

1 TO THE HOUSE OF REPRESENTATIVES:

2 The Committee on Health Care to which was referred Senate Bill No. 252
3 entitled “An act relating to financing for Green Mountain Care” respectfully
4 reports that it has considered the same and recommends that the House propose
5 to the Senate that the bill be amended by striking out all after the enacting
6 clause and inserting in lieu thereof the following:

7 * * * Intent and Principles * * *

8 Sec. 1. LEGISLATIVE INTENT; FINDINGS; PURPOSE

9 (a)(1) It is the intent of the General Assembly to continue moving forward
10 toward implementation of Green Mountain Care, a publicly financed program
11 of universal and unified health care.

12 (2) It is the intent of the General Assembly not to change in any way the
13 benefits provided to Vermont residents by Medicare, the Federal Employees
14 Health Benefit Program, TRICARE, a retiree health program, or any other
15 health benefit program beyond the regulatory authority of the State of
16 Vermont.

17 (b) The General Assembly finds that:

18 (1) It has been three years since the passage of 2011 Acts and Resolves
19 No. 48 (Act 48), which established the Green Mountain Care Board,
20 authorized payment reform initiatives, and created the framework for the
21 Vermont Health Benefit Exchange and Green Mountain Care.

1 (2) The Green Mountain Care Board currently regulates health insurance
2 rates, hospital budgets, and certificates of need. In 2013, the Green Mountain
3 Care Board’s hospital budget review limited hospital growth to 2.7 percent, the
4 lowest annual growth rate in Vermont for at least the last 15 years. The Green
5 Mountain Care Board issued four certificates of need and one conceptual
6 development phase certificate of need. It also issued 31 health insurance rate
7 decisions and reduced by approximately five percent the rates proposed by
8 insurers in the Vermont Health Benefit Exchange.

9 (3) In 2013, Vermont was awarded a three-year State Innovation Model
10 (SIM) grant of \$45 million to improve health and health care and to lower
11 costs for Vermont residents. The grant funds the creation of a sustainable
12 model of multi-payer payment and delivery reform, encouraging providers to
13 change the way they do business in order to deliver the right care at the right
14 time in the right setting. The State has created a 300-person public-private
15 stakeholder group to work collaboratively on creating appropriate payment and
16 delivery system models. Through this structure, care management models are
17 being coordinated across State agencies and health care providers, including
18 the Blueprint for Health, the Vermont Chronic Care Initiative, and accountable
19 care organizations.

20 (4) From the SIM grant funds, the State recently awarded \$2.6 million in
21 grants to health care providers for innovative pilot programs improving care

1 delivery or for creating the capacity and infrastructure for care delivery
2 reforms.

3 (5) Three accountable care organizations (ACOs) have formed in
4 Vermont: one led by hospitals, one led by federally qualified health centers,
5 and one led by independent physicians. The Green Mountain Care Board has
6 approved payment and quality measures for ACOs, which create substantial
7 uniformity across payers and will provide consistent measurements for health
8 care providers.

9 (6) The Vermont Health Benefit Exchange has completed its first open
10 enrollment period. Vermont has more people enrolled through its Exchange
11 per capita than are enrolled in any other state-based Exchange, but many
12 Vermonters experienced difficulties during the enrollment period and not all
13 aspects of Vermont's Exchange are fully functional.

14 (7) According to the 2013 Blueprint for Health Annual Report, Vermont
15 residents receiving care from a patient-centered medical home and community
16 health team had favorable outcomes over comparison groups in reducing
17 expenditures and reducing inpatient hospitalizations. As of December 31,
18 2013, 121 primary care practices were participating in the Blueprint for Health,
19 serving approximately 514,385 Vermonters.

1 (8) The Agency of Human Services has adopted the modified adjusted
2 gross income standard under the Patient Protection and Affordable Care Act,
3 further streamlining the Medicaid application process.

4 (9) Vermonters currently spend over \$2.5 billion per year on private
5 funding of health care through health insurance premiums and out-of-pocket
6 expenses. Act 48 charts a course toward replacing that spending with a
7 publicly financed system.

8 (10) There is no legislatively determined time line in Act 48 for the
9 implementation of Green Mountain Care. A set of triggers focusing on
10 decisions about financing, covered services, benefit design, and the impacts of
11 Green Mountain Care must be satisfied, and a federal waiver received, before
12 launching Green Mountain Care. In addition, the Green Mountain Care Board
13 must be satisfied that reimbursement rates for providers will be sufficient to
14 recruit and retain a strong health care workforce to meet the needs of all
15 Vermonters.

16 (11) Act 48 required the Secretary of Administration to provide a
17 financing plan for Green Mountain Care by January 15, 2013. The financing
18 plan delivered on January 24, 2013 did not “recommend the amounts and
19 necessary mechanisms to finance Green Mountain Care and any systems
20 improvements needed to achieve a public-private universal health care
21 system,” or recommend solutions to cross-border issues, as required by Sec. 9

1 of Act 48. The longer it takes the Secretary to produce a complete financing
2 plan, the longer it will be until Green Mountain Care can be implemented.

3 (c) In order to implement the next steps envisioned by Act 48 successfully,
4 it is appropriate to update the assumptions and cost estimates that formed the
5 basis for that act, evaluate the success of existing health care reform efforts,
6 and obtain information relating to key outstanding policy decisions. It is the
7 intent of the General Assembly to obtain a greater understanding of the impact
8 of health care reform efforts currently under way and to take steps toward
9 implementation of the universal and unified health system envisioned by
10 Act 48.

11 (d) Before making final decisions about the financing for Green Mountain
12 Care, the General Assembly must have accurate data on how Vermonters
13 currently pay for health care and how the new system will impact individual
14 decisions about accessing care.

