Assumptions

1. Rates based on Skill/Responsibility start with Common Laborer lowest and should increase as shown to Excavator Operator being highest
2. As Vermont is a small state, many contractors work across the different counties, therefore the rates should be similar throughout the state.

Conclusions

1. VT04 is an older survey and is lower than prevailing wages although the rates are in the correct order.
2. The Common Laborer Rates are inconsistent across the state.
3. The Common Laborer Rates for VT28, 32, and 33 are completely inaccurate and much too high.
4. The Common Laborer Rates for VT29 and 30 are moderately high.
5. The Loader Operator Rate in VT32 and Excavator Operator Rate in VT28 are too high.
6. Overall the Common Laborer rates are inconsistent and inaccurate.
