# How is CHAC Different?

5

- CHAC's primary care practitioners and community care partners are experts in caring for people who need care the most and use the most resources
- CHAC puts primary care providers in the drivers seat to successfully manage and oversee all care outside the inpatient setting
- CHAC's foundation is community-based primary care
- CHAC's governance includes broad representation from community partners

# Why It Matters

Our practices are skilled in 65-70% of the pie, not just the narrow 10% that represents the traditional health care delivery system.
