

Hi,

my name is Andrea Stefani from Plainfield, VT .., I have a 31 yr old daughter in dire need of diverse options of service supported housing with community., not in solitary confinement as it happens for her sadly right now, ever since she moved out just a year and couple months ago.

She has Autism (high functioning) and complex epilepsy and a very strong need of social life.,, work life... and stability!

None of it was reliably possible for first year., which resulted in 3 suicidal phases with suicide attempts.

it is greatly concerning, please don't ignore the housing needs and wishes of this direly underserved population.,, we lost already too many to depression and suicides because of the very unhappy, unsecure situations our family members have to endure.,, even my daughter was in dire distress already 3 times!!!

please make on- going funding and expansion of creative, communal housing options available asap and funnel continuous funds in this direction,

thank you, Andrea Stefani
