*** Nutrition Procurement Standards for State Government ***

Sec. 1. FINDINGS

(a) Approximately 13,000 Vermont residents are employed by the State. Reducing the impact of diet-related diseases will support a more productive and healthy workforce that will pay dividends to Vermont’s economy and cultivate national competitiveness for State residents and employees.

(b) Improving the nutritional quality of food sold or provided by the State on public property will support people in making healthy eating choices.

(c) State properties are visited by Vermont residents and out-of-state visitors, and also provide care to dependent adults and children.

(d) Approximately 25 percent of Vermont residents are overweight or obese.

(e) Obesity costs Vermont $291 million each year in health care costs, contributing to debilitating yet preventable diseases, such as heart disease, cancer, stroke, and diabetes.

(f) Improving the types of foods and beverages served and sold in workplaces positively affects employees’ eating behaviors and can result in weight loss.

(g) Maintaining a healthy workforce can positively affect indirect costs by reducing absenteeism and increasing worker productivity.

*** Findings ***

Sec. 1. FINDINGS

In recognition that being lesbian, gay, bisexual, or transgender is part of the natural spectrum of human identity and is not a disease, disorder, illness, deficiency, or shortcoming, the General Assembly finds:

(1) Vermont has a compelling interest in protecting the physical and psychological well-being of children, including lesbian, gay, bisexual, and
transgender youth, and in protecting its children against exposure to serious harms.

(2) A 2015 report published by the U.S. Substance Abuse and Mental Health Service’s Administration states “conversion therapy…is a practice that is not supported by credible evidence and has been disavowed by behavioral health experts and associations…[m]ost importantly, it may put young people at risk of serious harm.”

(3) The American Academy of Pediatrics, the American Counseling Association, the American Psychiatric Association, the American Psychological Association, the National Association of School Psychologists, and the National Association of Social Workers, together representing more than 477,000 health and mental health professionals, have all taken the position that homosexuality is not a mental disorder and thus there is no need for a “cure.”

S. 224.

An act relating to warranty obligations of equipment dealers and suppliers.

Reported favorably with recommendation of amendment by Senator Cummings for the Committee on Economic Development, Housing & General Affairs.

The Committee recommends that the bill be amended by striking out all after the enacting clause and inserting in lieu thereof the following:

Sec. 1. FINDINGS AND INTENT

(a) The General Assembly finds:

(1) Vermont has long relied on economic activity relating to working farms and forestland in the State. These working lands, and the people who work the land, are part of the State’s cultural and ecological heritage, and Vermont has made major policy and budget commitments in recent years in support of working lands enterprises. Farm and forest enterprises need a robust system of infrastructure to support their economic and ecological activities, and that infrastructure requires a strong economic base consisting of dealers, manufacturers, and repair facilities. Initiatives to help strengthen farm and forest working land infrastructure are in the best interest of the State.

(2) Snowmobiles and all-terrain vehicles have a significant economic impact in the State, including the distribution and sale of these vehicles, use by residents, ski areas, and emergency responders, as well as tourists that come to enjoy riding snowmobiles and all-terrain vehicles in Vermont. It is in the best interest of the State to ensure that Vermont consumers who want to purchase snowmobiles and all-terrain vehicles have access to a competitive marketplace and a strong network of dealers, suppliers, and repair facilities in the State.

(3) The distribution and sale of equipment, snowmobiles, and all-terrain vehicles within this State vitally affects the general economy of the State and the public interest and the public welfare, and in order to promote the public interest and the public welfare, and in the exercise of its police power, it is necessary to regulate equipment, snowmobile, and all-terrain vehicle suppliers and their representatives, and to regulate dealer agreements issued by suppliers who are doing business in this State, in order to protect and preserve the investments and properties of the citizens of this State.
(4) There continues to exist an inequality of bargaining power between equipment, snowmobile, and all-terrain vehicle suppliers and the independent dealer network. This inequality of bargaining power enables equipment, snowmobile, and all-terrain vehicle suppliers to compel dealers to execute dealer agreements, related contracts, and addenda that contain terms and conditions that would not routinely be agreed to by the equipment, snowmobile, and all-terrain vehicle dealer if this inequality did not exist. It therefore is in the public interest to enact legislation to prevent unfair or arbitrary treatment of equipment, snowmobile, and all-terrain vehicle dealers by equipment, snowmobile, and all-terrain vehicle suppliers. It is also in the public interest that Vermont consumers, municipalities, businesses, and others that purchase equipment, snowmobiles, and all-terrain vehicles in Vermont have access to a robust independent dealer network to obtain competitive prices when purchasing these items and to obtain warranty, recall, or other repair work.

