Hello I recently joined the Agency of Agriculture as the Produce Safety Program Development Coordinator. This is a new position focusing on the development of a produce safety program at the Agency. I need to undertake some preliminary research to understand the number of Vermont farms engaged in fruit and/or vegetable production and their relative sizes in terms of gross sales.

This will help us to direct outreach regarding implementation of the Food Safety Modernization Act (FSMA) and the possible development of a statewide produce safety program to the community of farmers who will be affected. I'm trying to learn what state resources are available for me to begin to answer these questions.
