DESIGN STANDARDS

(a) Findings.

(1) The purpose of the “Vermont State Standards for the Design of Transportation Construction, Reconstruction and Rehabilitation of Freeways, Roads and Streets” (Vermont State Standards) is to provide clear technical direction to the designers of transportation projects in Vermont and to achieve roadway and bridge designs that provide access, mobility, and safety for users and which are also sensitive to the social and environmental context of Vermont.

(2) The Vermont State Standards represent the work of the Vermont Design Standards Committee, a multi-disciplinary team of stakeholders that was established in 1994. This Committee concluded its work in 1996 and developed recommendations for revised standards based upon input from engineering, planning, and resources perspectives that led to development of the Proposed Vermont State Standards. 1997 Acts and Resolves No. 38, Sec. 19c directed the Agency to adopt the Proposed Vermont State Standards as formal Agency rules following the procedures set forth in the Administrative Procedure Act, 3 V.S.A. chapter 25.

1 ~~(3) Since adoption of the Vermont State Standards in 1997, the Agency~~
2 ~~has prepared engineering guidance and policy and planning documents related~~
3 ~~to roadway design, access management, bicycle and pedestrian design,~~
4 ~~Complete Streets, and safety that provide supplemental direction to designers~~
5 ~~of transportation projects in Vermont.~~

6 (4) Pursuant to 19 V.S.A. § 10c, the Agency has standing authority to
7 establish design standards.

8 (b) Prior to updating the Vermont State Standards, the Secretary of
9 Transportation shall establish a multi-disciplinary Stakeholders Group
10 consisting of representatives of public and private sector entities from the
11 various modes of transportation affected by the Vermont State Standards. The
12 Group shall include engineers, planners, resource specialists, operations staff,
13 and legal staff. The purpose of the Stakeholders Group will be to provide the
14 Agency with critical input in revising the Standards.

15 (c) Purpose and charge. The Stakeholders Group shall:

16 (1) Review the current Vermont State Standards and identify areas of
17 the Standards that require modification to be current with state-of-practice
18 transportation facility design, and modifications to be consistent with
19 supplemental design guidance and policies prepared by the Agency since 1997.
20 In fulfilling this primary duty, the Group shall also identify other related

1 ~~Agency standards and guidance that would need to be addressed to align with~~
2 the revised Vermont State Standards.

3 (2) Identify barriers, gaps, and opportunities that exist in current Agency
4 design practices, standards, and guidance to address the needs of all
5 transportation modes in a variety of contexts.

6 (3) Document the opportunities that exist to modify the existing
7 Vermont State Standards to meet current state-of-the-industry practices.

8 (4) Prepare an implementation plan and associated schedule for
9 addressing the various components of the Vermont State Standards that require
10 modification.

11 (d) On or before March 15, 2015, the Agency shall submit a written report
12 of the Stakeholder Group findings and recommendations to the House and
13 Senate Committees on Transportation.
