

Act No. 97 (S.215). Conservation and land development; water resources; water quality

An act relating to administering, implementing and financing water quality improvement in Vermont

This act requires the Secretary of Natural Resources to submit on or before November 15, 2014 to the General Assembly a report that provides specific recommendations for administering, implementing, and financing water quality improvement in Vermont. The report shall identify five priority actions that the State must address in the next 10 years to improve water quality. The report shall also recommend at least two proposals for financing water quality improvement in the State.

Effective Date: March 27, 2014
