Removing the box seems a small thing to those of us who don’t have a criminal record, but it can be a lifesaver to those who do.”

(D) if the person has no pending criminal charges, civil citations, or unpaid fines or penalties for a violation under this chapter.

(2) In the case of a second suspension, a license shall not be reinstated until:

***

(C) if the person elects to operate after the person operates under an ignition interlock RDL, after:

(i) a period of two years (plus any extension of this period arising from a violation of section 1213 of this title) if the person’s license or privilege to operate is suspended after a refusal to consent to a law enforcement officer’s reasonable request for an evidentiary test; or

(ii) a period of 18 months (for a period equivalent to the relevant suspension period specified in subsection 1205(m) or 1208(a) of this title, plus any extension of this period arising from a violation of section 1213 of this title) in all other cases, except that this requirement shall not apply if the underlying offense arose solely from being under the influence of a drug other than alcohol; and

(D) the person has no pending criminal charges, civil citations, or unpaid fines or penalties for a violation under this chapter.

(3) In the case of a third or subsequent suspension or a revocation, a license shall not be reinstated until:

(A) the person has successfully completed an alcohol and driving rehabilitation program;

(B) the person has completed or shown substantial progress in completing a therapy program at the person’s own expense agreed to by the person and the Driver Rehabilitation Program Director;

(C) the person has satisfied the requirements of subsection (b) of this section; and

(b) Abstinence.

(1) Notwithstanding any other provision of this subchapter, a person whose license or privilege to operate has been suspended or revoked for life under this subchapter may apply to the Driver Rehabilitation School Director and to the Commissioner for reinstatement of his or her driving privilege. The person shall have completed three years of total abstinence from consumption of alcohol or drugs, or both. The beginning date for the period of abstinence shall be no sooner than the effective date of the suspension or revocation from which the person is requesting reinstatement and shall not include any period during which the person is serving a sentence of incarceration to include furlough. The application shall include the applicant’s authorization for a urinalysis examination to be conducted prior to reinstatement under this subdivision. The application to the Commissioner shall be accompanied by a fee of $500.00. The Commissioner shall have the discretion to waive the application fee if the Commissioner determines that payment of the fee would present a hardship to the applicant.

(2) If the Commissioner, or a medical review board convened by the Commissioner, is satisfied by a preponderance of the evidence that the applicant has abstained for the required number of years immediately preceding the application and hearing, has successfully completed a therapy program as required under this section, has operated under a valid ignition interlock RDL for at least three years following the suspension or revocation or, in the case of a suspension or revocation involving a refusal, for at least four years following the suspension or revocation, and the person appreciates that he or she cannot drink any amount of alcohol and drive safely, the person’s license shall be reinstated immediately, subject to the condition that the person’s suspension or revocation will be put back in effect in the event any further investigation reveals a return to the consumption of alcohol or drugs and to such additional conditions as the Commissioner may impose and,
if the person has not previously operated for three years under an ignition interlock RDL, subject to the additional condition that the person shall operate under an ignition interlock restricted driver’s license for a period of at least one year following reinstatement under this subsection. However, the Commissioner may waive this one-year requirement to operate under an ignition interlock restricted driver’s license if the person furnishes proof as prescribed by the Commissioner that he or she is incapable of using an ignition interlock device because of a medical condition that will persist permanently or at least for one year. The requirement to operate under an ignition interlock RDL shall not apply if the person is exempt under subdivision (a)(4) of this section or if all of the offenses that triggered the lifetime suspension or revocation arose solely from being under the influence of a drug other than alcohol.

(3) If after notice and hearing the Commissioner later finds that the person was violating the conditions of the person’s reinstatement under this subsection, the person’s operating license or privilege to operate shall be immediately suspended or revoked for the period of the original suspension or revocation.

(4) If the Commissioner finds that a person reinstated under this subsection was suspended pursuant to section 1205 of this title, or was convicted of a violation of section 1201 of this title, the person shall be conclusively presumed to be in violation of the conditions of his or her reinstatement.

(5) A person shall be eligible for reinstatement under this subsection only once following a suspension or revocation for life.

