Agency of Administration

State of Vermont Department of Finance & Management 109 State Street, Pavilion Building Montpelier, VT 05620-0401

[phone] 802-828-2376 [fax] 802-828-2428

LETTER OF TRANSMITTAL

To the Honorable Peter Shumlin, Governor, The Honorable Phil Scott, Lieutenant Governor, Chairs of House Committees on Appropriations, Institutions and Ways and Means, Senate Committees on Appropriations, Finance and Institutions, and The Citizens of the State of Vermont:

I am pleased to present the Comprehensive Annual Financial Report (CAFR) of the State of Vermont for the fiscal year ended June 30, 2015. The Department of Finance and Management prepared this report as required by Title 32, Vermont Statutes Annotated, Section 182(a)(8). By issuing this report by December 31, 2015, the Department has met the State statutorily required issuance date. The Department prepared these financial statements and assumes responsibility for the completeness and reliability of the information presented in this report. To provide a reasonable basis for making these representations, the Department has established a comprehensive internal control framework that is designed to protect the State's assets from loss, theft, or misuse and to compile sufficient reliable information for the presentation of this report in accordance with generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). Because the cost of internal controls should not outweigh their benefits, Vermont's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements are free of material misstatement. I believe that the accompanying financial statements are accurate and fairly stated in all material respects, and presented in a manner designed to fairly report the State of Vermont's financial position, results of operations and changes in net position/ fund balances

I would like to direct your attention toward two important items contained in this CAFR. The first item is the Management Discussion and Analysis (MD&A) that follows the Independent Auditors' Report. This analysis is designed to give you, the reader, an overview of the State's financial position, described in understandable terms, in order to help you better understand the results of operations of your state government. Secondly, I would like to direct your attention to the Basic Financial Statements (BFS) which follow the MD&A. The BFS were prepared in conformity with GAAP as prescribed by the GASB. The BFS contain government-wide statements that present the State's financial activities in a manner similar to that of a private corporation; fund statements that report governmental, proprietary, fiduciary fund financial activity; discretely presented component unit financial activity; and note disclosures that explain and enhance the basic financial statements.

In addition to the MD&A and BFS, this CAFR includes a Required Supplementary Information (RSI) section, an Other Supplementary Information section, and a Statistical section. The RSI section contains various schedules relating to the State's defined benefit pension and other postemployment benefits plans, and Budget to Actual comparison schedules for the State's general and major special revenue funds with Notes reconciling budgetary fund balance to the governmental funds GAAP fund balance. The Other Supplementary Information section contains combining fund financial statements for the State's Non-major Governmental, Proprietary, and

Fiduciary Funds, and for the State's Non-major discretely presented Component Units. The Statistical section presents data relating to financial trends, revenue and debt capacity, and demographic and operating information about the State of Vermont. It should be noted that the information contained in the MD&A, RSI and Statistical sections is unaudited.

This CAFR includes the funds and entities for which the State is accountable based on GASB's criteria for defining the financial reporting entity. The criteria include fiscal dependence, financial accountability and legal standing. Please refer to Note I, for more information regarding the reporting entity and the component units.

State Profile

Vermont, known as the Green Mountain State, was first settled by the French in 1666, then by the English in 1690, and joined the Union as the fourteenth State in 1791. Rural in character, the state measures 9,249 square miles of land area, and, as of September 30, 2015, had an estimated population of 626,562. The State capital is Montpelier, and the largest city is Burlington. As of calendar year 2012, 94.4% of Vermonters aged 25 or older are at least high school graduates (ranked number 2 in the country) while 37.1% have at least a college bachelor's degree (ranked number 6 in the country).

The State Constitution provides for three traditional branches of Government – the Legislative, the Executive, and the Judicial. The Legislative branch is comprised of the House of Representatives (150 members) and the Senate (30 members); all are elected for two-year terms. The Executive branch includes six elected officers – the Governor, Lieutenant Governor, Treasurer, Secretary of State, Auditor of Accounts, and the Attorney General – all elected for two year terms, without term limitations. The Governor is responsible for the faithful execution of all laws and the management of the departments and agencies of the Executive Branch – including the agencies of Administration; Transportation; Natural Resources; Commerce and Community Development; Agriculture, Food and Markets; and Human Services, as well as other departments – through which the functions of the State government are carried out. The Judicial branch of the State is made up of a Supreme and Superior Courts, and the Judicial Bureau. The judges are appointed by the Governor with the advice and consent of the Senate, and serve six-year terms.

Budget Adoption and Legal Compliance/Budgetary Results

The Required Supplementary Information section includes Budget to Actual comparison schedules for the General Fund and the five budgeted special revenue funds. The State's budgeting process is described in the Notes to the Budget to Actual comparison schedules. These schedules present each fund's original budget, final budget, actual expenditures incurred on a budgetary basis, and the variance between the final budget and actual expenditures incurred. As the adopted budget provides legal control over spending, expenditures cannot exceed amounts appropriated under Vermont law. Budgetary control is exercised by fund within appropriation.

The General Fund

The General Fund accounts for all revenues and other receipts that are not required by law to be accounted for or deposited in other funds as well as the expenditures associated with these revenues. In fiscal year 2015, General Fund tax revenues accounted for 97.2% of total General Fund revenues. The three principal tax revenue contributors – the personal income tax, the General Fund's portion of the sales and use tax, and the meals and room tax – accounted for 80.8% of General Fund total tax revenues or approximately 78.6% of total General Fund revenues. General Fund expenditures used 59.5% of the

total revenues, and these expenditures occurred in the following major governmental functional categories: General Government, Protection to Persons and Property, Human Services, Labor, General Education, Natural Resources, and Commerce and Community Development. The majority of the remainder of the resources provided from the 2015 General Fund revenues were transferred out to other funds and used for various purposes. Please see Note IV.D. for a summary of these transfers.

Economic Condition

The consensus revenue forecast for fiscal year 2015 was revised twice during the fiscal year as the economic and revenue environment began to stabilize. During fiscal year 2015, the Vermont economy continued a slow and sometimes uneven recovery with the modest upgrade in the consensus revenue forecast in July 2014, followed by a slight downward revision in January for the balance of fiscal year 2015. Actual year end revenue collections in the General Fund exceeded both the initial and the final consensus forecast target.

The consensus economic forecast for the Vermont economy reflects the difficulties experienced nationwide. Despite another mid-Winter stall in output growth and consumption, the U.S. economy continues to make forward progress. As of this Summer, the economy once again seems poised to move onto a higher growth plane over the first half of fiscal year 2016. Progress is also being made on other areas of the labor market. There has been a significant decline in the number of workers that are among the ranks of the long-term unemployed, and there also has been a decline in the number of part-time workers who would otherwise prefer to be working full-time. The Consumer Confidence Index (CCI) increased 6.8 points during the month of June. Existing home prices appreciated steadily on a year-over-year basis during the 3-month period of February through April of calendar year 2015. Looking ahead, the U.S. economic landscape looks to be favorable for future improvement overall.

Recent developments regarding the Vermont economy continue to exhibit an "up and down" character. Seasonally adjusted payroll job changes in the State over the first half of calendar year 2015 continued to experience this now well-established "saw-toothed pattern". Vermont has made modest forward progress in its labor markets by adding 4,000 private sector jobs (and a total of 4,200 payroll jobs including the government sector). Improvements in job change are most significant in the leisure and hospitality sector, the education and health services sector, and the construction sector. Housing prices have increased by 2.7% for the four quarters ending with March, 2015.

With these factors in mind, the most recent consensus revenue forecast has moved back to a more upside orientation than the forecast issued in January 2015. For fiscal year 2015, data show that three of the State's major tax components (personal income tax , corporation income tax and meals and rooms tax) tracked well ahead of their respective targets. As a result, forecasts for General Fund revenues for fiscal year 2016 were revised upward by \$40.2 million (or 2.9%) from the January 2015 forecast due to improved tax receipts; forecasts for the Transportation Fund were reduced by \$0.8 million (or 0.3%) due to sluggish gas tax receipts due to weaker than anticipated gasoline prices; and forecasts for the Education Fund were increased by \$1.6 million (or 0.8%) based on current trends in the taxes that support this fund.

Long-term Financial Planning

As part of the State's long term financial planning, the Legislature created a Capital Debt Affordability Advisory Committee who is required to present to the Governor and General Assembly, no later than September 30 of each year, a recommendation as to the maximum amount of net tax-supported debt that the State may prudently issue for the ensuing fiscal year and which complies with the State's triple-A debt rating guidelines. The recommendation is calculated and presented in accordance with certain debt affordability guidelines and other matters that may be relevant to the proposed debt to be authorized.

At its September 2015 meeting the Committee made the recommendation to maintain the current authorization not to exceed \$144 million for the 2016-2017 fiscal year biennium. This represents a 9.9% reduction from the previous biennium's recommendation of \$159.9 million. This, coupled with a \$11.6 million premium in the State's recent bond sale that is being used to fund capital projects, provides a total capacity of \$155.6 million.

Independent Audit of These Financial Statements

KPMG LLP, an independent certified public accounting firm, performed an independent audit of the State's basic financial statements for the fiscal year ended June 30, 2015. The auditors have issued unmodified opinions, the most favorable outcome of the audit process. The audit described in the auditors' report is not intended to meet all requirements of the Federal Single Audit Act of 1996. Rather, the Single Audit Report for the State is issued under separate cover.

Awards and Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Vermont for its comprehensive annual financial report for the fiscal year ended June 30, 2014. This was the seventh year that Vermont has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of this report involved the dedicated work of staff in the Department of Finance and Management, the Office of the State Treasurer, the Office of the Auditor of Accounts, and the support of all State agencies, departments, component units, the Legislature, and the Judiciary. We welcome inquiries concerning this report and the finances of the State of Vermont.

Sincerely,

Andrew Pallito Commissioner

Independent Auditors' Report

The Speaker of the House of Representatives, President Pro-Tempore of the Senate And the Governor of the State of Vermont:

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Vermont (the State), as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of certain discretely presented component units identified in Note IA. We also did not audit the financial statements of the Vermont Lottery Commission, the Special Environmental Revolving Fund, the Vermont Energy Efficiency Utility Fund, the Vermont Universal Service Fund, or the Tri-State Lotto Commission. The discretely presented component units identified in Note IA represent 94% of the total assets and 99% of the total revenues of the aggregate discretely presented component units. The Vermont Lottery Commission represents 100% of the total assets and total revenues of the Vermont Lottery Commission Fund and 3% of the total assets and 34% of the total revenues of the business-type activities. The Special Environmental Revolving Fund represents 64% of the total assets and 4% of the total revenues of the Federal Revenue Fund; the Vermont Energy Efficiency Utility Fund and the Vermont Universal Service Fund collectively represent 9% of the total assets and 12% of the total revenues of the Special Fund; and collectively represent 8% of the total assets and 2% of the total revenues of the governmental activities. The Tri-State Lotto Commission represents 100% of the information disclosed in Note VE. Those statements were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for the discretely presented component units, the Vermont Lottery Commission, the business-type activities, the Special Environmental Revolving Fund, the Vermont Energy Efficiency Utility Fund, the Vermont Universal Service Fund, governmental activities and the Tri-State Lotto Commission are based solely on the reports of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

> KPMG LLP is a Delaware limited liability partnership, the U.S. member firm of KPMG International Cooperative ("KPMG International"), a Swiss entity

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the reports of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Vermont as of June 30, 2015, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with U.S. generally accepted accounting principles.

Emphasis of Matter

As disclosed in Note VF to the financial statements, during the year, the State adopted the provisions of Governmental Accounting Standards Board Statement No. 68, Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27, and Governmental Accounting Standards Board Statement No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date – an amendment of GASB Statement No. 68. Our opinions are not modified with respect to these matters.

Other Matters

Required Supplementary Information

U.S. generally accepted accounting principles require that the management's discussion and analysis and required supplementary information, as listed in the table of contents (collectively referred to as RSI), be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the RSI in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary and Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The Introduction, Other Supplementary Information-Combining and Individual Fund Statements and Schedules and the Statistical Section listed in the

accompanying table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Other Supplementary Information-Combining and Individual Fund Statements and Schedules is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, based on our audit and the reports of other auditors, the Other Supplementary Information-Combining and Individual Fund Statements and Schedules is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The Introduction and Statistical sections have not been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated December 29, 2015 on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control over financial reporting and compliance.

KPMG LLP

Colchester, Vermont December 29, 2015

VI Reg No 92-0000241

INTRODUCTION

We are pleased to present this analysis and discussion of Vermont's financial performance for the fiscal year ending June 30, 2015. This Management Discussion & Analysis (MD&A) section is intended to serve as an introduction to the State's basic financial statements, which have the following components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. The MD&A is designed to assist the reader in focusing on significant financial matters, provide an easily readable overview of the State's financial activities, identify any material changes from the original budget, and highlight financial matters that occurred during fiscal year 2015. The following presentation is by necessity highly summarized, and in order to gain a thorough understanding of the State's financial condition, the following financial statements, notes and required supplementary information should be reviewed in their entirety.

FINANCIAL HIGHLIGHTS

Government-wide

- Vermont reported net position of \$971 million, comprised of \$4.311 billion in total assets and \$137 million in deferred outflows offset by \$3.295 billion in total liabilities and \$182 million in deferred inflows at June 30, 2015 (Table 2). Of this net position amount, \$2.187 billion represents the net investment in capital assets, \$831.1 million is restricted for various purposes, and \$2.047 billion represents a deficit unrestricted net position. The reasons for the negative unrestricted net position are discussed in the Government-wide Financial Analysis below.
- The primary government's net position has increased by \$224.2 million as a result of this year's operations. The net position for governmental activities increased \$150.5 million and net position for business activities increased by \$73.7 million (Table 3). The increase in net position for business activities was primarily due to improvements in the financial position of the Unemployment Compensation Trust Fund.

Fund level

- The State's governmental funds reported a combined ending fund balance of \$933.5 million, an increase of \$25.6 million or 2.8 percent above last year. Of this ending fund balance \$113.7 million is in nonspendable form, \$605.0 million is restricted for specific purposes, and \$214.7 million is available for spending (committed, assigned, and unassigned fund balance). The increase in ending fund balance is primarily attributable to increases in fund balances of the General Fund (\$7.9 million), Education Fund (\$11.4 million), Federal Revenue Fund (\$22.3 million) and Global Commitment Fund (\$12.5 million), offset by decreases in fund balances of the Special Fund (\$20.5 million) and Capital Projects Funds (\$7.7 million).
- The State's enterprise funds reported a combined net position of \$227.7 million or an increase of \$73.7 million over last year.
- The State's General Fund reported an operating surplus this year of \$7.9 million which increased the accumulated fund balance to \$133.0 million, of which \$106.3 million is nonspendable.

Capital assets

• The carrying amount of capital assets for the primary government increased to \$2,540.6 million, an increase of \$243.1 million over last year. The increase is primarily in construction in process, infrastructure assets and machinery and equipment.

Long-term debt

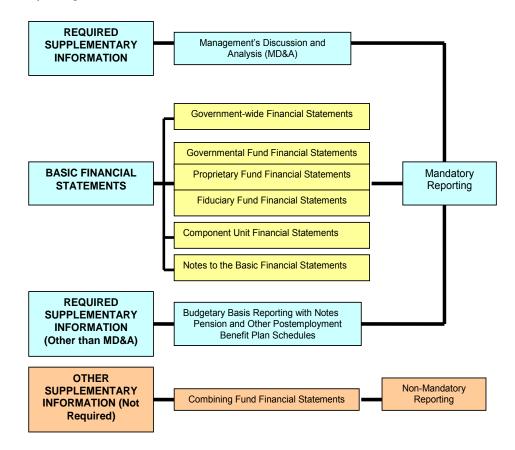

• The State's debt outstanding for general and special obligation Bonds increased \$22.9 million as compared to fiscal year 2014. The State issued \$109.8 million in general obligation bonds. Also, the State retired \$48.2 million in general obligation bonds, and \$1.5 million in special obligation transportation infrastructure bonds, and defeasance of \$37.2 million in general obligation bonds.

More information regarding the government-wide financial statements, fund level financial statements, capital asset activity and long-term debt activity can be found beginning on page 40.

OVERVIEW OF THE FINANCIAL STATEMENTS

This Comprehensive Annual Financial Report (CAFR) consists of an introductory section, a financial section, and a statistical section. The financial section contains the Independent Auditor's Report, this discussion and analysis section, the basic financial statements (BFS) with required supplementary information (RSI), and other supplementary information. Additional information regarding the above sections may be found below as well as in the notes to the financial statements.

The layout of the financial section and the relationship of the financial statements and supplementary information is presented in the following diagram. Notice the relationships between the various elements of the CAFR, such as "mandatory versus non-mandatory" reporting, or "required versus not required" supplementary information. This diagram is designed to illustrate how the various elements of the state's financial activity fit together in this CAFR.

Basic Financial Statements

Vermont's basic financial statements (BFS) consist of four components: 1) government-wide financial statements, 2) fund financial statements, 3) component units' financial statements, and 4) notes to the financial statements. The fund financial statements include governmental, proprietary, and fiduciary types of funds that will be described later in this analysis. Notes to the financial statements provide explanations and/or additional detail for all of the above type financial statements and are considered an integral part of the financial statements.

1) Government-Wide Financial Statements

Vermont's government-wide financial statements, which follow this MD&A section, are designed to present a broad view of the State's operations and financial position in a manner similar to the accounting principles used by most private-sector business. All of the State's activities except its fiduciary funds' activities are reported in the government-wide statements. Fiduciary activities are not included because the resources of these funds are not available to support the State's own programs.

The government-wide statements contain both short-term and long-term information about the State's financial position and assist in assessing the State's economic condition at the end of each fiscal year. The State prepares these statements using the "flow of economic resources" measurement focus and the accrual basis of accounting. This basically means that the methods utilized to prepare these statements are similar to those used by most private sector businesses in preparing their financial statements. They take into account all financial activity connected with the reported fiscal year including revenues, expenses, transfers, sales or acquisitions of capital assets, and any other activity affecting or possibly affecting the financial condition of the State, even if cash involved has not been received or paid.

The government-wide financial statements present two statements:

The *Statement of Net Position* presents a snapshot of both the primary government's and its component units' assets and liabilities and deferred outflows and deferred inflows, as of the date of this report, with the difference between the assets and deferred outflows, and liabilities and deferred inflows reported as "net position". Over time, increases or decreases in the primary government's net position may serve as an indicator as to whether the financial position of the State is improving or deteriorating.

The *Statement of Activities* presents the reported year's financial activity and hence, the reason(s) for the changes in net position included on the Statement of Net Position. All changes in financial activities are recognized as soon as the underlying event(s) giving rise to the changes occur, regardless of the timing of related cash flows. Thus, some revenues and expenses reported in this statement will not result in cash flows until future fiscal periods. This statement also presents the relationship between the State's major expenditure functions and the associated sources of program revenues associated with each expenditure function.

Both of the above financial statements segregate Vermont's financial activity into three categories: governmental activities, business-type activities, and discretely presented component unit activities. The governmental activities and business-type activities are combined to report on what is termed *primary government activities* which are separate and distinct from the *component units' activities* of the discretely presented component units.

Primary Government Activities

Governmental Activities – The financial activities reported in this section generally represent those services (functions) normally performed by a government entity. These activities are classified as either major or non-major, depending upon their financial size as compared to each other and to the group as a whole. The governmental activities include public education, general government, public health services, legal and judiciary services, natural resources, public safety, regulatory services, social services, and public transportation. Taxes, grants, and intergovernmental revenues are the main sources of funding for these activities.

Business-Type Activities – These business-type activities of the State include the operations of Vermont's enterprise activities. For financial reporting purposes, these activities are classified as either major or non-major, depending upon their financial size as compared to each other and to the group as a whole. Activities categorized as major include the Unemployment Compensation Trust Fund program, Liquor Control, and the State Lottery Commission. Activities reported as non-major include the Federal Surplus Property Program, publishing Vermont Life magazine, making equipment loans to municipalities, and several other activities. Both major and non-major activities normally recover all or a portion of their costs through user fees and charges to the external consumers of their goods and services, much like a private business.

Component Units' Activities

Discretely Presented Component Units – These are legally separate (incorporated) entities for which the primary government has the ability to impose its will on the entity, receive a benefit from activities of the entity, or could receive a financial burden due to the activities of the entity. The State's discretely presented component units are presented in the aggregate in the government-wide statements. This aggregate total consists of four major and eight non-major component units. This categorization is determined by the entity's relative significance to the State. Additional information or financial statements for each of these individual component units can be obtained from their respective administrative offices. Addresses and additional information about the State's component units are presented in Note I to the financial statements.

Blended Component Units – The State has no blended component units.

Included with the basic financial statements are two schedules (pages 48 and 52) that reconcile the amounts reported on the governmental fund financial statements (modified accrual basis of accounting) with governmental activities (accrual basis of accounting) on the government-wide statements. The following summarizes some of the differences in modified accrual and accrual accounting:

- Capital assets used in governmental activities are not financial resources and therefore are not reported in governmental fund statements.
- Certain revenues that are earned, but not available, are reported as revenues of governmental activities, but are reported as unavailable revenue on the governmental fund statements.
- Unless currently due and payable, long-term liabilities, such as capital lease obligations, compensated absences, net pension and other postemployment benefit obligations, and bonds and notes payable appear as liabilities in the government-wide statements but are not reported in the governmental fund statements.
- Internal service funds are reported primarily as governmental activities, but reported as proprietary funds in the fund financial statements.
- Capital outlay spending results in recording capital assets on the government-wide statements, but is reported as expenditures on the governmental fund statements.
- Bond and note proceeds result in liabilities on the government-wide statements, but are recorded as
 other financing sources on the governmental fund statements. Payments of bond and note principal
 results in a reduction in liabilities on the government-wide statements, but are reported as
 expenditures on the governmental fund statements.
- Certain other outflows represent either increases or decreases in liabilities on the government-wide statements, but are reported as expenditures on the governmental fund statements.
- Net position balances are allocated as *net investment in capital assets* (capital assets, net of
 accumulated depreciation, and reduced by outstanding balances for bonds and notes attributable to
 those assets) *restricted net position* (those with constraints placed on their use by external sources
 of imposed by law through constitutional provision or enabling legislation) and *unrestricted net
 position* (the net amount of assets, deferred outflows of resources, liabilities and deferred inflows of
 resources that do not meet any of the above restrictions).

The notes to the basic financial statements provide additional information that is integral to understanding the data provided in the government-wide and fund financial statements.

2) Fund Financial Statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. Similar to other state and local governments, Vermont uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

The fund financial statements focus and report on the State's activities in more detail than the government-wide statements. All of the funds of the State have been divided into three categories for reporting purposes: governmental, proprietary, and fiduciary. For governmental activities, the governmental funds financial statements indicate how these services are financed in the short-term as opposed to the government-wide statements, which present a long-term view of the State's finances.

In accordance with GASB Statement No. 34, the focus of governmental fund financial statements has shifted from fund types to reporting on the most significant funds of the State, or major funds. Accordingly, the governmental and proprietary funds are divided into major and non-major categories as required by the Governmental Accounting Standards Board. For the governmental and proprietary funds, the major funds are reported in individual columns in the fund financial statements while the non-major funds are presented in a consolidated column in the fund financial statements. Combining schedules or statements in the Other Supplementary Information section present detailed non-major fund activity. Fiduciary funds are reported by fiduciary type (pension and other postemployment benefit trusts, investment trusts, private purpose trusts and agency funds) with combining schedules or statements for the individual pension, other postemployment benefit, and agency funds presented in the Other Supplementary Information section.

The three categories of funds are Governmental Funds, Proprietary Funds, and Fiduciary Funds. It is important to note that these fund categories use different accounting methods and should be interpreted differently as described below. Following is a brief overview of these three major categories of funds.

Governmental Funds

Most of the basic services provided by the State are accounted for in the governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, the governmental fund financial statements focus on near-term inflows and outflows of spendable resources as well as the balances of resources available at the end of the fiscal year. This approach uses the "flow of current financial resources" measurement focus and the modified accrual basis of accounting. These statements provide a detailed short-term view of the State's finances that assist in determining whether there will be adequate financial resources available to meet the current needs of the State.

Because the time period focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented in the governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Schedules reconciling the governmental funds' Balance Sheet and Statement of Revenues, Expenditures, and Changes in Fund Balances to their respective government-wide statements are provided on the pages immediately following each governmental fund financial statement to facilitate this comparison.

The State reports twenty governmental funds of which six are classified as "major" governmental funds. These major funds are the General Fund, Transportation Fund, Education Fund, Special Fund, Federal Revenue Fund and Global Commitment Fund. Each major fund is presented in a separate column in the Governmental Funds' *Balance Sheet* and in the *Statement of Revenues, Expenditures, and Changes in Fund Balance*. The "non-major" governmental funds include the Fish and Wildlife Fund, two capital projects funds, two debt service funds, and nine permanent funds and are presented in one consolidated column in the governmental fund statements. Combining and individual non-major governmental fund statements are reported in the Other Supplementary Information section of this report.

Fund balance (the difference between assets and deferred outflows of resources, and liabilities and deferred inflows of resources) is classified as nonspendable, restricted and unrestricted (commited, assigned or unassigned).

The State budgets and controls its financial activities on the cash basis of accounting. In compliance with State law, the State records its financial transactions in either of two major categories – the General Fund or various special revenue funds. References to these funds in this report include the terms "budgetary" or "budgetary basis" to differentiate them from the GAAP funds of the same name which encompass different funding categories. The State adopts an annual appropriated budget for its budgetary general fund and each special revenue fund. A budgetary comparison schedule has been provided for these funds to demonstrate compliance with the approved budgets. These schedules can be found as part of the required supplementary information section of this report.

The governmental funds' financial statements immediately follow the government-wide financial statements.

Proprietary Funds

This category of funds includes enterprise funds (business-type) and internal service funds. These funds report activities that operate much like those of commercial enterprises. These funds' financial reports include a *Statement of Net Position;* a *Statement of Revenues, Expenses and Changes in Net Position;* and a *Statement of Cash Flows*.

Enterprise funds provide the same type of information as the business-type activities section in the government-wide financial statements, only in more detail and at the fund level. Like the government-wide financial statements, enterprise fund financial statements use the accrual basis of accounting. Enterprise funds account for services provided to the general public, government, and non-State government entities. They normally derive their revenue by charging user fees in order to cover the costs of their services.

The State reports nine enterprise funds of which three are reported as major funds in separate columns on the proprietary fund statements. These three are the Unemployment Compensation Fund, the Liquor Control Fund, and the Vermont Lottery Commission. The other six enterprise funds are reported as "non-major funds" and are consolidated into one column on the proprietary fund statements.

Internal service funds are used to report activity that provides goods and services to other funds, departments, or agencies of the primary government and its component units, or to other governments on a cost reimbursement basis. These funds provide communication and information technology, facilities and property management, fleet management, printing, risk management and insurance services. The internal service fund activities are allocated proportionately between the governmental activities (predominately) and the business-type activities in the government-wide statements based on the benefit of the services provided to these activities. The reconciliation between the government-wide financial statements for business-type activities and the proprietary fund statements is presented at the end of the proprietary fund financial statements.

The State reports twenty-three internal service funds, which are reported in one consolidated column entitled "Governmental Activities – Total Internal Service Funds" on the Proprietary Funds Statement of Net Position; Statement of Revenues, Expenses, and Changes in Net Position; and Statement of Cash Flows.

The proprietary funds' financial statements immediately follow the governmental fund financial statements. Combining non-major enterprise and combining internal service fund statements may be found in the Other Supplementary Information section of this report.

Fiduciary Funds

The fiduciary funds are used to account for assets held by the State in a trustee capacity or as an agent for individuals, private organizations, other governmental units, or other funds. Fiduciary funds are excluded from the government-wide financial statements because the State cannot use these assets to finance its operations. The fiduciary funds use the accrual basis of accounting.

The State's fiduciary funds are divided into the following four basic categories: Pension and Other Postemployment Benefit Trust Funds (includes three separate defined benefit pension plans, three separate defined contribution pension plans, two defined benefit other postemployment benefit plans, and one defined contribution other postemployment benefit plan); an Investment Trust Fund (which reports only the external portion of the Vermont Pension Investment Committee investment pool); a Private Purpose Trust Fund (which reports only the Unclaimed Property Fund); and Agency Funds (nine agency funds which account for the assets held for distribution by the State as an agent for other governmental units, organizations or individuals). These funds' financial reports include a *Statement of Fiduciary Net Position;* and a *Statement of Changes in Fiduciary Net Position*.

The fiduciary funds financial statements can be found immediately following the proprietary funds financial statements. Individual pension and other postemployment benefit trust funds, and agency funds financial statements are reported in the Other Supplementary Information section of this report.

3) Discretely Presented Component Units' Financial Statements

As mentioned previously, the State has included the net position and activities of four major component units in individual columns and eight non-major component units in a single column on the statements. The component units' financial statements can be found immediately after the fiduciary funds.

Combining individual non-major component units' financial statements can be found in Other Supplementary Information section of this report.

4) Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data presented in the government-wide and the fund financial statements. They are an integral part of the financial statements and focus on the primary government and its activities. The notes also explain some of the information contained in the financial statements and present in more detail than is practical in the financial statements.

The notes include a summary of significant accounting policies; additional information regarding the reconciliation of government-wide and fund financial statements; discussions on stewardship, compliance and accountability; detail notes on all activities and funds; and other information. The notes to the financial statements can be found immediately following the component units' financial statements.

Required Supplementary Information Other Than MD&A

The basic financial statements are followed by a section of required supplementary information. This section includes:

- The Schedule of Changes in Net Pension Liability and Related Ratios, a Schedule of Investment Returns, a Schedule of Employer and Nonemployer Contributions, and a Schedule of the State's Proportionate Share of the Net Pension Liability for the three defined benefit pension trust are included in the required supplementary information section. Also, this section includes the Schedule of Funding Progress and the Schedule of Employer Contributions for the other postemployment benefit plans.
- Schedules for the General Fund and budgeted Special Revenue Funds comparing their original budgeted amounts; final budgeted amounts; actual inflows, outflows, and balances stated on the budgetary basis; and variances between the final budgeted amounts and actual amounts presented on a budgetary basis. See Note III. A. for additional information regarding the budgetary process, including the budgetary basis.
- Notes to Required Supplementary Information include a schedule reconciling the statutory fund balance presented on a budgetary basis to the fund balance prepared on a modified accrual basis as presented in the governmental fund financial statements for the general fund and each budgeted special revenue fund, as well as additional information regarding the budgetary process.

Other Supplementary Information

Combining Financial Statements

The combining fund financial statements referred to earlier in connection with non-major funds and nonmajor component units are presented following the Required Supplementary Information section. The total columns of these combining financial statements carry to the applicable fund financial statement. These combining statements include the following:

- Non-major governmental funds
- Non-major proprietary (enterprise) funds
- Internal service funds
- Fiduciary funds (including individual pension and other postemployment benefit trust funds, and agency funds)
- Non-major component units

Statistical Section

A statistical section containing information regarding financial trends, revenue capacity, and debt capacity, as well as operating, economic and demographic information is presented immediately following the combining financial statements.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Net Position

The following primary government condensed financial statement information is derived from the State's June 30, 2015 and 2014 government-wide Statement of Net Position. Although the government-wide statements include discretely presented component unit activity, the component unit activity has not been included in these condensed statements.

