend these same protections to the thousands of agricultural workers in Vermont. Our state owes its identity to the family farms dotting our landscape. For hundreds of years, the backbone of that landscape has been the labor of indigenous Vermonters, immigrants from Europe and Quebec, and most recently, immigrants from Latin America. Our dairy sector, in particular,

depends on immigrants who work 365 days a year, through night shifts, and under dangerous conditions. While many farms practice fair labor practices, there are still countless cases of exploitation, sexual harassment, and racism. Like the broken federal immigration system, the federal prohibition barring agricultural workers to organize exacerbates this dynamic. Our state must keep stepping up to empower agricultural workers, just as S.102 has done for other workers.”

Rep. Donahue of Northfield explained her vote as follows:

“Madam Speaker:

Intimidation for joining or not joining a union should never be permitted. Denying workers the right to a secret ballot, as this bill does, creates that risk. I vote no.”

Rep. Logan of Burlington explained her vote as follows:

“Madam Speaker:

I vote yes on S.102 to correct a long-standing stain of discrimination within our labor law, to put us on a path to resolve another, and to make collective bargaining more accessible to Vermonters who currently fear retaliation.”

Rep. Harrison of Chittenden explained his vote as follows:

“Madam Speaker:

Sec. 7. 2020 Acts and Resolves No. 151, Sec. 1, as amended by 2023 Acts and Resolves No. 44, Sec. 1, is further amended to read:

Sec. 1. ALLOWANCE OF THE USE OF ENERGY EFFICIENCY

CHARGE FUNDS FOR GREENHOUSE GAS EMISSIONS

REDUCTION PROGRAMS

(a) The electric resource acquisition budget for an entity appointed to provide electric energy efficiency and conservation programs and measures pursuant to 30 V.S.A. § 209(d)(2)(A) for the calendar years 2021–2026 shall be determined pursuant to 30 V.S.A. § 209(d)(3)(B). This section shall apply only if the entity's total electric resource acquisition budget for 2024–2026 does not exceed the entity's total electric resource acquisition budget for 2021–2023, adjusted for cumulative inflation between January 1, 2021, and July 1, 2023, using the national consumer price index. An entity may include proposals for activities allowed under this pilot in its 2027–2029 demand resource plan filing, but these activities shall only be implemented if this section is extended to cover that ~~timeframe~~ time frame.

(b) Notwithstanding any provision of law or order of the Public Utility Commission (PUC) to the contrary, ~~the PUC shall authorize an entity pursuant to subsection (a) of this section to appointed under 30 V.S.A. § 209(d)(2)(A) may spend a portion of its electric resource acquisition budget, in an amount to be determined by the PUC but not to exceed \$2,000,000.00 per year, on programs, measures, and services that reduce greenhouse gas emissions in the thermal energy or transportation sectors. An entity appointed under 30 V.S.A. § 209(d)(2)(A) that has a three-year electric resource acquisition budget of less than \$8,000,000.00 may spend up to \$800,000.00 of its resource acquisition budget, and any additional amounts the entity has available to it through annually-budgeted thermal energy and process fuel funds and carry-forward thermal energy and process fuel funds from prior periods, on programs, measures, and services that reduce greenhouse gas emissions in the thermal energy or transportation sector. Programs measures, and services authorized pursuant to subsection (a) of this section shall~~ An entity spending a portion of its electric resource acquisition budget as outlined in this section shall submit notice of the amount of the annual electric resource acquisition budget to be spent pursuant to this subsection to the PUC, the Department of Public Service, the electric distribution utilities, and the Vermont Public Power Supply Authority with a sworn statement attesting that the programs, measures, or services comply with the following criteria:

(1) Reduce greenhouse gas emissions in the thermal energy or transportation sectors, or both.

(2) Have a nexus with electricity usage.

(3) Be additive and complementary to and shall not replace or be in competition with electric utility energy transformation projects pursuant to 30 V.S.A. § 8005(a)(3) and existing thermal efficiency programs operated by an entity appointed under 30 V.S.A. § 209(d)(2)(A) such that they result in the largest possible greenhouse gas emissions reductions in a cost-effective manner.

(4) Be proposed after the entity consults with any relevant State agency or department and shall not be duplicative or in competition with programs delivered by that agency or department.