(b) It is the intent of the General Assembly that this act be liberally construed in order to achieve its purposes.

Sec. 2. 9 V.S.A. chapter 107 is amended to read:

However:
(A) With respect to a natural gas transmission line subject to Board review, the line shall be in conformance with any applicable provisions concerning such lines contained in the duly adopted regional plan; and, in addition, upon application of any party, the Board shall condition any certificate of public good for a natural gas transmission line issued under this section so as to prohibit service connections that would not be in conformance with the adopted municipal plan in any municipality in which the line is located.

(B) With respect to a ground-mounted solar electric generation facility, the facility shall comply with the screening requirements of a municipal bylaw adopted under 24 V.S.A. § 4414(15) or a municipal ordinance adopted under 24 V.S.A. § 2291(28), and the recommendation of a municipality applying such a bylaw or ordinance, unless the Board finds that requiring such compliance would prohibit or have the effect of prohibiting the installation of such a facility or have the effect of interfering with the facility’s intended functional use.

(C) With respect to an in-state electric generation facility, the Board shall give substantial deference to the land conservation measures and specific policies contained in a duly adopted regional and municipal plan that has received a certificate of energy compliance under 24 V.S.A. § 4352. In this subdivision (C), “substantial deference” means that a land conservation measure or specific policy shall be applied in accordance with its terms unless there is a clear and convincing demonstration that other factors affecting the general good of the State outweigh the application of the measure or policy.

Sec. 13. 30 V.S.A. § 8002(30) is added to read:

(30) “Preferred location” means a site within the State on which a renewable energy plant will be located that is one of the following:

(A) A new or existing structure, including a commercial or residential building, a parking lot, or parking lot canopy, whose primary use is not the generation of electricity or providing support for the placement of equipment that generates electricity.

(B) A tract previously developed for a use other than siting a plant on which a structure or impervious surface was lawfully in existence and use prior to January 1 of the year in which an application for a certificate of public good under section 248 of this title for the plant is filed or in which the plant seeks an award of a contract under the standard offer program under section 8005a of
this title, whichever is earlier. To qualify under this subdivision (B), the limits of disturbance of a proposed renewable energy plant must include either the existing structure or impervious surface and shall not include any headwaters, streams, shorelines, floodways, rare and irreplaceable natural areas, necessary wildlife habitat, wetlands, endangered species, productive forestlands, and primary agricultural soils, all of which are as defined in 10 V.S.A. chapter 151.

(C) Land certified by the Secretary of Natural Resources to be a brownfield site as defined under 10 V.S.A. § 6642.

(D) A sanitary landfill as defined in 10 V.S.A. § 6602, provided that the Secretary of Natural Resources certifies that the land constitutes such a landfill and is suitable for the development of the plant.

(E) The disturbed portion of a gravel pit, quarry, or similar site for the extraction of a mineral resource, provided that all activities pertaining to site reclamation required by applicable law or permit condition are satisfied prior to the installation of the plant.

(F) A specific location designated in a duly adopted municipal plan under 24 V.S.A. chapter 117 for the siting of a renewable energy plant or specific type or size of renewable energy plant, provided that the plant meets any siting criteria recommended in the plan for the location. On or after January 1, 2019, to qualify under this subdivision (F), the plan must be certified under 24 V.S.A. § 4352.

(G) If the plant constitutes a net metering system, then in addition to subdivisions (A) through (F) of this subdivision (30), a site designated by Board rule as a preferred location.

Sec. 14. 30 V.S.A. § 8004(g) is added to read:

(g) Preferred locations. With respect to a renewable energy plant to be located in the State whose energy or environmental attributes may be used to satisfy the requirements of the RES, the Board shall exercise its authority under this section and sections 8005 and 8006 of this title to promote siting such a plant in a preferred location.

Sec. 15. 30 V.S.A. § 8005a is amended to read:

§ 8005a. STANDARD OFFER PROGRAM

(a) Establishment. A standard offer program is established. To achieve the goals of section 8001 of this title, the Board shall issue standard offers for renewable energy plants that meet the eligibility requirements of this section. The Board shall implement these standard offers by rule, order, or contract and shall appoint a Standard Offer Facilitator to assist in this implementation. For
the purpose of this section, the Board and the Standard Offer Facilitator constitute instrumentalities of the State.