Totals may not add due to rounding.

The State's combined net position (governmental and business-type activities) totals \$971 million at the end of 2015, as shown in Table 2. Approximately \$2.187 billion of the combined net position represents the State's investment in capital assets such as land, buildings, equipment, and infrastructure (roads, bridges, and other immovable assets) less any related debt still outstanding that was used to acquire those assets. This net investment in capital assets represents resources used to provide services to citizens, and therefore is not available for future spending. Although the State's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities. Capital assets increased by \$243 million primarily due to increases in construction in process, infrastructure assets and machinery and equipment.

An additional portion of the primary government's net position (85.6 percent) represents resources that are subject to external restrictions on how they may be used. This increase of \$102.3 million is primarily a result of additional amounts that are restricted for unemployment compensation (\$72.6 million), human services (\$15.6 million) and natural resources (\$13.3 million).

Internally imposed designations of resources are not presented as restricted net position. The remaining balance of unrestricted net position is a deficit of \$2.047 billion. The governmental activities' negative unrestricted net position balance is mainly the result of three actions: 1) long-term debt issued by the State for municipal, non-profit or component unit capital purposes, \$204.0 million outstanding at June 30, 2015, that does not result in a governmental activities' capital asset, 2) the amount of net position that is restricted for various purposes, and 3) the net Pension and OPEB liabilities (See Note IV. G. 4.).

Current assets increased by \$143.3 million due to increase in cash and equivalents (\$93.6 million) and federal grants receivable (\$53.5 million). Long term liabilities increased by \$1,218.3 million primarily due to the implementation of GASB Statement No 68, which changed the way the State records its net pension liabilities (See Note IV.G.4).

At the end of fiscal year 2015, the State reported positive total net position balances in its governmental activities, its business-type activities, and its discretely presented component units.

Changes in Net Position

The following primary government condensed financial statement information is derived from the State's June 30, 2015 and 2014 government-wide Statement of Changes in Net Position. Although the government-wide statements include discretely presented component unit activity, the component unit activity has not been included in these condensed statements.

Totals may not add due to rounding.

Governmental type activities had an overall increase in net position of \$150.5 million, or 25.4%, resulting from an operating profit of \$125.9 million and by transfers in from business-type activities of \$24.6 million, primarily from the Vermont Lottery Commission (\$22.8 million) to support education. Revenues were improved from 2014, with increases in both operating and capital grants and other taxes, as well as increases in income taxes, education taxes and charges for services, while expenditures increased by only a small amount.

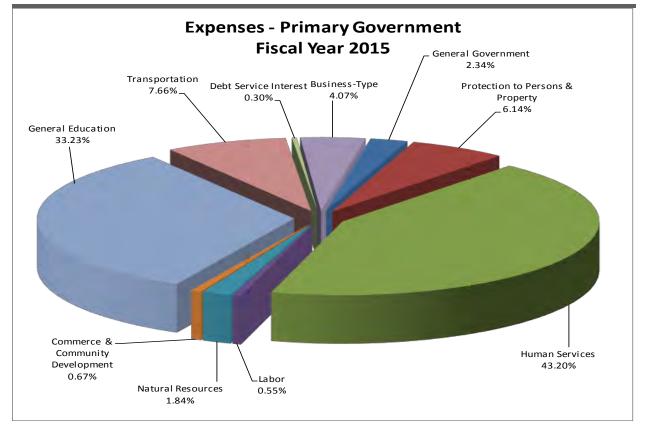

Business-type activities had an overall increase in net position of \$73.7 million or 47.9%, resulting from an operating profit of \$98.3 million offset by transfers out of \$24.6 million to governmental activities, primarily from the Lottery (\$22.8 million) to support education. Revenues increased from 2014, primarily due to an increase in revenue in the Vermont Lottery Commission (\$9.4 million) offset by a decrease in operating grants (\$4.5 million), while expenses increased by only a small amount.

The following graph illustrates the revenues of Vermont's primary government for fiscal year 2015. Approximately 35.87 percent comes from other entities and governments in the form of operating and capital grants and contributions (primarily federal grant revenues). An additional 31.76 percent of total revenues are generated by the statewide education and income taxes.

Percentages may not equal 100% due to rounding.

The following graph illustrates the percentages of total primary government expenses for fiscal year 2015. The largest category of expense is for human services (43.20 percent of total expense) which provides for Vermont's low-income, elderly care services and persons in state custody in the form of grants for selected services such as food stamps, health care, housing and child protective services. The second most significant category of expense is for general education (33.23 percent of total expenses) which provides for Vermont's support to secondary and higher education.

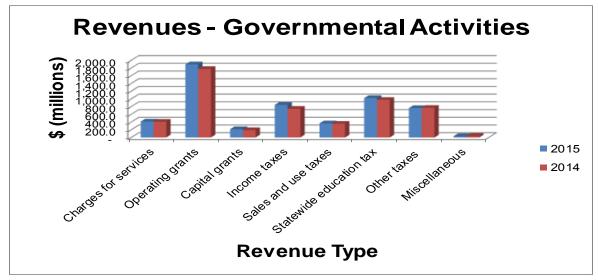

Percentages may not equal 100% due to rounding.

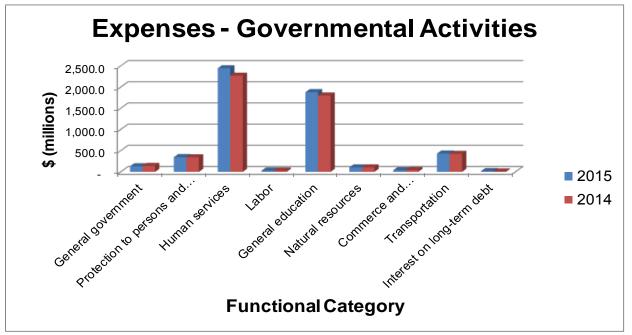

Governmental Activities

In 2015, governmental activities' revenues exceeded expenses by \$125.9 million and received transfers of \$24.6 million from business activities, resulting in a \$150.5 million (or 25.4 percent) increase in net position. Revenues increased by \$302.0 million, primarily due to an increase in operating grants and contributions (\$119.6 million) while expenses increased by \$256.3 million. Spending increased for human services (\$174.8 million), general education (\$78.4 million) and transportation (\$8.0 million).

The following chart provides a two-year comparison of governmental activities revenues:

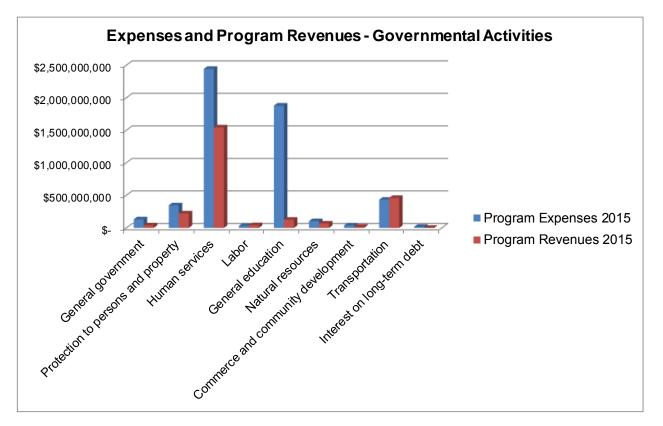

The following chart provides a two-year comparison of governmental activities expenses:

The following table shows to what extent program revenues (charges for services and grants and contributions) covered program expenses. For fiscal year 2015, program revenues covered \$2.5 billion or 46.5 percent of \$5.4 billion in program expenses. The remaining \$2.9 billion or 53.5 percent of program expenses was paid for by state taxes and other general revenue.

TABLE 4 Net Program Revenue For the years ended June 30, 2015 and 2014

	Program Expenses	с с		et ram //Revenue	Program Revenues as a Percentage of Program Expenses		
	2015	2015	2015 2014		2015	2014

The following chart displays program expenses and program revenues for 2015:

FINANCIAL ANALYSIS OF THE STATE'S INDIVIDUAL FUNDS

As noted earlier, the State of Vermont uses fund accounting to account for its ongoing operations and to demonstrate compliance with finance-related legal requirements imposed by both legislative mandates as well as externally imposed restrictions.

Governmental Funds

The focus of the State's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the State's financing requirements. In particular, *unrestricted (unassigned, assigned, and committed) fund balances* may serve as a useful measure of a government's net resources available for spending. At the end of fiscal year 2015, the unrestricted fund balance is 23.0 percent of the total fund balance of governmental funds, which is available for spending on governmental programs at the State's discretion in the coming year. The remainder of this fund balance is restricted or nonspendable to indicate that it is not available for appropriation, such as the principal of the State's Permanent Funds, and other items that are nonspendable, such as advances and long-term receivables. At the end of fiscal year 2015, the State's governmental funds reported combined fund balances of \$933.5 million, an increase of \$25.6 million in comparison with the prior fiscal year.

The General Fund is the chief operating fund of the State. At the end of fiscal year 2015, the General Fund's total fund balance was \$133.0 million and the unassigned portion of this fund balance was \$21.0 million. Its remaining fund balance was made up of nonspendable amounts totaling \$106.3 million, and assigned amounts totaling \$5.8 million. During 2015, total revenues and other financing sources exceeded total expenditures and other financing uses by \$7.9 million.

General Fund revenues increased by \$60.0 million, or 4.5%, primarily due to a \$63.8 million increase in personal and corporate taxes due to an improved economy, an increase in other revenues due a one-time \$5 million litigation settlement, and a \$10.1 million decrease in other taxes, primarily because there was a one year increase in inheritance and estate taxes in FY 2014. Expenditures decreased by \$25.4 million or 3.0%, primarily due to increases in protection to persons and property of \$8.8 million due to increases in education grants, and a decrease in human services expense of \$12.8 million due to the midyear change in the Choices for Care Medicaid waiver which consolidated it with the Global Commitment to Health Medicaid waiver in the Global Commitment Fund. The General Fund's statutory reserve for budgetary stabilization increased by \$3.1 million to \$69.3 million, the maximum allowed by statute.

The Transportation Fund's total fund balance was \$27.2 million at June 30, 2015, an increase of \$0.3 million from the fiscal year 2014 ending total fund balance. Transportation Fund revenues increased by \$39.2 million, primarily due to an increase in Federal Highway Administration grants (\$38.9 million), which corresponds to the increase in expenditures for transportation projects (\$38.0 million). The Transportation Fund's statutory reserve for budget stabilization increased by \$1.0 million to \$12.6 million, the maximum allowed by statute.

The Education Fund at June 30, 2015 had a total fund balance of \$73.8 million, which represents a \$11.4 million increase over fiscal year 2014's ending balance. General education costs increased by \$41.8 million, primarily due to an increase in grants to school districts (\$41.0 million). This increase was funded by increases in the statewide education tax (\$47.9 million); sales and use taxes (\$3.1 million); purchase and use taxes (\$1.8 million) and offset by decreases in the electric energy education tax (\$3.3 million). The Education Fund's statutory reserve for budget stabilization increased \$1.7 million to \$32.0 million, the maximum allowed by statute.

The Special Fund's total fund balance at the end of fiscal year 2015 was \$79.6 million, a decrease of 20.3 percent in comparison with 2014. The Special Fund's total fund balance is comprised of \$21.7 million as restricted, \$80.1 million as committed, and \$22.1 million unassigned deficit. Special Fund revenues decreased \$2.2 million or 0.4 percent, and expenditures increased \$16.1 million or 5.5 percent. The increase in expenditures was primarily in the protection to persons and property function (\$19.0 million), of which \$15.9 million was in the Energy Efficiency Utility program's grants, also increases in grants for general education (\$3.0 million), grants and payroll costs for natural resources (\$2.7 million), with an offsetting decrease in grants for human services (\$8.1 million). This resulted in a decrease in "excess of revenues over expenditures" of \$18.2 million from last fiscal year. Fiscal year 2015 transfers out to other funds exceeded transfers in from other funds by \$272.7 million. The Special Fund received transfers in of \$81.6 million, consisting of FEMA funds for construction on the Waterbury Office Complex (\$30.0 million); federal fund monies for the earned income tax credit (\$19.4 million); matching funds for school based Medicare services (\$23.8 million); and the Next Generation Fund (\$3.3 million). Transfers out of \$354.3 million consisted primarily of payments for a portion of the State's payment for Medicaid coverage under the Global Commitment to Health Medicaid waiver (\$287 million).

The Federal Revenue Fund accounts for all federal grants except those federal grants that are awarded to the Agency of Transportation (which are included in the Transportation Fund), the Global Commitment to Health Medicaid waiver (which are included in the Global Commitment Fund) and the Department of Fish and Wildlife (which are included in the Fish and Wildlife Fund, a non-major governmental fund). The Federal Revenue Fund's federal grant revenues for fiscal year 2015 were \$821.8 million, a decrease of \$59.3 million over fiscal year 2014's federal grant revenues. Expenditures were \$772.8 million, a decrease of \$60.1 million over 2014. This decrease in revenues and decrease in expenditures is largely due to the midyear change in the Choices for Care Medicaid waiver which consolidated it with the Global Commitment to Health Medicaid waiver in the Global Commitment Fund. The Federal Revenue Fund's total fund balance at the end of fiscal year 2015 (\$436.2 million) was a increase of \$22.3 million as compared to the total fund balance at the end of fiscal year 2014.

The fiscal year 2015 ending total fund balance for the Global Commitment Fund was \$114.1 million. Revenues and net transfers in of \$1,475.3 million exceeded expenditures of \$1,462.8 million by \$12.5 million. The primary changes were an increase in federal grants of \$175.3 million and an increase in human services expenses of \$230.2 million. These increased occurred due to an increased base budgeting expenditures attributable to the Medicaid case load and utilization growth, and the midyear change in the Choices for Care Medicaid waiver which consolidated it with the Global Commitment to Health Medicaid waiver in the Global Commitment Fund.

See Note I, Section E for more information regarding these funds.

Proprietary Funds

The State's *enterprise funds* provide the same type of information presented in the business-type activities in the government-wide financial statements, but in more detail. The Unemployment Compensation Trust Fund's total net position balance increased from \$149.3 million at June 30, 2014 to \$221.9 million at June 30, 2015, an increase of \$72.6 million in one year. Expenditures from the fund for unemployment benefits decreased by \$10.5 million over 2014.

The State's *internal service funds*' total net position at June 30, 2015 was a deficit of \$3.5 million, an \$8.9 million improvement from June 30, 2014. This improvement is primarily due to an improvement in net position of \$4.6 million in the medical insurance fund due to a rate increase in FY 2015, as well as an increase in the highway garage fund (\$1.3 million) due to a reduction in cost of supplies and parts and the property management fund due to the transfer of proceeds from the sale of a building in St. Albans (\$3.3 million). It should be remembered that the internal service funds' activity has been combined with the governmental funds' activity in the government-wide financial statements.

Fiduciary Funds

The State's fiduciary funds account for resources held for the benefit of parties outside State government. The Pension and Other Postemployment Benefit Trust Funds' net position decreased by 2.4% to \$3.97 billion at June 30, 2015. For more information regarding the State's retirement and other postemployment benefit plans, see Note IV. G. 4. to the financial statements. The Unclaimed Property Fund's total assets balance at June 30, 2015 is \$12.2 million, and total liabilities balance is \$8.8 million, including the escheat property claims liability estimated at \$8.8 million, resulting in ending net position of \$3.4 million. The Investment Trust Fund's total net position at June 30, 2015, were \$153.8 million. Net position of all fiduciary funds are reported as held in trust for particular purposes.

GENERAL FUND BUDGET HIGHLIGHTS

The State ended fiscal year 2015 with General Fund revenues of \$1.381 billion, expenditures of \$1.060 billion, and net transfers to other funds of \$314.5 million (non-GAAP budgetary basis). This was a \$52.4 million increase in revenues over the previous year. The fiscal year 2015 General Fund consensus revenue forecast initially approved by the Emergency Board in July, 2014 was subsequently revised downward by the Emergency Board at their January 2015 meeting. Compared to target, the revenues were 0.94 percent above the July, 2014 revenue forecast of \$1,367.9 million, and 1.69 percent above the January, 2015 revised revenue forecast of \$1,357.9 million. Personal income tax receipts were \$4.1 million above target, corporate income tax receipts were \$19.3 million above target, and meals and rooms tax receipts were \$1.7 million above target. Inheritance and estate taxes were \$4.4 million below target due to an unusually large estate tax filing in FY2014, and there was a one-time litigation settlement in FY2015 (\$5.0 million). The General Fund results allowed for a fully funded General Fund Budget Stabilization Reserve of \$69.3 million, representing the statutory maximum of 5 percent of the prior year appropriations level.

PRIMARY GOVERNMENT'S CAPITAL ASSETS AND DEBT ADMINISTRATION

Capital Assets

The State investment in capital assets (net of accumulated depreciation) for its governmental and business-type activities as of June 30, 2015, was \$2.541 billion, a total increase of 10.6 percent (Table 4). This investment in capital assets includes land, buildings, improvements, equipment, infrastructure and construction in progress. Infrastructure assets are items that are normally immovable and of value only to the State, such as roads, bridges, streets and sidewalks, drainage systems, lighting systems, and similar items.

Many component unit, municipal and non-profit organizations' capital construction projects and acquisitions are financed by the State, but the assets are actually owned by these other entities. Therefore, these capital assets are recorded on the financial statements of those entities and not on the books of the State. But the general obligation bonds issued by the State to finance these capital assets are reported as a liability of the State's governmental activities. At June 30, 2015, the State had \$204.0 million of general obligation bonds outstanding related to capital assets of these other entities. Additional information on the State's capital assets can be found in Note IV. E. of the notes to the financial statements.

Debt Administration

Bonded Indebtedness

The State has no constitutional or other limit on its power to issue obligations or to incur debt besides borrowing only for public purposes. In 1990, the General Assembly created the Capital Debt Affordability Advisory Committee and made it responsible for overseeing the long-term capital planning for the State. Annually, the General Assembly passes appropriations for capital purposes and authorizes the State Treasurer to issue general obligation bonds to provide the financing for all or a portion of the appropriations. Bonds are backed by the full faith and credit of the State, including the State's power to levy additional taxes to ensure repayment of the debt.

During fiscal year 2015, the State of Vermont's outstanding general and special obligation bond debt increased by approximately \$22.9 million. This increase can be accounted for by the issuance of \$109.8 million of general obligation bonds offset by the redemption of \$48.2 million in general obligation bonds, \$1.5 million in special obligation bonds, and defeasance of \$37.2 million in general obligation bonds. Additional information on the State's bonded debt is contained in Note IV. G. 1. of the notes to the financial statements.

The State's general obligation bond ratings are as follows: Aaa by Moody's Investor Service (since February 2007), AA+ by Standard & Poor's Ratings Services (since September 2000), and AAA by Fitch Ratings (since April 2010).

Pension Obligations

The State has implemented the Governmental Accounting Standards Board Statement No. 68, *Accounting and Reporting for Pensions* (GASB 68). This statement replaces GASB Statement No. 27, *Accounting for Pensions by State and Local Governments* and requires that an employer report a net pension liability (NPL) and related changes to the NPL, instead of a net pension obligation (NPO).

While GASB Statement No. 68 changes the amount of net pension liability that is reported in the financial statements, governments may continue to fund their plans by calculating an actuarially determined contribution and measuring their funded status as it relates to that actuarially determined contribution. This funding information, which was previously required by GASB Statement No. 27 to be reported as Required Supplementary Information, is not required by GASB Statement No. 68. Instead, management is disclosing this information in the Management's Discussion and Analysis.

The actuarial valuation that was used to determine the funding status was as of June 30, 2015. This is different from the actuarial valuation that was used to determine the net pension liability under GASB Statement No. 68, which rolls forward amounts from an actuarial valuation performed as of June 30, 2013, to the measurement date of June 30, 2014. For additional information on the GASB Statement No. 68 valuation can be found in Note IV.G.4.

Additional information regarding the determination of the actuarially determined contribution is available from the Vermont State Treasurer. Additional information on the defined benefit pension plans can be found in Note IV. G. 4.

ECONOMIC FACTORS AFFECTING THE STATE

Capital Debt Affordability

Annually the Capital Debt Affordability Advisory Committee (CDAAC) completes a review of the size and affordability of the State tax-supported general obligation debt. By October 1, the CDAAC submits to the Governor and to the General Assembly an estimate of the maximum amount of new long-term general obligation debt that prudently may be authorized for the next two fiscal years. In December, 2014, the CDAAC proposed that the maximum amount of long-term general obligation debt authorized to be issued by the State for fiscal years 2016 and 2017 not exceed \$144.0 million. This represented a 9.9% reduction from the previous biennium's recommendation of \$159.9 million. At its September 2015

meeting, the Committee made a recommendation to maintain the current authorization not to exceed \$144 million for the 2016-2017 fiscal year biennium. This, coupled with a \$11.6 million premium in the State's recent bond sale that is being used to fund capital projects, provides a total capacity of \$155.6 million.

Economic Outlook

The Vermont near-term economic outlook includes a Vermont economy, along with the US economy, continuing to make forward progress toward a more "normal" state of affairs for output, jobs, and income growth. The most recent forecast, however, includes a greater than normal risk of uncertainty, both in terms of the macroeconimic environment and recent and ongoing structural developments within many of the key revenue sources on which the State depends.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the State of Vermont's finances for all of Vermont's citizens, taxpayers, customers, and investors and creditors. This financial report seeks to demonstrate the State's accountability for the money it receives. Questions concerning any of the information provided in this report or requests for additional information should be addressed to:

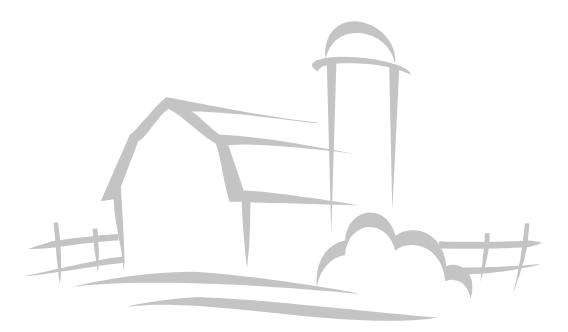

State of Vermont Department of Finance and Management 109 State Street, 5th Floor Pavilion Building Montpelier, Vermont 05609-0401

The State's component units issue their own separately issued financial statements. Their statements may be obtained by directly contacting them at the addresses found in Note I to the State's financial statements.

STATE OF VERMONT RECONCILIATION OF STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES - GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES - GOVERNMENTAL ACTIVITIES FOR THE FISCAL YEAR ENDED JUNE 30, 2015

Total net change in fund balances from the previous page\$	25,583,186
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of these assets is allocated over their estimated useful lives as	
depreciation expense. This is the amount by which capital outlays exceeded depreciation in the current period (net of internal service funds) ⁽¹⁾	228,132,110
Repayment of bond principal is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the statement of net position ⁽¹⁾	89,644,791
Bond proceeds provide current financial resources to the governmental funds, but issuing debt increases long-term liabilities in the statement of net position ⁽¹⁾	(120,732,958)
Receivables in the governmental funds that are not available to provide current financial resources are not reported as revenues in the governmental funds	3,374,611
Estimated personal income tax refunds that are not due and payable are not reported as expenditures in the governmental funds	6,387,350
Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds ⁽¹⁾	(90,775,458)
Internal service funds are used by management to charge the costs of certain activities, such as insurance and telecommunications to individual funds. The net revenue (expense) of the internal service funds is reported with governmental activities	8,867,341
Total changes in net position of governmental activities as reported on the statement of activities	150,480,973
(1)	

⁽¹⁾ Additional information on these amounts can be found in Note II. B.

STATE OF VERMONT NOTES TO BASIC FINANCIAL STATEMENTS JUNE 30, 2015

Note I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the State of Vermont (State) have been prepared in accordance with generally accepted accounting principles as applicable to governmental entities. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing accounting and financial reporting policies.

Newly implemented in these financial statements are the requirements of three new GASB statements. GASB Statement No. 68, *Accounting and Financial Reporting for Pensions*, requires that employers and non-employer contributing entities report a net pension liability and related pension expense as determined by the pension plans under the requirements contained in GASB Statement No. 67, *Financial Reporting for Pension Plans*. GASB Statement No. 69, *Government Combinations and Disposals of Government Operations*, provides accounting and financial reporting guidance for government combinations and disposals of government operations. GASB Statement No. 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date - an amendment of GASB Statement No.* 68, requires that upon implementation of GASB Statement No. 68, a government recognize a beginning deferred outflow of resources for its pension contributions made subsequent to the measurement date of the beginning net pension liability.

The accompanying financial statements present the financial position of the State, the results of operations of the State and the various funds and fund types, and the cash flows of the various proprietary funds. The financial statements are presented as of and for the period ending June 30, 2015.

The following is a summary of the more significant accounting policies employed in the preparation of these financial statements.

A. Financial Reporting Entity

The State of Vermont's Primary Government is comprised of three branches: the Executive Branch, with the Governor as the chief executive officer; the Legislative Branch, with a Senate of 30 members and a House of Representatives of 150 members; and the Judicial Branch, with Supreme and Superior Courts and the Judicial Bureau.

The basic financial statements include all funds, agencies, boards, commissions and organizations of the primary government (the State), as well as component units that have been determined to meet the requirements for inclusion in the State's financial reporting entity.

Component Units are entities that, although legally separate from the State, have been included because they are either financially accountable to the State, or have relationships with the State such that exclusion would cause the State's financial statements to be misleading or incomplete. These component units are financially accountable to the State appoints a voting majority of the organization's governing body and it is able to impose its will on that organization, or if there is a potential for the organization to provide a financial benefit or financial burden to the State. Alternatively, for those organizations where the State does not appoint a voting majority, an organization is financially accountable to the State if the organization is fiscally dependent and the organization provides a financial benefit or financial burden to the State.

Component unit activity may be "blended" into the activity of the primary government or may be reported separately. Blended component units are, in substance, part of the primary government's operations, even though they are legally separate entities. Thus, blended component units are appropriately presented as funds of the primary government. If they are reported separately, they are called "discretely presented component units" and are reported in a separate column in the government-wide financial statements to emphasize that

they are legally separate from the primary government. Each discretely presented component unit's designation as either "major" or "non-major" has been determined by the entity's relative significance to the State. Additional information as well as separately issued financial reports may be obtained by contacting the individual entity desired at the address given in the following text.

Discretely Presented Major Component Units

The "Discretely Presented Component Units" contained in the government-wide financial statements report the financial results of the following entities:

Vermont Student Assistance Corporation (VSAC) – VSAC was established by the Vermont Legislature to provide opportunities for persons who are residents of Vermont to attend colleges or other institutions of higher education by awarding grants and by making, financing, servicing, and guaranteeing loans to qualifying students. The Governor of the State appoints five of the eleven members of the Board of Directors and the State Legislature appoints two additional members. The State of Vermont has the ability to impose its will upon VSAC through its ability to change or alter the organization, structure or programs. For further information, contact their administrative offices at 10 East Allen Street, P.O. Box 2000, Winooski, Vermont 05404.

University of Vermont (UVM) - The University of Vermont's financial report includes both the University and the State Agricultural College. The State appoints twelve of the twenty-three voting members of the Board of trustees. The State has assumed an obligation to provide financial support through its annual appropriation and is obligated to maintain the University's debt service reserves. Additional information may be obtained by contacting the university's administrative offices at 348 Waterman Building, Burlington, Vermont 05405.

Vermont State College System (VSC) – The Vermont State College System's annual report includes the financial activity for the following organizations:

System Offices and Services Community College of Vermont Castleton State College Johnson State College Lyndon State College Vermont Technical College Vermont Interactive Television Allied Health Nursing Program Vermont Manufacturing Extension Center

The Governor, with the advice and consent of the Senate, appoints nine of the fifteen members of the board of trustees, and the legislature appoints an additional four members. The State has assumed an obligation to provide financial support through its annual appropriations and has assumed an obligation to maintain VSC's debt service reserves. Additional information about the system itself or about any of the individual organizations included in the system may be obtained by contacting the Office of the Chancellor, Vermont State Colleges, PO Box 7, Montpelier VT 05601.

Vermont Housing Finance Agency (VHFA) – The VHFA was created in 1974 by an Act of the General Assembly of the State of Vermont for the purpose of financing and promoting affordable, safe and decent housing opportunities for low- and moderate-income Vermonters. The State appoints voting members of VHFA's board of commissioners. The State is able to impose its will on the organization as the Governor can remove any member of the board at will. The State also has an obligation to maintain the organization's debt reserves. Further information may be obtained by contacting the Agency's administrative offices at 164 Saint Paul Street, Burlington, VT 05401.

Discretely Presented Non-major Component Units

*Vermont Economic Development Authority (VEDA)** – VEDA, a tax-exempt entity, was created by the Vermont Legislature for the purpose of promoting economic prosperity in the State by directly financing eligible

businesses and projects including manufacturing, agricultural, and travel and tourism enterprises; and by operating programs which provide eligible borrowers with access to capital. The authority has 15 voting members consisting of the Secretary of the Agency of Commerce and Community Development, the State Treasurer, the Secretary of Agriculture, Food and Markets, the Commissioner of Forest, Parks, & Recreation, and the Commissioner of Public Service or a designee of any of the above; and ten members, who are residents of the State of Vermont and appointed by the Governor with the advice and consent of the senate. The State has the ability to impose its will on the entity as the Governor can remove members at will and the State can change the structure and activities of the organization at any time. The entity's services primarily benefit the Vermont citizenry.

VEDA also administers the State Infrastructure Bank (SIB), the Drinking Water State Revolving Loan Fund – Private Loans, the Brownfields Revitalization Fund, and the Clean Energy Development Fund. These four funds are administered for the benefit of the State and are consolidated and reported in VEDA's agency fund. Audited financial statements and additional information may be obtained by contacting VEDA at 58 East State Street, Suite 5, Montpelier, Vermont 05602.

Vermont Housing and Conservation Board (VHCB) – The Legislature created and charged this organization with two goals: create affordable housing for Vermont residents; and conserve and protect Vermont's agricultural lands, historic properties, important natural areas, and recreational lands. The VHCB's Board of Directors is appointed by the Governor of the State of Vermont and there is a material financial relationship. Funding for the organization is provided by the Legislature, comprised of 50% of the revenue from the property transfer tax, plus other monies appropriated from time to time. The VHCB issues audited financial statements under separate cover. Additional information may be obtained by contacting them at 58 East State Street,, Suite 5 Montpelier, Vermont 05602.

Vermont Sustainable Jobs Fund, Inc. (VSJF) – The Vermont Legislature established the Sustainable Jobs Fund Program to create quality jobs that are compatible with Vermont's natural and social environment. In accordance with enabling legislation the VSFJ, a non-profit 503(c)(3) corporation was established to implement the program in order to fulfill the goals of the jobs program as listed in 10 V.S.A. 326(a). The VSJF's Board of Directors consists of the Secretary of the Agency of Commerce and Community Development, the Secretary of the Agency of Agriculture, Food and Markets, a director appointed by the Governor, and eight independent directors, no more than two of whom can be State government employees or officials. The independent directors are selected as vacancies occur by vote of the existing directors. The VSJF is included as a component unit of the State as it is closely related and financially integrated with the State of Vermont. Audited financial statements and additional information may be obtained by contacting them at 3 Pitkin Court, Suite 301, Montpelier, Vermont 05602.