(5) Be delivered on a statewide basis. However, this shall not preclude the delivery of services specific to a retail electricity provider. Should such services be offered, all distribution utilities and Vermont Public Power Supply Authority shall be provided the opportunity to participate, and those services shall be designed and coordinated in partnership with each of them. For programs and services that are not offered on a statewide basis, the proportion of utility-specific program funds used for services to any distribution utility

shall be ~~no~~ not less than the proportionate share of the energy efficiency charge, which in the case of Vermont Public Power Supply Authority, is the amount collected across their combined member utility territories during the period this section remains in effect.

(c) An entity that ~~is approved to provide~~ provides a program, measure, or service pursuant to this section shall provide the program, measure, or service in cooperation with a retail electricity provider.

(1) The entity shall not claim any savings and reductions in fossil fuel consumption and in greenhouse gas emissions by the customers of the retail electricity provider resulting from the program, measure, or service if the provider elects to offer the program, measure, or service pursuant to 30 V.S.A. § 8005(a)(3) unless the entity and provider agree upon how savings and reductions should be accounted for, apportioned, and claimed.

(2) ~~The PUC shall develop standards and methods to appropriately measure the effectiveness of the programs, measures, and services in relation to the entity's Demand Resources Plan proceeding.~~

(d) Any funds spent on programs, measures, and services pursuant to this section shall not be counted towards the calculation of funds used by a retail electricity provider for energy transformation projects pursuant to 30 V.S.A. § 8005(a)(3) and the calculation of project costs pursuant to 30 V.S.A. § 8005(a)(3)(C)(iv).

(e) ~~On or before April 30, 2021 and every April 30 for six years thereafter, the PUC shall submit a written report to the House Committee on Environment and Energy and the Senate Committees on Natural Resources and Energy and on Finance concerning any programs, measures, and services approved pursuant to this section.~~

(f) Thermal energy and process fuel efficiency funding. Notwithstanding 30 V.S.A. § 209(e), a retail electricity provider that is also an entity appointed under 30 V.S.A. § 209(d)(2)(A), may during the years of 2024–2026, use monies subject to 30 V.S.A. § 209(e) to deliver thermal and transportation measures or programs that reduce fossil fuel use regardless of the preexisting fuel source of the customer, including measures or programs permissible under this pilot program, with special emphasis on measures or programs that take a new or innovative approach to reducing fossil fuel use, including modifying or supplementing existing vehicle incentive programs and electric vehicle supply equipment grant programs to incentivize high-consumption fuel users, especially individuals using more than 1000 gallons of gasoline or diesel annually and those with low and moderate income, to transition to the use of battery electric vehicles.

(1) There shall be a ~~registration~~ fee of \$100.00 for each electric generation facility less than or equal to 50 kW in plant capacity, or for a rooftop project, or for a hydroelectric project filing a net metering registration, or for an application filed under subsection 248(n) of this title, or for an energy storage facility less than or equal to 1 MW in nameplate capacity that is required to obtain a certificate of public good under section 248 of this title and is proposed to be located inside an existing building and that would not require any ground disturbance work or upgrades to the distribution system.

(2) There shall be a fee of \$25.00 for modifications for each electric generation facility less than or equal to 50 kW in plant capacity, or for a rooftop project, or for a hydroelectric project filing a net metering registration, or for an application filed under subsection 248(n) of this title, or for an energy storage facility less than or equal to 1 MW in nameplate capacity that is required to obtain a certificate of public good under section 248 of this title and is proposed to be located inside an existing building and that would not require any ground disturbance work or upgrades to the distribution system.

(3) There shall be a fee for electric generation facilities and energy storage facilities that are required to obtain a certificate of public good under section 248 of this title and that do not qualify for the lower fees in subdivisions (1) and (2) of this subsection, calculated as follows:

Sec. 14. 30 V.S.A. § 209 is amended to read:

§ 209. JURISDICTION; GENERAL SCOPE

* * *

(d) Energy efficiency.

* * *

(3) Energy efficiency charge; regulated fuels. In addition to its existing authority, the Commission may establish by order or rule a volumetric charge to customers for the support of energy efficiency programs that meet the requirements of section 218c of this title, with due consideration to the State's energy policy under section 202a of this title and to its energy and economic policy interests under section 218e of this title to maintain and enhance the State's economic vitality. The charge shall be known as the energy efficiency charge, shall be shown separately on each customer's bill, and shall be paid to a fund administrator appointed by the Commission and deposited into the Electric Efficiency Fund. When such a charge is shown, notice as to how to obtain information about energy efficiency programs approved under this section shall be provided in a manner directed by the Commission. This notice shall include, at a minimum, a toll-free telephone number, and to the extent feasible shall be on the customer's bill and near the energy efficiency charge.

