

Thank you for the call back.

And, Thank-you for your help distributing the pages we talked about that you have that were supplied to you (for the 22 members who were at the hearing last Thursday).

If a physical copy of the 156 page California Document, "that one copy" you have now, could be physically supplied to the committee when it meets then that would be good for them to see the size of it (at least the Chair will have a physical copy, or any member who wants to browse it in paper form can have that opportunity).

Otherwise, per our conversation, attached is that pdf file of the 156 page document titled: "P65single061909.pdf" (EVIDENCE ON THE CARCINOGENICITY OF Marijuana Smoke"), and other PDFs are attached too, some that do a good job at explaining California's Prop 65. You said you will be able to distribute the physical copies you have, and the digital versions, to those at last Thursday's hearing (Marijuana bill that allows SMOKING" - that California Prop 65 states will cause cancer).

You will have to scan the actual testimony copies you have, the originals, for the members to have the full paper version of those pages as I have only a partial version I can attach (attached are the first 3 pages, the rest of it was taken from pages 7-14 of the 156 page Prop 65 "EVIDENCE ON THE CARCINOGENICITY OF Marijuana Smoke" document - please see links below, and attached).

Along with the attached, here are links to several informative California Prop 65 official state web links as well... You could email these, or post these as references for members to be able to access.
