

Federal Medical Assistance Percentages (FMAPs)

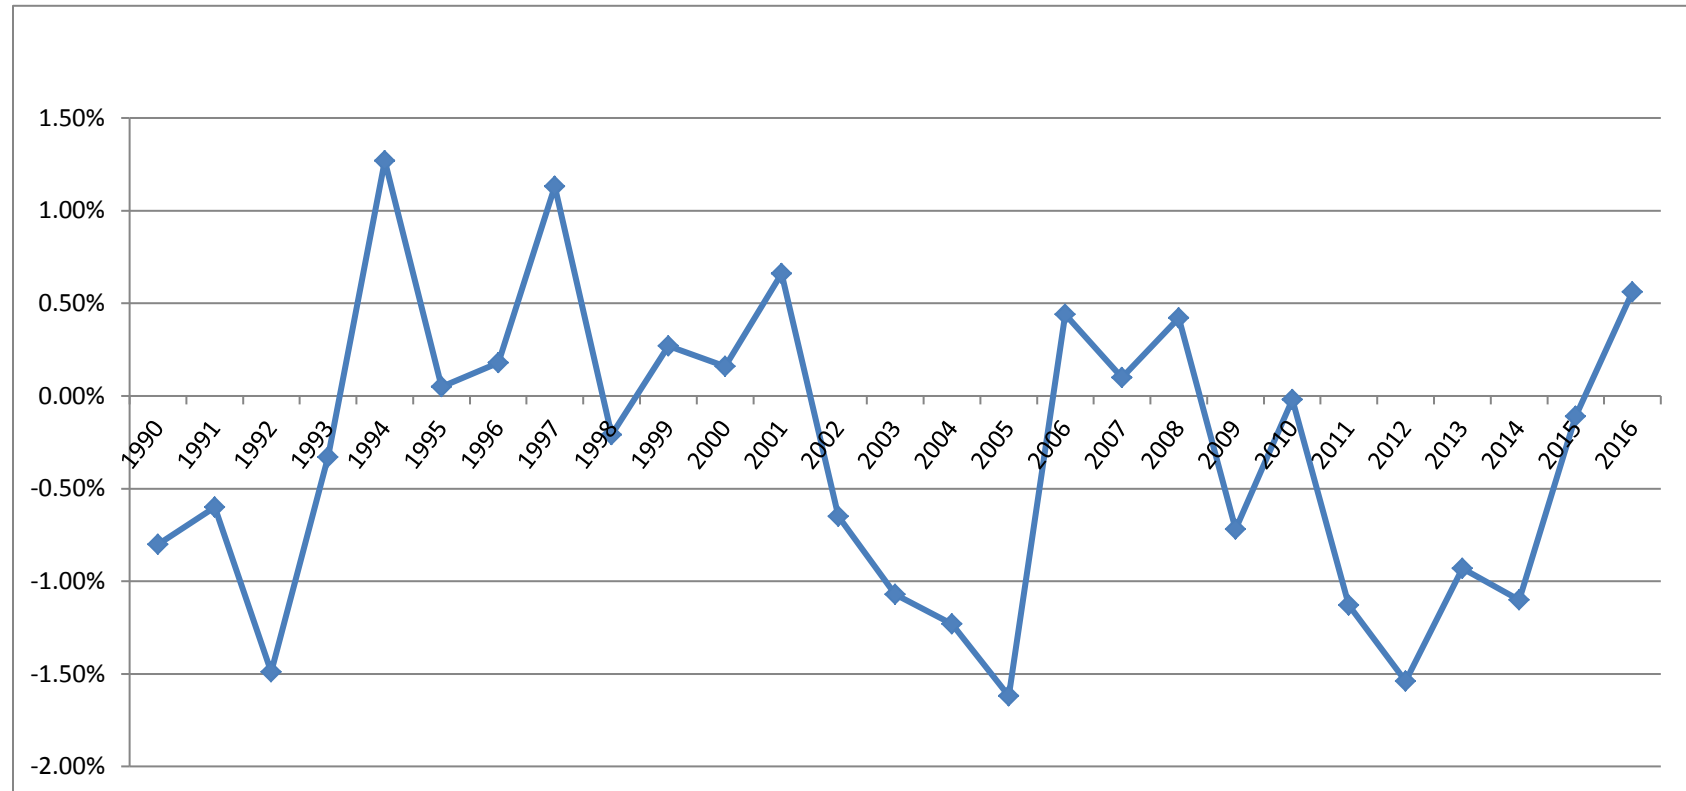

- ▶ The FMAP is the share of state Medicaid benefit costs paid by the federal government.
- ▶ Pursuant to federal law, the Secretary of the U.S. Dept. of Health and Human Services calculates the FMAPs each year.
- ▶ The FMAP is calculated based on a three-year average of state per capita personal income compared to the national average.
- ▶ No state can receive less than 50% or more than 83%.
- ▶ States also receive "enhanced FMAPs" for expansion populations under the ACA and for the *Childrens Health Insurance Program (CHIP)*.