* * *

(B) The charge established by the Commission pursuant to this subdivision (3) shall be in an amount determined by the Commission by rule or order that is consistent with the principles of least-cost integrated planning as defined in section 218c of this title. As circumstances and programs evolve, the amount of the charge shall be reviewed for unrealized energy efficiency potential and shall be adjusted as necessary in order to realize all reasonably available, cost-effective energy efficiency savings. In setting the amount of the charge and its allocation, the Commission shall determine an appropriate balance among the following objectives; provided, however, that particular

emphasis shall be accorded to the first four of these objectives: reducing the size of future power purchases; reducing the generation of greenhouse gases; limiting the need to upgrade the State's transmission and distribution infrastructure; minimizing the costs of electricity; reducing Vermont's total energy demand, consumption, and expenditures; providing efficiency and conservation as a part of a comprehensive resource supply strategy; providing the opportunity for all Vermonters to participate in efficiency and conservation programs; and targeting efficiency and conservation efforts to locations, markets, or customers where they may provide the greatest value.

(C) The Commission, by rule or order, shall establish a process by which a customer who pays an average annual energy efficiency charge under this subdivision (3) of at least \$5,000.00 may apply to the Commission to self-administer energy efficiency through the use of an energy savings account or customer credit programs which that shall contain a percentage of the customer's energy efficiency charge payments as determined by the Commission. The remaining portion of the charge shall be used for administrative, measurement, verification, and evaluation costs and for systemwide energy benefits. Customer energy efficiency funds may be approved for use by the Commission for one or more of the following: electric energy efficiency projects and non-electric efficiency projects, which may include thermal and process fuel efficiency, flexible load management, combined heat and power systems, demand management, energy productivity, and energy storage. These funds shall not be used for the purchase or installation of new equipment capable of combusting fossil fuels. The Commission in its rules or order shall establish criteria for each program and approval of these applications, establish application and enrollment periods, establish participant requirements, and establish the methodology for evaluation, measurement, and verification for programs. The total amount of customer energy efficiency funds that can be placed into energy savings accounts or the customer credit program annually is \$2,000,000.00 and \$1,000,000.00 respectively.

~~(C)~~(D) The Commission may authorize the use of funds raised through an energy efficiency charge on electric ratepayers to reduce the use of fossil fuels for space heating by supporting electric technologies that may increase electric consumption, such as air source or geothermal heat pumps if, after investigation, it finds that deployment of the technology:

* * * Thermal Energy * * *

Sec. 15. 30 V.S.A. § 201 is amended to read:

§ 201. DEFINITIONS

As used in this chapter:

* * *

(7) “Thermal energy” means piped noncombustible fluids used for transferring heat into and out of buildings for the purpose of avoiding, eliminating, reducing any existing or new on-site greenhouse gas emissions of all types of heating and cooling processes, including comfort heating and cooling, domestic hot water, and refrigeration.

(8) “Thermal energy network” means all real estate, fixtures, and personal property operated, owned, used, or to be used for or in connection with or to facilitate distribution infrastructure project that supplies thermal energy to more than one household, dwelling unit, or network of buildings that are not commonly owned. This definition does not include a mutual benefit enterprise, cooperative or common interest community that is owned by the persons it serves and that provides thermal energy services only to its members, a landlord providing thermal energy services only to its tenants where the service is included in the lease agreement, or any entity that provides thermal energy services only to itself.

Sec. 16. 30 V.S.A. § 231 is amended to read:

§ 231. CERTIFICATE OF PUBLIC GOOD; ABANDONMENT OF SERVICE; HEARING

* * *

(d) Notwithstanding any other State law to the contrary, a municipality shall have the authority to construct, operate, set rates for, finance, and use eminent domain for a thermal energy network utility without a certificate of public good or approval by the Commission. Nothing in this section shall alter the requirements of 10 V.S.A. § 151, including for district energy projects such as those described in subdivision 209 (e)(1) of this title.

Sec. 17 THERMAL ENERGY NETWORK DEVELOPMENT STUDY

(a) On or before December 1, 2025, the Public Utility Commission shall issue a report to the House Committee on Environment and Energy and the Senate Committee on Natural Resources and Energy on how to support the development of thermal energy networks and the permitting of thermal energy network providers. The report shall address all aspects of the permitting,

construction, operation, and rates of thermal energy networks and recommend necessary statutory changes.

