Sec. 15. 18 V.S.A. § 7627 is amended to read:

§ 7627. COURT FINDINGS; ORDERS

* * *

(b) If a person who is the subject of a petition filed under section 7625 of this title has not executed a durable power of attorney an advance directive, the court shall follow the person’s competently expressed written or oral preferences regarding medication, if any, unless the Commissioner demonstrates that the person’s medication preferences have not led to a significant clinical improvement in the person’s mental state in the past within an appropriate period of time.

(c) If the court finds that there are no medication preferences or that the person’s medication preferences have not led to a significant clinical improvement in the person’s mental state in the past within an appropriate period of time, the court shall consider at a minimum, in addition to the person’s expressed preferences, the following factors:
(1) The person’s religious convictions and whether they contribute to the person’s refusal to accept medication.

(2) The impact of receiving medication or not receiving medication on the person’s relationship with his or her family or household members whose opinion the Court finds relevant and credible based on the nature of the relationship.

(3) The likelihood and severity of possible adverse side effects from the proposed medication.

(4) The risks and benefits of the proposed medication and its effect on:

   (A) the person’s prognosis; and

   (B) the person’s health and safety, including any pregnancy; and

(5) The various treatment alternatives available, which may or may not include medication.

(d) As a threshold matter, the Court shall consider the person’s competency. If the Court finds that the person is competent to make a decision regarding the proposed treatment or that involuntary medication is not supported by the factors in subsection (c) of this section, the Court shall enter a finding to that effect and deny the petition.

(e) As a threshold matter, the Court shall consider the person’s competency. If the Court finds that the person is incompetent to make a decision regarding the proposed treatment and that involuntary medication is
supported by the factors in subsection (c) of this section, the court shall make specific findings stating the reasons for the involuntary medication by referencing those supporting factors.

(f)(1) If the court grants the petition, in whole or in part, the court shall enter an order authorizing the commissioner to administer involuntary medication to the person. The order shall specify the types of medication, the permitted dosage range, length of administration, and method of administration for each. The order for involuntary medication shall not include electric convulsive therapy, surgery, or experimental medications. A long-acting injection shall not be ordered without clear and convincing evidence, particular to the patient, that this treatment is the most appropriate under the circumstances.

(2) The order shall require the person’s treatment provider to conduct monthly reviews of the medication to assess the continued need for involuntary medication, the effectiveness of the medication, the existence of any side effects, and whether the patient has become competent pursuant to subsection 7625(c) of this title and shall also require the person’s treatment provider to document this review in detail in the patient’s chart. The person’s treatment provider shall notify the Department when he or she determines that the patient has regained competence. Within two days of receipt, the Department shall provide a copy of the notice to the patient’s attorney.
(g) For a person receiving treatment pursuant to an order of hospitalization, the commissioner may administer involuntary medication as authorized by this section to the person for up to 90 days, unless the court finds that an order is necessary for a longer period of time. Such an order shall not be longer than the duration of the current order of hospitalization. If at any time the treating psychiatrist finds that a person subject to an order for involuntary medication has become competent pursuant to subsection 7625(c) of this title, the order shall no longer be in effect.

Sec. 16. 18 V.S.A. § 7629 is amended to read:

§ 7629. LEGISLATIVE INTENT

(a) It is the intention of the General Assembly to recognize the right of a legally competent person to determine whether or not to accept medical treatment, including involuntary medication, absent an emergency or a determination that the person is incompetent and lacks the ability to make a decision and appreciate the consequences.

(b) This act protects this right through a judicial proceeding prior to the use of nonemergency involuntary medication and by limiting the duration of an order for involuntary treatment to no more than one year. The least restrictive conditions consistent with the person’s right to adequate treatment shall be provided in all cases. The General Assembly adopts the goal of high-quality, patient-centered health care, which the Institute of Medicine defines as
“providing care that is respectful of and responsive to individual patient preferences, needs, and values and ensuring that patient values guide all clinical decisions.” A substitute decision-maker is sometimes necessary to make a decision about care when a person is incompetent and lacks the ability to make a decision and appreciate the consequences. Even when a person lacks competence, health care that a person is opposing should be avoided whenever possible because the distress and insult to human dignity that results from compelling a person to participate in medical treatment against his or her will are real, regardless of how poorly the person may understand the decision.

(c) It is the policy of the General Assembly to work towards a mental health system that does not require coercion or the use of involuntary medication.

(d) This act will render the J. L. v. Miller consent judgment no longer applicable. This chapter protects the rights and values described in this section through a judicial process to determine competence prior to an order for nonemergency involuntary medication and by limiting the duration of an order for involuntary treatment to no more than one year. The least restrictive order consistent with the person’s right to adequate treatment shall be provided in all cases.

Sec. 17. 18 V.S.A. § 9701 is amended to read:

§ 9701. DEFINITIONS

As used in this chapter:
(21) “Ombudsman” means an individual appointed as a long-term care ombudsman under the Program contracted through the Department of Disabilities, Aging, and Independent Living pursuant to the Older Americans Act of 1965, as amended or the agency designated as the Office of the Mental Health Care Ombudsman pursuant to section 7259 of this title.

(32) “Patient representative” means the mental health patient representative established by section 7253 of this title.

Sec. 18. 18 V.S.A. § 9703 is amended to read:

§ 9703. FORM AND EXECUTION