Vermont Municipal Bond Bank (VMBB) – The Vermont Legislature established the VMBB for the express purpose of fostering and promoting adequate capital markets and facilities for borrowing money by governmental units of the State of Vermont for the financing of public improvements or other public purposes. The Governor appoints the four directors, and can remove members at will. VMBB is authorized, with written consent of the Governor and the State Treasurer, to carry out these charges by borrowing money or by issuing its own bonds and notes to obtain funds which are then utilized to purchase bonds and notes issued by local governmental entities. The State is obligated annually to appropriate any funds necessary to maintain required reserves of the bond bank. The VMBB has an annual fiscal year (December 31) and issues audited financial statements under separate cover.

VMBB also administers the Special Environmental Revolving Fund in accordance with 24 V.S.A. 4753(b). This fund was created by the Vermont Legislature for the purpose of fostering and promoting timely expenditures by municipalities for water supply, water pollution control, and solid waste management. The fund has a June 30 year-end and issues its own audited financial statements. For financial reporting purposes, its financial statements have been consolidated with the State's Federal Revenue Fund financial statements in this CAFR. Further information regarding VMBB or the Special Environmental Revolving Fund may be obtained by contacting VMBB at 20 Winooski Falls Way, Winooski VT 05404.

VERMONT

Vermont Educational and Health Buildings Financing Agency (VEHBFA) – VEHBFA is a non-profit entity which finances or assists in the financing of projects for eligible Vermont educational or health related entities. The majority of the Board of VEHBFA is appointed by the Governor of the State. The Board may appoint officers, agents, consultants and employees and fix their compensation, subject to approval of the Governor. It has a December 31 (annual) year-end and issues audited financial statements under separate cover. For additional information, they may be contacted at 20 Winooski Falls Way, Winooski VT 05404.

Vermont Center For Geographic Information (VCGI) –VCGI was established as a public non-profit chartered by the State of Vermont to assist the Vermont GIS Community with creating a comprehensive strategy for the development and use of a geographic information system. Under the terms of Act 179 of 2014, the VCGI ceased operations as a non-profit corporation, and all remaining assets and liabilities were merged into the State's Agency of Commerce and Community Development. The accounting and financial reporting for the merger was in accordance with GASB Statement No. 69. Additional information can be found in note V. F.

Vermont Veterans' Home – The Vermont Veterans' Home was originally chartered in 1884 by the Vermont Legislature and incorporated on November 24, 1884. A Board of Trustees appointed by the Governor oversees the operations of the Vermont Veterans' Home. The State can impose its will on the entity as directors serve at the pleasure of the Governor. The Vermont Veterans' Home is financially accountable to the State as the State provides all funding and controls the finances of the Home. The Vermont Veterans' Home issues its own audited financial statements under separate cover. Additional information may be obtained by contacting them at 325 North Street, Bennington, Vermont 05201.

Vermont Rehabilitation Corporation – The Vermont Rehabilitation Corporation is a non-profit quasi-public corporation that was incorporated in 1935 in accordance with 10 V.S.A. 272-277. Its main purpose is to provide a limited source of loan funds to family farmers or prospective family farmers under terms and conditions which will reduce their investment costs to an extent that offers them a reasonable chance to succeed. The Vermont Rehabilitation Corporation had been included as a component unit of the State as it was closely related and financially integrated with the State of Vermont. The corporation was dissolved in fiscal year 2015 and the remaining assets granted to the Vermont Economic Development Authority

Vermont Telecommunications Authority – The Vermont Telecommunications Authority was created in June 2007, pursuant to 30 V.S.A. 8061, for the purposes of ensuring that all regions of the State have access to affordable broadband and mobile telecommunications services and promoting and facilitating ongoing upgrades in statewide telecommunications infrastructure in the most efficient and economically feasible manner. The State appoints all members of the Vermont Telecommunications Authority and the State has the ability to impose its will on the entity as it must approve all bonds issued by the authority. Additional information may be obtained by contacting the corporation at 100 State Street, Suite 342, Montpelier VT 05620-3205.

Vermont Transportation Authority (VTA) – The Vermont Legislature specifically authorized the creation of VTA pursuant to the acquisition, operation, and support of an authorized transportation facility as defined in 29 V.S.A. 701. All members of the authority are appointed by the Governor, and all resources revert to the State on termination of the authority. The VTA, currently inactive, has remained in the State Statutes in case it becomes necessary to reactivate it in the future. Additional information may be obtained from the Agency of Transportation – Rail Division, National Life Building, Montpelier, Vermont 05633–5001.

*- Indicates entity was audited by KPMG LLP.

Joint Ventures

A joint venture is a legal entity or other contractual arrangement that is owned, operated or governed by two or more participants as a separate and specific activity subject to joint control, in which the participants retain an ongoing financial interest or responsibility. The Tri-State Lotto Commission (31 V.S.A. 673) is classified as a joint venture. The financial activities' of this organization have not been included in the State's financial statements; however, see Note V. E. for additional information regarding the organization.

Jointly-governed Organizations

The following organizations are classified as jointly-governed organizations, because they represent units over which control is exercised jointly by the State along with various other governmental agencies. There is no specific ongoing financial benefit or burden for the State associated with these organizations, which distinguishes these arrangements from those classified as joint ventures. The financial activities of these organizations are not included in the State's financial statements.

Connecticut River Valley Flood Control Commission (10 V.S.A. 1153) New England Board of Higher Education (16 V.S.A. 2692) New England Interstate Water Pollution Control Commission (10 V.S.A. 1333) Northeastern Forest Fire Protection Commission (10 V.S.A. 2503)

Related Organizations

Related organizations are separate legal entities for which the primary government appoints a voting majority of the board members, but does not have either (a) the ability to impose its will on the organization or (b) a relationship of financial benefit or burden with the organization. The Vermont State Housing Authority (24 V.S.A. 4005) has been classified as a related organization, and thus their financial activity has not been included in the State's financial statements.

Excluded Organizations

The following entities have been determined not to be part of the reporting entity after applying the criteria of GASB Statement No. 14 "The Financial Reporting Entity", as amended by GASB Statements No. 61.

Vermont Information Technology Leaders (VITL) Vermont Council on the Humanities Vermont Council on the Arts Vermont Historical Society Vermont Public Power Supply Authority Connecticut River Atlantic Salmon Commission (10 V.S.A. 4654) Texas Low Level Radioactive Waste Disposal Compact (10 V.S.A. 7013)

These organizations have not been included in the reporting entity because they are legally separate entities and the voting majority of their governing boards are not appointed by the State. They are not fiscally dependent on the State's primary government and exclusion from the reporting entity would not render Vermont's financial statements incomplete or misleading.

B. Basis of Presentation—Government-wide Financial Statements

The basic financial statements of the State of Vermont include both *government-wide statements* and *fund financial statements*. The focus of the government-wide statements is on reporting the operating results and financial position of the State as a whole and present a longer-term view of the State's finances. The focus of the fund financial statements is on reporting on the operating results and financial position of the State and present a shorter-term view of how operations were financed and what remains available for future spending.

While separate government-wide and fund financial statements are presented, they are interrelated. The governmental activities column incorporates data from governmental funds and internal service funds, while business-type activities incorporate data from the government's enterprise funds. Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, although the latter are excluded from the governments.

The State of Vermont's Government-wide Financial Statements (the Statement of Net Position and the Statement of Activities) report information on all of the financial activities of both the primary government and its component units, except fiduciary activity. Fiduciary fund activity has not been included in these entity-wide

VERMONT

statements in accordance with the requirements of GASB Statement No. 34. For the most part, the effect of interfund activity has also been removed from these government-wide statements. Primary government activities are segregated between governmental activities and business-type activities. Governmental activities' sources of revenues are normally taxes and inter-governmental revenues. Business-type activities rely, to a significant extent, on fees and charges for support. Further, the primary government is reported separately from its legally separate discretely presented component units.

The Statement of Activities demonstrates the degree to which direct expenses of a given function, segment, or component unit are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function, segment, or component unit. Program revenues include charges to customers who purchase, use, or directly benefit from goods or services provided by a given function, segment, or component unit. Program revenues also include grants and contributions that are restricted to meeting the operational or capital requirements of a particular function, segment, or component unit. Items not properly included among program revenues are reported instead as general revenues. Taxes and other resources that are dedicated internally are reported as general revenues rather than as program revenues. The State does not allocate general government (indirect) expenses to other functions.

Net position (the amount by which assets and deferred outflows exceed liabilities and deferred inflows) are reported on the Statement of Net Position in three components:

- (1) Net investment in capital assets- total amount of capital assets, net of accumulated depreciation and reduced by outstanding balances of bonds and other debt that are related to the acquisition or construction of those assets, including related deferred outflows of resources and deferred inflows of resources;
- (2) Restricted for amounts when constraints placed on the net position are either externally imposed, or are imposed by constitutional provisions or enabling legislation.
- (3) Unrestricted the total net position which do not fit the two preceding categories.

When both restricted and unrestricted resources are available for use, generally it is the State's policy to use restricted assets first with unrestricted resources utilized as needed.

C. Basis of Presentation—Fund Financial Statements

The financial activities of the State are recorded in individual funds, each of which is deemed to be a separate accounting entity. A fund is defined as a separate accounting entity with a self-balancing set of accounts. The State uses fund accounting to report on its financial position and results of operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities.

Separate financial statements are provided for governmental funds, proprietary funds, fiduciary funds, and discretely presented component units. Major governmental funds, major proprietary funds, and major component units are reported in individual columns in their respective fund financial statements. Non-major funds and component units are combined and reported in a single column. The single test for classifying a fund as either major or non-major consists of applying the following two steps:

- a. Total assets plus deferred outflows of resources, liabilities plus deferred inflows of resources, revenues, or expenditures/expenses of that individual governmental or enterprise fund are at least 10 percent of the corresponding element total (assets plus deferred outflows of resources, liabilities plus deferred inflows of resources, etc.) for all funds in that category or type (that is total governmental or total enterprise), <u>and</u>
- b. The same element that met the 10 percent criterion in (a) is at least 5 percent of the corresponding element total for all governmental and enterprise funds combined.

In addition to the above major fund criteria, any other governmental or enterprise fund that government officials believe is particularly important to financial statement users (i.e. because of public interest or for consistency) may be reported as a major fund.

The financial activities of the State reported in the accompanying financial statements have been classified into the following governmental, proprietary and fiduciary funds:

Governmental Funds

General Fund – The Vermont Legislature has established the General Fund as the basic operating fund of the State. As such, the General Fund is used to finance and to account for all expenditures for which no special revenues have otherwise been provided by law. All revenues received by the State and not otherwise required by law to be deposited in any other designated fund or used for any designated purpose are deposited in the General Fund. Unexpended and/or unencumbered appropriation balances will, unless otherwise directed by law, revert to fund balance at the end of the fiscal year to be re-appropriated in the future.

Special Revenue Funds - These funds are used to account for and report the proceeds of specific revenue sources that are restricted, committed or assigned to expenditures for specified purposes other than debt service or capital projects, and include the following:

Transportation Fund – This fund is a major special revenue fund. It is used primarily for preservation, maintenance, and improvements to the State's transportation infrastructure. This infrastructure includes highways, bridges, railroads, airports, public transportation, and other related activities. The fund is also used for construction of transportation capital facilities. The primary sources of revenue in this fund are motor fuel taxes, motor vehicle purchase and use tax, motor vehicle license and registration fees, traffic ticket revenue, other statutorily specified revenues, as well as reimbursements from the federal government for transportation projects.

Education Fund – This fund is a major special revenue fund. It was established by the Vermont Legislature to equalize statewide education funding requirements. Sources of funding and allowable expenditures are codified in 16 V.S.A. 4025. These allowable expenditures include payments to school districts and supervisory unions for the support of education, the costs of short-term borrowing, and statewide education tax income sensitivity adjustments. Funding includes the statewide education tax, allocations of other taxes, State lottery profits, Medicaid reimbursements, and appropriated transfers from the General Fund.

Special Fund – This fund is a major special revenue fund. It combines many individual special revenue funds that account for proceeds or specific revenues not categorized above that are limited to expenditures for specific purposes. These purposes cross the entire range of State government activities.

Federal Revenue Fund – This fund is a major special revenue fund. All federal grant receipts are recorded in this fund except for those federal funds specifically designated for human services as part of the global commitment to health Medicaid waiver, transportation or fish and wildlife purposes (which are recorded in the State's Global Commitment Fund, Transportation Fund or Fish and Wildlife Fund respectively).

Global Commitment (to Health) Fund – This fund is a major special revenue fund created in accordance with Section16c of 33 V.S.A. 1901(e). It is the result of Vermont entering into a Medicaid demonstration waiver agreement with the Federal Government. The original waiver agreement was amended on January 1, 2011, was renewed on October 2, 2013, and will expire on December 31, 2016. This agreement was amended January 30, 2015, bringing the former Choices for Care demonstration waiver into the Global Commitment demonstration waiver. This agreement caps Federal expenditures in Medicaid services, but gives Vermont great latitude in promoting universal access to health care, cost containment, and effective administration. The State will be financially at risk for managing costs within

the capped limits but stands to benefit from any savings realized from program efficiencies. As part of the agreement, the Agency of Human Resources (AHS) has contracted with the Department of Vermont Health Access (DVHA), which serves as a publicly sponsored managed care organization, and adheres to all Federal managed care organization regulations.

In addition to the grant received from the Federal Government, General and Special Fund resources are used to fund payments from the Agency of Human Services to the DVHA for the purpose of providing services under the global commitment to health care waiver approved by the Federal Centers for Medicare and Medicaid Services under Section 1115 of the Social Security Act. These payments are reported as transfers out of the General and Special Funds and as transfers in to the Global Commitment Fund. These funds will be expended as appropriated by the general assembly, authorized by the Director of the DVHA, and approved by the Commissioner of Finance and Management consistent with agreements between the DVHA and departments delivering eligible services under the waiver. These resources paid to the Global Commitment Fund are adjusted by the AHS each quarter to the actual expenditures paid.

Non-major governmental funds column includes the balances and activities of the following:

Fish and Wildlife Fund – This fund is a non-major special revenue fund. The fund's revenue is committed by statute and can only be utilized for fish and wildlife purposes. Principal sources of revenue include license fees and federal grants.

Capital Projects Funds – These funds, consisting of the General Obligation Bond Projects Fund and the Transportation Infrastructure Bond Projects Fund, are non-major governmental funds, and account for and report financial resources that are restricted, committed, or assigned to be used for expenditures for capital outlays, including the acquisition or construction of capital facilities and other capital assets. These capital expenditures may be for the State directly or for outside organizations such as the Vermont State College System, municipalities, etc.

Debt Service Funds—These funds, consisting of the General Obligation Debt Service Fund and the Transportation Infrastructure Debt Service Fund, are non-major governmental funds, and account for and report financial resources that are restricted, committed, or assigned to be used for expenditures for bond principal and interest.

Permanent Funds – These are non-major governmental funds that report resources that are legally restricted to the extent that only earnings, not principal, may be expended for purposes that benefit the government or citizenry, such as higher education, cemetery care, and monument preservation.

Proprietary Funds

These funds account for those activities for which the intent of management is to recover the cost of providing goods or services to the general public or other departments of government primarily through user charges; or where prudent financial management dictates that periodic determinations of results of operations are appropriate. These funds include the following types:

Enterprise Funds – These nine funds are used to account for operations that are financed and operated in a manner similar to private business enterprises. The State's intent in these funds is to recover the costs including depreciation expense associated with providing the goods and services to the public primarily through user charges. Three of these enterprise funds, reporting the activities of the State's unemployment compensation program, the liquor control board, and the State's lottery program, are reported as "major funds" while the remaining six are reported as non-major funds.

Unemployment Compensation Trust Fund – accounts for federal monies and unemployment taxes collected from employers to provide payment of benefits to the unemployed (21 V.S.A. Chapter 17).

Liquor Control Fund – accounts for the operations of the Liquor Control Board which purchases, distributes, and sells distilled spirits through its agency stores (7 V.S.A. Chapter 40).

Vermont Lottery Commission – accounts for the operations of the Vermont Lottery (31 V.S.A. Chapter 14). The net profits of the Vermont Lottery Commission are used to support public education and are transferred monthly to the Education Fund.

Internal Service Funds – These twenty-three separate funds are used to account for the financing of goods and services provided by one State department to other State agencies, departments, or intergovernmental units. Their objective is not to make a profit but rather to recover the total cost of providing these goods and services by charging users of their services and products. Activities accounted for in the State's internal service funds include risk management; employee group insurance programs; equipment acquisition and maintenance; rental and maintenance of facilities; financial, human resource, audit, and information technology services; postage, copying and supply procurement services; and State vehicle fleet management. In the government-wide financial statements, Internal Service Funds are reported within the governmental activities.

Fiduciary Funds

These funds are used to account for assets held in a trustee capacity or as an agent for individuals, private organizations, or other governmental units. These funds include the following:

Pension and Other Postemployment Benefit Trust Funds – These funds are used to report assets and associated financial activity that are held in trust for the members and beneficiaries of the Vermont State Retirement (defined benefit) System, the Vermont State Defined Contribution Retirement System, the State Teachers' Retirement (defined benefit) System, the Vermont Municipal Employees' (defined benefit) Retirement System, the Vermont Municipal Employees' (defined benefit) Retirement Account, the State Employees' Postemployment Benefit Trust Fund, the Retired Teachers' Health and Medical Benefit Fund and the Vermont Municipal Employees' Health Benefit Fund.

Investment Trust Fund – Under the authority granted in 3 V.S.A. 523, beginning in Fiscal Year 2009, the State Treasurer created and began accepting deposits into the Vermont Pension Investment Committee (VPIC) Investment Pool, an external investment pool. The investment trust fund is used to account for the investments of the external participants in the Pool.

Private Purpose Trust Fund – The State's only fund in this category is the *Unclaimed Property Fund*, which accounts for all abandoned property that is required to be remitted to the State. The Unclaimed Property Division in the State Treasurer's Office administers procedures for returning this property to its rightful owner if they can be located. In addition to monetary assets, from time to time, the Unclaimed Property Division may have custody of tangible property that has not been valued and therefore is not reported in the financial statements.

Agency Funds – These funds report assets and liabilities for deposits and investments entrusted to the State as agent for others. They have no net position and report items such as Federal income tax withholding, social security tax withholding, etc.

D. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured, such as *current financial resources* or *economic resources*. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

Government-wide Financial Statements – The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements have been met.

VERMONT

Statewide education property taxes are recognized as revenues in the year for which the taxes are levied. This property tax is levied by the State on July 1, is included in the property tax bills levied by municipalities, and is collected by municipalities. The municipalities, by December 1 and June 1, must make payment to the State Treasurer in the amount specified by the Commissioner of Taxes.

Governmental Fund Financial Statements – The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period.

Major revenue sources considered susceptible to accrual include federal grants, interest on investments, and sales and income taxes.

Expenditures generally are recorded when a liability is due and payable, with the following exceptions:

- a. Employees' vested annual, personal, and compensatory leave time are recorded as expenditures when utilized. The amount of accumulated leave unpaid at the end of the fiscal year has been reported only in the accrual-basis financial statements and does not include any accruals for the State's share of any payroll taxes that will be due when the expenditures are actually paid. See the "Compensated Absences" section of this footnote for additional information.
- b. Interest on general long-term debt is recognized when due to be paid.
- c. Debt service expenditures and claims and judgments are recorded only when payment is due to be paid.

Proprietary Funds, Fiduciary Funds, and Discretely Presented Proprietary Fund Type Component Units – The financial statements presented for these types of funds use the economic resources measurement focus and the accrual basis of accounting. Revenues are recognized when earned and expenses are recorded when the liabilities are incurred.

Proprietary funds distinguish operating revenues and expenses from non–operating items. Operating revenues and expenses generally result from providing services, and producing and delivering goods in connection with the proprietary fund's principal ongoing operations. Revenues and expenses not meeting this definition are categorized as non-operating revenues and expenses.

E. Assets, Liabilities, Deferred Outflows/Inflows, and Net Position/Fund Balance

Cash and Cash Equivalents

Cash balances for most funds are deposited with the State Treasurer. Except for the Pension and Vermont Municipal Employees Health Benefit Trust Funds, Investment Trust Fund, and Capital Projects Funds, cash balances deposited with the State Treasurer are pooled together and amounts that are not immediately required are invested in short-term investments.

Income earned by these short-term investments is allocated based on average daily balances to those funds authorized to receive it while any remaining earnings are deposited in the General Fund.

Cash and cash equivalents as reported in the financial statements include bank accounts, imprest cash, shortterm investments with an original maturity of three months or less such as certificates of deposit, commercial paper, federal government agencies' discount notes, money market accounts, and repurchase agreements.

Investments

Investments are stated at fair value. Fair values of investments are generally based on quoted market prices. For additional information regarding types of investments and basis of valuation, see Note IV.B.—Investments.

Receivables

Receivables in the government-wide financial statements represent amounts due to the State at June 30 that will be collected at some time in the future. They consist primarily of accrued taxes and federal grants and are reported net of allowance for uncollectible accounts. See Note IV.C.—Accounts Receivable for further information.

Receivables reported in the governmental funds financial statements consist primarily of accrued taxes, federal grants receivable, and notes receivable from drinking water and clean water special environmental loans. Other receivables include primarily fees, fines, and expenditure reimbursements due to the Medicaid program from drug companies and third party insurance companies. Revenues accrued in the governmental funds' financial statements consist primarily of accrued taxes, and other receivables that will be collected by the State within 60 days after year-end. Amounts estimated to be collected after the 60-day revenue recognition period are recorded as unavailable revenues. Federal receivables are amounts due from the federal government to reimburse the State's expenditures incurred pursuant to federally funded programs. Federal grant revenues are accrued when the qualifying expenditure is incurred. Notes receivable in the General Fund consist primarily of a Vermont Economic Development Authority note held by the State. See Note V.C. – Contingent Liabilities for further information. No allowances for uncollectible amounts have been recognized in these notes receivable.

Inventories

Inventories of materials and supplies in governmental funds are recorded as expenditures when purchased. Inventories reported in the proprietary funds are valued at the lower of cost or market, except inventories reported in the Federal Surplus Property Fund (an enterprise fund) are reported at the federal acquisition cost. Cost valuation methods used in the various funds are as follows: weighted average method – Liquor Control enterprise fund, Vermont Life Magazine enterprise fund, Highway Garage internal service fund, and Offender Work Programs internal service fund; specific identification method – Vermont Lottery Commission enterprise fund, Federal Surplus Property enterprise fund, and State Surplus Property internal service fund; and first-in, first-out method – Postage internal service fund.

Prepaid Expenses

In the governmental funds, all purchases are recorded as expenditures when the invoice is entered for payment. In the proprietary and fiduciary funds, certain payments reflect costs applicable to future accounting periods and as such, are recorded as prepaid expenses. These prepaid items will be expensed as they are liquidated.

Capital Assets and Depreciation

Capital assets, which include property, plant, equipment, art and historical treasures, and infrastructure assets, are reported in the applicable governmental or business-type activities columns in the government-wide Statements of Net Position, and in the fund financial statements for the proprietary and fiduciary funds. All purchased capital assets are valued at historical cost or estimated historical cost, if actual historical cost is not available. Donated assets are valued at estimated fair market value on the date donated to the State.

Capital assets, except as stated below, have an initial cost of at least \$5,000, and provide a future economic benefit for a minimum of 2 years. This includes buildings that are not considered to be part of an infrastructure asset. All land and land use rights, regardless of cost, are capitalized and are not depreciated. Infrastructure assets are defined as long-lived economic resources that are normally stationary in nature, utilized primarily by the general public as opposed to State employees, cost at least \$50,000 and provide future economic benefit for a minimum of 3 years. Normally, infrastructure assets are much greater in value, have a longer economic life, and can be preserved for a greater number of years than most capital assets. Software with a cost of at least \$50,000 and a useful life of more than two years, and internally generated intangible assets with a cost of at least \$150,000 and a useful life of more than one year are capitalized.

Capital assets are depreciated over their useful lives using the straight-line mid-month depreciation method. Useful lives for buildings are 5 to 50 years, equipment is 3 to 20 years, software is 3 to 10 years, and infrastructure assets are 7 to 80 years. Additional disclosures related to capital assets and assets acquired through capital leases are found in Notes IV. E. - Capital Assets - and IV. G. 3. - Lease Commitments - respectively.

When a capital asset is disposed of, its cost and related accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in income for the period. Repairs and maintenance are recorded as expenses. Significant renewals and improvements that increase the life expectancy are capitalized and deductions are made for retirements resulting from the renewals or improvements. Interest incurred on debt issued for construction of governmental activities capital assets is not capitalized.

The majority of the historic artifacts and collections that are maintained by the various State agencies and departments are not included in the capital asset reporting. The items not reported are protected and preserved, held for public exhibition and educational purposes and the proceeds from any sales of such items are used to acquire new items for the collection.

Deferred Outflows/Inflows of Resources

In addition to assets, the Statement of Net Position reports a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will *not* be recognized as an outflow of resources (expense/expenditure) until then. The Primary Government has three items that qualify for reporting in this category, the unamortized balance of losses on bond refunding, changes in proportional share, and pension contributions made subsequent to the measurement date, all reported in the government-wide Statement of Net Position. A loss on a bond refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is capitalized and amortized over the shorter of the life of the refunded or refunding debt. Changes in proportional share are capitalized and recognized over a period equal to the expected remaining service lives of all employees. Pension contributions made subsequent to the measurement date will be recognized as a reduction of the net pension liability after the next measurement date.

In addition to liabilities, the Statement of Net Position reports a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will *not* be recognized as an inflow of resources (revenue) until that time. The Primary Government has one type of item, which only arises under the modified accrual basis of accounting, that qualifies for reporting in this category, and that is *unavailable revenue*. Governmental funds report unavailable revenue in the balance sheet for revenue that is not available under the modified accrual basis. The amount is capitalized and recognized as revenue in the period that the it becomes available. The Primary Government has two items that qualify for reporting in this category in the government-wide financial statements, both related to pensions. Net differences between projected and actual earnings on pension plan investments is capitalized and recognized over a five year period. Changes in proportional share of pension related amounts are capitalized and recognized over a period equal to the expected remaining service lives of all employees.

Additional disclosures related to deferred outflows and inflows of resources are included in Notes IV. F. -Deferred Outflows and Deferred Inflows and IV. G. 4. - Retirement Plans and Other Postemployment Benefits.

Tax Refunds Payable

Tax refunds payable primarily represent amounts owed by the State to taxpayers because of overpayment of their income tax liabilities. Tax refunds payable, which reduce respective tax revenues, are accrued to the extent they are measurable based on payments and estimates. The amount reported as tax refunds payable at June 30, 2015 in the governmental funds statements is comprised of tax refunds for filed tax returns due and payable at June 30, 2015. The amount reported as tax refunds payable at June 30, 2015 in the

government-wide financial statements is comprised of estimated tax liability overpayments for the first and second calendar quarters of year 2015's tax liability that will be paid out in calendar year 2016.

Arbitrage Rebate Obligations

In accordance with Section 148(f) of the U.S. Internal Revenue Code, the State must rebate to the U.S. Government the excess of interest earned from the investment of certain debt proceeds over the yield rate of the applicable debt. Arbitrage rebate, if any, is due and payable on each five-year anniversary of the respective debt issue. As of June 30, 2015, the primary government had no outstanding arbitrage rebate obligation. The arbitrage rebate liabilities reported by the discretely-presented component units are included in "Other Long-term Liabilities" in the government-wide statement of net position.

Compensated Absences

Compensated absences' liabilities include amounts for accumulated unpaid vacation, compensatory time, and personal leave credits. Classified State employees accrue vacation leave based on the number of years employed up to a maximum rate of 24 days annually and may not accumulate more than a maximum of 45 days (360 hours) at any one time. This liability is expected to be liquidated in future periods as either salary payments or cash payments upon termination of employment. Compensatory time and personal leave time accumulates as earned by the employees but must be taken within the subsequent year or be forfeited.

Liabilities for compensated absences are recorded in the government-wide statement activity where the employees are assigned, and in the funds, where applicable. The amounts are calculated based on an employee's pay rate in effect as of year-end. Additional information including changes in balances may be found in Note IV. G. 5. – Changes in Long-term Liabilities.

Employees earn sick leave credits based on the number of years employed with a maximum accrual rate of 21 days per fiscal year. Sick leave may only be liquidated if and when sickness or injury is incurred. Additionally, if employment is terminated, any sick leave that the individual may have accrued is forfeited without any payout; therefore, it is not an accruable liability to the State. There is no limit on the amount of sick leave an employee may accumulate.

Encumbrances

Contracts and purchasing commitments are recorded as encumbrances when the contract or purchase order is executed. When the terms of the purchase order or contract have been fulfilled and payment to the contracting party is due, the encumbrance is liquidated and the liability and expenditure are recorded. Encumbrances remaining at fiscal year-end are reported within the restricted, committed, or assigned fund balances of the governmental funds, as appropriate. The amount of the encumbrances remaining in the general fund, reported as assigned fund balances, is \$5,796,975.

Fund Balances

The fund balance amounts for governmental funds have been classified in accordance with GASB Statement No. 54—*Fund Balance Reporting and Government Fund Type Definitions*. Fund balances are reported in classifications that comprise a hierarchy based primarily on the extent to which the government is bound to honor constraints on the specific purposes for which amounts in those funds can be spent. As a result, amounts previously reported as reserved and unreserved are now reported as nonspendable, restricted, committed, assigned, or unassigned.

 Nonspendable fund balance includes items that cannot be spent. This includes activity that is not in a spendable form (inventories, prepaid amounts, long-term portions of loans or notes receivable, or property held for resale unless the use of the proceeds are restricted, committed or assigned) and activity that is legally or contractually required to remain intact, such as a principal balance in a permanent fund.

- Restricted fund balances have constraints placed upon the use of the resources either by an external party or imposed by law through a constitutional provision or enabling legislation.
- Committed fund balances can be used only for specific purposes pursuant to constraints imposed by a formal action of the Vermont Legislature, the State's highest level of decision-making authority. This formal action is the passage of a law by the legislature specifying the purposes for which amounts can be used. The same type of formal action is necessary to remove or change the specified use.
- Assigned fund balance includes amounts that are constrained by the State's intent to be used for a specific purpose, but are neither restricted or committed. For governmental fund types other than the General Fund, this is the residual amount within the fund that is not restricted or committed. In the General Fund, amounts are assigned by the Agency of Administration under authorization by the Legislature in the annual Budget Adjustment Act.
- Unassigned fund balance is the residual amount of the General Fund not included in the four categories above. Also, any deficit fund balances within the other governmental fund types are reported as unassigned.

When both restricted and unrestricted amounts are available for use, generally it is the State's policy to use restricted amounts first, with unrestricted resources utilized as needed. In the case of unrestricted resources, it is generally the State's policy to use committed amounts first, followed by assigned amounts, then unassigned amounts as needed. Additional information may be found in Note IV. H.—Fund Balance/Net Position

Bond Discounts, Premiums and Issuance Costs

In the government-wide financial statements, bond discounts or premiums are capitalized and amortized over the term of the bonds using the effective interest rate method. Bonds payable are reported net of the applicable bond premium or discount. Bond issue costs other than prepaid insurance are reported as expenses.

