

Dental Therapy Employment Information November 1, 2015

Currently there are 51 dental therapists (DTs) licensed to practice in Minnesota, thirteen of which are certified advanced dental therapists (ADTs). This information is a snapshot of the employment environment as it continues to evolve.

Status

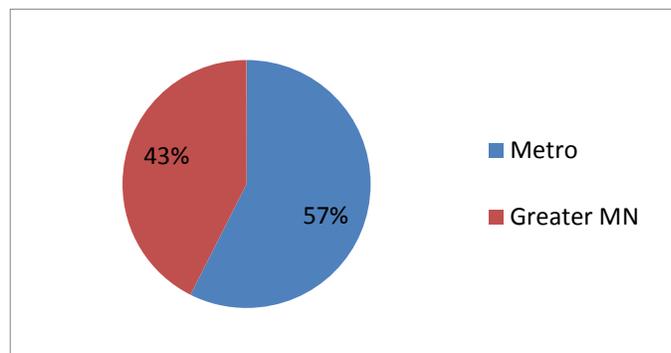

- 46 are employed
- 1 not seeking employment

Location

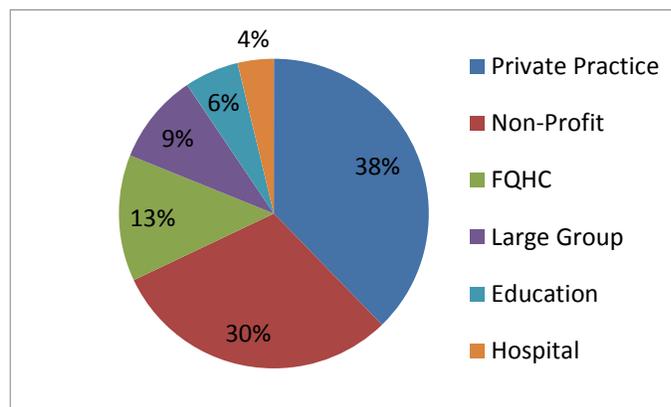

- 27 practice in the 7-county metro area
- 20 practice in Greater Minnesota

This data reveals that 34% of DTs work in a Health Resources and Services Administration (HRSA) defined rural area.

Clinic Type

- 20 in private practices
- 16 in non-profit clinics
- 7 in FQHCs
- 5 in large group clinics
- 3 in educational institutions
- 2 in hospitals

All DTs regardless of clinic type are providing care to underserved patients. The number of clinic locations and types differ for the number of employed DTs due to the fact that many graduates work in multiple settings and some clinics employ more than one dental therapist.