(6)(A) If an applicant for reinstatement under this subsection resides in a jurisdiction other than Vermont, the Commissioner may elect not to conduct an investigation. If the Commissioner elects not to conduct an investigation, he or she shall provide a letter to the applicant’s jurisdiction of residence stating that Vermont does not object to the jurisdiction issuing the applicant a license if the applicant is authorized required to operate only vehicles equipped with an ignition interlock device for at least a three-year period and is required to complete any alcohol rehabilitation or treatment requirements of the licensing jurisdiction.

(B) If the applicant’s jurisdiction of residence is prepared to issue or has issued a license in accordance with subdivision (A) of this subdivision (6) and the applicant satisfies the requirements of section 675 of this title, the Commissioner shall update relevant State and federal databases to reflect that
the applicant’s lifetime suspension or revocation in Vermont under chapter 13, subchapter 13 of this title has terminated.

(a) The department may award an advance in an amount determined by the department to be suitable for the engineering planning under standards established by the department:

(1) For planning of potable water supply facilities, when it finds the same to be necessary in order to preserve or enhance the quality of water provided to the inhabitants of the municipality, or to alleviate an adverse public health condition, or to allow for orderly development and growth of the municipality, except that no funds may be awarded until the department determines that the applicant has complied with the provisions of section 1676a of this title, unless such funds are solely for the purpose of determining the effect of the proposed project on agriculture;

(2) For planning of pollution abatement facilities, in order to enable a municipality to comply with water quality standards established under chapter 47 of this title;

(3) For the planning of combined sewer separation facilities, when it finds the same to be necessary to allow improvement of the quality of the receiving water in order that increased legitimate water uses and recreational potential in the best interest of the public can be realized.

(b) The department shall award an advance for planning under this section only when it finds:

(1) That the cost of the project is reasonable for its intended purpose; and

(2) That local funds are not readily available for the planning, and funds are not readily available through other established planning and design programs. [Repealed.]

Sec. 10. 10 V.S.A. § 1594 is amended to read:

§ 1594. PAYMENT OF AWARDS

On receipt of the engineering planning documents and their approval by the department, the department shall certify the award to the commissioner of finance and management who shall issue his or her warrant for payment thereof from the construction grant funds available to the department. The department may direct the commissioner of finance and management to issue his or her warrant for partial payments of the award upon receipt and approval of portions of the total engineering work to be performed under the advance,
together with recipient’s certification that costs for which reimbursement has been requested have been incurred and paid by the recipient municipality. The recipient shall provide supporting evidence of payment upon the request of the department. Partial payments shall be made not more frequently than monthly. Interest costs incurred in local short-term borrowing of the planning advance shall be reimbursed as part of the planning advance.  [Repealed.]

Sec. 11.  10 V.S.A. § 1595 is amended to read:

§ 1595.  REPAYMENT OF ADVANCES

Advances under this subchapter shall be repaid when construction of the facilities or any portion thereof is undertaken. Where a construction grant is made by the department for the project, the amount of the outstanding advances shall be retained from the first payment of the grant funds. In other instances, if repayment is not made within 60 days upon demand by the department, the sum shall bear interest at the rate of 12 percent per annum from the date payment is demanded by the department to the date of payment by the municipality. The department may approve proportional repayment when construction is initiated on a small portion of the planned project. [Repealed.]

Sec. 12.  10 V.S.A. chapter 55, subchapter 3 is redesignated to read:

Subchapter 3.  Construction Grants in Aid

Sec. 13.  10 V.S.A. § 1621 is amended to read:

(B) In the case of water pollution abatement projects utilizing innovative or alternative processes or techniques and determined eligible for federal grants under section 201(g)(5) of P.L. 92-500, and its subsequent amendment, the cost of building, acquisition, alteration, remodeling, improvement or extension of treatment works, an approved grant allowance to defray all or a portion of the engineering costs, and up to a $3,000.00 grant allowance for administrative and legal costs relating to the project, but shall exclude all costs of land and easements required for the project and legal and administrative costs incident thereto which are not eligible for federal assistance.

