

VHC, Cassandra Gekas: DOL follow up for House Healthcare Committee.
File under Cass Gekas, Wed. Feb. 24, 2016

Good morning,

I wanted to pass along answers to the DOL questions posed in last week's Committee hearing. Please let me know if you need anything else.

- For State DOL income verification, what data is collected and how is it collected?:

Employers are required to report wages earned to DOL quarterly.

- What does DOL do to verify this data?:

This is a question best answered by DOL

- Does it include self-employed wages?

Data does not include self-employed wages. Self-employed individuals who are required to manually verify income (IE the income they are reporting doesn't match what's at the federal hub) would be required to provide manual documentation.

All the best,
Cass