(b) Eligibility. To be eligible for a standard offer under this section, a plant must constitute a qualifying small power production facility under 16 U.S.C. § 796(17)(C) and 18 C.F.R. part 292, must not be a net metering system under section 219a of this title, and must be a new standard offer plant. In this section, “new standard offer plant” means a renewable energy plant that is located in Vermont, that has a plant capacity of 2.2 MW or less, and that is commissioned on or after September 30, 2009.

(c) Cumulative capacity. In accordance with this subsection, the Board shall issue standard offers to new standard offer plants until a cumulative plant capacity amount of 127.5 MW is reached.

(1) Pace. Annually commencing April 1, 2013, the Board shall increase the cumulative plant capacity of the standard offer program (the annual increase) until the 127.5-MW cumulative plant capacity of this subsection is reached.

(A) Annual amounts. The amount of the annual increase shall be five MW for the three years commencing April 1, 2013, 7.5 MW for the three years commencing April 1, 2016, and 10 MW commencing April 1, 2019.

(B) Blocks. Each year, a portion of the annual increase shall be reserved for new standard offer plants proposed by Vermont retail electricity providers (the provider block), and the remainder shall be reserved for new standard offer plants proposed by persons who are not providers (the independent developer block).

(i) The portion of the annual increase reserved for the provider block shall be 10 percent for the three years commencing April 1, 2013, 15 percent for the three years commencing April 1, 2016, and 20 percent commencing April 1, 2019.

(ii) If the provider block for a given year is not fully subscribed, any unsubscribed capacity within that block shall be added to the annual increase for each following year until that capacity is subscribed and shall be made available to new standard offer plants proposed by persons who are not providers.

(iii) If the independent developer block for a given year is not fully subscribed, any unsubscribed capacity within that block shall be added to the annual increase for each following year until that capacity is subscribed and:
(I) shall be made available to new standard offer plants proposed by persons who are not providers; and

(II) may be made available to a provider following a written request and specific proposal submitted to and approved by the Board.

(C) Adjustment; greenhouse gas reduction credits. The Board shall adjust the annual increase to account for greenhouse gas reduction credits by multiplying the annual increase by one minus the ratio of the prior year’s greenhouse gas reduction credits to that year’s statewide retail electric sales.

(i) The amount of the prior year’s greenhouse gas reduction credits shall be determined in accordance with subdivision 8006a(a) of this title.

(ii) The adjustment in the annual increase shall be applied proportionally to the independent developer block and the provider block.

(iii) Greenhouse gas reduction credits used to diminish a provider’s obligation under section 8004 of this title may be used to adjust the annual increase under this subsection (c).

(D) Pilot project; preferred locations. For a period of three years commencing on January 1, 2017:

(i) The Board shall allocate the following portions of the annual increase to new standard offer plants that will be wholly located in one or more preferred locations other than parking lots or parking lot canopies:

(I) one-sixth of the annual increase, during the first year;

(II) one-quarter of the annual increase, during the second year; and

(III) one-third of the annual increase, during the third year.

(ii) The Board separately shall allocate the following portions of the annual increase to new standard offer plants that will be wholly located on parking lots or parking lot canopies:

(I) one-sixth of the annual increase, during the first year;

(II) one-quarter of the annual increase, during the second year; and

(III) one-third of the annual increase, during the third year.

(iii) To qualify for these allocations, the plant shall not require the construction of a new substation by the interconnecting retail electricity
provider or by increasing the capacity of one or more of the provider’s existing facilities.

(iv) These allocations shall apply proportionally to the independent developer block and provider block.

(v) If in a given year an allocation under this pilot project is not fully subscribed, the Board in the same year shall allocate the unsubscribed capacity to new standard offer plants outside the pilot project.

(2) Technology allocations. The Board shall allocate the 127.5-MW cumulative plant capacity of this subsection among different categories of renewable energy technologies. These categories shall include at least each of the following: methane derived from a landfill; solar power; wind power with a plant capacity of 100 kW or less; wind power with a plant capacity greater than 100 kW; hydroelectric power; and biomass power using a fuel other than methane derived from an agricultural operation or landfill.