15 (e) The General Assembly also must consider the benefits and risks of a
16 new health care system on Vermont's businesses when there are new public
17 financing mechanisms in place, when businesses no longer carry the burden of
18 providing health coverage, when employees no longer fear losing coverage
19 when they change jobs, and when business start-ups no longer have to consider
20 health coverage.

1 (f) The General Assembly must ensure that Green Mountain Care does not
2 go forward if doing so is not cost-effective for the residents of Vermont and for
3 the State.

4 (g) The General Assembly must be satisfied that an appropriate plan of
5 action is in place in order to accomplish the financial and health care
6 operational transitions needed for successful implementation of Green
7 Mountain Care.

8 Sec. 2. PRINCIPLES FOR HEALTH CARE FINANCING

9 The General Assembly adopts the following principles to guide the
10 financing of health care in Vermont:

11 (1) All Vermont residents have the right to high-quality health care.

12 (2) All Vermont residents shall contribute to the financing for Green
13 Mountain Care.

14 (3) Vermont residents shall finance Green Mountain Care through taxes
15 that are levied equitably, taking into account an individual's ability to pay and
16 the value of the health benefits provided so that access to health care will not
17 be limited by cost barriers. The financing system shall maximize opportunities
18 to pay for health care using pre-tax funds.

19 (4) As provided in 33 V.S.A. § 1827, Green Mountain Care shall be the
20 payer of last resort for Vermont residents who continue to receive health care

1 through plans provided by an employer, by a federal health benefit plan, by
2 Medicare, by a foreign government, or as a retirement benefit.

3 (5) Vermont's system for financing health care shall raise revenue
4 sufficient to provide medically necessary health care services to all Vermont
5 residents, including:

6 (A) ambulatory patient services;

7 (B) emergency services;

8 (C) hospitalization;

9 (D) maternity and newborn care;

10 (E) mental health and substance use disorder services, including
11 behavioral health treatment;

12 (F) prescription drugs;

13 (G) rehabilitative and habilitative services and devices;

14 (H) laboratory services;

15 (I) preventive and wellness services and chronic care
16 management; and

17 (J) pediatric services, including oral and vision care.

18 (6) The financing system for Green Mountain Care shall include an
19 indexing mechanism that adjusts the level of individuals' and businesses'
20 financial contributions to meet the health care needs of Vermont residents and

1 that ensures the sufficiency of funding in accordance with the principle
2 expressed in 18 V.S.A. § 9371(11).

15 to at least 87 percent of the full actuarial value of the covered health services.

16 (3) The Green Mountain Care Board shall consider whether to impose
17 cost-sharing requirements; if so, ~~whether~~ how to make the cost-sharing
18 requirements income-sensitized; and the impact of any cost-sharing

8 * * *

9 * * * Adverse Childhood Experiences * * *

10 Sec. 20. FINDINGS AND PURPOSE

11 (a) It is the belief of the General Assembly that controlling health care
12 costs requires consideration of population health, particularly Adverse
13 Childhood Experiences (ACEs).

14 (b) The ACE Questionnaire contains ten categories of questions for adults
15 pertaining to abuse, neglect, and family dysfunction during childhood. It is
16 used to measure an adult’s exposure to traumatic stressors in childhood. Based
17 on a respondent’s answers to the Questionnaire, an ACE Score is calculated,
18 which is the total number of ACE categories reported as experienced by a
19 respondent.

20 (c) In a 1998 article entitled “Relationship of Childhood Abuse and
21 Household Dysfunction to Many of the Leading Causes of Death in Adults”

1 published in the American Journal of Preventive Medicine, evidence was cited
2 of a “strong graded relationship between the breadth of exposure to abuse or
3 household dysfunction during childhood and multiple risk factors for several of
4 the leading causes of death in adults.”

5 (d) The greater the number of ACEs experienced by a respondent, the
6 greater the risk for the following health conditions and behaviors: alcoholism
7 and alcohol abuse, chronic obstructive pulmonary disease, depression, obesity,
8 illicit drug use, ischemic heart disease, liver disease, intimate partner violence,
9 multiple sexual partners, sexually transmitted diseases, smoking, suicide
10 attempts, and unintended pregnancies.

11 (e) ACEs are implicated in the ten leading causes of death in the United
12 States and with an ACE score of six or higher, an individual has a 20-year
13 reduction in life expectancy.

14 (f) An individual with an ACE score of two is twice as likely to experience
15 rheumatic disease. An individual with an ACE score of four has a
16 three-to-four-times higher risk of depression; is five times more likely to
17 become an alcoholic; is eight times more likely to experience sexual assault;
18 and is up to ten times more likely to attempt suicide. An individual with an
19 ACE score of six or higher is 2.6 times more likely to experience chronic
20 obstructive pulmonary disease; is three times more likely to experience lung
21 cancer; and is 46 times more likely to abuse intravenous drugs. An individual

1 with an ACE score of seven or higher is 31 times more likely to attempt
2 suicide.

3 (g) Physical, psychological, and emotional trauma during childhood may
4 result in damage to multiple brain structures and functions.

5 (h) ACEs are common in Vermont. In 2011, the Vermont Department of
6 Health reported that 58 percent of Vermont adults experienced at least one
7 adverse event during their childhood, and that 14 percent of Vermont adults
8 have experienced four or more adverse events during their childhood.
9 Seventeen percent of Vermont women have four or more ACEs.

10 (i) The impact of ACEs is felt across all socioeconomic boundaries.

11 (j) The earlier in life an intervention occurs for an individual with ACEs,
12 the more likely that intervention is to be successful.

13 (k) ACEs can be prevented where a multigenerational approach is
14 employed to interrupt the cycle of ACEs within a family, including both