(C) In the case of water pollution abatement projects utilizing privately owned treatment works serving one or more residences or small commercial establishments, and determined eligible for federal grant assistance under section 201(h) of P.L. 92-500, and its subsequent amendment, the cost of building, acquisition, and alteration of facilities, an approved grant allowance to defray all or a portion of the engineering costs, and up to a $3,000.00 grant allowance for administrative and legal costs relating to the project, but shall exclude all costs of land and easements required for the project and legal and administrative costs incident thereto which are not eligible for federal assistance.
(3) In the case of combined sewer separation projects, the cost of combined sewer separation facilities, storm water treatment facilities, and attendant facilities determined necessary by the department, an approved grant allowance to defray all or a portion of the engineering costs, and up to a $3,000.00 grant allowance for administrative and legal costs relating to the project, but shall exclude all costs of land and easements required for the project and legal and administrative costs incident thereto.

(4) All water pollution abatement projects shall be in conformance with the provisions of chapter 151 of this title.

Sec. 15. 10 V.S.A. § 1623 is amended to read:

§ 1623. APPLICATION

A municipality which has voted funds in a specific amount to construct a water pollution abatement and control facility as described in section 1622 of this title, at a meeting duly warned for that purpose, which desires to avail itself of state aid funds under this subchapter, shall apply for such funds in writing to the department in a manner prescribed by the department. Municipalities whose water pollution abatement facilities have been previously constructed and which meet the permit requirements established under chapter 47 of this title may make application for state aid funds without further vote of the municipality:

(1) if the local share of the project costs are formally authorized by the municipal officials from funds available to them, or

(2) if the project is to construct facilities to remove phosphorus to a level of 1 milligram per liter,

(3) and provided the project meets all other requirements of the department.

Sec. 16. 10 V.S.A. § 1624 is amended to read:

§ 1624. FINANCIAL ASSISTANCE WITH WATER SUPPLY PROJECTS

(a) Grants. The secretary may award a municipality a state grant for a potable water supply facility of up to 35 percent of its total eligible project cost, when the municipality contributes at least ten percent of the total eligible costs, for which purpose the municipality may use federal funds obtained from other programs, and when the secretary finds that:

(1) the project is necessary, and the proposed type, size and estimated cost of the project are suitable for its intended purpose;
(2) at least one-half of the property owners of the new area of the municipality to be served by the project have contracted to connect to the water system and pay for service at rates which the legislative body of the municipality determines to be adequate to cover the anticipated operating and maintenance costs including debt services;

(3) the proposed rate and fee schedule provide for reasonable contributions by all persons in the municipality benefited by the project; and

(4) the municipality has voted bonds for the project prior to April 5, 1997 in anticipation of the receipt of a construction grant authorized under this subsection.

(b) Loans.

(1) The secretary may certify to the Vermont municipal bond bank established by 24 V.S.A. § 4571 the award of a loan to a municipality to assist with a potable water supply facility project, when the secretary finds that:

(A) the project is necessary;

(B) the proposed type, size, and estimated cost of the project are suitable for its intended purpose; and

(C) the municipality will have the technical, financial, and managerial ability to operate the facility in compliance with federal and state law.

(2) The certification by the secretary shall specify the interest rate, and indicate which of the following loan conditions concerning construction loans apply:

(A) The term shall not exceed 20 years, and the annual interest rate, plus administrative fee, shall be no more than three percent or less than zero percent, except that when the applicant municipality is disadvantaged as defined by subdivision 1571(9) of this title, the term shall not exceed 30 years. When the applicant municipality is disadvantaged as defined in subdivision 1571(9)(A) of this title, the annual interest rate, plus administrative fee, shall be no less than minus three percent.

(B) In no instance shall the annual interest rate, plus administrative fee, be less than necessary to achieve an annual household user cost equal to one percent of the median household income of the applicant municipality or served area, taking into account:
(i) debt retirement of the project, including any monies a municipality may borrow to match federal funds available to the drinking water state revolving fund pursuant to subsection (d) of this section;

(ii) prior drinking water projects; and

(iii) estimated annual operation and maintenance costs as determined by the secretary.

(3) A municipal legislative body may execute a loan agreement under this subsection, provided the loan is authorized by municipal voters and secured by the full faith and credit of the municipality.

(4) A loan shall be issued and administered pursuant to chapter 120 of Title 24.

(5) Loans shall be available to the extent funds are available and according to priorities established by the secretary.

(6) For purposes of this subsection, the secretary shall determine the median household income of a municipality from the most recent federal census data available when the priority list used for funding the project was approved, or at the option of an applicant municipality, based on the recommendation of an independent contractor hired by the municipality and approved by the secretary. The determination of the secretary shall be final. The cost of an independent contractor may be included in the total cost of a project. When using federal census data to determine the median household income of a municipality, the census data shall be adjusted for inflation beginning in the second year of availability by increasing it four percent per year.