In the fund financial statements, governmental fund types recognize bond discounts, premiums and issuance costs in the period the bond proceeds are received. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issued are reported as other financing sources while discounts are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds, are reported as expenditures.

Interfund Transactions

Interfund Loans – Short-term loans between funds outstanding at year-end for such things as cash overdrafts are recorded as Interfund Receivables/Payables. Advances To/From Other Funds represent long-term interfund loans receivable and payable.

Reimbursements – Reimbursements result when one fund makes an expenditure for a second fund when that expenditure or expense is properly applicable to the second fund. Reimbursement transactions reduce expenditures in the reimbursed fund and increase expenditures/expenses in the reimbursing fund.

Quasi-External Transactions –These transactions occur between two government funds that would be accounted for as revenue and expenditures if they occurred between a government entity and a private sector entity.

Transfers – These transfers encompass all types of transfers, except for the residual equity transfers, and are primarily routine transfers of appropriation resources between funds. Transfers are not revenue, expenditures, or expenses, and are classified as "Other Financing Sources (Uses)" in the operating statements of the governmental funds and in a separate subsection before net income in the proprietary funds.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts of assets and liabilities that affect the disclosure of contingent assets and liabilities as of the date of the financial statements, and that affect the reported amounts of revenues and expenses for the reporting period. Actual results could differ from these estimates.

Note II. RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

The governmental fund financial statements each include a schedule that reconciles the fund balance and net changes in fund balance in the fund financial statements to the net position and changes in net position in the government-wide financial statements. Differences between the two occur because the current financial resources measurement focus and modified accrual basis of accounting that is used in governmental funds must be converted to the economic resources measurement focus and accrual basis of accounting that is used in government-wide reporting. In addition, differences will occur because balances and transactions associated with interfund activity must be eliminated in the process of preparing the government-wide financial statements, including consolidation of internal service fund data into the governmental activities in the government-wide financial statements.

A. Explanation of Certain Differences Between the Governmental Fund Balance Sheet and the Government-wide Statement of Net Position

The governmental fund balance sheet includes a reconciliation between *fund balance—total governmental funds* and *net position—governmental activities* as reported in the government-wide statement of net position.

One element of that reconciliation explains that "capital assets used in governmental activities (net of internal service funds' capital assets) are not considered financial resources for fund perspective reporting and, therefore, are not reported in the funds." The details of this \$2,483,523,472 are as follows:

Land Construction in progress Works of art	\$ 129,315,367 638,486,590 127,803
Depreciable capital assets and infrastructure,	121,000
net of \$1,269,191,467 of accumulated depreciation	 1,715,593,712
Net adjustment to increase fund balances - total governmental funds to arrive at net position - governmental activities	\$ 2,483,523,472
Another element of that reconciliation explains that "amounts are presented in the Stateme but are not presented in fund balances due to a different basis of accounting." The details \$107,227,060 are as follows:	

Long-term assets are not available to pay for current period expenditures and	
therefore are reported as unavailable revenues in the governmental funds	152,648,990
Deferred outflow for unamortized loss on sale of refunding bonds	8,414,684
Deferred outflow for pension related items	127,854,904
Deferred inflow for pension related items	(181,179,712)
Payable to component units	(511,806)
Net adjustment to increase fund balance - total governmental funds to arrive at net position - governmental activities	<u>\$ 107,227,060</u>

The final element of that reconciliation explains that "long-term liabilities, including bonds payable, are not due and payable in the current period and therefore are not considered financial liabilities for fund perspective reporting, and therefore, are not reported in the funds." The details of this \$2,777,791,559 are as follows:

VERMONT NOTES TO THE FINANCIAL STATEMENTS				
Bonded and capital lease debt (net of internal service funds' liable Accrued interest payable on bonds	•••••••••••••••••••••••••••••••••••••••			
Compensated absences (net of internal service funds' liability)	(9,091,700) (31,407,215)			
Tax refunds payable Net pension liabilities	(57,290,650) (1,300,872,140)			
Net other postemployment benefits obligation	(714,311,874)			
Other long-term liabilities	(<u>11,933,171</u>)			
Net adjustment to reduce <i>fund balance - total governmental</i> to arrive at <i>net position - governmental activities</i>	funds <u>\$ (2,777,791,559</u>)			

B. Explanation of Certain Differences Between the Governmental Fund Statement of Revenues, Expenditures, and Changes in Fund Balances and the Government-wide Statement of Activities

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between *net changes in fund balances—total governmental funds* and *changes in net position of governmental activities* as reported in the government-wide statement of activities.

One element of that reconciliation explains that "governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlay exceeded depreciation expense in the current period, net of internal service funds." The details of this \$228,132,110 difference are as follows:

Capital outlay/functional expenditures	\$ 585,661,562
Expensed net book value of disposed assets	(232,018,901)
Depreciation expense	 (125,510,551)
Net adjustment to increase net changes in fund balances - total governmental	
funds to arrive at changes in net position of governmental activities	\$ 228,132,110

A second element of the reconciliation states that repayment of bond principal is reported as an expenditure in governmental funds,. However, in the government wide statements, repayment of bond principal reduces long-term liabilities. The details of the \$89,644,791 difference are as follows:

Principal repayment	\$ 49,710,000
Payment to refunding bond escrow agent	 39,934,791
Net adjustment to increase net changes in fund balances - total governmental	
funds to arrive at changes in net position of governmental activities	\$ 89,644,791

Another element of that reconciliation states that the issuance of long-term debt (e.g., bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related items. The details of this \$120,732,958 difference are as follows:

Bonds issued increases long-term debt in the statement of activities	\$ (73,555,000)
Refunding bonds issued increases long-term debt in the statement of activities	(36,205,000)
Bond premium is amortized over the life of the bonds in the statement of activities	(9,924,406)
Refunding bonds deferred outflow amortized to interest expense over life of refunded bonds	(1,036,003)
Bond discount is amortized over the life of the bond in the statement of activities	 (12,549)
Net adjustment to decrease changes in fund balances - total governmental funds to arrive at changes in net position of governmental activities	
funds to arrive at changes in net position of governmental activities	\$ (120,732,958)

NOTES TO THE FINANCIAL STATEMENTS

Increase in accrued interest payable Increase in compensated absences Increase in payable to component units Increase in employer pension and other postemployment benefit related costs Decrease in pollution remediation related costs	\$	(441,946) (162,139) (122,785) (90,879,025) 830,437
Net adjustment to decrease net changes in fund balances - total governmental funds to arrive at changes in net position of governmental activities	<u>\$</u>	(90,775,458)

Note III. STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

A. Budgetary Information

Vermont statutes require the head of every State department, board and commission, and any officer or individual responsible for any activity for which funds are appropriated by the Vermont Legislature to provide, on or before September 1 preceding any biennium, statements to the Commissioner of Finance and Management showing in detail the amounts appropriated and expended for both the current and preceding fiscal years and the amount estimated to be necessary for similar activity for the ensuing two fiscal years. The Commissioner of Finance and Management and the Secretary of Administration are then required to submit to the Governor by November 15 preceding each biennium, the estimates as received along with any other estimates for the ensuing two fiscal years. The Governor then submits to the Vermont Legislature, no later than the third Tuesday of every annual session, a budget that embodies estimates, requests, and recommendations for appropriations or other authorizations for expenditures from the State treasury for at least the succeeding fiscal year. The Vermont Legislature then enacts into law an appropriations act that must be approved by the Governor before expenditures can be made. In recent years, in accordance with Act 250 of 1979 Section 125, it has been the practice of the Governor to submit an annual budget and the Vermont Legislature to enact appropriations on an annual basis.

Budgets are prepared and appropriated on a cash basis and usually at the program level. The Agency of Administration maintains budgetary control by fund at the appropriation level. Governmental funds' unspent appropriation balances revert to the fund balance at the end of each fiscal year for re-appropriation unless authorized to be carried forward to the following year(s) by legislative act. Unexpended balances of capital projects funds are available for expenditure in the following fiscal year(s).

The original budgets for expenditures and transfers are determined by the Legislature through the passage of the annual Appropriation Act. The Commissioner of Finance and Management (with approval from the Governor) may transfer balances of appropriations not to exceed \$50,000 made under any appropriation act for the support of the government from one component of an agency, department, or other unit of State government, to any component of the same agency, department, or unit; and may transfer balances of appropriation act from one department or unit of the agency of transportation to another department or unit of the agency of transportation for the specific purpose of funding authorized transportation projects which have been approved by the federal government for advance construction in which the expenditure of State funds will be reimbursed by federal funds when the federal funds become available, and the transfer is limited to funds which have been approved for reimbursement. If any receipts, including federal receipts, exceed the appropriated amounts, the receipts may be allocated and expended, subject to the approval of the Scope of the program, which establishment or increase will at any time commit the State to the expenditure of State funds, they may be expended only upon the approval of the Legislature.

B. Deficit Fund Balances/Net Position

Business-type Proprietary Funds

Federal Surplus Property Fund ended fiscal year 2015 with both a deficit unrestricted net position and a total net position of \$136,467. The program continues to suffer from a lack of inventory for sale from the federal government that could in turn be retrieved for sale by the State. In 2015 the fund did not receive any additional capital from the General Fund as in past years due to other budgetary pressures. The plan going forward is to reduce the deficit by actively retrieving goods for sale to increase program sales in 2016. The program lost \$26,875 in fiscal year 2015. Given the program is popular with local governments further recapitalization from the General Fund would be required if sales continue to keep the program in a deficit position.

Vermont Life Magazine Fund ended fiscal year 2015 with both a deficit unrestricted net position and a total net position of \$2,840,146. Initiatives to reduce this deficit include a reorganization of the enterprise including the elimination of the business manager position and the hiring of a sales manager tasked with increasing advertising and product sales. Vermont Life also plans to act as a contracted editorial and design agency for both the State of Vermont and private publishers. It will also manage the Vermont Department of Tourism's photography acquisitions and direct mail fulfillment. Continued direct mail campaigns will result in increased advertising sales.

Internal Service Funds

Single Audit Revolving Fund ended fiscal year 2015 with both a deficit unrestricted net position and a total net position of \$332,723. In part, the deficit can be attributed to fiscal year 2009 budget rescissions resulting in a transfer to the General Fund of \$196,000. The remaining deficit is due to fiscal year 2015 accruals that will be billed in fiscal 2016.

Financial & HR Information Fund ended fiscal year 2015 with a deficit unrestricted net position of \$1,036,809 and a deficit total net position of \$968,666. Revenues for fiscal year 2015 reflect an allocation to include the deficit incurred in fiscal year 2014. Revenues were \$2.4 million higher than the allocation/billing for fiscal year 2014. Operating expenses were up approximately \$1 million over fiscal year 2014 with a profit of \$186,925 for fiscal year 2015. The deficit will continue to be recovered through increased efficiencies in the program as well as adjusted rate allocations to departments in fiscal year 2017.

Communications & Information Technology Fund ended fiscal year 2015 with a deficit unrestricted net position of \$2,673,047 and a deficit total net position of \$801,995. The process to reduce the deficit in the fund has been to utilize financial adjustments in budgeting the allocation vs. the mainframe. The goal is to continue this process. The fund is slowly driving a loss through under-recovering our mainframe costs while over-recovering our costs related to the allocation. Specifically, within the larger allocation cost center, the fund has taken steps in the FY17 budgeting process to ensure that this continues by identifying lapses in our billing.

Fleet Fund ended fiscal year 2015 with a deficit unrestricted net position of \$5,290,240 but with a combined net positive position of \$3,103,521. The unrestricted deficit is the result of the financing of fixed assets (vehicles) that are financed through the inter-fund payables. More importantly, the total net position is positive and is expected to remain in that position as the program had a change in net position of \$577,851 in fiscal year 2015. A rate holiday, reduction of lease rates, or a possible payback of unused mileage charges is possible in 2016 to help reduce the overall program fund surplus.

Copy Center Fund ended fiscal year 2015 with a deficit unrestricted net position of \$2,549,147 and a deficit total net position of \$1,708,175. Though the Print Shop has increased its sales volume over the last few years which have helped to stabilize the fund. A corresponding reduction in the cost of sales as well as a reduction in the annual depreciation expense and purchase of equipment resulted in the program having a positive change in net position in fiscal year 2015. Management continues to aggressively pursue additional business opportunities including synergistic opportunities with the Postal Center.

Postage Fund ended fiscal year 2015 with both a deficit unrestricted net position of \$2,771,266 and a deficit net position of \$2,367,458. Although sales were reduced in fiscal year 2015 by just under 10%, with a corresponding reduction in cost of sales, the operating costs continue to increase driven by staff costs and ongoing depreciation costs. As such, the program lost \$101,561 more than in fiscal year 2014, adding to the deficit net position in fiscal year 2015. It is the intention that the current fund deficit will be recovered through business operations (cost containment as well as new rate structures). An increase in the General Fund subsidy to cover the increasing cost of internal mail delivery and bomb screening has been budgeted for fiscal year 2016. If sales continue to decline, an adjustment to staffing costs may be required to bring the program into balance.

Facilities Operations Fund ended fiscal year 2015 with a deficit unrestricted net position of \$2,427,121 and a deficit total net position of \$2,487,598. The fund's deficit is being recovered through increased billings established by the administration. To do this a deficit reduction amount would need to be added to the space rental rates. As part of the fiscal year 2015 budget rescission, the program is being required to reduce costs by over \$1 million. As this requirement carried over into the fiscal year 2016 budget cycle, it is anticipated a similar outcome can be expected in fiscal year 2016.

Property Management Fund ended fiscal year 2015 with a deficit unrestricted net position of \$22,212,435 and a deficit total net position of \$22,431,197. The fund's deficit continues to expand due to the lack of a revenue source to cover the ongoing operating expense of the program, although the deficit net positon actually improved over fiscal year 2014 due to the sale of 20 Houghton Street in St. Albans. Proceeds from the facility were returned to the fund to recover the associated deficit this building incurred. The Administration is exploring adding a surcharge to the existing leases to aid in covering the costs associated with the program operations.

All Other Insurance Fund ended fiscal year 2015 with both a deficit unrestricted net position and a deficit total net position of \$29,310. This fund acts more like a revolving fund in that it purchases commercial policies for state entities not provided elsewhere and billed back to those entities. One commercial policy requires a higher initial premium subject to rebates based on actual experience. The fund purposely bills the agency the anticipated net premium. As such the cost of sales can exceed the associated revenue in any given year. The current deficit net position is a timing issue that should be eliminated automatically.

Workers' Compensation Fund ended fiscal year 2015 with both a deficit unrestricted net position and a total net position of \$6,124,109. The rates for fiscal year 2015 included an additional \$1.25 million to help alleviate part of this deficit net position. In 2016, the fund's deficit will continue to be addressed in the rate setting process for departments and agencies. The workers' compensation program has an aggressive medical case management team that is striving to return injured employees back to work at the earliest possible signs of recovery. The administration is currently looking at alternative models in fiscal year 2017 for providing this service to injured state employees which could result in significant savings to the State.

Medical Insurance Fund ended fiscal year 2015 with both a deficit unrestricted net position and a total net position of \$4,291,999. Due to the unexpected usage losses in fiscal year 2014, the rate increase in fiscal year 2015 was significantly higher than the previous fiscal year. The end result was a positive increase in net position in fiscal year 2015 which cut the deficit net position in half. It is anticipated that these sustained higher rates in fiscal year 2016 should retire this deficit in fiscal year 2016.

Human Resource Services Fund ended fiscal year 2015 with both a deficit unrestricted net position and a total net position balance of \$243,816. The fund had a small increase in net position in fiscal year 2015 which helped reduce the deficit net positon from fiscal year 2014. The program funded a new workforce development program that was not initially included in the fiscal year 2015 billings to departments. Costs incurred would be recovered, if need be, in the fiscal year 2016 billings. Without these additional costs, the deficit would have improved faster in fiscal year 2015.

Governmental Fund Types

Special Fund ended fiscal year 2015 with a negative unassigned fund balance of \$22,130,501. This is due mainly to the allocation of the State share of accrued liabilities pertaining to the Global Commitment Fund at June 30, 2015 and the revenues to pay for those liabilities is not available until 2016.

Fiduciary Fund Types

Vermont Retired Teachers' Health and Medical Benefits Fund ended fiscal year 2015 with a deficit net position of \$10,056,458. The statute creating this fund (16 V.S.A. 19944b) authorizes the State Treasurer to use interfund borrowings of up to \$30 million to finance any shortfalls in this fund, and it is the Legislature's intent to repay any such borrowings by the end of fiscal year 2023. At June 30, 2015 the loan balance was \$13,954,600.

NOTE IV. DETAIL NOTES ON ALL ACTIVITIES AND FUNDS

A. Cash and Cash Equivalents

Deposits for the primary government are governed by State statutes. When depositing public monies, the State Treasurer must act in accordance with 32 V.S.A. Chapter 431. Although the statute provides requirements for the collateralization of deposits, it does not establish limits. These limits are set by published formal guidelines issued by the State Treasurer.

The custodial credit risk for deposits is the risk that in the event of a depository financial institution failure, the government will not be able to recover funds deposited in the failed institution or will not be able to recover collateral securities that are in the possession of an outside party. Deposits are exposed to custodial credit risk if they are not covered by depository (FDIC) insurance and are uncollateralized; or collateralized with securities held by the pledging financial institution's trust department or agent, that are not registered in the depositor – government's name. Although State statute does not require deposits to be collateralized, the Treasurer requires the State's cash deposits held in its primary bank to be collateralized with either United States Treasury securities or Vermont municipal securities or other approved money market instruments, or other collateral acceptable to the Treasurer. Certificates of deposit are collateralized, in whole or in part, on the basis of agreements with the bank, a protocol requiring periodic due diligence and review of bank capitalization and assets. Bank deposits in excess of the FDIC amounts and collateral agreements are uninsured and uncollateralized. Bank balances of deposits for the primary government, excluding pension, other post employment benefits, and investment trust funds, as of June 30, 2015, were \$356,775,909. Of these, \$8,645,809 was exposed to custodial credit risk as uninsured and uncollateralized.

The pension, other postemployment benefits, and investment trust funds' cash deposits, outside of the pension trust funds' custodian bank, totaled \$8,128,519 none of which was exposed to custodial credit risk.

B. Investments

Primary Government—Excluding All Pension, Other Postemployment Benefits, and Investment Trust Funds

Investments for the primary government are governed by State statutes. The State has an investment policy with an overriding goal of minimizing exposure to risk and maintaining liquidity necessary for future cash needs while maximizing the return on investments. Two sections of State statute govern the investment of the State's operating and restricted cash (i.e., non-pension funds).

When investing public monies, the State Treasurer must act in accordance with 32 V.S.A. 433. Types of investments allowed include obligations of the United States, its agencies and instrumentalities, and any repurchase agreements whose underlying collateral consists of such obligations or other approved money market instruments; certificates of deposit issued by banks and savings and loan associations approved by the State Treasurer; prime bankers' acceptances; prime commercial paper; tax exempt securities; and domestic

money market funds. Also, the State Treasurer's Office issues additional formal guidance that is reviewed periodically, to assure that the three investment objectives -- safety, liquidity, and yield -- are met.

The statutory guidelines for certain trust funds are contained in 32 V.S.A. 434, referred collectively as the Trust Investment Account. These include the Tobacco Trust Fund, the Higher Education Trust Fund, the ANR Stewardship Fund, two Veterans' Home trusts, the Fish and Wildlife Trust, Vermont State Retirement OPEB Fund, and various small trusts.

The State Treasurer may invest funds in accordance with the standard of care established by the prudent investor rule and apply the same investment objectives and policies adopted by the Vermont State Employees' Retirement System, where appropriate, to the investment of funds in the Trust Investment Account.

Investments are stated at market value in the case of marketable securities and at estimated fair value for certain nonmarketable securities. Money market and other short-term investments are reported at market value when published market prices and quotations are available, or at amortized cost, which approximates fair value. Management at the State Treasurer's Office is responsible for the fair value measurements of investments reported in the financial statements. The State Treasurer's Office has implemented policies and procedures to assess the reasonableness of the fair values provided; the Office believes that reported fair values at the balance sheet date are reasonable.

(a) Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. The primary government's investments, other than pension and investment trust funds' investments, at June 30, 2015 are presented as follows:

The above includes instruments that are classified as cash and short-term investments for balance sheet purposes. The following is a reconciliation of the investment types to the financial statement presentation (*in Thousands*).

	Investment Maturities (in years)								
Investment Type	 Fair Value		Less Than 1		1 to <6		6 to 10		More Than 10
Debt Investments									
US Agencies/Treasuries	\$ 1,313	\$	149	\$	569	\$	350	\$	245

US Treasury Trust Pool	 192,933								
Total Investments	\$ 474,773								

Primary Government Investments - Excluding Pension, Other Postemployment Benefits and Investment Trust Funds (Expressed in Thousands)

Primary Government Investments - Excluding Pension, Other Postemployment Benefits and Investment Trust Funds

Investments per maturity schedule Included in cash & cash equivalents:	\$ 474,773
Money market mutual fund	(219,884)
US Unemployment trust pool	 (192,933)
Financial statement investments total	\$ 61,956
Governmental activities total	\$ 58,769
Business activities total	1,312
Fiduciary - private purpose trust fund	 1,875
Total	\$ 61,956

b) Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributable to the monetary magnitude of the State's investment in a single issuer. While State statute does not establish ceilings, formal investment guidelines for operating funds limit the amount invested to 10% in any one issuer of commercial paper, corporate securities, or bankers' acceptances. There are no limitations for U.S. Government and Federal Agencies. Money market funds utilized by the State Treasurer's Office are highly rated and incorporate the requisite diversification. As of June 30, 2015, no single issuer exceeded 5% for the primary government portfolios.

(c) Custodial Credit Risk

For investments, custodial credit risk is the risk that a government will not be able to recover the value of an investment or collateral securities that are in the possession of an outside party if the counterparty to the transaction fails. The State has no formal policy on custodial credit risk but maintains contractual relationships with custodian banks that provide coverage and define the procedures. As of June 30, 2015 all securities were registered in the name of the State at its custodian bank. Investments in open-end mutual funds are not exposed to custodial risk because their existence is not evidenced by specific securities.

(d) Credit Risk

Credit risk is the possibility that the issuer or other counterparty to an investment may default on their obligations. In non-pension funds this risk has been mitigated by implementing statutory guidelines on credit quality and further restricted by formal investment guidelines and the use of low-risk money market instruments. The credit risk associated with the State's debt securities, money market funds, bond mutual funds, and other pools of fixed income securities, exclusive of pension fund investments, as of June 30, 2015, is presented as follows using the Moody's rating scale.

Primary Government Rated Debt Instruments Excluding Pension, Other Postemployment Benefits and Investment Trust Funds

(Expressed in Thousands)

		Quality Ratings				
<u>Debt Investments</u>	 Fair Value	Aaa			Unrated	
US Agencies/Treasuries Money Market Mutual Fund Certificates of Deposit	\$ 1,313 248,465 10,600	\$	1,313 219,884 -	\$	- 28,581 10,600	
Totals	\$ 260,378	\$	221,197	\$	39,181	

(e) Foreign Currency Risk

Foreign currency risk is the extent to which changes in exchange rates affect the value of an investment. Vermont's operating funds are restricted, through statute and formal guidelines, to specific money market instruments and money market funds who only invest in domestic instruments. In the Trust Investment Account portfolio, total exposure to foreign currency risk as of June 30, 2015, was \$0.

Primary Government—Pension, Other Postemployment Benefits, and Investment Trust Funds

The State has three defined benefit plans (Vermont State Retirement System (VSRS), State Teachers Retirement System (STRS), and Vermont Municipal Employees' Retirement System (MERS)); three defined contribution plans (VSRS, MERS, and Single Deposit Investment Account); and three other postemployment benefit funds. Additional information on these plan benefit and actuarial valuations may be found in Note IV.G.4.—Pension and Other Postemployment Benefits.

By statute, the assets of the three defined benefit plans are invested on behalf of each plan's Trustees through the Vermont Pension Investment Committee (VPIC), which was established by the Vermont Legislature (Title 3 V.S.A. Chapter 17), effective July 1, 2005, to combine the assets of the VSRS, STRS and MERS defined benefit plans for the purpose of (i) investment in a manner that is more cost- and resource-efficient; (ii) improving the effectiveness of the oversight and management of the assets of the Retirement Systems; and (iii) maintaining the actuarial, accounting, and asset allocation integrity of the Retirement Systems. The majority of these assets have been pooled for investment purposes. Effective May 31, 2006, legislation amended VPIC's authority allowing VPIC to enter into agreements with municipalities administering their own retirement systems to invest retirement funds for those municipal plans.

On November 1, 2007, the City of Burlington, Vermont pooled its investments with the majority of the assets of the State, Teachers and Municipal defined benefit plans pursuant to a change in State statute permitting Vermont municipalities to pool their funds with the VPIC thereby creating an "external investment pool." An "external investment pool" is defined by GASB 31 as the commingling and investing of the monies of more than one legally separate entity, on the participants' behalf, in an investment portfolio. In this case, one of the participants, the City of Burlington, is not part of the State's reporting entity. Each of the participating funds has an equity position in the external pool and individual investment securities are not specifically identified to any of the participating funds. As a result, the "pooled investment" is a net equity position, incorporating the results of the underlying securities, receivables and liabilities. Earnings in each pooled investment are allocated based on the month-end balances of each of the respective systems. The pool is not audited separately.

The three defined benefit plans and the City of Burlington's assets managed by VPIC are externally managed in the pool established July 1, 2005 with a startup share price of \$1,000. Ownership in the pool is based on the number of shares held by each member. The net asset value per share is determined by dividing the total fair value of the net assets of the pool by the number of shares of the pool outstanding on the valuation date. Contributions to and withdrawals from the pool are based on the beginning of the day net asset value per share on the day of the transaction.

The pool's net position and statement of changes in net position are as follows.

VERMONT PENSION INVESTMENT COMMITTEE INVESTMENT POOL STATEMENT OF NET POSITION June 30, 2015

City of Burlington	 153,777
Totals - June 30, 2015	\$ 3,941,675

All three defined benefit plans managed by the State have adopted a common asset allocation as determined by the Vermont Pension Investment Committee. As of October 29, 2009, the VPIC adopted a set of investment policies and guidelines common to all three defined benefit plans. These are used by VPIC with the objective of maximizing returns within acceptable risk parameters.

The State's Single Deposit Investment Account (SDIA), a non-contributory defined contribution plan, is invested in a commingled stable bond fund. The investment policy governing the SDIA portfolios includes a minimum average credit quality of double-A, no bonds rated below investment grade, and limitations on assetbacked, mortgage-backed, collateralized Mortgage Obligations, corporate bonds, and single issuers of non-treasury/government agency backed bonds. The Vermont State Retirement's defined contribution plan's trustee is the State Treasurer. The Vermont Municipal Employees' Retirement System Board of Trustees is the trustee for the Vermont Municipal Employees' defined contribution plan. Both plans are administered by Fidelity Investments Institutional Operations Company. Investment choices are made by participants from a range of funds approved by the trustees' for the plans. Investment options are Fidelity and non-Fidelity mutual funds including large and small market capitalization equities (actively managed and indexed), international equities, fixed income securities, balanced funds, target retirement date age based funds, and a stable value fund. Funds included in the plans were selected based on consideration of fund performance for one and multi-year periods, performance ranked against peer group funds in asset class, management fee expense ratios, fund asset class and investment objectives, historical annual returns, Morningstar ratings, performance in various stages of the capital market cycle, and consultant recommendations as to the optimal number of funds and appropriate asset classes. Fidelity provides quarterly investment reports and analysis that are reviewed by Treasury staff, the State Treasurer and Vermont Municipal Employees' Retirement's Board.

The State has three other postemployment benefit funds, the Vermont State Postemployment Benefits Trust Fund (State OPEB), the Retired Teachers' Health and Medical Benefit Fund (RTHMB) and the Vermont Municipal Employees Health Benefit Fund (Muni OPEB). The State OPEB is invested in the Trust Investment Account utilized as an investment vehicle by many of the State's primary funds. The RTHMB has no investments. The Muni OPEB in invested under the authority of the Municipal Retirement Board of Trustees and utilizes an outside administrator, ICMA-RC employing mutual funds.

Investments are stated at market value in the case of marketable securities and at estimated fair value for certain nonmarketable securities. Money market and other short-term investments are reported at market value when published market prices and quotations are available, or at amortized cost, which approximates fair value. Real estate is carried at the net asset value of each retirement system's real estate fund investments, which net asset value is further based on the fair market value of the real properties. Properties' fair market values in each of the retirement systems' fund investments are established quarterly by real estate fund manager appraisals and are validated at least yearly by third-party property appraisals. Nonmarketable securities include alternative investments such as private equity and venture capital, which are valued using current estimates of fair value obtained from the investment manager in the absence of readily determinable public market values. Such valuations generally consider variables such as the high, medium, and low values for portfolio investments; the investments' exit timetables, and the status of any proceedings leading to a liquidity event: the financial performance of investments, including comparison of comparable companies' earning multiples; cash flow analysis; and recent sales prices of investments. Management at the State Treasurer's Office is responsible for the fair value measurements of investments reported in the financial statements. The State Treasurer's Office has implemented policies and procedures to assess the reasonableness of the fair values provided; the Office believes that reported fair values at the balance sheet date are reasonable.

a) Interest Rate Risk

As pension trust funds have a different investment term horizon based on a long average liability term, the VPIC manages exposure to fair value loss arising from movements in interest rates by establishing duration guidelines with its debt securities with Core, Core Plus and Global Fixed Income investment managers, requiring that the duration be within a specified percentage of the duration band of the appropriate benchmark index. In the case of domestic Core Fixed Income managers the average duration (interest rate sensitivity) of an actively managed portfolio shall not differ from the appropriate passive benchmark's duration by more than +/- 25 percent. The Core Plus portfolio restriction is +/- two years around the passive benchmark duration. With respect to Global Fixed Income portfolios, current portfolio durations are restricted to a range of one to ten years. High yield fixed income portfolios prices and yields are not as directly correlated with the general level of interest rates and are duration monitored but not duration restricted. The calculation of the duration of mortgage backed securities involves assumptions as to the expected future prepayment rate for the security. The Managers are required to calculate duration at the time of initial purchase and on a routine basis to maintain compliance with these guidelines. Fixed income managers are required to report portfolio duration as a measure of portfolio interest rate sensitivity. Pension, Other Postemployment Benefits and Investment Trust Funds investments are as follows:

Pension, Other Postemployment Benefits, and Investment Trust Funds' Investments

(b) Concentration of Credit Risk

Formal guidelines for pension funds state that no more than 5% of the market value of a portfolio's domestic fixed income assets may be invested in the debt securities of any one issuer. No limitations on issues and issuers shall apply to obligations of U.S. Government and Federal Agencies. As of June 30, 2015, no issuer exceeded 5%.

(c) Custodial Credit Risk

Custodial credit risk for investments is the risk that a government will not be able to recover the value of an investment or collateral securities that are in the possession of an outside party if the counterparty to the transaction fails. The VPIC manages exposure to custodial credit risk by requiring all relevant investment managers to hold investments in separate accounts with VPIC's custodian. VPIC guidelines specify the custodial requirements for these accounts and the duties of the Managers and the custodian. As of June 30, 2015, all securities were registered in the name of the State at its custodian bank. Investments in pools, openend mutual funds, and other investments not evidenced by specific securities are not categorized.

