RE: H.297

Dear Lawmakers,

I'm writing to urge you to support the ban on sale of ivory and rhino horn. I've spent time volunteering at elephant sanctuaries and understand what we stand to lose. Vermont has always been a leader of issues of the environment and conservation. Please continue that tradition and let the country and the rest of the world that Vermonters are serious about not only local conservation, but global.

Please stand tall for these animals and against all the evils that flow from the trade of these animals.
