

March 23, 2015

To whom It may Concern:

I am writing in support of bill H. 426 regarding raw milk.

I am a consumer of raw milk and have been for 13 years. I moved to Vermont with my family in 2002, looking forward to a life more connected to our food source and the farmers who produce it.

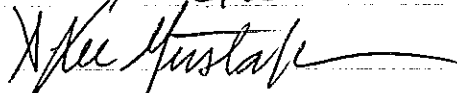

Having a local source of raw milk and other locally produced food is very important to me. I appreciate the many benefits that raw milk provides for the health of my family.

Please do not place undue burdens on small farmers through unnecessary regulations. Let's preserve our freedom to produce and to buy raw milk.

Sincerely,

Heidi A. Gustafson
