

Efficiency Vermont Overview September 2015

Liz Gamache, Director

Structure

- Focus is delivering system-wide, and individual, electric and thermal savings
- Regulated utility, operated under a performance-based contract
- Budget and oversight process managed by the Public Service Department and Public Service Board

Current & Planned Programs

More than 70 current programs, across all sectors – examples of what this looks like for customers:

- Circulator Pumps (residential)
- Husky (large industrial)
- VT Association of Hospitals and Health Systems
- Downtowns and Municipalities

Savings from new technologies – and how we use them

Integration with RES Tier 3

Efficiency Vermont is already the statewide foundation for new utility offerings:

- Heat pump leasing
- E-homes
- Contractor and supplier network

Independent 3rd party to help guide customer decisions and encourage them to move efficiency projects forward

Your feedback, comments and suggestions
are always welcome