(d) Credit Risk

Detailed pension guidelines by asset class and supplemental requirements by investment manager are used to set risk parameters and are stated in written contracts. These guidelines are reviewed and adopted by VPIC. Treasury staff and independent investment consultants are utilized to assure compliance. The credit risks associated with these securities are as follows:

Pension, Other Postemployment Benefits, and

e) Foreign Currency Risk

Unless VPIC stipulates specific exceptions to the guidelines, the global bond portfolio may hold no more than 30% of its assets, at market value, or 120% of each country's benchmark weight (whichever is greater) in the debt securities of any single foreign government or non-U.S. government entity. For the purposes of this calculation, all countries within the European Single Currency shall count as one country. Single non-government debt security limitations are also set for the global bond portfolio. In the case of equities, the investment manager is afforded flexibility in the number of issues held and their geographic or industry distribution, provided that equity holdings are within the lesser of established percentage ranges in relative to single holding limitations and a stock's weighting in the style benchmark against which the manager is measured. Most foreign currency exposure is in the pension and investment trust funds' portfolios. The value in US dollars by foreign currency denomination and type of investment is as follows:

Pension, Other Postemployment Benefits, and Investment Trust Funds' Investments Foreign Currency Risk - International Securities at Fair Value

Formal investment policy guidelines adopted by the VPIC state that international equity managers may enter into forward exchange contracts on currency provided that use of such contracts is designed to dampen portfolio volatility and facilitate securities transaction settlements rather than leverage portfolio risk exposure. In global fixed income accounts, opportunistic currency positioning may be utilized to hedge and cross-hedge the portfolio's currency risk exposure or in the settlement of securities transactions. The managers may vary the total portfolio exposure to currency from fully unhedged to fully hedged. The global fixed income managers are permitted to hedge all, some, or none of the portfolio's currency exposure. They are permitted to cross-hedge currency positions, but may not net short any currency, or net long more than 100% of the portfolio. VPIC has funds allocated to a global allocation asset manager in the form of shares of a commingled trust. The manager for this trust may enter into long and/or short positions in currencies of the countries represented in established indices. The strategy is permitted to cross-hedge currency exposure and will actively manage its currency exposure. This active management may go beyond fully-hedged or unhedged currency exposure, and is provided for by a specific exemption to the VPIC general guidelines.

Derivative Financial Instruments

Vermont Pension Investment Committee (VPIC) policy authorizes certain investment managers (Managers) to invest in derivative financial investments. Derivatives are financial arrangements between two parties whose payments are based on, or "derived" from, the performance of some agreed upon benchmark. Disclosures related to derivatives positions required under Governmental Accounting Standards Board Statement No. 53 – *Accounting and Financial Reporting for Derivative* Instruments (GASB No. 53) apply only to those derivative instruments held directly by the VPIC on behalf of the defined benefit plans and the external investment trust

and not those held within commingled fund investment vehicles. The Pension and Other Postemployment Benefit Trust Funds do not have hedgeable assets or liabilities, and all derivative instruments are considered investment derivatives, with corresponding changes in fair value reported in investment income. The fair value of all derivative financial instruments are reported in the Statement of Fiduciary Net Position. All of the derivatives reported at June 30, 2015, are at fair value.

The fair value balances and notional amounts of derivative instruments outstanding at June 30, 2015, classified by type, and the changes in fair value of such derivative instruments for the year then ended are as follows:

	Changes in Fair Value			Fair Value at June 30, 2015

Currency forwards								
FX forwards	Investment revenue		3,714,801	Investment		-		22,955,477

Derivative instruments may be used for any of the following purposes;

- · To gain market exposure.
- To convert financial exposure in a given currency to that of another currency (e.g., to hedge Japanese Yen exposure back to the U.S. dollar). Any and all international Managers may enter into foreign exchange contracts on currency provided that: a) such contracts are one year or less, and b) use of such contracts is limited solely and exclusively to hedging currency exposure existing within the Manager's portfolio. There shall be no foreign currency speculation or any related investment activity, with the exception of currency hedging Managers who enter into currency hedging will be guided by specific risk parameters in their contracts.
- To adjust the duration of a bond portfolio in a manner that is consistent with the accepted approach of the Manager and other contract terms applicable to the Manager.
- To make portfolio adjustments that are consistent with other elements of the VPIC's investment policies and that do not systematically increase risk or expected volatility of the rate-of-return of the total portfolio.
- For trading purposes which are intended to enhance investment returns. This purpose is subject to the requirement that it be consistent with other elements of the VPIC's investment policies and that it does not systematically increase the risk or expected volatility of the rate of return of the total portfolio.

All other uses of derivatives are prohibited unless specifically approved by the VPIC. Managers are expected to have internal risk management programs in place to ensure that derivatives-based strategies do not result in inappropriate risks to the VPIC Portfolio. Separately managed funds include the following reporting requirements: a list of all derivative positions as of quarter-end; an assessment of how the derivative positions affect the risk exposures of the total portfolio; an explanation of any significant pricing discrepancies between

the Manager and custodian bank; an explanation of any non-compliance. Commingled funds provide the VPIC with a guarterly list of derivative positions and assessment of the effect on the risk exposure of the portfolio.

For derivative securities, the Custodian Bank is required to obtain two independent prices, or to notify the VPIC that two independent prices are not available. Managers are required to reconcile the valuations of all derivatives positions on a monthly basis with the Custodian Bank. Derivatives, which are futures contracts, are Commodity Futures Trading Commission approved and exchange-traded. Options may either be exchange-traded or traded over-the-counter (OTC).

Futures represent commitments to purchase (asset) or sell (liability) securities at a future date and at a specified price. Futures contracts are traded on organized exchanges (exchange traded) thereby minimizing the VPIC's credit risk. The net change in the futures contracts value is settled daily in cash with the exchanges. Net gains or losses resulting from the daily settlements are included with trading account securities gains (losses) in the Statement of Changes in Fiduciary Net Position.

Currency forwards represent forward foreign exchange contracts that are entered into in order to hedge the exposure to changes in foreign currency exchange rate on the foreign currency dominated portfolio holdings. A forward foreign exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in the net realized gains or losses on foreign currency related transactions in the Statement of Changes in Fiduciary Net Position.

Only forward currency contracts are defined as derivatives per GASB No. 53 are reported above; currency spot contracts are not included.

Risk of loss arises from changes in currency exchange rates. At June 30, 2015, currency forward positions consisted of unrealized gains on pending foreign exchange sales of \$3,714,800.

Options represent or give buyers the right, but not the obligation, to buy or sell an asset at a preset price over a specified period. The option's price is usually a small percentage of the underlying asset's value. As a writer of financial options, the VPIC receives a premium at the outset of the agreement and bears the risk of an unfavorable change in the price of the financial instrument underlying the option. As a purchaser of financial options, the VPIC pays a premium at the outset of the agreement and the risk of an unfavorable change in the price of the financial instrument underlying the option.

Swaps represent an agreement between two or more parties to exchange sequences of cash flows over a period in the future. At June 30, 2015, the VPIC had three different types of swap arrangements; interest rate swaps, inflation linked swaps, and credit default swaps. In the most common type of interest rate swap arrangement, one party agrees to pay fixed interest payments on designated dates to a counterparty who, in turn, agrees to make return interest payments that float with some reference rate. The interest rate swaps allowed the VPIC to effectively convert long term variable interest investments into fixed interest rate investments. Credit default swaps are used to manage credit exposure without buying securities outright. Gains and losses on swaps are determined based on market values and are recorded in the Statement of Changes in Fiduciary Net Position.

Counter-party creditworthiness, for non-exchange traded derivatives, shall be at a minimum of "A3" as defined by Moody's Investor Service, "A-" by Standard & Poor's, and "A-" by Fitch. The use of counter-parties holding a split rating with one of the ratings below A3/A– is prohibited. The use of unrated counter-parties is prohibited. Individual counter-party exposure, for non-exchange traded commodity derivatives, is limited to 50% of the notional amount of the VPIC Portfolio commodity derived exposure. An exception is allowed if the total commodity derivative exposure is less than \$3 million. Any entity acting as counter-party must be regulated in either the United States or the United Kingdom. All other uses of derivatives are prohibited unless specifically approved by the VPIC. Managers are expected to have internal risk management programs in place to ensure that derivatives-based strategies do not result in inappropriate risks to the VPIC portfolio. For fiscal year 2015 all counterparties for derivatives met the VPIC counterparty risk rating requirements.

The following shows the market value	of credit exposure per Mo	ody's ratings at June 30, 2015.

Moody's Rating	Ма	rket Value
Aa2	\$	17,285
Aa3		28,295
A1		1,882,290
A2		34,317
A3		290,817
Baa1		132,698
Total	\$	2,385,702

In addition, Manager credit research teams are tasked with evaluating potential counterparties for their creditworthiness as counterparties, not relying on ratings agencies alone. Managers evaluate individual counterparties using various methods of credit analysis: company visits, reports, earnings updates and take into account other factors, including the broker's/dealer's reputation for sound management, the past experience of the manager with the broker/dealer, market levels for its debt and equity, its quality of liquidity provided and its share of market participation. At June 30, 2015, risk concentrations are as follows:

Counterparty Name	Percentage of Net Exposure	Moody's Rating	S&P Rating	Fitch Rating
Morgan Stanley Capital Services	25%	A1	А	A+
Bank of America NA	20%	A1	А	A+

Royal Bank of Scotland PLC	0%	A3	BBB+	BBB+

VPIC's Managers use master agreements and may receive additional protection through the collateralization requirements, which helps to mitigate a party's exposure to another party in the event of a default or termination event by requiring the pledging/posting of assets to the other party to secure any outstanding obligations under certain transactions. By regular, generally daily, movement of collateral on forward settling trades, VPIC's exposure to any particular counterparty can be reduced. Collateral movement threshold for securities under the master forward agreements typically ranges from \$0 to \$250,000 per account, depending on the particular counterparty. Managers require daily posting of collateral with many of our counterparties.

VPIC does not have a formal policy regarding master netting arrangements. As a general practice, Managers use industry standardized contracts, generally known as "master agreements" or "netting agreements," counterparty risk is reduced by providing parties to a transaction the ability to close out and net its total exposure to a counterparty in event of a default with respect to all transactions governed under that particular agreement. These agreements (ISDA Master Agreement and Credit Support Annex, Master OTC Options Agreement, Master Securities Forward Transaction Agreement, Global/Master Repurchase Agreement) allow

parties to a transaction to know their legal rights and obligations, in addition to an ability to net. Managers generally put master agreements in place on behalf of each account it manages and each separate counterparty legal entity with which it transacts. The maximum amount of loss VPIC would face in case of default of all counterparties as of June 30, 2015, consists of the aggregated fair value of OTC positions in the amount of \$1,108,610.

Derivative instruments often contain credit-risk-related contingent features that could result in an immediate payment to the counterparty. For example, a material adverse change clause could provide the counterparty with the right to early terminate the derivative agreement. Alternatively, it could provide a basis for renegotiating the agreement if specific events occur, such as a downgrade of the entity's credit rating below investment grade. These provisions may include an obligation to post additional collateral in instances where the credit-risk contingent feature is triggered or the counterparty is provided the right to terminate the agreement early.

The VPIC funds hold mortgage-backed securities including collateralized mortgage obligations (CMOs) at fair value. Mortgage-backed securities represent a direct interest in a pool of mortgage loans. CMOs are bonds that are collateralized by whole loan mortgages, mortgages pass-through securities, or stripped mortgage-backed securities. Income is derived from payments and pre-payments of principal and interest generated from collateral mortgages. Cash flows are distributed to different investment tranches in accordance with the payment order established for the CMO instrument. Cash flows associated with these tranches may demonstrate varying degrees of sensitivity to interest rate fluctuations. A reduction in interest rates may cause some of the tranches to experience a reduction in fair value as prepayments reduce the interest payments, causing a decline in total cash flows. In a rising interest rate environment, an increase in interest payment and cash flows may cause an increase in fair value.

Risk is minimized through the purchase of high quality instruments with limited default or prepayment risk. Agency fixed and floating rate pass-through, U.S. Treasury securities and cash equivalents can be held without limitation. Securities designed to provide more precisely targeted maturities (Sequential Collateralized Mortgage Obligations) and those that create tranches, or Planned Amortization Classes (PAC I and PAC II), with cash flows that are protected from prepayment changes within certain limits, may also be purchased without limitation. Policy restrictions and portfolio percentage limitations are established for the purchase of more interest rate sensitive instruments and certain interest rate and price stress tests are required.

Asset-backed securities are collateralized by a loan, lease, or receivable other than real estate. Payments are collected by a servicer though a "pass-through" arrangement. As monthly payments of principal and interest are made, the pass-through security holder is entitled to a pro rata portion of the payments received. Risk of pre-payment varies with the underlying assets. Risk is minimized through the purchase of high quality instruments with limited default or prepayment risk.

C. Receivables

D. Interfund Balances

1. Due From/To Other Funds

Due from/to other funds represents amounts owed to one State fund by another, for goods sold, services received or reimbursement of costs. The balances of due from/to other funds at June 30, 2015, are as follows.

VERMONT

2. Advances To/From Other Funds

The General Fund has made cash advances to certain proprietary funds for imprest petty cash disbursements needs. The General Fund advances to other funds at June 30, 2015, are summarized below.

Proprietary Funds	
Vermont Lottery Fund	\$ 300,000
Liquor Control Fund	75
Non-major Proprietary Funds	 200
Total	
Iotal	\$ 300,275

3. Interfund Receivables/Payables

The primary government cash in most funds is pooled in the State Treasurer's accounts. When a fund has a deficit cash balance, this amount is reclassified to a liability account - interfund payable. The General Fund reports the corresponding interfund receivable for the cash borrowed from the pool. The following funds at June 30, 2015, reported interfund payables. It is expected that certain amounts due the General Fund from the Internal Service Funds will not be repaid within one year. It is expected that these interfund payables will be reduced in future years through changes to billing rates and management of operations.

Proprietary Funds Non-major Enterprise Funds Internal Service Funds	\$ 2,700,823 69,004,081
Fiduciary Funds Pension and OPEB Trust Funds Agency Funds	 13,954,600 11,088
Total	\$ 85,670,592

4. Inter - Primary Government/Component Unit Balances

Advances to component units consist of the amounts advanced under various agreements with component units to use the funds for specific programs. As the component unit uses the funds, the advance is reduced and expenditures are recognized by the State. At June 30, 2015, the General Fund advances to component units was \$5,701,485 advanced to the Vermont Economic Development Authority (VEDA) for interest rate subsidies and grants to be issued at the direction of State agencies. The Special Fund advance was \$30,389 to VEDA for emergency flood relief loans.

Due from component units/Due to primary government consist of the amounts owed to the primary government for programs administered by component units, in accordance with memoranda of understanding with State departments, and for the elimination of negative balances in the State Treasurer's pooled cash. Due from primary government/Due to component units consist of amounts appropriated from the primary government's funds to the component units that had not been disbursed by fiscal year end.

At June 30, 2015, these account balances are as follows.

	ont Housing & ervation Board	Ver	mont Veteran's Home	Total		
Due from Component Units General Fund	\$ 2,303,009	\$	622,180	\$	2,925,189	
Total	\$ - 2,303,009	\$	- 622,180	\$	2,925,189	

5. Interfund Transfers

Transfers between funds occur when one fund collects revenues and transfers the assets to another for expenditure or when one fund provides working capital to another fund. All transfers are legally authorized by the Legislature through either statute or Appropriation Acts.

The Education Fund received transfers from the General Fund and the Vermont Lottery Commission to support the general State grant for local education. The Special Fund received transfers from the General Fund for the Next Generation Fund, from the Transportation Fund for FEMA related projects, from the Federal Revenue Fund for the earned income tax credit for the year, and from the Global Commitment Fund for special education school-based Medicaid services. The Global Commitment Fund received transfers from the General and Special Funds for Medicaid related services provided under the Vermont Global Commitment to Health Medicaid waiver.

Interfund transfers for the fiscal year ending June 30, 2015, are on the following page.

The rest of this page has been intentionally left blank.

Internal Service Funds	 9,985,234		
Total	\$ 135,495,788		

2. Impairment of Capital Assets

During the fiscal year ended June 30, 2012, the State recognized impairment losses for damage caused by Tropical Storm Irene. In accordance with GASB Statement No. 42, *Accounting and Financial Reporting for Impairment of Capital Assets and for Insurance Recoveries*, insurance recoveries during the year were used to offset the amount of loss that was recognized. During the fiscal year ended June 30, 2015, additional insurance recoveries in the amount of \$4.4 million were received and recorded as revenues. Additional recoveries are expected; however the amounts are subject to negotiations with the company and cannot be reasonably estimated at this time.

F. Deferred Outflows and Deferred Inflows

Deferred outflows in the government-wide Statement of Net Position consist of the unamortized balance of losses related to refunding of debt, and pension contributions made subsequent to the measurement date. The difference between the reacquisition price (the amount placed in escrow to pay for advance refunding) and the net carrying amount of the old debt, is reported as a deferred outflow and recognized as a component of interest over the remaining life of the old debt or the life of the new debt, whichever is shorter.

Balance, July 1, 2014	\$ 6,909,872
Deferred amount on new refundings	2,540,815
Current year amortization	 (1,036,003)
Balance, June 30, 2015	\$ 8,414,684

Additional information regarding deferred outflows of resources and deferred inflows of resources related to pension liabilities can be found in Note IV. G. 4.

Deferred inflows in the governmental funds Balance Sheet consist of unavailable amounts related to revenue recognition. Revenues and other governmental fund financial resources are recognized in the accounting period in which they become both available and measurable. When an asset is recorded in governmental fund financial statements but the revenue is not available, a deferred inflow of resources is reported until such time as the revenue becomes available.

G. Long-term Liabilities

1. General Obligation & Special Obligation Bonds Payable

General obligation bonds payable have been authorized and issued primarily to provide funds for acquisition and construction of capital facilities for higher education, public and mental health, correctional facilities, environmental conservation purposes, maintenance and construction of highways, assistance to municipalities for construction of water and sewage systems, and local schools.

Once authorized by the Legislature, the State Treasurer, with the approval of the Governor, may issue general obligation bonds. The bonds are to be payable in substantially equal or diminishing amounts, the first such payment to be payable not later than five years after the date of the bonds, and the last such payment to be made no later than twenty years after the date of the bonds.

Special obligation transportation infrastructure bonds are limited obligations of the State of Vermont payable from and secured solely by a pledge of funds held in trust by the Peoples United Bank in accordance with the terms of a Trust Agreement. Funding sources for the pledged funds are funds to be received from the Motor Fuel Infrastructure Assessments as authorized by Act 50 of the 2009 legislative session. The proceeds from this issue are expected to be expended for transportation infrastructure purposes, namely the rehabilitation or replacement of State bridges, construction of roadway capacity projects.

The changes in bonds principal payable for fiscal year 2015 are summarized in the following schedule.

	General Obligation Bonds		Spec	cial Obligation Bonds	Total Obligation Bonds

Future general and special obligation debt service requirements at June 30, 2015 are as follows:

2. Bond Refundings

During the 2015 fiscal year, the State issued general obligation refunding bonds 2014 Series C in the amount of \$36,205,000 to be used solely to refund portions of the State's general obligation bonds. Through advanced refunding, portions of the 2005 Series C Bonds, 2007 Series A Bonds and 2007 Series D Bonds were refunded with proceeds from the 2014 Series C Bonds on a current basis of \$37,170,000. The total refunded amount of \$37,170,000 results in defeasance of debt and the liabilities have been removed from the State's financial statements. Total proceeds inclusive of premium for the 2014 Series C is \$40,182,501, after paying \$247,710 in refunding bond issuance costs, \$39,934,791 was paid to the bond escrow agent. The net carrying value of the refunded debt was \$37,393,976. The State has taken advantage of lower interest rates; and has decreased its aggregate debt service payments by \$3,480,778 over the twelve years ending June 2028. The economic gain (the present value of the debt service savings) for the State through this transaction is \$3,027,760 using a discount rate of 2.2265581%.

During fiscal years 2015, 2012, and 2010, the State defeased "in-substance" certain general obligation bonds by issuing new bonds and by placing the proceeds of these new bonds in an irrevocable trust. These trust assets are utilized to make all debt service payments on the defeased bonds. Accordingly, these trust assets and the liability for the defeased bonds are not included in the State's financial statements.

The total amount of defeased bonds remaining outstanding at June 30, 2015, is \$68,000,000.

3. Lease Commitments

A. Operating Leases

The State is committed under various operating leases covering real property (land and buildings) and equipment. Although lease terms vary, certain leases continue subject to appropriation by the General Assembly. If continuation is reasonably assured, leases requiring appropriation by the General Assembly are considered non-cancelable leases for financial reporting purposes. It should also be noted that the State is currently negotiating a small number of operating leases on which rent is being paid on a month-by-month basis and for which there is no signed agreement. These leases have not been included in the following table.

Total lease payments paid by the primary government in fiscal year 2015 was \$17,181,995 for operating leases of which \$17,051,878 was paid for property leases, \$129,667 for equipment leases and \$450 for cancellable land rentals.

The following is a summary of the estimated future minimum rental commitments under operating leases for real property and equipment at June 30, 2015:

	Р	rimary Governme	nt				
Fiscal Year	Non- Cancelable Leases	Cancelable Leases	Total				
<u></u>	<u></u>	<u></u>	<u></u>				
2016	\$ 12,902,735	\$ 450	\$ 12,903,185				
2017	9,648,482	450	9,648,932				
2018	8,568,166	450	8,568,616				
2019	7,929,408	450	7,929,858				
2020	7,167,003	450	7,167,453				
2021 - 2025	21,805,742	2,250	21,807,992				
2026 - 2030	803,495	2,250	805,745				
Totals	\$ 68,825,031	\$ 6,750	\$ 68,831,781				

B. Capital Leases

The State has entered into capital lease arrangements to acquire various items of machinery and equipment and building improvements with a present value of minimum lease payments totaling \$15,624,855 at the commencement of the lease agreements. The majority of the present value amount is from a building lease between ReArch Company, LLC. and the State of Vermont. The agreement is one piece of a multi-part downtown redevelopment strategy for the City of St. Albans. Various State agencies and Departments commenced leasing the new office space in December, 2014. The lease commitment assumes a 20 year term; however, the agreement has an option that would allow the State to purchase the property on the tenth anniversary of the lease. The present value amount of the new building lease is \$11,819,357. In addition, the State continues to lease from HLFB, Inc., for energy efficiency projects for State buildings located in Montpelier, Waterbury and Middlesex. The present value amount from the HLFB agreement is \$3,776,619.

Capital lease payments for the primary government in 2015 totaled \$976,786 with \$7,458 for machinery and equipment, \$392,036 for building improvements, and \$577,292 for the building lease in St. Albans.

The future minimum lease obligation and the net present value of the minimum lease payments at June 30, 2015 are as follows:

Fiscal Year	 Primary Government
2016	\$ 1,293,610
2017	1,316,446
2018	1,341,678
2019	1,048,470
2020	964,354
2021-2025	5,157,167
2026-2030	5,764,051
2031-2035	 5,649,662
Total minimum lease payments	22,535,438
Less interest	 (10,660,337)
Present value of minimum lease payments	\$ 11,875,101

4. Retirement Plans and Other Postemployment Benefits

In accordance with State statutes, the State Treasurer and the individual retirement systems' Board of Trustees administer the State's three defined benefit pension plans and two defined contribution plans. In addition to providing pension benefits, the State also offers other postemployment medical insurance benefit plans to retirees of the Vermont State Retirement System and State Teachers' Retirement System. Disclosures relating to defined benefit pension plans are included in 4. A. below, those relating to defined contribution pension plans are included in 4. B. below, and those relating to other postemployment benefits (OPEB) are included in 4. C. below.

These systems are considered part of the State's reporting entity and are included in the accompanying financial statements as pension and other postemployment benefit trust funds in the fiduciary fund type. There are no separate stand-alone financial statements issued for these plans.

Summary of significant accounting policies - basis of accounting and valuation of investments

The financial statements for the pension and other postemployment benefit trust funds are prepared using the accrual basis of accounting. Plan members' contributions are recognized in the period in which the contributions are due. The employers' contributions are recognized when legally due. Benefits and refunds are recognized when due and payable in accordance with the terms of the plans. For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the pension plans and additions to/deductions from the plans' net position have been determined on the same basis as they are reported by the pension plans. All investments are reported at fair value. Securities traded on a national exchange are valued at the last reported sales price on June 30, 2015. Securities without an establish market are reported at estimated fair value. Additional information on the plans' investments may be found in Note IV. B. - Investments.

A. Defined Benefit Retirement Plans

The State has implemented GASB Statement No. 68, Accounting and Reporting for Pensions and GASB Statement No. 71, Pension Transitions for Contributions Made Subsequent to the Measurement Date - an amendment of GASB Statement No. 68, for the fiscal year ending June 30, 2015. GASB Statement No. 68 replaces the requirements of GASB Statement No. 27, Accounting for Pensions by State and Local Government Employers and requires that employers report a net pension liability (NPL) and related pension expense as determined by the plan under the requirements contained in GASB Statement No. 67. GASB Statement No. 71 requires that upon implementation of GASB Statement No. 68, a government recognize a beginning deferred outflow of resources for its pension contributions made subsequent to the measurement date of the beginning net pension liability.

Implementation of these new financial reporting standards required that the State restate its beginning net position as of July 1, 2014, for the cumulative effects of applying this statement. In addition, in accordance with the provisions of these statements, beginning balances of deferred pension outflows of resources and deferred pension inflows of resources have not been reported, except for recognizing the beginning balance for deferred outflows of resources for pension contributions made subsequent to the measurement date of the beginning pension liability but before the start of the State's fiscal year. Disclosures required under GASB Statement No. 68 only apply to the two defined benefit plans for which the State is required to fund the Net Pension Liability (See Section A.2. below, page 123).

The State implemented GASB Statement No. 67, Financial Reporting for Pension Plans for the fiscal year ending June 30, 2014. This statement replaced the requirements of GASB Statement No. 25, Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans, and specified the required approach to measuring the pension liability of employers and nonemployer contributing entities for benefits provided through the pension plan. GASB Statement No. 67 required plans to calculate a net pension liability (or NPL) to be measured as the total pension liability less the amount of the pension plan's fiduciary net position. Disclosures required under GASB Statement No. 67 include all defined benefit pension plans for which the State acts as a fiduciary (See Section A.3. below, page 129).

Neither of these new Statements affects the way that a government may chose to fund their pension obligations. While GASB Statement No. 68 changes the amount of the pension liability that is reported on the financial statements, governments may continue to fund their plans by calculating an actuarially determined contribution and measuring their funded status as it relates to that actuarially determined contribution. GASB Statement No. 68 requires certain disclosures if an actuarially determined contribution has been calculated. The disclosures, which include schedules presenting the actuarially determined contribution, the amount of those contributions recognized by the plan, the difference between the two amounts, the amount of covered-employee payroll, and the contributions as a percentage of covered-employee payroll are included as Required Supplementary Information and Notes to Required Supplementary Information (See page 165).

Information regarding funding progress of the unfunded actuarial accrued liability, previously required by GASB Statement No. 27, is not required by GASB Statement No. 68. Management believes this information is useful to users of the State's financial statements, and has included discussions on funding progress in the Management's Discussion and Analysis. The discussion includes information on all plans for which the State acts as a fiduciary (See page 35).

In order to provide the necessary disclosures that are required under the various GASB Statements, the disclosures below are separated into three sections. The first section (Disclosures about the Defined Benefit Retirement Plans) offers disclosures about the plans themselves - descriptions of the plans and who is covered; an analysis of the membership of the various groups of the various plans as of the end of the fiscal year; a discussion of benefits provided by each of the plans, and the financial statements of each of the three defined benefit plans.

The second section (Financial Reporting of Net Pension Liability and Pension Expense by the Employer as required by GASB Statement No. 68) provides funding information regarding the pension plans that are required by GASB Statement No. 68 - changes in net pension liability, balances of deferred pension outflows of resources and deferred pension inflows of resources (including prospective schedules of amortization of the deferred outflows and inflows), and the calculation of pension expense for the year.

The third section (Net Pension Liability and Disclosures required by GASB Statement No. 67) provides the information that is required by GASB Statement No. 67 - the calculation of the net pension liability; the actuarial assumptions and census data that were used in calculating that NPL; the discount rate that was used in the calculations; and the sensitivity of the NPL to changes in the discount rate. The Statement of Net Plan Position and the Statement of Changes in Plan Net Position for the fiscal year ended June 30, 2015 are included at the end of this section.

1. Disclosures about the Defined Benefit Retirement Plans

This first section provides the disclosures about the defined benefit retirement plans required by GASB Statement No. 67, including the plan descriptions, benefits and membership at June 30, 2015.

Plan Descriptions

The <u>Vermont State Retirement System</u> (VSRS) (3 V.S.A. Chapter 16) is a single-employer defined benefit pension plan which covers substantially all general State employees and State Police, except employees hired in a temporary capacity. Membership in the system is a condition of employment.

Management of the plan is vested in the VSRS Retirement Board, which consists of an appointee of the governor; state treasurer; commissioner of human resources; commissioner of finance and management; three members of the Vermont State Employees' Association who are active members of the system (each chosen by such association in accordance with its articles of association) and one retired state employee who is a beneficiary of the system (to be elected by the Vermont Retired State Employees' Association).

The <u>State Teachers' Retirement System</u> (STRS) (16 V.S.A. Chapter 55) is a cost-sharing multiple-employer defined benefit pension plan with a special funding situation. It covers nearly all public day school and nonsectarian private high school teachers and administrators as well as teachers in schools and teacher training institutions within and supported by the State that are controlled by the State Board of Education. Membership in the system for those covered classes is a condition of employment. During the year ended June 30, 2015, the retirement system consisted of 287 participating employers.

Management of the plan is vested in the STRS Board of Trustees, which consists of the secretary of education (ex-officio); the state treasurer (ex-officio); the commissioner of financial regulation (ex-officio); two trustees and one alternate who are members of the system (each elected by the members of the system under rules adopted by the board) and one trustee and one alternate who are retired members of the system receiving retirement benefits (who are elected by the Association of Retired Teachers of Vermont).

The <u>Vermont Municipal Employees' Retirement System</u> (MERS) (24 V.S.A., Chapter 125) is a cost-sharing, multiple-employer defined benefit pension plan designed for school districts and other municipal employees that work on a regular basis and also includes employees of museums and libraries if at least half of that institution's operating expenses are met by municipal funds. An employee of any employer that becomes affiliated with the system may join at that time or at any time thereafter. Any employee hired subsequent to the effective participation date of their employer who meets the minimum hourly requirement is required to join the system. During the year ended June 30, 2015, the retirement system consisted of 437 participating employers.

Management of the plan is vested in the MERS Retirement Board of Trustees, which consists of the state treasurer; two employee representatives who at all times during their term of office are contributing members and have completed five years of creditable service (each elected by the membership of the system); one employer representative who shall at all times during their term of office be a member of the governing body, chief executive officer or supervisor of a participating employer (elected by the membership of the system) and one employer representative who shall at all times during their term of office be a member of the governing body, chief executive officer or supervisor of a participating employer (appointed by the governor from candidates jointly submitted by the Vermont League of Cities and Towns and the Vermont School Boards Association).

