

ANR ARPA: State Parks 3-Acre

Updated January 10, 2024

Program – These funds are being used to implement required water quality practices to reduce stormwater runoff from impervious surfaces. Specifically, the funds will be used at eight state parks to implement the required measures in order to comply with this law.

Funding –

How much ANR received: \$2,000,000

How much is obligated*: \$2,000,000

Remaining to be obligated*: \$0

**For the purposes of this document only, obligated includes funding that has been committed, in writing, encumbered funds, funding that is obligated via a grant or other written document, or where the project is engaged in pre-funding steps such as developing a funding stack or obtaining required permits prior to the funds being executed. Any funds that are unobligated are designated so; there is a plan for all unobligated funds.*

Projects

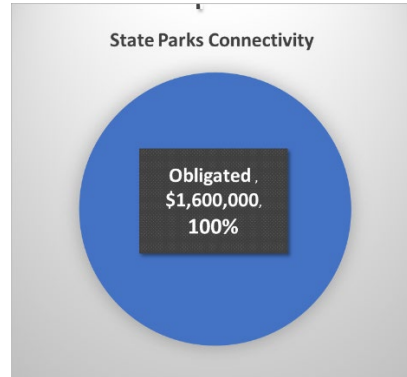

Project	Town	Award Amount
Allis State Park	Brookfield	\$250,000
Emerald Lake State Park	Dorset	\$250,000
Lake Carmi State Park	Franklin	\$250,000
Little River State Park	Waterbury	\$250,000
Kingsland Bay State Park	Ferrisburgh	\$218,000
Underhill State Park	Underhill	\$342,000
Mt. Philo State Park	Charlotte	\$191,000
North Hero State Park	North Hero	\$249,000

ANR ARPA: State Parks Connectivity

Updated January 10, 2024

Program – These funds are being used to improve broadband access at state parks by installing fiber optic cable (and/or the infrastructure necessary to support future installation of fiber optic cable). FPR and Agency of Digital Services have worked closely with the Vermont Community Broadband Board to define the project and track the progress of the Communication Union Districts (CUD). This lengthy process is now complete and the RFP issuance is imminent. While the need is present at all 55 state parks, the RFP will be for ‘last mile’ infrastructure needed for improved broadband within 8-10 high priority parks based on existing level of service, park attendance, availability of fiber within ‘last mile’ etc.

Funding –

How much ANR received: \$1,600,000

How much is obligated*: \$1,600,000

Remaining to be obligated*: \$0

**For the purposes of this document only, obligated includes funding that has been committed, in writing, encumbered funds, funding that is obligated via a grant or other written document, or where the project is engaged in pre-funding steps such as developing a funding stack or obtaining required permits prior to the funds being executed. Any funds that are unobligated are designated so; there is a plan for all unobligated funds.*

Number of Projects

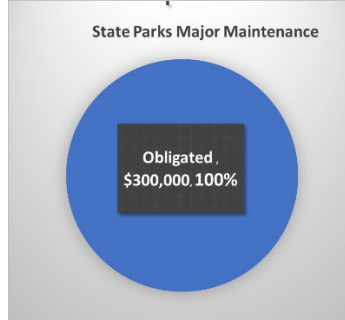

Statewide; all counties – specific locations to be determined by RFP response 8-10

ANR ARPA: State Parks Major Maintenance

Updated January 10, 2024

Program – These funds will be used to update the potable drinking water supply system at Underhill State Park, replacing aging galvanized metal pipes that sit on the ground and are routinely dislodged by tree growth and gravity.

Funding –

How much ANR received: \$300,000

How much is obligated*: \$300,000

Remaining to be obligated*: \$0

**For the purposes of this document only, obligated includes funding that has been committed, in writing, encumbered funds, funding that is obligated via a grant or other written document, or where the project is engaged in pre-funding steps such as developing a funding stack or obtaining required permits prior to the funds being executed. Any funds that are unobligated are designated so; there is a plan for all unobligated funds.*

Projects

Project	Town	Award Amount
Underhill State Park Drinking Water Distribution Replacement	Underhill	\$300,000

ANR ARPA: Roads Water Quality

Updated January 10, 2024

Program – These funds will be used to implement best management practices to improve water quality on Agency of Natural Resources-owned lands. Projects will be prioritized based on a road erosion inventory that identifies opportunities to meet water quality goals. Projects may, for example, improve road surfaces, ditches, and related drainage infrastructure in order to meet water quality goals. A request for proposals (RFP) for the remainder of the funds will be released within a month.

Funding –

How much ANR received: \$1,200,000

How much is obligated*: \$1,200,000

Remaining to be obligated*: \$0

**For the purposes of this document only, obligated includes funding that has been committed, in writing, encumbered funds, funding that is obligated via a grant or other written document, or where the project is engaged in pre-funding steps such as developing a funding stack or obtaining required permits prior to the funds being executed. Any funds that are unobligated are designated so; there is a plan for all unobligated funds.*

Projects

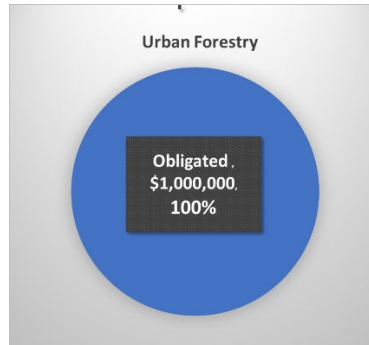

Project	Town	Award Amount
Moss Glen C100	Stowe	\$50,000
State Lands Road Archeological Resource Assessment	Multiple	\$66,200
Bill Sladyk WMA South Road Rebuild	Warners Grant, Norton	\$25,000
Coolidge State CCC Road	Shrewsbury	\$100,000
Roxbury SF Rice Tract NW	Roxbury	\$25,000
Statewide road contract for rehabilitation of 26 miles roads	Norton, Holland, Warren's Gore, Warner's Grant, Morristown, Stowe, Walden, Bolton, Duxbury, Huntington, Waterbury, Fayston, Sharon, Plymouth, Shrewsbury, Richmond	\$930,800

ANR ARPA: Urban Forestry

Updated January 10, 2024

Program – These funds will be used to plant 5,000 trees in high-priority areas statewide via a block grant program and a residential free-tree giveaway program called Vermont Community Canopy as well as urban forestry technical assistance statewide. These projects support climate change adaptations via the establishment or restoration of urban tree canopy, providing green infrastructure, and revitalization of public spaces for health and well-being.

Funding –

How much ANR received: \$1,000,000

How much is obligated*: \$1,000,000

Remaining to be obligated*: \$0

**For the purposes of this document only, obligated includes funding that has been committed, in writing, encumbered funds, funding that is obligated via a grant or other written document, or where the project is engaged in pre-funding steps such as developing a funding stack or obtaining required permits prior to the funds being executed. Any funds that are unobligated are designated so; there is a plan for all unobligated funds.*
