

Denise,

I would like to take a few moments to voice my concerns about the proposed burlington charter changes!

First of let me start by saying I believe they are unconstitutional and for that alone should make it do they do not pass! They will take peoples rights away ! I am not a drinker but if theses laws pass I would not be allowed to go into a restaurant in Burlington while carrying a concealed weapon simply because they have a liquor license! It is also in reasonable to tell someone how to store their weapon in their own home! What good is a personal defense weapon if it is locked up when someone decides to break into your home! Granted I don't live in Burlington but if these charter changes pass it will set a president That towns can create their own laws regarding firearms diss regarding the state laws already in place! If you want to prevent violence involving firearms maybe the state should enforce the laws we have, instead of creating unconstitutional laws which only hurt the law abiding citizens of this great state!