* * *

(f) Price. The categories of renewable energy for which the Board shall set standard offer prices shall include at least each of the categories established pursuant to subdivision (c)(2) of this section. The Board by order shall determine and set the price paid to a plant owner for each kWh generated under a standard offer required by this section, with a goal of ensuring timely development at the lowest feasible cost. The Board shall not be required to make this determination as a contested case under 3 V.S.A. chapter 25.

(1) Market-based mechanisms. For new standard offer projects, the Board shall use a market-based mechanism, such as a reverse auction or other procurement tool, to obtain up to the authorized amount of a category of renewable energy, if it first finds that use of the mechanism is consistent with:

(A) applicable federal law; and

(B) the goal of timely development at the lowest feasible cost.

(2) Avoided cost.

(A) The price paid for each category of renewable energy shall be the avoided cost of the Vermont composite electric utility system if the Board finds either of the following:

(i) Use of the pricing mechanism described in subdivision (1)(market-based mechanisms) of this subsection (f) is inconsistent with applicable federal law.

(ii) Use of the pricing mechanism described in subdivision (1)(market-based mechanisms) of this subsection (f) is reasonably likely to
result in prices higher than the prices that would apply under this subdivision (2).

(B) For the purpose of As used in this subsection (f), the term “avoided cost” means the incremental cost to retail electricity providers of electric energy or capacity or both, which, but for the purchase through the standard offer, such providers would obtain from distributed renewable generation that uses the same generation technology as the category of renewable energy for which the Board is setting the price. For the purpose of As used in this subsection (f), the term “avoided cost” also includes the Board’s consideration of each of the following:

(i) The relevant cost data of the Vermont composite electric utility system.

(ii) The terms of the contract, including the duration of the obligation.

(iii) The availability, during the system’s daily and seasonal peak periods, of capacity or energy purchased through the standard offer, and the estimated savings from mitigating peak load.

(iv) The relationship of the availability of energy or capacity purchased through the standard offer to the ability of the Vermont composite electric utility system or a portion thereof to avoid costs.

(v) The costs or savings resulting from variations in line losses and other impacts to the transmission or distribution system from those that would have existed in the absence of purchases through the standard offer.

(vi) The supply and cost characteristics of plants eligible to receive the standard offer.

* * *

(5) Price; preferred location pilots. For the period during which the Board allocates capacity to new standard offer plants that will be wholly located in one or more preferred locations as set forth in subdivision (c)(1)(D) of this section, the following shall apply to the price paid to such a plant:

(A) In using a market-based mechanism such as a reverse auction to determine this price for each of the two allocations of capacity, the Board shall compare only the proposals of plants that qualify for the allocation.

(B) In using avoided costs to determine this price for each of the two allocations of capacity, the Board shall derive the incremental cost from distributed renewable generation that is sited on a location that qualifies for the
allocation and uses the same generation technology as the category of renewable energy for which the Board is setting the price.

Sec. 16. STANDARD OFFER PILOT; REPORT

On or before January 15, 2018, the Public Service Board shall file a report with the House Committee on Commerce and Economic Development, the Senate Committee on Finance, and the House and Senate Committees on Natural Resources and Energy on the progress of the standard offer pilot project on preferred locations authorized in Sec. 15 of this act. This report shall itemize the size, type of preferred location, generation technology, and cost per kilowatt hour of each application received under the pilot project and shall identify each generation facility approved under the pilot and the bill credit per kilowatt hour awarded to each such facility.

Sec. 17. 30 V.S.A. § 8010 is amended to read:

§ 8010. SELF-GENERATION AND NET METERING

* * *

(c) In accordance with this section, the Board shall adopt and implement rules that govern the installation and operation of net metering systems.

(1) The rules shall establish and maintain a net metering program that:

* * *

(G) accounts for changes over time in the cost of technology; and

(H) allows a customer to retain ownership of the environmental attributes of energy generated by the customer’s net metering system and of any associated tradeable renewable energy credits or to transfer those attributes and credits to the interconnecting retail provider, and:

(i) if the customer retains the attributes, reduces the value of the credit provided under this section for electricity generated by the customer’s net metering system by an appropriate amount; and

(ii) if the customer transfers the attributes to the interconnecting provider, requires the provider to retain them for application toward compliance with sections 8004 and 8005 of this title; and

(I) promotes the siting of net metering systems in preferred locations.