(7) Loans awarded for the purpose of refinancing old debt shall be for a term of no more than 20 years and at an interest rate set by the state treasurer at no less than zero percent and no more than 80 percent of the average rate on marketable obligations of the state, except that municipalities or private water system owners which qualify for loan awards under 24 V.S.A. § 4770 and which incurred debt and initiated construction after April 5, 1997 may receive loans at interest rates and terms pursuant to subdivision (b)(2)(A) of this section.

(8) Loans awarded for the purpose of conducting feasibility studies and preparation of engineering plans and designs shall be for a term of no more than five years at an interest rate of zero percent.
(9) Loans awarded for the purpose of purchasing land or conservation easements to protect public water sources shall be for a term of no more than 20 years at an annual interest rate of three percent.

(10) The secretary may forgive up to $25,000.00 of a loan from the Vermont environmental protection agency (EPA) drinking water state revolving fund to municipalities for improvements to public school water systems following substantial completion of the project. The secretary shall establish amounts, eligibility, policies, and procedures for loan forgiveness in the annual state intended use plan (IUP) with public review and comment prior to finalization and submission to the EPA.

(11) Subject to the interest rate and administrative fee limitations of subdivision (b)(2) of this section, the secretary may designate projects as United States Department of Agriculture Rural Development-Vermont EPA drinking water state revolving fund jointly funded projects, and reduce the Vermont EPA revolving fund interest rate, plus administrative fee, in order to make the total loan cost of the joint loan to the municipality equivalent to the total loan cost of a separately-funded Vermont EPA revolving loan for the same project.

(c)(1) Zebra mussel control. The department may award supplemental financial aid for the construction of zebra mussel control measures, upon finding that the proposed project is necessary. The supplemental aid shall be awarded in such a manner that the total financial burden of a water system, including zebra mussel controls, shall not exceed, in the first year after receiving the supplemental aid, an annual cost to a typical household of 1.5 percent of median household income for the project area as determined by the department. The estimate of such cost shall include all awards of aid under subsections (a) and (b) of this section, all other aid available to the applicant, and the estimated new and existing capital debt retirement and annual operating costs of the system. Awards of supplemental aid may, in accordance with the eligibility limitations of subdivision 1622(1) of this title, consist of:

(A) a loan under chapter 120 of Title 24 with an interest rate sufficient to assure that annual user costs do not exceed 1.5 percent of the median household income; or

(B) a grant for up to, but not exceeding, the total capital cost of the proposed project, in order to assure as closely as possible that annual household user costs do not exceed 1.5 percent of the median household income for the project area.
(2) In awarding financial assistance under this section, the department shall determine the existing and proposed annual user cost in accordance with procedures or rules adopted under chapter 25 of Title 3.

(d) Municipal match of federal revolving funds.

(1) A municipality may choose to provide the state money necessary to match federal monies available to the drinking water state revolving fund established by 24 V.S.A. § 4753(a)(3), and thereby become eligible to receive a loan from the revolving fund in the amount of the total cost of a water facility project approved under this section. Such a loan from the revolving fund, for up to the total project cost, shall be approved by municipal voters and secured by the full faith and credit of the municipality or anticipated revenues from municipal water charges.

(2) The amount of such a municipal match of federal funds shall be equal to one-sixth of the total project cost, which shall constitute a sum in addition to the amount of a loan for the total project cost to be received by the municipality from the revolving fund. A municipality is authorized to borrow monies needed for the match amount, from sources other than the revolving fund, which shall be approved by municipal voters and secured by the full faith and credit of the municipality or anticipated revenues from municipal water charges, or a municipality may use other funds or tax revenues available to it for this purpose.

(e) Upon request of the owner of a privately owned public water system, a municipality shall apply for and support an application for a community development block grant to receive use of state and federal funds, provided:

(1) the private water system owner agrees to pay all administrative and legal costs incurred by the municipality in pursuit of the grant;

(2) the municipality finds that the project to be supported by the grant is consistent with applicable local and regional plans, and local ordinances or other local enactments;

(3) the private water system owner, to the extent practicable, undertakes the administration of logistical and legal work necessary to prepare the application materials; and

(4) the private water system owner agrees to hold the municipality harmless from any claims of liability arising from the grant application or project.
(f) The secretary may use federal funds to award grants to municipalities to complete studies, or for start-up costs associated with the physical and operational consolidation of public water systems or the interconnection of public water systems. The secretary shall establish amounts, eligibility, priorities, policies, and procedures in the annual state intended use plan (IUP). [Repealed.]

