

DAIRYVISIONVT

DairyVisionVT's mission is to empower Vermont's innovative dairy farmers with business skills and guidance needed to create successful dairy operations, resulting in a vibrant and profitable dairy industry in Vermont. As a non-profit organization, we accomplish our mission through the support of individuals and organizations throughout New England and New York.

Created in 2012, DairyVisionVT seeks to increase profitability on our dairy farms by serving as a catalyst for farms to identify ways to build and maintain their business. We provide funding and expert technical assistance to farmers seeking to improve their bottom line and increase production.

Participating farms – who have to go through a rigorous application process by staff and team members – can expect the following:

- A new approach to building the farm's success
- Tailored assistance
- A dedicated team of professionals focused on their business
- An opportunity to access funding for expert review and consultation
- A schedule determined by the farm
- Participation in a program with support from the agricultural lending community and others
- Ongoing support following the consultation period

DairyVisionVT provides a holistic approach that covers all aspects of the business, utilizing a unique model focused on unbiased analysis and recommendations from handpicked team members with expertise in human resources, dairy finances, cow care and nutrition.

Our website is currently under construction, but members of our board of directors will be in attendance at the Vermont Farm Show from Jan 27-29 to introduce the program to potential farms and sponsors.