Copies of each individual defined benefit retirement plan's annual actuarial valuation report, and information describing each defined benefit plan's provisions in greater detail, are available for inspection at the Retirement Division, Office of the State Treasurer, 109 State Street, Montpelier, Vermont 05609-6901.

Membership of the Vermont State Retirement System is made up of the following:

· general employees who did not join the non-contributory system on July 1, 1981 (Group A);

- · State police, law enforcement positions, and airport firefighters (Group C);
- · judges (Group D);
- · terminated vested members of the non-contributory system (Group E); and
- · all other general employees (Group F).

Membership of the State Teachers' Retirement System is made up of the following:

· general teachers who did not join the non-contributory system on July 1, 1981 (Group A);

- · terminated vested members of the non-contributory system (Group B); and
- · all other general teachers (Group C).

Membership of the Vermont Municipal Employees' Retirement System is made up of the following:

- general employees whose legislative bodies have not elected to become a member of Group B or Group C (Group A);
- general employees whose legislative bodies have elected to become members of Group B or Group C (Group B & C);
- · sworn police officers, firefighters and emergency medical personnel (Group D);

At June 30, 2015, the State Treasurer's Office reports the following membership of each of the defined benefit plans by status and group.

2. Employer Reporting of Pension Liabilities, Pension Expense, Deferred Outflows of Resources, and Deferred Inflows of Resources Related to Pension Plans as required by GASB Statement No. 68

This section includes the information that is required to be reported by employers per GASB Statement No. 68. It reports information regarding the calculation of the State's net pension liability, including changes during the measurement period in both total pension liability and plan net position; balances in the various components of deferred pension outflows of resources and deferred pension inflows of resources and the amounts to be recognized in pension expense in future periods; and the calculation of pension expense. In addition to presenting the NPL, this section also includes information on the actuarial assumptions and census data used in the valuation, the discount rate that was used to calculate the NPL, and disclosures as to the sensitivity of the NPL to changes in the discount rate.

The State is responsible for 98.2355% of the VSRS net pension liability. The Vermont Veterans' Home (a discrete component unit) is responsible for 1.7645% of the VSRS net pension liability. The STRS is a cost-sharing multiple-employer plan with a special funding situation. The State is responsible for 100% of the STRS net pension liability as a non-employer contributing entity. The information is presented in this section is for those two plans. The State does not participate in the MERS plan, so no employer information is presented for that plan.

Reporting Date, Measurement Date, and Valuation Date (Employer Reporting)

Net pension liabilities, deferred pension outflows of resources, deferred pension inflows of resources, and pension expense are all presented as of the State's reporting date (June 30, 2015) and for the State's reporting

period (the year ended June 30, 2015). These amounts are measured as of the measurement date and for the measurement period (the period between the prior and current measurement dates). GASB Statement No. 68 requires that the current measurement date be no earlier than the end of the employer's prior fiscal year. For the reporting date of June 30, 2015, the State has chosen to use the end of the prior fiscal year (June 30, 2014) as the measurement date, and the year ended June 30, 2014 as the measurement period.

The total pension liability is determined by an actuarial valuation performed as of the measurement date, or by the use of update procedures to roll forward to the measurement date amounts from an actuarial valuation as of a date no more than 30 months and 1 day earlier than the employer's most recent fiscal year-end. The State has elected to apply update procedures to roll forward amounts from an actuarial valuation performed as of June 30, 2013, to the measurement date of June 30, 2014.

Net Pension Liabilities (Employer Reporting)

The net pension liability (NPL) is measured as the portion of the actuarial present value of projected benefit payments that is attributable to past periods of employee service, net of the pension plan's fiduciary net position. The changes in the components for the measurement period are as follows (amounts are in thousands):

	<u>Vermont State Retirement System</u> Increase (Decrease)					State Teachers' Retirement System Increase (Decrease)					
		tal Pension Liability (a)	Plan Net Position		Net Pension Liability		Total Pension Liability		Plan Net Position (b)	Net Pension Liability (a-b)	
Balances - June 30, 2013	\$	(a) 1,917,377	\$	(b) 1,470,492	\$	(a-b) 446,885	\$	(a) 2,565,354	(b) \$1,554,352	\$	1,011,002

Additional information regarding the changes in the net pension liability for the year ended June 30, 2015 can be found in the Required Supplementary information immediately following these notes to the financial statements.

Deferred Pension Outflows of Resources and Deferred Pension Inflows of Resources (Employer Reporting)

Most changes in the net pension liability are included in pension expense during the year of change. Changes resulting from current-period service cost, interest on the total pension liability, and changes in benefit terms are required to be included in pension expense immediately. Similarly, projected earnings on the pension plan's investments are also required to be included in the determination of pension expense immediately.

The effects of certain other changes in the net pension liability are required to be included in pension expense over the current and future periods, depending on the nature of the change.

The effect on the net pension liability of differences between the projected earnings on pension plan investments and actual experience with regard to those earnings is required to be included in pension expense in a systematic and rational manner over a closed period of five years, beginning with the current period. Changes in the net pension liability not included in pension expense are required to be reported as deferred outflows of resources or deferred inflows of resources related to pensions. This treatment arises from the concept that these changes result from the use of estimates, where probabilities of events range from zero to 100 percent, while actual events either occur or do not occur. Therefore, differences between some estimates and actual experience will occur with every measurement that incorporates future events.

The effects on the total pension liability of (1) changes of economic and demographic assumptions or of other inputs and (2) differences between expected and actual experience are required to be included in pension expense in a systematic and rational manner over a closed period equal to the average of the expected remaining service lives of all employees that are provided with benefits through the pension plan (active employees and inactive employees), beginning with the current period. Changes in the net pension liability not included in pension expense are required to be reported as deferred outflows of resources or deferred inflows of resources related to pensions. This treatment arises from the concept that pensions arise from an exchange between employee and employee of salaries and benefits for employee service each period and that these transactions and related pension measurements are viewed in the context of ongoing, career-long employment relationships.

Employer contributions subsequent to the measurement date of the net pension liability are required to be reported as deferred outflows of resources, and will be recognized as a reduction of the net pension liability at June 30, 2016.

		Prin Gover			Discrete Component Units				
Source	Οι	eferred Itflows of esources	In	Deferred If Iows of Sources	Out	ferred flows of sources	Inf	eferred lows of sources

Employer contributions made subsequent to the measurement date Total	\$	<u>127,856</u> 128,333	\$		\$	<u>934</u> 934	\$		

As of June 30, 2015, the State reported the following deferred pension outflows of resources and deferred pension inflows of resources (amounts are in thousands):

The amount reported as deferred pension outflows of resources resulting from employer contributions made subsequent to the measurement date will be recognized as a reduction of the net pension liability at June 30, 2016 and is included in the table below. The deferred pension outflows of resources and deferred pension inflows of resources, as discussed on the previous page, will be recognized in pension expense as follows (amounts are in thousands):

Year Ended	Primary	Discrete
June 30	 Government	 Component Units
2016	\$ 82,441	\$ 466
2017	(45,415)	(469)
2018	(45,416)	(467)

Pension Expense (Employer Reporting)

As discussed above, most changes in the net pension liability are included in pension expense in the year of change, including changes resulting from current-period service cost, interest on the total pension liability, changes in benefit terms, and projected earnings on the pension plan's investments. Other changes in net pension liability are recorded as deferred pension outflows of resources and deferred pension inflows of resources, and included in pension expense on a systematic and rational manner over current and future periods.

Pension expense for the year ended June 30, 2015, is as follows (amounts are in thousands):

	_	Primary vernment	Co	omponent Units
Service cost	\$	71,818	\$	695
Employee contributions		360,021		2,764
Interest on total pension liability		(63,744)		(561)

Total Pension Expense	\$	142,816	\$	831

Actuarial Methods and Assumptions (Employer Reporting)

Methods and assumptions used to determine pension expense and total pension liability are based on a valuation date of June 30, 2013 for VSRS and STRS. The chart on the following page summarizes these methods and assumptions.

	VSRS	STRS
Valuation date	6/30/2013	6/30/2013
Inflation assumptions	3.00% - 3.25%	3.00% - 3.25%
Investment rate of return	6.25% - 9.00%	6.25% - 9.00%
Projected salary increases	3.00% - 7.79%	4.25% - 8.40%
Cost of living adjustments	1.5% - 3.0%	1.5% - 3.0%
Post Retirement Adjustments		
Allowances in payment for at least one year adjusted for cost of living based on CPI but not in excess of percentage indicated	Groups A, C, D - 5%	Group A - 5%
Allowances in payment for at least one year increased on January 1 by one-half of the percentage increase in the CPI but not in		
excess of percentage indicated	Group F - 5%	Group C - 5%
Assumed annual rate of cost-of-living increases	For those eligible for increases of 100% of CPI change - 3%	For those eligible for increases of 100% of CPI change - 3%
	For those eligible for increases of 50% of CPI change - 1.5%	For those eligible for increases of 50% of CPI change - 1.5%
Census Data for 2013 Valuation		
Retired members or beneficiaries currently		
receiving benefits	5,980	8,086
Inactive members	867	2,416
Active members	8,325	9,952
Terminated vested members	732	740

Mortality rates are based as follows for the various retirement systems:

<u>Vermont State Retirement System</u>. Mortality rates for active employees were based on the RP-2000 Mortality Table for Employees, with adjustments for mortality improvements based on Scale AA, to 2016; rates for retirees and beneficiaries were based on the RP-2000 Mortality Tables for Employees and Healthy Annuitants projected with Scale AA, to 2010; and rates for disabled retirees were based on the RP-2000 Combined Mortality Tables for Employees and Healthy Annuitants with a three-year set-forward.

<u>State Teachers' Retirement System</u>. Mortality rates for active employees were based on the RP-2000 Mortality Table for Employees, with adjustments for mortality improvements based on Scale AA, to 2016; rates for retirees, terminated vested members and beneficiaries were based on the 1995 Buck Mortality Tables set back three years for males and one year for females; and rates for disabled retirees were based on the RP-2000 Disabled Life Table projected with Scale AA, to 2016.

<u>Vermont Municipal Employees' Retirement System</u>. Mortality rates for active employees were based on 50% of the probabilities in the 1995 Buck Mortality Tables for Males and Females; rates for non-disabled retirees and terminated vested members were based on the 1995 Buck Mortality Tables with no set back for males and one year set-back for females; rates for beneficiaries are based on the 1995 Buck Mortality Tables for Males and Females; and rates for disabled retirees were based on the RP-2000 Disabled Life Tables.

The actuarial assumptions used in the June 30, 2013 valuation were based on the results of an actuarial experience study for the period from July 1, 2005, through June 30, 2010. Actuarial valuations attempt to estimate costs associated with the pension system based on a number of demographic, economic, and retirement experience assumptions. To the extent assumptions are at variance to experience, this can result in actuarial gains and losses ultimately impacting contribution rates and the development of the actuarially required contribution. Experience studies are required by statute to be conducted every five years to review actual experience in comparison to these assumptions and to provide recommended changes to assumptions.

The long-term expected rate of return on pension plan investments was determined using best-estimate ranges of expected future nominal rates of return (expected returns, net of investment expense and inflation) developed for each major asset class using an econometric model that forecasts a variety of economic environments and then calculates asset class returns based on functional relationships between the economic variables and the asset classes. These best estimate ranges were combined to produce forecasts of the short, intermediate, and longer term horizons by weighting the expected future nominal rates of return by the target asset allocation percentage. The various time horizons in the forecast are intended to capture more recent economic and capital market conditions as well as other plausible environments that could develop in the future over economic cycles. To reflect this in the rate-of-return assumption, a Select and Ultimate assumption setting approach, which is cited in Section 3.6.4 of Actuarial Standard of Practice No. 27 as an alternative to a single assumed rate of return, is employed. Best estimates of arithmetic real rates of return for each major asset class included in the target asset allocation as of June 30, 2014 are summarized in the following table:

	Target Asset	Long-term Expected Real Rate of
Asset Class	Allocation	Return
Equity	31.50%	6.70%
Fixed Income	33.00%	2.94%
Alternatives	15.50%	6.26%
Multi-Strategy	20.00%	5.98%

Nominal long-term expected rates of return for these asset classes are equal to the sum of the above expected long-term real rates and the expected long-term inflation rate of 3.0%.

Discount Rate (Employer Reporting)

The discount rate used to measure the total pension liability was 8.22% for the VSRS and 8.15% for the STRS. The projection of cash flows used to determine the discount rate assumed that contributions will continue to be made in accordance with the current funding policy. Based on these assumptions, the fiduciary net position was projected to be available to make all projected future benefit payments to current System members, through the fiscal year ending June 30, 2109. Therefore, a blended rate incorporating a municipal bond rate is not needed. The assumed discount rate has been determined in accordance with the method prescribed by GASB Statement No. 68.

The annual money-weighted rate of return on pension plan investments calculated as the internal rate of return on pension plan investments, net of pension plan investment expenses for the year ended June 30, 2014 was 14.05% for VSRS, 13.83% for STRS. A money-weighted rate of return expresses investment performance, net of pension plan investment expense, adjusted for the changing amounts actually invested.

Sensitivity of the Net Pension Liability to Changes in the Discount Rate (Employer Reporting)

The following presents the net pension liability of the various retirement systems (at the June 30, 2014 measurement date), calculated using the discount rates determined above, as well as what the systems' net pension liability would be if it were calculated using a discount rate that is one percentage point lower or one percentage point higher than the current rate (amounts are in thousands):

	 VSRS	 STRS
One-percent decrease		
Discount rate	7.22%	7.15%
Net pension liability	\$ 587,188	\$ 1,258,726
Net pension liability, as reported		
Discount rate	8.22%	8.15%
Net pension liability	\$ 351,642	\$ 958,437
One-percent increase		
Discount rate	9.22%	9.15%
Net pension liability	\$ 153,107	\$ 706,364

3. Net Pension Liability and Disclosures required by GASB Statement No. 67 (Plan Reporting)

This section includes the information that is required to be presented by GASB Statement No. 67, reporting on the financial statements for the defined benefit plans for the year ended June 30, 2015. Separate valuations were performed by the State's actuary to calculate the total pension liability in accordance with this standard for financial reporting by pension plans and calculates the net pension liability (NPL). The plans elected to base the valuations on plan data as of June 30, 2014 and used update procedures to roll forward the total pension liability to the pension plan's fiscal year end of June 30, 2015. In addition to presenting the NPL, this section also includes information on the actuarial assumptions used in the valuation, the discount rate that was used to calculate the NPL, and disclosures as to the sensitivity of the NPL to changes in the discount rate.

Net Pension Liabilities (Plan Reporting)

The components of the net pension liabilities of the defined benefit retirement plans at June 30, 2015, are shown as follows with amounts in thousands:

	Re	/ermont State etirement System	Vermont State Teachers' Retirement System	E	Vermont Municipal Employees Retirement System
Total pension liability Plan fiduciary net position	\$	2,169,909 (1,624,861)	\$ 2,839,621 (1,653,116)	\$	613,000 (535,904)
Net pension liability	\$	545,048	\$ 1,186,505	\$	77,096
Plan fiduciary net position as a percentage of total pension liability		74.88%	58.22%		87.42%

Actuarial Assumptions (Plan Reporting)

The June 30, 2015 total pension liability was determined by rolling forward the total pension liability as of June 30, 2014 to June 30, 2015, using the actuarial assumptions and methods used in the June 30, 2014 actuarial valuation of the plans. Except for the expected rate of return on assets, there have been no changes in the assumptions used for the June 30, 2013 actuarial valuations. The expected rate of return on assets was

changed to 7.95% for each plan. There were no changes in benefit terms that affected measurement of the net pension liability since the prior measurement date.

Additional information regarding changes in the net pension liability for the year ended June 30, 2015 can be found in the Required Supplementary Information section immediately following these notes to the financial statements.

The long-term expected rate of return on pension plan investments was determined using best-estimate ranges of expected future nominal rates of return (expected returns, net of investment expense and inflation) developed for each major asset class using an econometric model that forecasts a variety of economic environments and then calculates asset class returns based on functional relationships between the economic variables and the asset classes. These best estimate ranges were combined to produce forecasts of the short, intermediate, and longer term horizons by weighting the expected future nominal rates of return by the target asset allocation percentage. The various time horizons in the forecast are intended to capture more recent economic cycles. To reflect this in the rate-of-return assumption, a Select and Ultimate assumption setting approach, which is cited in Section 3.6.4 of Actuarial Standard of Practice No. 27 as an alternative to a single assumed rate of return, is employed. Best estimates of arithmetic real rates of return for each major asset class included in the target asset allocation as of June 30, 2015 are summarized in the following table:

	Target Asset	Long-term Expected Real Rate of
Asset Class	Allocation	Return
Equity	32.00%	8.61%
Fixed Income	35.00%	1.91%
Alternatives	17.00%	6.93%
Multi-Strategy	16.00%	4.88%

Nominal long-term expected rates of return for these asset classes are equal to the sum of the above expected long-term real rates and the expected long-term inflation rate of 3.0%.

Discount Rate (Plan Reporting)

The discount rate used to measure the total pension liability was 7.95% for the VSRS, STRS, and MERS. Amounts for the prior year were 8.22%, 8.15% and 8.23%, respectively. The projection of cash flows used to determine the discount rate assumed that contributions will continue to be made in accordance with the current funding policy. Based on these assumptions, the fiduciary net position was projected to be available to make all projected future benefit payments to current System members, through the fiscal year ending June 30, 2112. Therefore, a blended rate incorporating a municipal bond rate is not needed. The assumed discount rate has been determined in accordance with the method prescribed by GASB Statement No. 67.

The annual money-weighted rate of return on pension plan investments calculated as the internal rate of return on pension plan investments, net of pension plan investment expenses for the year ended June 30, 2015 was (0.50%) for VSRS, (0.40%) for STRS, and (0.51%) for MERS. Amounts for the prior year were 14.05%, 13.83% and 14.13% respectively. A money-weighted rate of return expresses investment performance, net of pension plan investment expense, adjusted for the changing amounts actually invested.

Sensitivity of the Net Pension Liability to Changes in the Discount Rate (Plan Reporting)

The following presents the net pension liability of the various retirement systems, calculated using the discount rates determined above, as well as what the systems' net pension liability would be if it were calculated using a

discount rate that is one percentage point lower or one percentage point higher than the current rate (amounts are in thousands):

	 VSRS	 STRS	 MERS
One-percent decrease Discount rate	6.95%	6.95%	6.95%
Net pension liability	\$ 802,737	\$ 1,506,647	\$ 153,994
Net pension liability, as reported Discount rate Net pension liability	\$ 7.95% 545,048	\$ 7.95% 1,186,505	\$ 7.95% 77,096
One-percent increase Discount rate Net pension liability	\$ 8.95% 328,082	\$ 8.95% 917,934	\$ 8.95% 12,633

The defined benefit financial statements are as follows.

B. Defined Contribution Retirement Plans

Retirement Plan Descriptions

In accordance with Title 3 of the Vermont Statutes Annotated, Chapter 16A, the State established an optional single employer defined contribution pension plan for exempt State employees effective January 1, 1999. The <u>Vermont State Defined Contribution Plan</u> is reported in the Pension Trust Funds. Exempt employees hired after January 1, 1999, have a one-time opportunity to elect either the defined benefit or defined contribution plan. Employees are required to contribute at the rate of 2.85%. The State is required to contribute to each employee's account at the rate of 7% of the employee's compensation for each payroll period. An employee becomes vested in the plan after completion of 23 months of creditable service as a State employee. During the fiscal year ending June 30, 2015, member contributions totaled \$748,019 with State employer contributions at \$1,837,253. As of June 30, 2015, the Vermont State Defined Contribution Plan's net position totaled \$58,343,500 and there were 602 participants.

<u>The Vermont Municipal Employees' Defined Contribution Plan (24 V.S.A. 5070)</u>, a multiple employer defined contribution pension plan, was implemented by the Vermont Municipal Employees' Retirement System's Board of Trustees on July 1, 2000, and is reported as a pension trust fund. The defined contribution plan was offered by municipal employers to one or more groups of their eligible employees. Once offered by the employer, each eligible employee was required to make an election to participate. Employees participating in one of the municipal defined benefit plans who elected to participate in the defined contribution plan had the July 1, 2001, actuarial value of their accrued defined benefit plan transferred to the defined contribution plan. Employers that did not offer the defined contribution plan to their employees as of December 31, 1999, have an opportunity to do so no later than December 31 of any subsequent year with the transfer effective July 1 of the following year.

Participating municipal employees are required to contribute at the rate of 5% of earnable compensation. Employers are required to contribute at the rate of 5.125%. Employees become vested in the plan after 12 months of service. During the fiscal year ending June 30, 2015, member contributions totaled \$541,185 and employer contributions at \$603,384. As of June 30, 2015, the Municipal Employees' Defined Contribution Plan's net position totaled \$21,029,179, and there were 519 participants.

<u>The Single Deposit Investment Account (SDIA)</u>, a non-contributory multiple employer defined contribution pension plan reported as a Pension Trust Fund, was established according to the provisions of Public Act 41 of the 1981 Session. The Act authorized a new Group B non-contributory plan within the State Teachers Retirement System (STRS) and a new Group E non-contributory plan within the Vermont State Retirement System (VSRS).

The STRS's members in the Group A contributory plan could have elected to either remain in the Group A plan or transfer to the new Group B non-contributory plan. Group A members electing to transfer to the Group B plan had their choice between the following three options:

- · have both their accumulated employee contributions and accumulated interest returned to them; or
- have their accumulated contributions returned to them and only their accumulated interest invested by the retirement board in the SDIA; or
- have both their accumulated employee contributions and accumulated interest invested by the retirement board in the SDIA.

The VSRS's members in the Group A contributory plan could have elected to either remain in the Group A plan or transfer to the new Group E non-contributory plan. Group A members electing to transfer to the Group E plan had their choice between the following three options:

- · have both their accumulated employee contributions and accumulated interest returned to them; or
- have their accumulated contributions returned to them and only their accumulated interest invested by the retirement board in the SDIA; or
- have both their accumulated employee contributions and accumulated interest invested by the retirement board in the SDIA.

No additional contributions could be made to the SDIA beyond those described above. The SDIA funds are not available to the members until they retire or terminate employment. At June 30, 2015 there were 1,555 members, with net position of \$57,343,237 in the Single Deposit Investment Account.

The defined contribution plans' financial statements are as follows:

C. Other Postemployment Benefits

In addition to providing pension benefits, the State offers postemployment medical insurance, dental insurance, and life insurance benefits to retirees of the VSRS and STRS.

Medical Insurance Plan Descriptions

Vermont State Postemployment Benefits Trust Fund

The <u>Vermont State Postemployment Benefits Trust Fund</u> (VSPB) (3 V.S.A. 479a) was established in fiscal year 2007 as an irrevocable trust fund for the purpose of accumulating and providing reserves to support retiree postemployment benefits other than pension benefits for members of the Vermont State Retirement System.

Employees Hired Prior To July 1, 2008

State employees hired prior to July 1, 2008, and retiring directly from active State service for any reason (disability, early, or normal) may elect to carry whatever medical coverage is in effect at that time into retirement for themselves and their dependents. During their lifetime the retiree will pay 20% of the cost of the premium, except in the case where retirees select joint or survivorship options. If the retiree chooses the joint or survivor pension options and predeceases his or her spouse, the medical benefits along with the pension benefit will continue for the spouse. However, generally, the surviving spouse must pay 100% of the cost of the premium.

In addition, once a retiree or surviving spouse becomes eligible for Medicare coverage (at age 65); it is mandatory that they enroll in both Medicare Part A and Part B as soon as possible. Medicare thus becomes the primary insurer with the State plan becoming the secondary insurer. The insured's State insurance premium costs will then decrease in recognition of this change.

Vermont State Retirement System's defined benefit plan Group C members who terminate with 20 or more years of service, but are not yet 50 years old, may elect to receive medical coverage at the time they begin receiving their retirement benefits. For all other Vermont State Retirement System's active employees, if the employee does not retire directly from State service (inactive members), they are not eligible to participate in the State's medical insurance plan. If the insurance is terminated at any time after retirement benefits have been received, coverage will not be able to be obtained again at a later date.

Employees Hired After June 30, 2008

Based on legislation enacted during fiscal year 2008, Vermont State Retirement System's defined benefit plan Group F employees hired after June 30, 2008 will pay, upon retirement, a tiered retiree health care premium amount based on completed years of service. The tiered rate paid will range from 100% of the premium cost for retirees with less than 10 years of service to 20% of the premium cost for retirees with 20 or more years of service. Additionally, as part of the enacted legislation, Group F employees hired after June 30, 2008 will also have the ability to elect health care insurance at the 20% premium cost level when they begin to receive retirement benefits in a manner comparable to regular retirements even if the employee terminated prior to their early retirement date, provided the member had 20 years of service upon termination of employment.

As of June 30, 2015, retirees accounted for 4,530 of the 13,409 participants enrolled in the single, spousal, or family plan options. Of the \$164.3 million in premiums received by the Medical Insurance Fund (internal service fund) during 2015, retirees contributed \$7.2 million. Of the \$148.1 million in claims expense incurred by the Medical Insurance Fund during 2015, \$38.4 million was attributable to retiree claims.

The State's fiscal year 2015 contributions to VSPB totaled \$29.0 million. The VSPB then paid premium payments of \$28.4 million (calculated on a pay-as-you-go basis) to the State's Medical Insurance Fund. At June 30, 2015, the trust fund has total net position of \$19.9 million being held in trust for postemployment benefits other than pension benefits.

Retired Teachers' Health and Medical Benefit Fund

The <u>Retired Teachers' Health and Medical Benefit Fund</u> (RTHMB) (16 V.S.A. 1944b) was created by the legislature on July 1, 2014, to explicitly appropriate State contributions to the fund for current year (pay-as-you-go) health care expenses separate from the State's contribution to the State Teachers' Retirement System (STRS) pension trust fund. Prior to fiscal year 2015, the health care expenses for the STRS's retirees were paid through a sub-fund of the defined benefit pension trust fund and no State contribution was explicitly budgeted or funded.

Retirees of the STRS participate in multi-employer health coverage plans operated by the Vermont Education Health Initiative (VEHI) which is managed jointly by the Vermont School Boards Insurance Trust and the Vermont- National Education Association. VEHI partners with Blue Cross Blue Shield to provide health insurance to retired and active teachers. VEHI issues its own audited financial statements. These and plan information are available the VEHI Offices, 2 Prospect Street, Suite 5, Montpelier, VT 05602.

STRS's members have access to three medical benefit plans in retirement. The plans are identical to those offered to active teachers in public school systems in Vermont. Members may pick up medical coverage under one of the plans offered for themselves and all eligible dependents at the time of retirement, or anytime thereafter during one of the semi-annual open enrollment periods. If the member has a minimum of 10 years of creditable service at the time of retirement, the system picks up 80% of the retiree's premium only, based on the cost of the "standard plan" as defined by statute. The retiree must pick up the full cost of the premium for all covered dependents.

Once a retiree becomes eligible for Medicare coverage (at age 65), it is mandatory that they enroll in both Medicare Part A and Part B. Medicare becomes the primary insurer and the Teacher's medical plans become the secondary insurer. Two of the plans offered become "carve-out" plans to coordinate with Medicare, and one of the plans is replaced with a true Medicare supplemental plan. The premiums for all plans are reduced in accordance with the decrease in liability once Medicare becomes the primary insurer.

For fiscal year 2015, the RTHMB received nonemployer contributions of \$8.6 million from the General Fund, and \$2.5 million from the Property Tax Relief program in the Special Fund. The RTHMB also receives Employer Group Waiver Plans (EGWP) subsidies, and starting in fiscal year 2016, an annual assessment on newly hired teachers, as well as charges to federal grants for pension and health care costs. The State Treasurer is authorized to use interfund borrowings of up to \$30 million to finance any funding shortfalls, and it is the Legislature's intent to repay any such borrowings by the end of fiscal year 2023. RTHMB interfund loan balance from the General Fund at June 30, 2015 was \$13.95 million. The RTHMB paid \$24.7 million in premiums to VEHI on a pay-as-you-go basis, during fiscal year 2015.

As of June 30, 2015, 5,801 retirees are enrolled in the single, spouse, and family medical plan options. The retirees contributed \$16.7 million in premiums.

Medicare Part D - Prescription Drug Subsidy

Under the Medicare, Prescription Drug, Improvement, and Modernization Act of 2003 (MMA), employer sponsors of retiree prescription drug plans can apply for a 28% subsidy for the qualified prescription drug costs of their retirees. To be eligible for the subsidy, the employer coverage must be actuarially equivalent to the new Medicare Part D coverage and the employer must provide notices of creditable prescription drug coverage to individuals entitled to Medicare Part D.

The State Teachers' Retirement System Board of Trustees agreed that they would continue to offer the same prescription drug coverage program that has been available to active and retired teachers for the past several years. The Retirement Division has received an attestation from its actuaries that the prescription drug program offered to retired teachers is equivalent, and in fact, better than the drug program offered through Medicare Part D. The State system has also agreed to offer the same prescription drug coverage program that has been available to active and retired State employees for the past several years. The Department of Human Resources has received an attestation from its actuaries that the prescription drug program offered to retired to retired members is equivalent, and in fact, better than the drug program offered through Department of the members is equivalent, and in fact, better than the drug program offered through Medicare Part D.

The systems will continue to evaluate the results of the Medicare Part D Program and its impact on the postage 65 health care benefits marketplace and prescription drug pricing. The Vermont Teachers' Retirement Board of Trustees and the State will need to determine in future years whether it is in their best interest to continue to offer the same prescription drug program, or whether it should be modified or discontinued. If the determination is to continue to offer the same coverage, the estimated annual subsidy will fluctuate depending on the number of retirees and covered dependents that actually sign up for the Medicare Part D Program. If it is determined that the prescription coverage should either be modified or discontinued, then the savings will be realized by a decrease in medical premiums.

For the fiscal year ending June 30, 2015, the subsidy contributed by the State to the VSPB was \$2,127,281. In the case of RTHMB, the subsidy for fiscal year 2015 was \$17,860. On December 31, 2013, STRS discontinued participation in the RDS program, and enrolled retirees in the EGWP, plus a supplement, starting January 1, 2014. The transfer from RDS to EGWP is expected to result in cost savings to the State while achieving a similar level of service for covered retirees.

Plan Membership

At June 30, 2015, the number of participants included in the OPEB valuations are as follows:

	VSPB	RTHMB
Active employees (1)	8,879	9,582
Terminated vested Retired employees ⁽²⁾	4,530	1,943 6,040
Total participants	13,409	17,565

⁽¹⁾ Number of active employees includes participants in the defined contribution plan. ⁽²⁾ Includes 24 VSPB and 223 RTHMB July 1, 2015 retirements.

OPEB Actuarial Valuation - Methods and Assumptions

The State's independent actuary has prepared annual valuations of the OPEB liabilities for VSPB and RTHMB as of June 30, 2015. Both the VSPB and RTHMB reports present two separate calculations of the State's OPEB liability, depending on whether the liability would be prefunded or remain on a pay-as-you-go basis. Since the State OPEB trust fund has accumulated some assets, a third blended calculation is also included in the valuation. The MERS, a cost-sharing, multiple-employer public employees' retirement system, is administered by the State but has no associated State health care benefit or liability.