Sec. 17. 10 V.S.A. § 1624a is amended to read:

§ 1624a. AWARDS FOR POLLUTION ABATEMENT PROJECTS FOR COMBINED SEWER OVERFLOWS

(a) When the Department finds that a proposed water pollution abatement project not covered under section 1625 of this title is necessary, that the proposed type, kind, quality, size, and estimated cost of the project, including operation cost and sewage disposal charges, are suitable for abatement of pollution, and that the project or the prescribed project phases are necessary to meet the intent of the water quality classifications established by the Secretary or by statute under chapter 47 of this title, the Department may award State financial assistance to the project. These projects may include ancillary work determined by the Secretary to be necessary to attain the water quality goals.

(b) The assistance shall consist of:

(1) A grant of 25 percent of the eligible project cost.

(2) A loan from the Vermont Environmental Protection Agency (EPA) Pollution Control Revolving Fund or the Vermont Pollution Control Revolving Fund of 50 percent of the eligible project cost. No interest shall be charged. In a certificate to the Vermont Municipal Bond Bank, the Secretary shall recommend the term, repayment schedule, and other terms and conditions of the loan.

(c) Notwithstanding the percentages of assistance provided for in subsection (b) of this section, when a municipality is certified by the Secretary of Commerce and Community Development to be within a designated job development zone, the grant to the municipality shall be 50 percent of eligible project costs and the loan shall be 25 percent of eligible project costs.

(d) Grants and loans under this section may be made from State and federal sources, as determined by the Secretary.

(e) A loan agreement may be entered into by action of the legislative body of the municipality, using procedures specified by applicable general or special enabling authority, following:
(1) authorization by the electorate of issuance of bonds in the amount of
25 percent of project costs, unless the municipality has determined to use some
other method of financing its share of project cost; and

(2) authorization by the electorate of indebtedness in the amount of the
loan under this section.

(f) A loan agreement may include provisions for deferred repayment if the
electorate has authorized the future issuance of bonds to make a final
repayment of the loan, and the authorization specifies whether the bond
agreements will pledge the full faith and credit of the municipality or sufficient
revenues from municipal sewage disposal charges.

(1) Except as provided in subdivision (2) of this subsection, loan
repayments shall be according to the following schedule:

(A) 0.50 percent in the first year and increasing thereafter at 0.50
percent per year through the ninth year; and

(B) 5.0 percent in the 10th year through the 19th year; and

(C) the remainder in the 20th year.

(2) Notwithstanding subdivision (1) of this subsection, a municipality
shall be entitled to loan repayment under this subdivision if repayment would
produce municipal sewer rates in the municipality which exceed 150 percent of
the current State average rate for a family of four. For purposes of this
calculation, the municipality’s sewer rates shall be deemed to include operating
costs, payments on the municipality’s water pollution control debt, and
repayment of five percent of the principal of the loan under this section. The
following shall be minimum repayments under this subdivision:

(A) 0.25 percent per year in the first through the tenth year, dating
from the issuance of the certification of completion of the project;

(B) 0.50 percent in the 11th year and increasing thereafter at 0.50
percent per year through the 19th year; and

(C) the remainder in the 20th year.

(3) When a loan is issued with deferred repayment provisions pursuant
to authorization of the electorate under this section for the future issuance of
bonds, upon maturity of the loan, if other sources of revenue are available, the
legislative body of the municipality may elect not to issue bonds to make the
final payment on the loan. The term of these bonds, if issued, shall not exceed
20 years. As authorized in the initial vote, these bonds may be secured by a
pledge of the full faith and credit of the municipality or by sufficient revenues from municipal sewage disposal charges.

(g) State financial assistance under this section shall be made to the extent that funds are available and according to a system of priorities established by the Secretary. In establishing this system, priority shall be given to pollution abatement and not to the support of demand growth, and to projects discharging into or near lakes on January 1, 1988.

