Gender Distribution

Gender	Population	% of Total Participants
Female	71	65.14%
Male	38	34.86%

Site: SASH - Windham - Melrose Terrace

Survey: No Survey Selected

Population: 109

Age Distribution

Age Distribution Bracket	Population	% of Total Participants
Birth To 18	1	0.92%
18 To 65	42	38.53%
65 To 80	37	33.94%
80 and Above	29	26.61%

Site: SASH - Windham - Melrose Terrace

Survey: No Survey Selected

Population: 109

General Information and SASH Performance

These instructions are to be included on Measure breakdown pages:

Instructions:
- Measures are listed in SASH Survey order
- Click on Measure link for a bar graph of the percent of participants with a measure test/assessment by month and in last 12 months and further drilldowns to participant outreach lists.
- Display of measure data is based on last measure result during the time interval. For measures without a specified time interval, averages are based on the last measure result at any point in time.
- Each Participant Count is based on the age and gender criteria for the measure; therefore, the count for a given measure may be less than the population of participants with the condition. In addition, when a participants last measure result represents a measure exclusion (e.g., Participant has bilateral foot amputation and the Annual Comprehensive Foot Exam answer is "NA," the participant will not be included in the count.
- The count used to calculate the % of participants at goal is the population of participants eligible for a given measure whether or not a measure answer has been recorded for that participant answer has been recorded for that patient.

General Information	Participant Count	% of Total Participants
Total Numbers of Participants	109	100.00%
Numbers of Medicaid Participants	41	37.61%
Numbers of Medicare Participants	93	85.32%
Participants with both Medicare and Medicaid	28	25.69%
Number of VA Participants	0	0.00%
Participants with NO Insurance	3	2.75%

General Health and Wellness	Measure Denominator	Percentage
Participants who have an identified PCP	87	85.29%
Participants who have PERS or Other Lifeline	16	15.69%
Participants who have an Advanced Directive	17	16.67%
Participants who have had an Advanced Directive and registered online	6	5.88%
Participants who use Tobacco	32	31.37%
Participants who use Tobacco and want to quit	13	12.75%
Participants who have had a routine or annual exam	73	71.57%
Participants with documented Total cholesterol >200	0	0.00%
Participants with Depression Screening-PHQ-2	87	85.29%

Vaccinations	Measure Denominator	Percentage
Shingles	11	10.78%
Flu	62	60.78%
Pneumococcal	37	36.27%

Current Medical Status	Measure Denominator	Percentage
Participants with 1 – 2 ER visits	42	41.18%
Participants with 3 – 5 ER visits	13	12.75%
Participants with > 5 ER visits	3	2.94%
Participants with overnight hospital stays	31	30.39%
Participants with rehab/subacute in nursing home stays (post hospital)	14	13.73%
Participants with rehab/subacute in nursing home stays (non post hospital)	3	2.94%
Participants with 1 – 2 hospital visits	26	25.49%
Participants with 3 – 5 hospital visits	5	4.90%
Participants with > 5 hospital visits	0	0.00%

ADL / IADL Deficits	Participant Count	% of Total Participants
Participants with one ADL deficit	9	8.26%
Participants with more than one ADL deficit	34	31.19%
Participants with No ADL deficit (blank)	17	15.60%
Participants with one IADL deficit	4	3.67%
Participants with more than one IADL deficit	7	6.42%
Participants with No IADL deficit (blank)	17	15.60%

Mobility Screening	Participant Count	% of Total Participants
Participants who drive	45	41.28%
Participants who don't drive	64	58.72%
Participants who own a car	41	37.61%
Participants using cane or walker	49	44.95%
Participants using wheelchair	9	8.26%
Participants who left house <=1 time per week during previous month	11	10.09%
Participants with NO mobility screen data (blank)	14	12.84%

Cognitive Health Evaluation	Participant Count	% of Total Participants
Participants who passed Cognitive Health evaluation	55	50.46%
Participants who failed Cognitive Health evaluation	22	20.18%
Participants with NO Cognitive Health Information (blank)	31	28.44%

Comorbidities	Participant Count	% of Total Participants
Participants with 3 or more comorbidities	87	79.82%
Participants with 5 or more comorbidities	63	57.80%
Participants with No comorbidities	14	12.84%

Nutrition	Participant Count	% of Total Participants
Participants with “Good” Nutrition score evaluation	5	4.59%
Participants with “Moderate Risk” Nutrition score evaluation	39	35.78%
Participants with “High Risk” Nutrition score evaluation	49	44.95%
Participants with No Nutrition scores	16	14.68%

Falls Reporting and Risk	Participant Count	% of Total Participants
Participants with segregated falls		
1	23	21.10%
2	3	2.75%
3	5	4.59%
5	1	0.92%
Participants with falls	49	44.95%
Participants with 1 – 2 falls reported in last 12 months	14	12.84%
Participants with 3 – 5 falls reported in last 12 months	7	6.42%
Participants with >5 falls reported in last year	4	3.67%
Participants with falls with ER visits	14	12.84%
Participants with falls with hospital stay	4	3.67%
Participants with falls with both ER and hospital stay	0	0.00%
Participants with falls with neither ER or hospital stay	9	8.26%
Participants with Fall Risk Total Score >4	59	54.13%
Participants with No Mach -10 Falls Total Risk Score	34	31.19%
Participants with a TUG Falls Total Risk Score	2	1.83%
Participants with No TUG Falls Total Risk Score	107	98.17%
