To Mike Hogan:

On behalf of Cork Ventures, LLC I would like to request a rule change for regulation number 47. The rule states that both malt and vinous beverages can be filled under a second class license and that the quantity to be filled is limited to a 64 ounce container.

I am proposing that the regulation include a 750ml container specifically for vinous beverages. After reading the regulation it appears to be written for malt and although it includes "vinous" in the language, the container size was not taken into consideration. A 64 ounce growler of wine would be difficult to consume before it spoils.

Thank you for your consideration,