(b) Nothing in this section shall be construed to prohibit persons or companies already regulated by the Commission under 30 V.S.A. chapter 5 from pursuing thermal energy network projects prior to completion of this study.

§ 8009. BASELOAD RENEWABLE POWER PORTFOLIO
REQUIREMENT

* * *

(d) On or before November 1, ~~2026~~ 2027, the Commission shall determine, for the period beginning on November 1, ~~2026~~ 2027 and ending on November 1, 2032, the price to be paid to a plant used to satisfy the baseload renewable power portfolio requirement. The Commission shall not be required to make this determination as a contested case under 3 V.S.A. chapter 25. The price shall be the avoided cost of the Vermont composite electric utility system. As used in this subsection, the term “avoided cost” means the incremental cost to retail electricity providers of electric energy or capacity, or both, which, but for the purchase from the plant proposed to satisfy the baseload renewable power portfolio requirement, such providers would obtain from a source using the same generation technology as the proposed plant. * * * Energy Cost Stabilization Study * * *

Sec. 21. ENERGY COST STABILIZATION STUDY

(a) The General Assembly finds:

(1) Energy generation and consumption is in a state of transition, shifting towards beneficial, strategic electrification using efficiency, renewables, storage, and flexible demand management.

(2) There is an increasing understanding of energy burden that is measured in terms of the percentage of household income that is spent on energy costs.

(3) Total energy costs are a result of multiple expenditures such as electricity costs, transportation costs, and building heating and cooling costs.

(4) As energy consumption shifts from fossil fuels to electricity, electricity costs may increase but total energy costs (including transportation and building heating and cooling costs) are expected to decrease.

(5) There are various income-sensitive programs available to Vermont households that assist with energy costs.

(b) The Public Utility Commission shall study current and potential future programs and initiatives focused on reducing or stabilizing energy costs for low- or moderate-income households and shall make a determination as to whether a statewide program to reduce energy burden is needed in Vermont. In conducting its analysis, the Commission shall take into consideration a comprehensive approach that recognizes electric costs might rise but that total energy costs are expected to decrease because of increased electrification, efficiency, storage, and demand response activities. The Commission shall submit a written report of its findings and recommendations to the General Assembly on or before December 1, 2025.

(c) In conducting the study required by this section, the Commission shall seek input from interested stakeholders, including the Department of Public Service, the Agency of Human Services, the Agency of Transportation, the efficiency utilities, electric distribution utilities, residential customers, low-income program representatives, consumer-assistance program representatives, statewide environmental organizations, environmental justice entities, at least one low-income cost reduction program participant, at least one moderate-income cost reduction program participant, and any other stakeholders identified by the Commission.

(d)(1) As part of its study, the Commission shall assess current programs within and outside Vermont designed to directly reduce or stabilize energy expenditures for low- or moderate-income households and shall seek to identify successful design elements of each. In particular, the Commission shall assess:

(A) Vermont low-income electric energy cost reduction programs;

(B) statewide energy cost reduction programs currently available outside Vermont; and

(C) Vermont programs available to low- and moderate-income households that are designed to reduce transportation, thermal, or electric energy costs, including through investments in efficiency or electrification measures.

(2) In assessing existing programs, the Commission shall take into consideration and develop findings regarding each program's:

(A) funding model and funding source;

(B) eligibility requirements;

(C) process for making and monitoring eligibility determinations;

(D) administrative structure;

(E) efficacy in terms of eligibility, customer participation, funding, program offerings, and coordination with other programs, and where there might be opportunities for program improvement, particularly regarding administrative savings and efficiencies and universality of access; and

(F) ability to assist the State with achieving its greenhouse gas reduction requirements in a manner that is consistent with State policy on environmental justice.

(e) The report required by this section shall include the following:

(1) Recommendations as to how existing programs may better coordinate to ensure low- and moderate-income Vermonters are reducing their total energy consumption and costs.

(2) If applicable, identification of obstacles and recommended solutions for increasing coordination across electric, thermal, and transportation energy cost reduction programs, including through the sharing of best practices and program design and implementation successes.

(3) A recommendation as to whether existing programs should continue to operate and align with a new statewide program or, instead, transition eligible customers to a statewide program and otherwise cease operations.

(4) A recommendation regarding the most appropriate financing mechanism for a statewide energy cost stabilization program if such a program is recommended and, in addition, recommendations regarding:

(A) eligibility requirements, which may be based on income, participation in other public assistance programs, or other potential approach;

(B) a process for making and monitoring eligibility determinations;
and

(C) any other matters deemed appropriate by the Commission.
