

how about fixing the problem and bringing jobs and manufacturing back to this country so people have quality work which will bring down crime eventually because poverty always has spawned crime, and then fix the broken justice system and put these criminals away for good that kill, use guns in crimes ,molest,rape or intentionally hurt others and steal from them, i am sick of the law abiding people getting punished and loosing there freedoms because of these criminals who could care less about your gun control thank you and i dont support any new gun laws, we have enough now that dont get enforced very well.
