

Hello to our very much appreciated Legislators!

I support the implementation of the pilot planning grant housing begun by Act 186, along with developing a pipeline for funding the annual development of stable, service-supported housing for adults with developmental disabilities.

This is important work to create stable, service-supported housing options for adults with developmental disabilities and moderate to high support needs here in Vermont.

I was a Pediatric Neurology Nurse for 25 years. I always have been concerned about my patients' future, when they would need adult housing. Many were able to work with some supervision.

Thank you for your work!

Daniel Berna
