

I would like to go on record opposing the proposed Burlington Charter Changes. I believe this charter change is just another step to firearm confiscation. I also believe this will be a detriment to Burlington's economy in that gun owners like myself will no longer shop or spend money in various eating establishments for fear of breaking the law while availing ourselves of our Second Amendment Rights.

If this passes it will create confusion among the municipalities across Vermont. Many states look at Vermont as a model of good sense gun rights. We have very few gun problems in this freedom loving state. Unfortunately a failed New York City politician trying to create a legacy for himself is causing trouble by spreading lies and making up issues that do not already exist.

Honorable Committee Members, I implore you please do not allow this change in Burlington's Charter, as it will cause confusion and risk making criminals out of law abiding citizens and risk causing more harm to an already fragile economy.

Sincerely

Dennis L. Angiono
