Things like this one needs to be addressed first before legalization happens in Vermont. I am for changing the medical cannabis program first before legalization happens especially when the medical cannabis program here in Vermont is located in Vcic which is public safety. Plus the fact we have had numerous overdose in the in the last 5 years and especially in 2015. Especially when the current bill wants to borrow money first to get a point of sale system going. Which i can tell you this that department of liquor control point of sale system is outdated or not updated in many rural areas of Vermont. I truly believe that fixing the medical cannabis program first is essential to helping show that vermont could have a well regulated system but as current as this article I have to believe that Vermont is not ready for legalized cannabis. That other states are worried about it as well. This shows how far behind Vermont is with doing many things.

Thank you for reading this email.