(h) Notwithstanding subsection (b) of this section, a loan awarded from the Vermont Environmental Protection Agency Pollution Control Revolving Loan Fund for a combined sewer overflow abatement project may be for up to 100 percent of the eligible project cost if:

1. the project is included on a priority list; and

2. the project is capitalized, at least in part, with a Federal Clean Water State–Revolving–Fund grant that includes loan forgiveness provisions. [Repealed.]

Sec. 18. 10 V.S.A. § 1625 is amended to read:

§ 1625. AWARDS FOR POLLUTION ABATEMENT PROJECTS TO ABATE DRY WEATHER SEWAGE FLOWS

(a) When the Department finds that a proposed water pollution abatement project is necessary to maintain water quality standards during dry weather sewage flows, and that the proposed type, kind, quality, size, and estimated cost, including operation cost and sewage disposal charges, of the project are suitable for abatement of pollution, and the project or the prescribed project phases are necessary to meet the intent of the water quality classifications established by the Secretary or by statute under chapter 47 of this title, the Department may award to municipalities a State assistance grant of up to 25 percent of the eligible project cost, provided that in no case shall the total of the State and federal grants exceed 90 percent of the eligible project costs:

1. except that the 90 percent limitation shall not apply when the municipality provides, as their local share, federal funds allocated to them for the purpose of matching other federal grant programs having a matching requirement; and

2. except that the total of State and federal grants issued under P.L. 92–500 section 202(a)(2) may equal up to 95 percent of the eligible costs for innovative or alternative wastewater treatment processes and techniques.

(b) In carrying out the purposes of this subchapter, the Department shall define the purpose and scope of an eligible project, including a determination
of the area to be served, type of treatment, effluent limitations, eligible construction costs, cost accounting procedures and methods and other such project construction, operation and fiscal elements necessary to meet federal aid requirements. The Department shall, as a part of the administration of this grant program, encourage municipalities to undertake capital development planning and to establish water and sewer charges along public utility concepts.

(c) Any municipality having proceeded with construction of facilities with a State grant of 25 percent since July 1, 1984 shall be eligible for an increase in the State grant to a total of 35 percent of the eligible project costs.

(d) The Department may award a State assistance grant of up to 50 percent of the eligible costs of an approved pollution abatement project or a portion thereof not eligible for federal financial assistance in a municipality that is certified by the Secretary of Commerce and Community Development to be within the designated job development zone. To achieve the objectives of chapter 29, subchapter 2 of this title, the eligibility and priority provisions of this chapter do not apply to municipalities within a designated job development zone.

(e) [Repealed.]

Sec. 19. 10 V.S.A. § 1626a is amended to read:

§ 1626a. AWARDS FOR WASTEWATER TREATMENT PLANTS WITH A CAPACITY OF 250,000 GALLONS OR MORE PER DAY

(a) Definitions. For the purpose of this section:

(1) “Septage” means the product of an individual or a group septic tank, which is removed from the tank for further processing and disposal.

(2) “Sludge” means the intermediate product of a municipal wastewater treatment plant which receives further processing by the same plant in a manner similar to the processing of septage by the plant.

(3) The project or plant “cost” means the cost of the enlargement or new construction of a wastewater treatment plant which the commissioner of environmental conservation finds is eligible for financial assistance under this section.

(b) Loan eligibility. The proposed enlargement or new construction of a wastewater treatment plant with a total design hydraulic capacity of 250,000 or more gallons per day shall be eligible for a loan for 100 percent of the total project cost, as provided by chapter 120 of Title 24, if the commissioner of environmental conservation finds that:
(1) the proposed plant capacity is necessary to accommodate anticipated municipal growth; and that

(2) the proposed plant capacity will be sufficient to receive, treat and dispose of septage in a quantity equivalent to the ratio of 2,000 gallons or more of such septage per day for each 1,000,000 gallons per day of plant design hydraulic capacity. However, this condition shall not be required if the commissioner finds that such septage treatment capacity by the plant is not needed within the region of the state in which the plant is or will be located.

(c) Additional state assistance eligibility.