While the Vermont Municipal Employees Health Benefit Fund is classified as a postemployment benefit fund, there is no accrued liability in excess of the assets of the fund. There is no annual required contribution and unfunded actuarial accrued liability. Component units and authorities of the State will perform their own valuation as the State does not assume the risk or financial burden for their health care costs.

The VSPB, assuming no prefunding, actuarial accrued liability increased over the past year due to the following factors:

- Expected increases due to the passage of time;
- Demographic experience different than expected;

- Updated mortality assumption; and
- Updated age morbidity assumption.

These increases were partially offset by the following assumption changes:

- Lower than expected increase in premiums;
- Updated future retirees' spouse coverage election assumption;
- Updated retirement, termination, and disability assumptions; and
- Updated retiree Premium Reduction Option election assumption.

Implementation of the EGWP arrangement impacts the calculation of accrued liabilities, as it is treated differently for accounting purposes than the previous Retiree Drug Subsidy (RDS) program. GASB Statement No. 45 disallows reflecting future RDS payments as an offset to liabilities, while the EGWP arrangement flows into reduced premium expense as opposed to an intergovernmental transfer, allowing those subsidies to be reflected in the calculation of the liabilities. The State's change in the Medicare Part D program from RDS to EGWP at the start of calendar year 2015 has resulted in a change in the discount rate for VSPB plan changed from the 4.25% "blended rate" to 4.0% on the pay-as-you-go basis.

The RTHMB, assuming no prefunding, actuarial accrued liability increased over the past year due to the following factors:

- Expected increases due to the passage of time;
- Impact of recent year's demographic experience;
- Updates to the methodology used in setting cost assumptions based on revisions to Actuarial Standard of Practice No. 6; and
- Updated retirement assumption.

These factors were partially offset by the following:

- Decrease in participation assumption for future retirees and terminated vested participants;
- Decrease in future spouse participation;
- Updated Premium Reduction Option assumption; and
- Updated termination, mortality, and disability assumptions.

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Actuarially determined amounts are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

The following list contains the various actuarial methods and significant assumptions used to determine the annual required contributions at the State level for VSPB and RTHMB OPEB plans.

⁽¹⁾ This rate assumes that no additional funding will occur as the EGWP arrangement was implemented in 2015.

The actuary has estimated the change in the unfunded actuarial accrued liability between June 30, 2014 and June 30, 2015, as follows:

-	VSPB	RTHMB
Unfunded actuarial accrued liability, June 30, 2014 \$ End of year service cost	1,073,824,089 42.834.313	\$ 766,775,478 20.156.337
Interest cost	42,968,141	30,106,704
Estimated benefit payments	(37,416,308)	(28,495,158)
Estimated increase in assets	(1,531,236)	-
Impact of recent year demographic experience	5,033,043	12,097,274
Updated per capita costs	(49,895,044)	(27,701,821)
New per capita cost methodology	-	428,292,200
Change in assumptions	16,770,669	(208,194,176)
Asset loss	530,926	10,056,456
Unfunded actuarial accrued liability, June 30, 2015 $\frac{s}{=}$	1,093,118,593	<u>\$ 1,003,093,294</u>

Annual OPEB Cost and Net OPEB Obligation

The State's annual OPEB cost (expense) is calculated based on the annual required contribution of the employer (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a period not to exceed thirty years.

The following table shows the component of the State's annual OPEB cost for the year ended June 30, 2015, the amount actually contributed, and the changes in the State's net OPEB obligation.

		VSPB	RTH	IMB

The funding status of the plans as of June 30, 2015, was as follows (expressed in thousands):

The schedule of funding progress, presented as required supplementary information immediately following these notes to the financial statements, presents multi-year trend information about whether the actuarial values of plan assets are increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Dental Insurance

Dental plans are available to retired State employees, retired teachers, retired municipal employees and their eligible dependents. The dental plan must be elected at the time of retirement. The retiree pays the full premium for all covered lives. There is no cost to the State.

Life Insurance

In the case of life insurance, if a State employee retires with 20 or more years of service and was participating in the life insurance program, a \$10,000 benefit will continue into retirement. If a State employee retires due to disability prior to age 60, and if proper documentation is approved by the life insurance company, full life insurance coverage will continue at the State's expense up to age 65. When the retiree reaches the age of 65 and if they have a total of 20 years or more of active and retired (while receiving disability) service, life insurance coverage will automatically change to the \$10,000 level with 100% of the premium being paid by the State. In addition, a retiree may convert their insurance coverage in effect at their time of retirement to an individual policy within 30 days of their retirement date without a physical exam.

Vermont Municipal Employees Health Benefit Fund

The MERS RHS Plan established on July 1, 2007, is a tax-advantaged savings plan that assists retirees in paying for healthcare costs after retirement. Contributions to this fund are deposited into the RHS Plan member accounts on a tax-free basis, accumulate interest on a tax-free basis, and are drawn out during retirement on a tax-free basis to reimburse health care expenses, including out-of-pocket expenses, deductibles and premiums.

The MERS Board deposited an initial amount of \$5.1 million into the RHS accounts on July 2, 2007. Additional employer contributions totaling approximately \$6 million were collected during the course of the fiscal years 2008 and 2009 that were deposited in member accounts during fiscal year 2009. No such contributions have been made since fiscal year 2009. Future contributions and subsequent transfers to member accounts will be made as directed by the MERS Board of Trustees. There is no guarantee that the RHS member accounts will receive any additional funding. While classified as a postemployment benefit fund, there is no accrued liability in excess of the asset of the fund. There is no annual required contribution and unfunded actuarial accrued liability. All MERS defined benefit pension plan members and retirees who have a minimum of 5 years of contributory service are eligible to participate in the RHS plan. The amount each member will receive is determined by the total number of contributory years of service in the system. Each year of service is equal to one share. The share value is determined based on the total eligible population, the total number of years of contributory service represented, and the amount of the distribution. The share value will change when future deposits are made. All eligible members receive the first five shares in their medical reimbursement account, which may be used for any medical expense, including premium reimbursement. The additional shares, representing service credit above five years, are deposited into the premium reimbursement account, which may only be used for medical, dental, vision or long-term health care premium reimbursements.

The money may be accessed by members only after separation from service and the achievement of retiree status from the MERS plan. For members who were already receiving retirement benefits from the MERS, the funds in their RHS account could be accessed after July 2, 2007 to reimbursement expenses incurred after July 1, 2007. Members who are still actively employed, and members in a vested-terminated status, may access the funds once they retire and begin receiving monthly pension payments. Funds in the RHS accounts are invested in the appropriate age-related Milestone Fund through a third party record keeper.

At June 30, 2015, there were 5,287 active and retired members participating in the MERS RHS plan. Investments in member accounts as of June 30, 2015 totaled \$12,909,626.

The financial statements for the OPEB Funds are as follows:

5. Other Long-term Liabilities

Governmental activities long-term liabilities are generally liquidated by payments from the governmental and internal service funds' programs, including all major governmental fund types except for the Education Fund. Bonds payable are liquidated by transfers of resources from the General, Transportation, Special and Federal Funds. During the year ended June 30, 2015, the following changes occurred in the long-term liabilities:

	Total Liability July 1, 2014		Additions		Reductions	Total Liability June 30, 2015			Amounts due within one year	
Governmental activities										
Bonds payable										
Bonds ⁽¹⁾	\$ 593,715,000	\$	109,760,000	\$	86,880,000	\$	616,595,000	\$	50,005,000	
Bond premium	26,741,407		15,536,597		5,836,166		36,441,838		7,026,074	
Bond discount	 (176,686)		-		(12,549)		(164,137)		(12,945)	
Total bonds payable	620,279,721		125,296,597		92,703,617		652,872,701		57,018,129	
Capital leases payable	1,630,229		10,646,000		401,129		11,875,100		481,724	
Compensated absences	33,398,155		40,417,493		40,325,749		33,489,899		26,668,222	
Claims and judgments	50,853,215		165,597,718		161,095,829		55,355,104		18,348,632	
Contingent liabilities	7,000,000		-		-		7,000,000		-	
Net pension liability	1,445,629,411		436,327,370		581,084,641		1,300,872,140		-	
Net other postemployment obligations	638,444,006		119,561,151		43,693,283		714,311,874		-	
Pollution remediation obligations ⁽²⁾	 5,763,608		3,455,078		4,285,515		4,933,171		865,330	
Total governmental activities										
long-term liabilities	\$ 2,802,998,345	\$	901,301,407	\$	923,589,763	\$	2,780,709,989	\$	103,382,037	

- (1) Governmental activities bonds payable include additions of \$109,760,000 in general obligation bonds.
- (2) The Pollution Remediation Obligation (PRO) liabilities were measured using the actual contract cost, where no changes in cost are expected, or a method that is materially close to the expected cash flow technique. Liability estimates are subject to change due to cost increases or reductions, or changes in technology or applicable laws or regulations governing the remediation efforts.

Under the federal Superfund law, the State is responsible for sharing remediation costs at sites where the United States Environmental Protection Agency (USEPA) expends resources from the superfund trust for cleanup. Currently, there are five superfund sites in Vermont in various stages of cleanup, from initial assessment to cleanup activities. The Pollution Remediation Obligation (PRO) for these Superfund sites at June 30, 2015 is \$2,445,357 which is a net reduction from last year of \$24,643. The State does not anticipate recovering reimbursements from the parties who caused the pollution. The amount due within one year is \$468,289. These Superfund sites are as follows:

• Vermont has three former copper mines that are listed as federal Superfund sites. Two of these sites are in the early stages of investigation and a remedial plan has not been determined for estimating the potential liability. Cleanup of acidic discharges from one of the mines has progressed and cost estimates are available but there is still uncertainty about the long-term liability since the treatment system for the site has not been determined. Under the current phase of remedial work and cleanup, the State's obligation over the next five years is estimated at \$2,185,538, of which \$426,000 is estimated to be spent in 2016.

• There are two superfund sites under the oversight of the USEPA which have been remediated, and under the superfund site agreement the State is responsible for long-term operation and maintenance costs of the facilities constructed by the EPA. The PRO as of June 30, 2015 is \$259,819.

A former mining facility with significant ground contamination is the State's largest potential obligation for cleanup not currently listed as a Superfund site. The State has been working with potential responsible parties and the USEPA to address the environmental contamination but so far a remedy for the site's cleanup, including an estimate of the cost of cleanup, has not been determined due to the potential magnitude and the various options that are being investigated. The State performs the annual operation and maintenance of the erosion control systems installed. In 2016, the State plans to investigate and potentially remediate releases from PCB-containing transformers located on site. The PRO for oversight of the site at June 30, 2016 is \$1,212,739.

The State continues its work on cleanup of ground water contamination resulting from a chemical spill at a former dry cleaner facility. By order of the Vermont Superior Court, the Agency of Natural Resources will conduct the cleanup work required and the former owners shall be responsible for reimbursing the State for cost related to implementing the cleanup plan. In 2015, the State spent approximately \$420,000 for the construction of a permeable reactive barrier to intercept and remediate contaminated groundwater migrating towards a residential neighborhood and posing an immediate human health threat. The total PRO reported at June 30, 2015 is \$235,854.

The Agency of Transportation discovered pollution requiring remedial action at three construction sites. Oil pollution was discovered during the water line installation at an industrial park location, lead contaminated soil was discovered prior to construction of bridge work, and underground contamination was discovered during the removal of an underground storage tank at one State Office Complex. The PRO is \$189,221 at June 30, 2015. The estimated expenditures for cleanup in 2016 are \$147,000.

Asbestos removal projects in three State Buildings were completed in 2015; the total pollution remedial obligation was reduced by \$415,000 due to the completion of these projects. The State is currently working to cleanup potential health threats from mold in one building and PCB's (polychlorinated biphenyl) in wall paint in another building. The PRO is \$850,000 at June 30, 2015; the amount due in the current year is estimated to be \$235,000.

NOTES TO THE FINANCIAL STATEMENTS

Note V. OTHER INFORMATION

A. Risk Management

1. Workers' Compensation and Risk Management

The Agency of Administration's Financial Services Division oversees the Workers' Compensation and Risk Management programs, which administers all insurance programs for State government with the exception of the health and life insurance plans listed below. State policy is to minimize the purchase of commercial insurance by either self-funding or otherwise retaining the risk when it makes sense to do so. The programs set aside assets and pay claims utilizing the following three Internal Service Funds:

State Employees' Workers' Compensation Fund State Liability Self Insurance Fund Risk Management – All Other Fund (used for the purchase of commercial insurance)

The Workers' Compensation Fund covers all State employees who are injured on the job, pursuant to State statute. Certain quasi-governmental entities may also request coverage through this program. The State has unlimited exposure to liability and has not purchased any stop-loss insurance to limit this exposure. All claims are processed by Workers' Compensation personnel and are audited annually by an outside claims adjuster to ensure that the claims-based statistical information used to calculate the State's workers' compensation exposure is reliable. Workers' Compensation is reviewed annually by an outside accountant and an outside actuary, including a review of incurred but not reported claims (IBNR). The contribution required to fully fund losses is calculated annually by an outside actuary. Allocation to each participating entity is done by Risk Management personnel utilizing departmental exposure and experience factors.

The Liability Insurance Fund covers general and employment practices liability, discrimination, and auto liability risk. The coverage is comparable to standard private commercial policies. It offers coverage to the same group of participants as those covered by the workers' compensation program described above. The State's exposure to tort risk in Vermont is subject to the doctrine of sovereign immunity and is governed by the Vermont Tort Claims Act, 12 V.S.A. §5601. Exposure outside of Vermont and to federal suit and other non-tort suit is potentially unlimited. The State is self-insured retention (SIR) for the first \$500,000 of exposure and has purchased excess commercial insurance to cover the additional per-occurrence exposure in amounts of up to \$1,500,000 (\$2,000,000 total) in Vermont and \$10,000,000 in excess of the \$500,000 SIR for claims that are not subject to the Vermont Tort Claims Act. Claims are processed by Risk Management personnel (prior to 2006, claims were processed by a third-party administrator), and are audited annually by an outside claims adjuster to ensure that the claims-based statistical information used to calculate the State's liability exposure is reliable. This liability is reviewed annually by an outside actuary, including a review of incurred but not reported claims (IBNR). The contribution required to fully fund losses is calculated annually by an outside actuary. Allocation to each participating entity is done by Risk Management personnel utilizing departmental exposure and experience factors.

The Risk-Management – All Other Fund provides insurance coverage through purchased commercial policies for risks not covered in the above funds or which are self-assumed. This coverage provides insurance for State-owned real property, bonds for various categories of employees, errors and omissions coverage for judges, and various other miscellaneous coverages. The State's liability exposure is limited to the amount of the various deductibles associated with the respective policies and potentially for any claims in excess of the purchased limits.. Premium charges from the various insurers are either assessed directly against the entity requiring the coverage or apportioned among those entities receiving the benefits of the coverage. Risk Management also assesses a surcharge of up to 5% of the premium to cover administrative costs. Entities eligible for coverage are the same as those listed above for the other funds.

Insurance settlements have never exceeded the coverage disclosed above.

In addition to the three internal service funds above, effective July 1, 2007, the General Assembly established

the Sarcoidosis Benefit Trust Fund (a program in the Special Fund) to cover specific claims arising from an outbreak of Sarcoidosis at the impaired State office building in Bennington, Vermont (Act 53 of 2007). Claims are reviewed and processed under rules established that mirror the rules for the Workers' Compensation Fund claims. Funding was established as a special fund and not a proprietary fund as funding will only be available by the General Assembly as claims arise and funding needs are determined. The Fund is managed by Workers' Compensation personnel. Total payments issued from fiscal year 2008 through fiscal year 2015 are \$1,806,514.

2. Health Care Insurance, Dental Assistance Plan, Life Insurance, Employee Assistance Program, and Long Term Disability Funds for State Employee Benefit Plans

The Employee Benefits Division of the Department of Human Resources maintains medical/behavioral health insurance, dental assistance plan, life insurance, employee assistance program, and long term disability program funds for the benefit of current State employees, retired former employees, and legislators as well as employees and certain former employees of outside "special" groups which have been declared eligible to participate by statute or labor agreement. Not all of these named groups may participate in every plan. Detailed eligibility information for each group listed above can be found in the plan summaries that follow. Temporary and contractual employees are not eligible to participate in these plans.

Enrolled plan participants share in the premium cost of the medical/behavioral health plan. Prescription drug coverage is included in the medical/behavioral health plan. Premium rate setting is performed by an outside actuary in conjunction with the Administrative Services Division of the Department of Human Resources. The State's liability for incurred but not yet reported (IBNR) claims is calculated by the actuary and is based on the State's prior claims experience. Special Groups covered under the health insurance plan remit premium to the State for their members. Retirees covered under the health plan pay premium through the Retirement Division of the Treasurer's Office.

The medical insurance plan offerings have been in place since 2001. The plan options are: TotalChoice and HealthGuard which are "preferred provider organization" indemnity-type plans; the SelectCare plan which is a "point of service" plan, similar to an open-ended HMO (members may opt out of the SelectCare network but must meet a deductible and coinsurance to do so); and the SafetyNet option which is a high-deductible catastrophic plan and was offered until the end of December, 2013. Benefits are administered under a managed care arrangement. All four health plan options are self-insured by the State. The State employs a third party administrator to provide administrative services, including claims payment. To limit the State's large claims exposure, the State has purchased a stop loss insurance policy.

The self-funded State of Vermont Employee Dental Assistance Plan provides up to \$1,000 regular dental benefits annually and up to \$1,750 lifetime benefit for orthodontic expenses for each participant. These plan caps effectively limit the State's exposure to catastrophic loss so no stop-loss insurance has been purchased. The Administrative Services Division within the Department of Human Resources sets the premium rates, in consultation with the dental plan administrator's actuary. Participants include all groups mentioned in paragraph 1 above except for retirees. The State pays 100% of the premium for State employee participants and their covered dependents. Special Groups covered under the dental assistance plan remit premium to the State for their members.

The State of Vermont Employee Life Insurance Program consists of a Term-Life benefit and an Accidental Death and Dismemberment (AD&D) benefit, each of which provides coverage equal to two times a participant's base salary rounded down to the nearest \$100. Retirees who work for the State for at least twenty years and who have life insurance at the time of retirement receive a retiree life benefit of \$10,000 with no AD&D coverage. Both Life and AD&D are fully insured benefits. The State purchases insurance under which the carrier retains liability for all claims. The Administrative Services Division calculates the premium rates charged to departments for both of these programs. The State pays 75% of active employees' premiums and 100% of retirees' premium costs. Only current State employees, retired State employees, and current active employees of outside special groups are eligible to participate. Special Groups covered under the life insurance plan remit premium to the State for their members.

An Employee Assistance Program (EAP) is provided for the benefit of State employees and members of their immediate household. This program assists employees and family members in addressing problems that impact their lives including stress, family, financial, substance abuse, and other issues. Active State employees and their families are eligible for this program. The EAP Program Manager is paid a monthly fee based on the number of employees who work for the State. The plan provides up to 5 counseling sessions per case through a network of providers. No claims costs, or claims liabilities are incurred under this plan by the State. The State pays 100% of the fee for this plan.

A Long Term Disability Program is provided as an income replacement benefit for certain State employees who become disabled due to non-occupational injury or illness, and the disability is expected to be long term or permanent. The plan provides financial protection for State employees and their families by continuing a portion of their income while disabled. Only State employees who are not eligible to be represented by the employees' unions (the Vermont State Employees Association and the Vermont Troopers Association) are eligible for this benefit. Employees must be employed for one (1) year before coverage is effective. This plan is fully insured through an insurance company, so there is no liability to the State for claims. The premium is based on a percentage of the salaries of eligible participants. The State issues payment to the insurance company for the premium and the cost is then recovered from eligible employees in the following manner: Those eligible employees who are not covered by a leave plan have a one-time 0.2% salary reduction in their next cost-of-living increase following eligibility.

Three years' changes in the respective funds' claims liability amounts are displayed in the following table:

Fund and Fiscal Year	B	Liability at eginning of EFiscal Year	Current FY Claims and Changes in Estimates		Current FY Claims Payments		Liability at End of Fiscal Year
Workers' Compensation Fund							
2013	\$	26,063,348	\$	9,668,124	\$	8,437,633	\$ 27,293,839

2015		260,498		6,139,185		6,076,607	323,076

B. Budget Stabilization Reserves

The 1993 Legislature amended action taken by the 1987 Legislature by repealing legislation creating the Budget Stabilization Trust Fund and created separate Budget Stabilization Reserves within both the General Fund and Transportation Fund. The Education Fund Budget Stabilization Reserve was created by the 1999 Legislature. These reserves were created to reduce the effects of annual variations in State revenues upon

these funds by reserving certain surpluses of revenues.

The reserves balances consist of any budgetary basis surplus at the close of the fiscal year, provided the balance in each fund's Budget Stabilization Reserve shall not exceed an amount equal to five percent of its appropriations for the prior fiscal year plus any additional amounts as may be authorized by the Vermont Legislature. Use of the reserve is limited to offsetting the respective fund's deficit at the close of a fiscal year. For fiscal year 2015, the State fully funded the Budget Stabilization Reserves for the General, Transportation and Education Funds to their respective statutory maximum levels. The balances at June 30, 2015 are as follows: \$12,552,891 in the Transportation Fund's Budget Stabilization Reserve; \$69,309,130 in the General Fund's Budget Stabilization Reserve.

The State has previously reported its General Fund Budget Stabilization Reserve as reserved for budget stabilization in the governmental funds. With the implementation of GASB Statement No. 54, "Fund Balance Reporting and Governmental Fund Type Definitions", the reserve does not meet the criteria to be classified as restricted or committed fund balance, and is reported as unassigned fund balance. There has been no change in the budget stabilization policy or the way in which the policy is being carried out. The Transportation Fund's Budget Stabilization Reserve and the Education Fund's Education Reserve are classified as committed for transportation, respectively.

C. Contingent and Limited Liabilities

1. Contingent Liabilities

Vermont Economic Development Authority:

In 1974, the General Assembly created the Vermont Industrial Development Authority, renamed it the Vermont Economic Development Authority (VEDA) in 1993; and transferred the functions and the responsibilities of the Vermont Industrial Building Authority, Industrial Park Authority, and the Aid Board to it. Each of these original entities was relegated to a particular segment of commercial development. VEDA was established as a body corporate and politic and a public instrumentality of the State. It is governed by a fifteen member board which consists of the Secretary of the Agency of Commerce and Community Development, the State Treasurer, the Secretary of Agriculture, Food and Markets, and ten public members appointed by the Governor with the advice and consent of the Senate. The full faith and credit of the State is pledged to support the activities of VEDA.

VEDA has the power, under its two insurance programs (the Mortgage Insurance Program – MIP and the Financial Access program – FAP), to insure various types of loans.

Under the MIP, VEDA has the power to insure up to \$3.5 million of loans made by financial institutions for the purchase of land and construction of industrial building facilities in the State; to finance the purchase of machinery and equipment; and to provide working capital. The refinancing of existing loans is also possible under the act that created VEDA. In FY2015, VEDA included a loss reserve of \$393,000 related to the MIP and in accordance with the State's guarantee, the State recorded a similar liability at June 30, 2015. As of June 30, 2015, the State's contingent liability for mortgage insurance contracts insured under its MIP is \$1,076,303.

VEDA is authorized to reimburse lenders participating in its other insurance program (FAP) for losses incurred on loans that the lenders register with VEDA. The full faith and credit of the State is pledged in an amount equal to the reserve premium payment deposited by the participating lenders for each registered loan, with the aggregate amount of credit that may be pledged not to exceed \$1 million at any one time. The State's contingent liability for the FAP at June 30, 2015 is \$127,484. The State has no recorded payable to VEDA in the Governmental Funds for fiscal 2015.

VEDA also operates the Small Business Loan Program and a Vermont Entrepreneurial Lending Program. The full faith and credit of the State is pledged to guarantee up to \$1 million dollars of these loans. In a prior fiscal, the State paid VEDA \$308,737 for losses that were incurred in this program; however, \$17,900 was recovered.

The State's contingent liability for this program is \$709,200.

Federal Grants:

The State receives federal grants that are subject to audit and review by federal grantor agencies that could result in expenditures being disallowed under the terms of the grants. However, it is believed that required reimbursements resulting from such disallowances would not be material.

2. Limited Liabilities

Vermont Economic Development Authority:

The State has a limited liability for the VEDA. VEDA may create one or more debt service reserve funds in accordance with 10 V.S.A. Section 219. Annually, VEDA must report to the State the amount necessary to bring the reserve balances up to the minimum required by statute. This sum so certified may be appropriated by the State. To date, it has not been necessary for the State to appropriate money to maintain the reserve and it is not anticipated that any appropriation will have to be made.

Vermont Municipal Bond Bank:

The State has a limited liability for the Vermont Municipal Bond Bank (Bank). The Bank is required to maintain debt service reserve funds. 24 V.S.A. Section 4675 requires the State to provide annual appropriations to restore the reserve funds to the required minimum balance, if necessary. It has never been necessary for the State to appropriate money to the reserve fund and it is not anticipated that it will need to make an appropriation in the future.

Vermont Housing Finance Agency:

The State has a limited liability for the Vermont Housing Finance Agency (Agency). The Agency may create one or more debt service reserve funds in accordance with 10 V.S.A. Section 632. Annually, the Agency must report to the State the amount necessary to bring these reserve fund balances up to the minimum required by statute. This sum so certified may be appropriated by the State. It has not been necessary for the State to appropriate money to maintain the reserve fund and it is not anticipated that any appropriation will have to be made.

Vermont Student Assistance Corporation:

The State has a limited liability for the VSAC. VSAC may create one or more debt service reserve funds in accordance with 10 V.S.A. Section 2867. Annually, VSAC must report to the State the amount necessary to bring the reserve balances up to the minimum required by statute. This sum so certified may be appropriated by the State. To date, it has not been necessary for the State to appropriate money to maintain the reserve and it is not anticipated that any appropriation will have to be made.

Vermont Telecommunications Authority:

The State has a limited liability for the VTA. VTA may create one or more debt service reserve funds in accordance with 10 V.S.A. Section 8065. Annually, VTA must report to the State the amount necessary to bring the reserve balances up to the minimum required by statute. This sum so certified may be appropriated by the State. To date, it has not been necessary for the State to appropriate money to maintain the reserve and it is not anticipated that any appropriation will have to be made.

University of Vermont:

The State has a limited liability for the UVM. UVM may create one or more debt service reserve funds in accordance with 16 V.S.A. Section 2363. Annually, UVM must report to the State the amount necessary to bring the reserve balances up to the minimum required by statute. This sum so certified may be appropriated by the State. To date, it has not been necessary for the State to appropriate money to maintain the reserve and it is not anticipated that any appropriation will have to be made.

Vermont State Colleges:

The State has a limited liability for the VSC. VSC may create one or more debt service reserve funds in accordance with 16 V.S.A. Section 286. Annually, VEDA must report to the State the amount necessary to bring the reserve balances up to the minimum required by statute. This sum so certified may be appropriated by the State. To date, it has not been necessary for the State to appropriate money to maintain the reserve and it is not anticipated that any appropriation will have to be made.

3. Contractual Liabilities

At June 30, 2015, the State of Vermont had long-term contracts outstanding of approximately \$339,351,654 funded from federal sources, and \$1,063,294,058 funded from all other funding sources. Contracts such as retainer contracts and contracts for commodities have not been included since the nature of these on-going contracts are tracked statewide to ensure the best prices for supplies and some professional services. Following is a summary of contractual liabilities by agency, department or office at June 30, 2015.

Agency, Department, or Office	 Total Contractual Obligation	Funded by Federal Sources		 Funded by Other Sources
Agency of Administration	\$ 240,692,009	\$	20,648	\$ 240,671,361
Agency of Agriculture, Food & Markets	1,461,436		221,885	1,239,551
Agency of Commerce & Community Development	1,196,975		43,210	1,153,765
Agency of Human Services	10,034,202		9,436,427	597,775
Agency of Natural Resources	245,760,637		60,450,200	185,310,436
Agency of Transportation	12,365,603		2,200,920	10,164,683
Auditor of Account's Office	568,340,431		243,719,651	324,620,781
Center of Crime Victims Services	3,946,433		-	3,946,433
Criminal Justice Training Council	31,193		-	31,193
Agency of Education	577,911		-	577,911
Department of Labor	1,712,800		1,712,800	-
Department of Liquor Control	2,532,065		-	2,532,065
Department of Public Safety	3,713,712		898,421	2,815,291
Enhanced 911 Board	11,357,586		-	11,357,586
Department of Financial Regulation	3,481,448		-	3,481,448
Fire Service Training Council	-		-	-
Green Mountain Care Board	4,014,385		3,600,630	413,755
Joint Fiscal Office	252,860		-	252,860
Judiciary	-		-	-
Military Department	18,867,931		15,689,089	3,178,841
Office of the Attorney General	1,552,606		17,791	1,534,815
Office of the Defender General	3,311,279		-	3,311,279
Public Service Board	1,477,769		-	1,477,769
Public Service Department	5,551,579		84,092	5,467,487
Secretary of State's Office	3,607,337		1,255,889	2,351,448
State Treasurer's Office	246,701,317		-	246,701,317
State's Attorneys and Sheriffs Office	747,340		-	747,340
Vermont Life Magazine	412,583		-	412,583
Vermont Lottery Commission	 8,944,285		-	 8,944,285
Total	\$ 1,402,645,712	\$	339,351,654	\$ 1,063,294,058

The Agency of Transportation contracts are mainly infrastructure construction contracts of which 71% have end dates of June 30, 2016 or earlier. Of the Agency of Human Services contract liability balance, 38% is for contracts in the Department of Corrections, 35% is Department of Vermont Health Access, and 12% is Department of Health. Of the contracts in the Agency of Administration, 78% have end dates during fiscal year 2016, and are primarily for human resource benefit administration services, information technology services (including an electronic integrated tax system), and capital construction. The State Treasurer's Office contracts are mostly investment management services and health insurance for the retirement plans which consist of 97% of the total, with 50% having end dates during fiscal year 2016.

4. Grant Awards

The State of Vermont engages in many grant programs that benefit municipalities, non-profits, individuals and families statewide. The grant table summarizes the grant activity by government function. The award balance represents the total grant obligation outstanding at the beginning of the fiscal year. The current year awards are grants issued during the current fiscal year and have a start date during the current or prior fiscal year, and also awards issued in a prior fiscal year that have a start date in the current fiscal year. The award adjustments are grants amended in the current fiscal year that had a start date a the prior fiscal year. The grants expended include payments issued to grantees on both current year awards and prior year grant awards. The award balances at June 30, 2015 represents the remaining unexpended award amounts.

		Total Grant Obligation								
	Number of Grants Awarded in 2015	Award Balances at June 30, 2014	Current Year Awards	Award Adjustments	Grants Expended	Award Balances at June 30, 2015				
General Government	503	\$ 25,155	\$ 94,698,320	\$ 5,187,886	\$ (99,245,456)	\$ 665,905				
Protection to Persons and Property	908	25,174,279	37,194,368	(1,327,565)	(35,702,001)	25,339,081				
Human Services	901	65,118,027	225,711,798	(8,869,198)	(176,987,033)	104,973,594				
Employment and Training	61	2,163,013	3,018,781	-	(2,408,147)	2,773,647				
General Education	1,889	23,551,499	126,911,041	-	(119,224,670)	31,237,870				
Natural Resources	271	23,781,873	18,699,777	2,655,727	(28,118,844)	17,018,533				
Commerce and Community Development	193	29,304,421	24,604,127	639,385	(15,486,231)	39,061,702				
Transportation	501	182,443,715	93,120,777	8,359,324	(102,861,566)	181,062,250				
Grant Total	5,227	\$ 351,561,982	\$ 623,958,989	\$ 6,645,559	<u>\$ (580,033,948</u>)	\$ 402,132,582				

The major grants awarded in 2015 are summarized below by agency or department.

