Here are some very good websites that we promised you
, showing a very wide spectrum of the experience that is in no way limited to Vt. When so many people, all over so much of our country
, and the world, have nothing but horror and
ruination come of forced psychiatric drugging , that means only one thing
: that the doctors and the proponents are lying to you : that those forced
by it are never "helped" , and that it should not be in the human experience.

<http://psychrights.org/>

<http://www.NoIOC.org> (Please scroll down the right side to view the incredibly long list of humanity that has had their lives devastated by this and NO OTHER way to publicize this but this website
, since the mainstream media is RESISTANT to hear from the victims.)