(1) Grants. A proposed wastewater treatment plant which is eligible for a loan under subsection (b) of this section, and a wastewater treatment plant with a design hydraulic capacity of 250,000 or more gallons per day which is being refurbished, shall in addition be eligible for a grant of up to 50 percent of the cost of that portion of the plant to be used to treat septage, or septage and sludge in combination, if the commissioner of environmental conservation finds that the proposed plant capacity will be sufficient to receive, treat and dispose of septage alone in a quantity equivalent to the ratio of 4,000 gallons or more of such septage per day for each 1,000,000 gallons per day of plant design hydraulic capacity. The portion of the plant used for processing septage, or septage and sludge in combination, shall include facilities for receiving septage and for the storage, treatment, transfer, and disposal of both septage and sludge.

(2) Loans. A proposed wastewater treatment plant which is eligible for a grant under this subsection may receive an interest-free loan for the remaining amount of the total project cost, from revolving funds established by chapter 120 of Title 24.

(d) Conditions of additional state assistance. The additional state assistance provided by subsection (c) of this section shall be awarded under the following conditions:

(1) To be eligible for additional assistance, a proposed plant shall be consistent with any solid waste implementation plan adopted pursuant to 24 V.S.A. § 2202a, or chapter 117 of Title 24, which is approved by the secretary of natural resources and which addresses septage and sludge management. However, the commissioner of environmental conservation shall not withhold additional assistance because of an absence of an adopted or approved solid waste implementation plan.

(2) Plants eligible for additional assistance shall receive increased funding priority in accordance with rules adopted by the secretary.
(3) A plant receiving additional assistance shall, for the useful life of the facility, maintain its additional processing capacity for use only in receiving and processing septage. Such septage shall be accepted from any Vermont municipality, and shall not be restricted to specific municipalities. The rate or rates charged for acceptance by the plant of septage from sources other than the users for whom the plant is designed primarily to serve, shall be equal to the rate or rates charged the primary users, and shall not subsidize the primary users. The agency shall include these requirements in any permit issued for the construction and operation of the plant, and the requirements shall be enforceable in the manner prescribed for that permit.

(4) Project costs eligible for additional assistance shall include the cost of: land used for the direct disposal of septage and sludge; facilities to receive, store, treat, transfer and dispose of septage and sludge; and facilities to compost or pelletize or otherwise process septage and sludge.

(5) When other state or federal assistance is awarded to a plant eligible for additional assistance under this section, such other assistance shall reduce, first, the loan amount awarded under this section, and secondly, the grant amount awarded under this section. [Repealed.]

Sec. 20. 10 V.S.A. § 1626b is added to read:

§ 1626b. MUNICIPAL WATER POLLUTION CONTROL GRANTS

(a) Projects. The Secretary may award State assistance grants to municipalities for water pollution abatement and control facilities.

(b) Application. The Secretary shall prescribe the form of application to apply for a grant under this section. The application shall include:

(1) a description of the project;

(2) a schedule for project implementation;

(3) an estimate of the project cost;

(4) the information necessary for the Secretary to determine the grant amount using the criteria described in section 1628 of this title;

(5) whether the project requires a permit under chapter 151 of this title; and

(6) any other information that the Secretary deems necessary to implement this section.

(c) Grant award. The Secretary shall make grant awards pursuant to the project priority system adopted under section 1628 of this title in an amount not to exceed 35 percent of eligible project costs. The Secretary shall not
award a grant under this section until the applicant provides a permit or jurisdictional opinion that a permit is not required, issued pursuant to chapter 151 of this title.

(d) Payment of awards. Payment of awards shall be made pursuant to section 1627 of this title.

Sec. 21. 10 V.S.A. § 1628 is amended to read:

§ 1628. PRIORITIES

The Department shall make grant awards under this chapter to eligible municipal water pollution abatement and control projects on the basis of urgency of need as determined according to a system of priorities adopted by rule by the Department and to the extent appropriate funds are available. The system of priorities shall include increased priority to eligible municipal projects in designated centers. The Department shall assure that projects sponsored by a town school district, or incorporated school district shall be given increased priority for purposes of the receipt of engineering planning advances awarded under section 1593 of this chapter. The total amount of the engineering planning advances made and still outstanding during a period for this purpose shall not exceed 30 percent of the bond issue or appropriation voted for construction grant funds by the General Assembly for the period in which the award is made require consideration of criteria, including:

1. whether a project is grant or loan eligible;

2. the condition of the waters affected by the project and whether the waters are:

   A. not in compliance with the Vermont Water Quality Standards; or

   B. have a total maximum daily load (TMDL);

3. whether the project will address water quality issues identified in a basin plan;

4. whether the project will abate or control pollution that is causing or may cause a threat to public health;

5. whether the project will address an emergency situation affecting or constituting a threat to the environment or the public health, safety, or welfare;

6. if the project repairs or replaces existing infrastructure, the condition and integrity of such infrastructure;

7. whether the project incorporates principles of environmental resiliency or sustainability, including energy efficiency, which reduce the
environmental impacts of the project or a water pollution abatement and control facility:

(8) the fiscal integrity and sustainability of the project, including whether the project is a cost-effective alternative, when compared to other alternatives;

(9) whether the project serves a designated center;

(10) affordability factors for the municipality or municipalities in which the project is located, including:

   (A) median household income;
   (B) unemployment rate; and
   (C) population trends; and

(11) if the project removes a pollutant for which the water or waters affected by the project are impaired, the cost-effectiveness of the project at removing that pollutant.

Sec. 22. 10 V.S.A. § 1630 is amended to read:

§ 1630. REGULATIONS RULES

Sec. 23. 10 V.S.A. § 1632 is amended to read:

§ 1632. STATE ADMINISTRATIVE DEPARTMENTS

For the purpose of constructing or substantially improving a water pollution abatement and control facility or potable water supply facility any state administrative department as authorized in Title 3 shall be deemed a municipality under section 1623 of this title, and subject to the terms and conditions applicable to municipalities; provided, however, that a State administrative department deemed a municipality shall only receive State assistance under this chapter if the Department has a surplus of funds at the end of each fiscal year after all municipal grant applicants have received committed funds.

Sec. 24. 24 V.S.A. § 4751 is amended to read:

§ 4751. DECLARATION OF POLICY

It is hereby declared to be in the public interest to foster and promote timely expenditures by municipalities for water supply systems, water pollution
abatement and control facilities, and solid waste management, each of which is declared to be an essential governmental function when undertaken and implemented by a municipality. It is also declared to be in the public interest to promote expenditures for certain existing privately owned public water systems and certain privately owned wastewater and public and potable water supply systems to bring those systems into compliance with federal and state standards and to protect public health and the environment.

(A) if the Secretary recommends that private entities should not receive loans under 24 V.S.A. chapter 120 for water pollution abatement and control facilities or public water supply systems, the basis for the recommendation;

(B) if the Secretary recommends that private entities should be authorized to receive loans under 24 V.S.A. chapter 120 for water pollution abatement and control facilities or public water supply systems:

(i) the basis for the recommendation;

(ii) how loans to municipal projects would retain priority over private entities in eligibility;
(iii) whether loans to private entities should be limited to certain types of water pollution abatement and control facilities or public water supply systems projects, including whether:

(I) loans for correcting sewage problems should only be authorized to private residences or development with failed systems, as that term is defined in 10 V.S.A. § 1972; and

Until such new rules are adopted, the Department shall award grants pursuant to subsection (b) of this section.

(b) When the Department finds that a proposed water pollution abatement and control facility is necessary to maintain or achieve compliance with the Vermont Water Quality Standards; that the proposed type, kind, quality, size, and estimated cost of the project, including operation cost and sewage disposal charges, are suitable for abatement of pollution; and that the project or the prescribed project phases are necessary to meet the intent of the water quality classifications established by the Secretary or by statute under 10 V.S.A. chapter 47, the Department may award State financial assistance to the project as follows:

(1) Combined sewer separation facilities and combined sewer overflow abatement projects shall be eligible for a grant of 25 percent of the eligible project costs.

(3) A project to construct, enlarge, or refurbish a wastewater treatment plant with a design hydraulic capacity of 250,000 or more gallons per day shall be eligible for a grant of up to 50 percent of the cost of that portion of the plant used to treat septage, or septage and sludge in combination, if the Commissioner of Environmental Conservation finds that the proposed plant capacity will be sufficient to receive, treat, and dispose of septage alone in a quantity equivalent to the ratio of 4,000 gallons or more of such septage per day for each 1,000,000 gallons per day of plant design hydraulic capacity. The portion of the plant used for processing septage, or septage and sludge in combination, shall include facilities for receiving septage and for the storage, treatment, transfer, and disposal of both septage and sludge.