Human Services

Public health grants are awarded for prevention of diseases, public awareness programs like tobacco cessation, alcohol & drug abuse programs, HIV prevention and family planning, vaccinations and inspection programs. In 2015, there were 269 grants awarded totaling over \$48 million for public health.

During fiscal year 2015, programs under mental health for adults and children were awarded approximately \$23 million. Programs managed under mental health are for child care services, substance abuse and rehabilitation, services for homeless people with mental illness, and transitional support and housing.

The Department of Children and Families awarded 296 grants totaling over \$63 million for programs in 2015. Programs included economic assistance and services for families, child development programs, and weatherization programs.

There were \$28 million in grants awarded to 101 grantees for various aged and independent living programs. The majority of the grants were for training, work based learning and supported education, abuse prevention, caregiver programs, services for individuals with physical disabilities, general support for the blind and visually impaired, and grants for congregate and home delivered meals.

During fiscal year 2015, the State paid \$30 million to Fletcher Allen Health Care for the Graduate Medical Education program (GME). The GME program helps ensure access to quality essential professional health services for Medicaid beneficiaries through the care provided by teaching physicians and teaching hospitals. The University of Vermont contributed \$13.1 million to the State to support the GME programs; this support is listed as other revenue in the Global Commitment Fund.

General Government

The Agency of Administration includes the Department of Libraries which awarded 139 grants in the amount of \$60,964 to public libraries throughout the state, and the Department of Taxes which awarded 257 grants in the amount of \$96,438 to municipalities, Information and Innovations awarded \$2.4 million to Vermont Telecommunications Authority for the expansion of broadband and cell phone service statewide, and the Department of Finance and Management awarded approximately \$90 million to help fund higher education in Vermont.

Education

The Agency of Education awarded 1889 grants in 2015 providing support for Vermont's education system. Programs include early education and readiness programs plus wellness food programs for children. Secondary education program include the flexible pathways initiatives to increase the rates of graduation and continuation on to post-secondary education. Other programs focus on basic adult education, technology advances, and teacher and principal training and recruitment.

Transportation

Transportation grants provide funding to communities around the state that focus on safety, preservation and maintenance of existing transportation systems, economic development, and energy efficient transportation choices. Funding for ongoing projects include bridge replacement and rehabilitation, culvert repair, paving projects, enhancement projects, and various roadway projects. Vermont Better Backroads Program is an example of an enhancement project designed to promote the use of erosion control and maintenance techniques that save money while protecting and enhancing Vermont's lakes and streams. Funding is also provided for transportation alternatives including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to their daily needs, community improvement activities, and environmental mitigation; safe routes to school projects; and projects for planning, designing, or constructing boulevards and other roadways.

Natural Resources

The Agency administers grant and loan programs through its 3 departments. The Department of Environmental Conservation awarded more than \$14 million in funding which included loans to Municipalities for repair and improvement of water systems, pollution control systems, and storm-water projects. Other programs focused on education and informing the public about proper disposal of household hazardous waste products, aquatic nuisance control, and protecting environmentally sensitive areas. The Department of Forest, Parks & Recreation awarded approximately \$3 million in grants for programs that promote outdoor recreation while at the same time establish protocol to protect the environment; and the Department of Fish & Wildlife awarded approximately \$1 million in grants providing funding for an improved water and boating infrastructure, and enhanced and environmentally responsible shooting ranges.

Protection to Persons and Property

Public Safety grants are made up of safety programs like fire prevention and safety, motorcycle safety, bicycle safety, traffic safety, seatbelt safety and boating safety. In addition, the Division of Emergency Management & Homeland Security provides aid and support to Vermont's local emergency response providers by funding disaster preparedness programs. The Department issued 483 grants totaling over \$18 million.

The Vermont Crime Victims' Services awarded 105 grants in the amount of \$5.1 million for crime victim assistance, and domestic and family violence services' programs.

The Agency of Agricultural, Food & Markets awarded 215 grants in the amount of \$6.4 million to support programs that encourage growth of agriculture in Vermont while protecting the health of consumers and Vermont's environment.

Commerce and Community Development

The Agency awarded 193 grants in 2015 for programs which aim to provide decent housing, assure a suitable living environment, and expand economic opportunities for Vermonters. In addition, the agency funds the preservation of historic buildings, agricultural barns, and programs to integrate historic preservation concerns with local planning options. Of the 193 grants issued, the Department of Housing & Community Development awarded 134 grants totaling over \$21 million in funding. The Department of Economic Development awarded 42 grants totaling approximately \$1.4 million with \$600,000 of the funding allocated to the Vermont Training Program which provides employers with performance based workforce grants for pre-employment training, training for new hires and incumbent workers.

Labor

The department awarded over \$3 million to 61 grant recipients in 2015 primarily for workforce education and training activities. The grant award programs focus on economic and workforce development, increased funding for post-secondary education, and training through internships or scholarships in schools.

D. Litigation

The State, its agencies, officials and employees are defendants in numerous lawsuits involving funding for social welfare programs, civil rights actions, public education funding, breach of contract and negligence. The Attorney General is unable to predict the ultimate outcome of the majority of these suits, some of which seek recovery of monetary damages of unspecified amounts. However, based on information provided by the Attorney General, any ultimate liability to the State resulting from these lawsuits that is not covered by various insurance policies, would not materially affect the State's overall financial condition.

E. Joint Venture

The State of Vermont has entered into a Tri-State Lotto Compact with the States of New Hampshire and Maine for the purpose of operating a tri-state lottery. This lottery does not replace Vermont's individual lottery games but is run in addition to the existing games. The Compact provided for the creation of a Tri-State Lottery Commission (Commission) which is an interstate body, both corporate and politic, serving as a common agent for the party states and representing them both collectively and individually in the exercise of its powers and duties. The Commission is composed of one member from each of the party states. Each State's lottery appoints one of its members to this position. The three-member Commission annually elects a chairperson from among its members. The Commission is empowered to promulgate rules and regulations governing the establishment and to administer the operation of the Tri-State Lotto. Tri-State Lotto tickets are sold in each of the party states and processed in a central location as determined by the Commission. Fifty percent of the gross sales from each State are aggregated in a common prize pool, and operating costs are charged proportionally to each of the party states. The remaining revenues generated within each State remain in that particular State.

Additional information regarding the Tri-State Lotto Commission may be obtained by contacting the Vermont Lottery Commission, 1311 US Route 302-Berlin, Suite 100, Barre, Vermont 05641.

F. Accounting Changes

Accounting changes related to government combinations

During the year ended June 30, 2015, the State implemented GASB Statement No. 69, Government Combination and Disposals of Government Operations, which provides accounting and financial reporting guidance for government combinations and disposals of government operations. During the fiscal year, the operations of Vermont Center for Geographic Information (VCGI) (a discretely presented component unit of the State of Vermont) were merged into the State's Agency of Commerce and Community Development.

The combination became effective on March 31, 2015; however, under the provisions of GASB Statement No. 69, the merger date is July 1, 2014, the beginning of the reporting period in which the combination occurred. The initial opening balances of VCGI's assets, liabilities and net position as of the beginning of the period, were determined based on the carrying values reported in the separate financial statements of VCGI as of June 30, 2014. The removal of VCGI as a discretely presented component unit of the State resulted in a \$197,431 restatement of opening net positon in the Statement of Activities for the component units. In order to bring the accounting principles of VCGI into conformance with those of the State an adjustment to capital assets in the amount of \$18,019 was made to reflect a consistent method of accounting for capitalization of assets. The merger of VCGI along with the adjustment to capital assets described above resulted in a \$179,412 restatement of opening net positon of governmental activities in the Statement of Activities.

A schedule of the adjusted balances recorded as of the merger date is shown on the following page.

NOTES TO THE FINANCIAL STATEMENTS

	State of Vermont Governmental				Adjustments				
	Activities		VCGI	Total	Debit			Credit	Total
Assets Current assets	\$1,037,106,530	\$	227.519	\$1,037,334,049	\$	-	\$	-	\$1,037,334,049

Deferred outflows of Resources									
Loss on refunding of bonds payable	6,909,872		-	6,909,872		-		-	6,909,872
Total deferred outflow of resources	6,909,872			6,909,872			_	<u> </u>	6,909,872
Liabilities									
Current liabilities	520,640,834		51,057	520,691,891		-		-	520,691,891
Non-current liabilities	1,461,838,892			1,461,838,892		-			1,461,838,892
Total liabilities	1,982,479,726		51,057	1,982,530,783					1,982,530,783
Net Position									
Net investment in capital assets	2,010,723,836		20,969	2,010,744,805		18,019		-	2,010,726,786
Restricted	579,356,244		-	579,356,244		-		-	579,356,244
Unrestricted	(856,544,143)		176,462	(856,367,681)					(856,367,681)
Total net position	<u>\$1,733,535,937</u>	\$	197,431	\$1,733,733,368	\$	18,019	\$		\$1,733,715,349

Implementation of this standard required restatement of opening fund balances of the Special Fund. In order to reflect the modified accrual basis of accounting used in Special Fund, an adjustment of \$3,979 was made to the amount used in the restatement of opening net position in the governmental activities for the assets and liabilities that were merged following the accrual basis of accounting. This adjustment resulted in a restatement of opening fund balances of the Special Fund of \$175,433.

Restated amount	\$	100,139,683				

Accounting changes related to changes in pension plan reporting

During the year ended June 30, 2015, the State implemented GASB Statement No. 68, *Accounting and Financial Reporting for Pensions*, that requires that employers and non-employer contributing entities report a net pension liability and related pension expense as determined by the plans under the requirements contained in GASB Statement No. 67, *Financial Reporting for Pension Plans*. Previously, GASB Statement No. 27, *Accounting for Pensions by State and Local Government Employers*, required employers to report a net pension obligation as determine under the requirements of GASB Statement No. 25, *Financial Reporting for Defined Benefit Plans and Note Disclosures for Defined Contribution Plans*.

Also during the year ended June 30, 2015, the State implemented GASB Statement No. 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date - An amendment of GASB Statement*

No. 68, that requires that upon implementation of GASB Statement No. 68, a government recognize a beginning deferred outflow of resources for its pension contributions made subsequent to the measurement date of the beginning net pension liability.

Implementation of these two standards had no effect on the beginning fund balances of governmental funds. However, the beginning net positions of governmental and business activities, certain enterprise funds and a discretely presented component unit have been restated. The restatement eliminated the previously reported net pension obligation and recognizes the newly required net pension liability and deferred outflow of resources. The effect of the restatement is shown below.

Restatement of net position

The effects of accounting changes on net position were as follows:

	Governmental Activities	Business-type Activities	Liquor Control Fund	Vermont Lottery Commission	Vermont Life Magazine Fund	
As originally reported, July 1 Restatements Elimination of opening net pension obligation	\$ 1,733,535,937	\$ 157,415,817	\$ 5,918,826	\$ 688,993	\$ (2,033,130)	
as of June 30, 2014 Recognition of opening net pension liability	198,205,956	-	-	-	-

G. Subsequent Events

1. Debt Issuances

2015 Series A (Vermont Citizens Bonds) (Green Bonds) – General Obligation Bonds and 2015 Series B - General Obligation Bonds

The State issued \$28,515,000 of 2015 Series A - General Obligation Bonds, dated October 22, 2015. The bonds are general obligations of the State of Vermont, and the full faith and credit of the State are pledged to the payment of principal and interest on these bonds. The interest rates on these bonds vary from 2% to 5%, and payment to bondholders is scheduled to commence on August 15, 2016, and terminate on August 15, 2030.

The State issued \$61,345,000 of 2015 Series B - General Obligation Bonds, dated October 22, 2015. The bonds are general obligations of the State of Vermont, and the full faith and credit of the State are pledged to the payment of principal and interest on these bonds. The interest rates on these bonds vary from 2.625% to 5%, and payment to bondholders is scheduled to commence on August 15, 2016, and terminate on August 15, 2035.

The issuance of these bonds is authorized by capital acts from legislative sessions: Act 26 (2015), and Act 51 (2013) as amended by Act 178 (2014). The proceeds are to be used for various purposes including capital projects, major maintenance at the State buildings, Vermont State Colleges, University of Vermont, Vermont school construction, various projects in the areas of human services, natural resources, public safety, agriculture, various grant purposes, and other projects.

2015 Series C—General Obligation Refunding Bonds

The State issued \$25,720,000 of 2015 Series C – General Obligation Refunding Bonds, dated October 22, 2015, for the purpose of advance refunding of \$25,250,000 of the 2009 Series A - General Obligation Bonds maturing on March 1 in the years 2020 through 2029. Interest rates on the bonds range from 2% to 4%, and payments to bondholders are scheduled to commence on August 15, 2017, and terminate on August 15, 2028. As a result of the bond refunding transaction, the State reduces its total debt service payments over the next 15 years by \$2,464,019, and achieves an economic gain of \$1,876,469.

2. Medicaid and Children's Health Insurance Program Eligibility Determination

The Medicaid and Children's Health Insurance Programs are part of the Global Commitment Fund, which receives funding from the General and Special Funds, and federal grants. Since implementation of the State's health insurance market place, Vermont Health Connect (VHC), in fiscal year 2014, the State has experienced functionality challenges with the system's eligibility and renewal determination components for the Medicaid and Children's Health Insurance Program (CHIP) programs. During fiscal year 2015, the State was unable to ensure its compliance with the renewal and eligibility requirements related to the Medicaid and CHIP programs. Accordingly, the state requested and, on November 13, 2015, received approval from the Centers for Medicare & Medicaid Services (CMS) for a waiver, under section 1902(e)(14)(A) of the Social Security Act, that allows the State to delay the implementation of eligibility determination renewal and redetermination provisions of the Affordable Care Act until fiscal years 2016 and 2017. The accompanying financial statements reflect the impact of this waiver for the year ended June 30, 2015.

Due to this waiver, the State will not be required to comply with 42 CFR sections 435.916(a), 435.916(b), and 435.952(j) for claims paid for services provided to ineligible beneficiaries during state fiscal year 2015.

3. Vermont Pension Investment Committee (VPIC)

On July 16, 2015, the Burlington Employees' Retirement System's (BERS) Board of Trustees voted to withdraw from the VPIC investment pool. The BERS is the sole external participant in the Investment Trust Fund. At this time the State Treasurer's Office is creating a plan for this withdrawal. It is expected that the withdrawal will occur during fiscal year 2016.

4. Retirement Incentive Program

In an effort to reduce labor costs, the 2016 Appropriation Act, the legislature authorized the State Treasurer's Office's Retirement Division to offer a Retirement Incentive Program. The program encourages State employees to retire effective October 1, 2015 (and no later than March 1, 2016) by issuing incentive payments up to \$15,000 per employee. The retirement incentive payment shall be made in equal installments during fiscal years 2016 and 2017 with the first payment within 90 days of the retirement date and the second payment within 30 days of the one-year anniversary of the retirement date. Incentive payments will be made through the State's operating fund and not through the pension fund.

The program was offered to all eligible State employees (approximately 1,000) on July 17, 2015. The employee was required to submit an application to the program by August 31, 2015. There were 311 initial applicants, and only 221 employees are actually participating. Although the exact incentive payment for employees who have not yet retired has not been calculated, the State estimates the total cost of the incentive payments will be approximately \$3.2 million, split over fiscal year 2016 and 2017.

In order to achieve long-term savings, the legislation also states that at least three-fourths of the positions vacated through this program must remain vacant and unfunded.

Note to the Required Supplementary Information—Budgetary Reporting (unaudited)

Budgetary Comparison Schedules

The budgetary schedules provide a comparison of the original and final adopted budget with actual data on a budgetary basis for the Governmental Funds. The State compiles a separate legal basis budgetary report, which shows the legal compliance with the budget. Budgetary comparison schedules showing legal level detail may be obtained by contacting the State of Vermont, Department of Finance and Management, 109 State Street, 5th Floor, Pavilion Building, Montpelier, Vermont 05609-0401.

Budgetary Process

Vermont statutes require the head of every State department, board, and commission and any officer or individual responsible for any activity for which funds are appropriated by the Vermont Legislature to provide, on or before September 1 preceding any biennium, statements to the Commissioner of Finance and Management showing in detail the amounts appropriated and expended for both the current and preceding fiscal years and the amount estimated to be necessary for similar activity for the ensuing two fiscal years. The Commissioner of Finance and Management and the Secretary of Administration are then required to submit to the Governor by November 15 preceding each biennium, the estimates as received along with any other estimates for the ensuing two fiscal years. The Governor then submits to the Vermont Legislature, no later than the third Tuesday of every annual session, a budget that embodies estimates, requests, and recommendations for appropriations or other authorizations for expenditures from the State treasury for at least the succeeding fiscal year. The Vermont Legislature then enacts into law an appropriations act that must be approved by the Governor before expenditures can be made. In recent years in accordance with Act 250 of 1979 Section 125, it has been the practice of the Governor to submit an annual budget and the Vermont Legislature to enact appropriations on an annual basis.

Budgets are prepared and appropriated on a cash basis and usually at the program level. The Governor may amend appropriations or transfer appropriations within limits established by 32 V.S.A. Chapter 9. The Agency of Administration maintains budgetary control by fund at the appropriation level. Governmental funds' unspent appropriation balances revert to the fund balance at the end of each fiscal year for re-appropriation unless authorized to be carried forward to the following year(s) by legislative act. Unexpended balances of capital projects funds are available for expenditure in the following fiscal year(s).

Budgetary Funds

Vermont's annual Appropriation Act, the State's legally adopted budget, does not present budgets using the same fund structure as what is used for reporting in accordance with accounting principles generally accepted in the United States of America (GAAP). The GAAP basis Special Fund is represented in the Appropriation Act as program-level budgets for the Special, State Health Care Resources, and Tobacco Trust Funds. These funds are presented separately in the accompanying schedules. The budgetary basis American Recovery and Reinvestment Act Fund includes certain portions of the GAAP basis Transportation and Federal Revenue Funds. These funds are presented on a budgetary basis in the accompanying schedules.

Revenue Estimates

By July 31 each year, the Joint Fiscal Office and the Secretary of Administration provide to the Emergency Board their respective estimates of State revenues in the General, Transportation, Education, State Health Care Resources, and Global Commitment Funds. The Emergency Board then has 10 days to determine the original revenue estimates for the fiscal year. For the Special, Federal Revenue, and American Recovery and Reinvestment Act Funds, the original budget for revenues is based on the amount appropriated for expenditures. By January 15, the Joint Fiscal Office and the Secretary of Administration provide to the Emergency Board their respective estimates of State revenues and the Emergency Board determines any revision to the July revenue estimates.

Expenditure and Transfer Budgets

The original budgets for expenditures and transfers are determined by the Legislature through the passage of the annual Appropriation Act. The Commissioner of Finance and Management (with approval from the Governor) may transfer balances of appropriations not to exceed \$50,000 made under any appropriation act for the support of the government from one component of an agency, department, or other unit of State government, to any component of the same agency, department, or unit; and may transfer balances of

appropriations made under any appropriation act from one department or unit of the agency of transportation to another department or unit of the agency of transportation for the specific purpose of funding authorized transportation projects which have been approved by the federal government for advance construction in which the expenditure of State funds will be reimbursed by federal funds when the federal funds become available, and the transfer is limited to funds which have been approved for reimbursement. If any receipts including federal receipts exceed the appropriated amounts, the receipts may be allocated and expended, subject to the approval of the Secretary of Administration. If, however, the expenditure of those receipts will establish or increase the scope of the program, which establishment or increase will at any time commit the State to the expenditure of State funds, they may be expended only upon the approval of the Legislature. The full faith and credit of the State has been pledged to support various programs. Any payments that are required to be made by the Treasurer are paid in accordance with Vermont Statutes and do not require an appropriation by the Legislature.

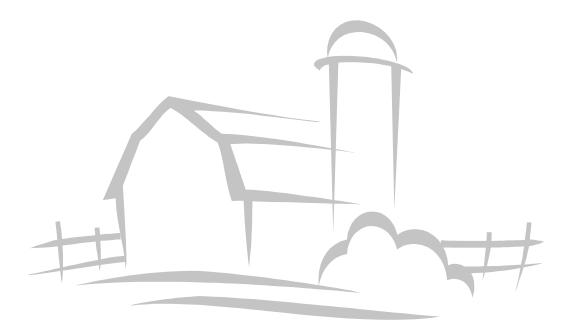

Budget and GAAP Basis Reporting

The accompanying budgetary comparison schedules report the actual revenues, expenditures and other financing sources (uses) on a budget basis, which differs significantly from GAAP. These different accounting principles result in basis, perspective, and entity differences in the fund balance—budgetary basis. *Basis differences* arise because the basis of budgeting (cash basis) differs from the GAAP basis used to prepare the statement of revenues, expenditures, and changes in fund balances—governmental funds. *Perspective differences* result because the Appropriation Act's program-oriented structure differs from the fund structure required for GAAP. *Entity differences* arise because certain activity reported within the State's financial reporting entity for GAAP purposes is excluded from the Appropriation Act. The following presents a reconciliation of the budgetary basis and GAAP basis fund balances for the funds reported in the accompanying schedules for the fiscal year ended June 30, 2015:

-	General Fund	Tra	Insportation Fund	 Education Fund	 Federal Revenue Fund	С	Global ommitment Fund	 ARRA Fund

Fish & Wildlife Fund – This fund is used to account for the activities of the Fish and Wildlife Department. The Fish and Wildlife Department's mission is to protect and conserve the State's fish, wildlife, plants and their habitats for the people of Vermont.

General Obligation Bond Projects Fund – This fund accounts for general capital improvement expenditures funded by the issuance of State general obligation bonds.

Transportation Infrastructure Bond Projects Fund – This fund accounts for transportation capital improvement expenditures funded by the issuance of transportation infrastructure special obligation bonds.

General Obligation Debt Service Fund—This fund accounts for and reports financial resources that are restricted, committed, or assigned to expenditures for general obligation bond principal and interest.

Transportation Infrastructure Debt Service Fund—This fund accounts for and reports financial resources that are restricted, committed, or assigned to expenditures for transportation infrastructure special obligation bond principal and interest.

Higher Education Endowment Fund – This is a permanent fund whose revenue is used by the University of Vermont and Vermont State Colleges to provide non loan financial assistance to Vermont students attending their institutions and by the Vermont Student Assistance Corporation to provide non loan financial assistance to Vermont students attending a Vermont postsecondary institution.

Vermont Sanitorium Fund – This is a permanent fund whose income is to be used for the treatment and cure of respiratory diseases.

Albert C. Lord Trust Fund – This is a permanent fund whose income is to be used for demonstrations, lectures and instruction in the care of woodlots and restoration.

Lumberjack Fund – This is a permanent fund whose income is to strengthen annual workshops for educators interested in enhancing classroom skills in the area of fish and wildlife management.

Couching Lion Farm Cemetery Fund – This is a permanent fund whose income is to be used to provide for the care of a private cemetery in Camel's Hump State Park.

Carrie P. Underwood Fund – This is a permanent fund whose income is to used to provide aid to poor libraries and to otherwise promote the library interests of the State.

Laura H. Morgan Fund— This is a permanent fund whose income is to be used to benefit the Brandon Training School.

Bennington Battle Monument Fund – This is a permanent fund whose revenue is to be used to repair and maintain the Bennington Battle Monument.

Zenus H. Ellis Fund – This is a permanent fund whose income is to be used to maintain the iron fence and flagpole at the Hubbardton battlefield.

Vermont

Industrial Homework Office Fund – This fund is used to account for a program that arranges industrial work for blind and otherwise handicapped citizens at their home of a subcontract nature.

Federal Surplus Property Fund – This fund is used to account for a program that acquires and distributes surplus property from various military and federal sources. Public entities (towns, schools, districts, volunteer fire departments, etc) and non-profit organizations conducting educational and health care programs may apply for eligibility.

Vermont Life Magazine Fund – This fund is used to account for the activities of the Vermont Life Magazine. *Vermont Life* is a quarterly magazine published by the State of Vermont. It explores and celebrates the State's people, places and rich heritage.

Municipal Equipment Loan Fund – This fund is used to account for a program that was created for the purpose of providing loans on favorable terms to municipalities for the purchase of construction, fire, emergency or heavy equipment or vehicles.

Unemployment Compensation Contingency Fund – This fund is used to account for the interest, fines and penalties collected under the unemployment compensation law as well as the administrative costs not chargeable to federal grants.

Electric Power Sales Fund—This fund is used to account for the revenues and expenses for the purchase of wholesale electric power for resale to Vermont's utilities.

Vermont

Highway Garage Fund – This fund accounts for the maintenance and rental of equipment to the Agency of Transportation for use in construction, maintenance and operation of the State's transportation infrastructure.

Offender Work Programs – This fund accounts for the activities of the print shop, sign shop and furniture shop run by the Department of Corrections.

Single Audit Revolving Fund – The purpose of this fund is to account for the costs attributable to the Auditor of Accounts Office's performance of the annual Single Audit .

Financial & HR Information Fund – The activities of this fund account for the costs of the support of the State's financial and human capital management ERP systems.

Communications & Information Technology Fund – This fund accounts for the activities of the Department of Information and Innovation's communications and information technology services.

Fleet Fund – This fund accounts for the Department of Buildings and General Services' vehicle management activities including the daily and long-term leasing of vehicles for employees use in travel on State business.

E-Procurement Fund - The purpose of the Purchasing Card Program is to establish a more efficient, costeffective method of purchasing and paying for small dollar transactions and high-volume, repetitive purchases.

Copy Center Fund – This fund's activities include the Department of Buildings and General Services Print Shop and copier leasing services.

Postage Fund – This fund accounts for the mail services for the Montpelier and Waterbury state complexes including mail collection and delivery, sorting, and applying postage.

Facilities Operations Fund – This fund's purpose is to provide operating expenses, maintenance, renovations and acquisitions of buildings, grounds and support facilities.

Property Management Fund – This fund's purpose is to provide State Agencies with safe, comfortable, and efficient space through leasing; purchasing; and planning which enables them to carry out their mission.

Equipment Revolving Fund – This fund is used as an internal lease purchase mechanism of equipment for State agencies and departments.

State Resource Management Fund – This fund accounts for the costs of energy resource conservation measures implemented by departments anticipated to generate a life cycle cost benefit to the state.

State Surplus Property Fund – This fund accounts for the sale of all items that are no longer needed by the State's agencies and departments.

State Liability Insurance Fund – This fund provides liability insurance coverage for the actions performed by the State's employees in the course of performing their assigned duties.

Risk Management-All Other Fund – This fund is used to purchase insurance protection for state property and other miscellaneous risks that are specific to certain departments or types of employees, such as judicial liability, liability related to maintenance of railroad tracks, and required bonds for certain state officials.

Workers' Compensation Fund – This fund provides workers' compensation coverage for all state employees.

Medical Insurance Fund – This fund provides health coverage for current state employees, retirees, legislators and other groups eligible to participate.

Dental Insurance Fund – This fund provides dental coverage for current state employees, legislators and other groups eligible to participate.

Life Insurance Fund – This fund provides a life insurance policy for current state employees, retirees and other groups eligible to participate.

Long-term Disability Fund – This fund provides an income replacement benefit for state employees that are not eligible to be represented by the employees' union should they have a long term or permanent disability.

Employees' Assistance Fund – This fund provides a program that assists state employees and members of their immediate household assistance in addressing problems that impact their lives.

Human Resource Services Fund - This fund provides centralized human resources management services for agencies and departments of the State.

STATISTICAL SECTION CONTENTS JUNE 30, 2015

The Statistical Section of the Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information indicates about the State of Vermont's overall financial health. Below is a summary of the components and purpose of the tables provided in this section.

Financial Trends – Tables 1 through 4

These schedules contain trend information extracted from the State's financial statements, to help the reader understand how the State's financial performance and financial position have changed over time.

Revenue Capacity – Tables 5 through 7

These schedules contain information to help the reader assess the State's most significant revenue source – the personal income tax.

Debt Capacity – Tables 8 and 9

These schedules present information to help the reader assess the affordability of the State's current levels of outstanding debt, the State's ability to issue additional debt in the future, and related historical trend data.

Demographic and Economic Information – Tables 10 and 11

These schedules contain demographic and economic indicators to help the reader understand the environment within which the State's financial activities take place.

Operating Indicators – Tables 12 through 14

These schedules contain service levels and capital asset data to help the reader understand how the information in the State's financial report relates to the services the State provides to its citizens and visitors.

This information is unaudited.

In 2011 the State implemented GASB Statement No. 54. Under GASB Statement No. 54, fund balances are classified as Nonspendable, Reserved, Committed, Assigned or Unassigned. Prior to GASB 54, fund balances were classified as Reserved or Unreserved. Amounts for fiscal years 2010 and earlier have not been restated to reclassify these balances.

- Data for 2015 are projected annual estimates based on information through 2015 second quarter. The estimates for 2011 and forward are based on the 2012 North American Industry Classification System ("NAICS"). Prior years are based on the 2002 NAICS.
- (2) Includes non-earned income, such as interest and dividends, rental income, and government transfers to individuals.
- (3) Total direct tax rate is not available. Average effective tax rate equals personal income tax collections (see Statistical Section Table 6) divided by total personal income. Source of collections data: Vermont Department of Taxes

Source: U.S. Department of Commerce, Bureau of Economic Analysis

⁽¹⁾ Different taxable income ranges apply to these rates for other filing statuses, including Married Filing Jointly, Married Filing Separately, Head of Household, etc.

⁽²⁾ Commencing in 2010, the tax rates applied to the five income ranges for single status filers were 3.55%, 6.80%, 7.80%, 8.80% and 8.95%, respectively.

⁽³⁾ For 2005 - 2009, the tax rates applied to the five income ranges for single status filers were 3.6%, 7.0%, 8.3%, 8.9%, and 9.4% respectively.

⁽⁴⁾ See Statistical Section Table 5 for additional detail regarding personal income.

¹ Executive Order No. 01-10 consolidated human resource services statewide by transferring certain human resource positions within state government to the Department of Human Resources. The effective date of this consolidation was July 1, 2010.

² Effective in 2012, Acts 48 and 64 of 2011 Session established the Green Mountain Care Board and Enhanced 911 Board as a independent entities, respectively.

³ The reduction in employees in 2012 is the result of the Vermont State Hospital in Waterbury being forced to close due to Tropical Storm Irene.

⁴In 2014, the Agency of Administration's Financial Services Division moved from the Dept. of Buildings & General Services to the Secretary of Administration's Office.

⁵ In 2008, the Payroll Division within the Dept. of Human Resources transferred to the Dept. of Finance & Management. In 2015, a VTHR Operations division was was created in the Secretary of Administration's Office. The Payroll Division positions and additional positions from the Dept. of Human Resources were transferred from the Departments of Finance & Management and Human Resources to the VTHR Operations division.
