

Dear Denise, I write to you in your capacity as Committee Secretary to ask you to urge the members to vote against the charter changes the City of Burlington is trying to have passed. Allowing these charter changes, in my opinion, will open a local Pandoras Box as far as all state municipalities wishing to take matters into their own hands. That would result in the erosion of State authority and the homogeneity of state law with regards to not only firearms but all municipal matters that a town or city might find objectionable. If there is such a strong bias in Burlington for the proposed changes surely the private sector is better equipped to deal with it, ie; if a bar loses patrons because of an objection to carrying firearms the establishment will police it. I thank you in advance for your kind consideration. All the best, Peter Sharp.
