

## VAHHA Proposal

VAHHA proposes a fee of \$375 per month/patient for telemonitoring monitoring services. VAHHA estimates the cost to Medicaid could be as low as \$135,000 a year to \$270,000, a small investment that could result in considerable savings and better care.

Average number of patients per month	75	150
Cost/per month (\$375/patient/month – Federal/State)	\$28,125	\$56,250
Yearly cost total (Federal and State)	\$337,500	\$675,000
State payments (60/40 Federal/State match) for year	\$135,000	\$270,000