* * *

(3) The rules shall establish standards and procedures governing application for and issuance or revocation of a certificate of public good for net
metering systems under the provisions of section 248 of this title. In establishing these standards and procedures, the rules:

(A) The rules may waive the requirements of section 248 of this title that are not applicable to net metering systems, including criteria that are generally applicable to public service companies as defined in this title; 

(B) The rules may modify notice and hearing requirements of this title as the Board considers appropriate; and 

(C) The rules shall seek to simplify the application and review process as appropriate; and

(D) with respect to net metering systems that exceed 150 kW in plant capacity, shall apply the so-called “Quechee” test for aesthetic impact as described by the Vermont Supreme Court in the case of In re Hahn, 174 Vt. 515 (2002) (mem.). The rules and application form shall state the components of this test.

(E) With respect to a net metering system exceeding 15 kW in plant capacity, the rules shall not waive or include provisions that are less stringent than the following, notwithstanding any contrary provision of law:

(i) the requirement of subdivision 248(a)(4)(C) of this title to provide a copy of the application to the Agencies of Agriculture, Food and Markets and of Natural Resources; the Department of Public Service; the Division for Historic Preservation; the municipal legislative body; and the municipality and regional planning commissions; and

(ii) the requirements of subdivision 248(a)(4)(J) (required information) and subsections 248(f) (preapplication submittal) and (t) (aesthetic mitigation) and, with respect to a net metering system exceeding 150 kW in plant capacity, of subsection (u) (decommissioning) of this title.

(2) The certificate holder shall have control over all vegetation used to demonstrate that the facility will not have an undue adverse effect on aesthetics and all locations on which mitigation plantings are required to be installed. As used in this subdivision, “control” means that the certificate holder has an enforceable right to install and maintain plantings and to manage vegetation.
(3) For three years after installation of all required plantings, the certificate holder annually shall submit documentation by a qualified expert that the plantings have been maintained in accordance with the approved plans.

(4) The certificate holder shall have an ongoing duty to maintain the plantings in accordance with the approved plans and replace dead or diseased plantings as soon as seasonably possible.

§ 21. PARTICULAR PROCEEDINGS; ASSESSMENT OF COSTS

(a) The Board, the Department, or the Agency of Natural Resources may allocate the portion of the expense incurred or authorized by it in retaining additional personnel for the particular proceedings authorized in section 20 of this title to the applicant or the public service company or companies involved in those proceedings. As used in this section, “agency” means an agency, board, or department of the State enabled to authorize or retain personnel under section 20 of this title.

(1) The Board shall upon petition of an applicant or public service company to which costs are proposed to be allocated, review and determine, after opportunity for hearing, having due regard for the size and complexity of the project, the necessity and reasonableness of such costs, and may amend or revise such allocations. Nothing in this section shall confer authority on the Board to select or decide the personnel, the expenses of whom are being allocated, unless such personnel are retained by the Board. Prior to allocating costs, the Board shall make a determination of the purpose and use of the funds to be raised hereunder, identify the recipient of the funds, provide for allocation of costs among companies to be assessed, indicate an estimated duration of the proceedings, and estimate the total costs to be imposed. With the approval of the Board, such estimates may be revised as necessary. From time to time during the progress of the work of such additional personnel, the Board, the Department, or the Agency of Natural Resources shall render to the company detailed statements showing the amount of money expended or contracted for in the work of such personnel, which statements shall be paid by the applicant or the public service company into the State Treasury at such time and in such manner as the Board, the Department, or the Agency of Natural Resources may reasonably direct.

(2) In any proceeding under section 248 of this title, the Agency of Natural Resources may allocate the portion of the expense incurred in retaining additional staff authorized in subsection 21(a) of this title only if the following apply:

(A) the Agency does not have the expertise and the retention of such expertise is required to fulfill the Agency’s statutory obligations in the proceeding; and

(B) the Agency allocates only that portion of the cost for such expertise that exceeds the fee paid by the applicant under section 248b of this title.
(b) When regular employees of the Board, the Department, or the Agency of Natural Resources are employed in the particular proceedings described in section 20 of this title, the Board, the Department, or the Agency of Natural Resources may also allocate the portion of their costs and expenses to the applicant or the public service company or companies involved in the proceedings. The costs of regular employees shall be computed on the basis of working days within the salary period. The manner of assessment and of making payments shall otherwise be as provided for additional personnel in subsection (a) of this section. However, with respect to proceedings under section 248 of this title, the Agency of Natural Resources shall not allocate the costs of regular employees.
