

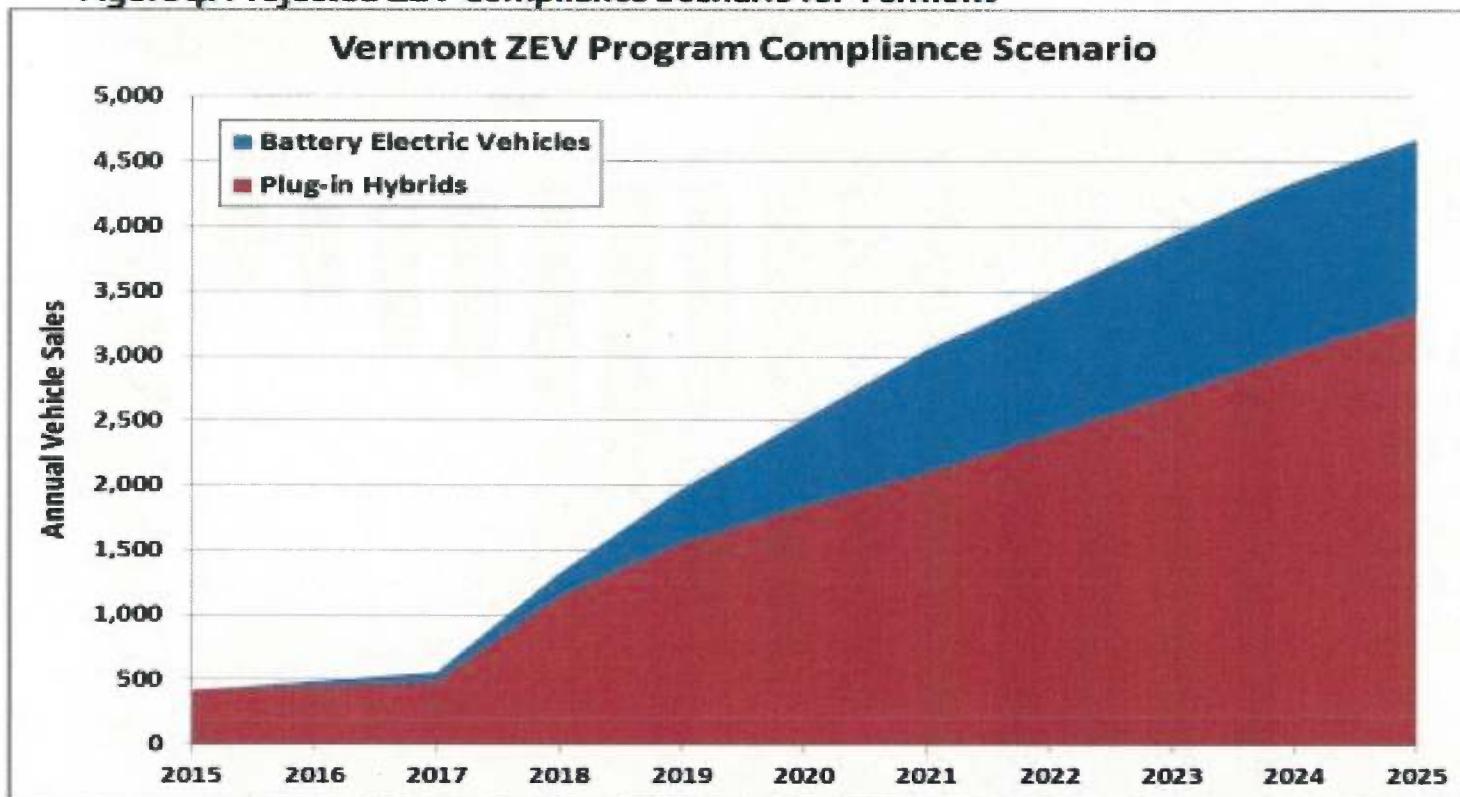

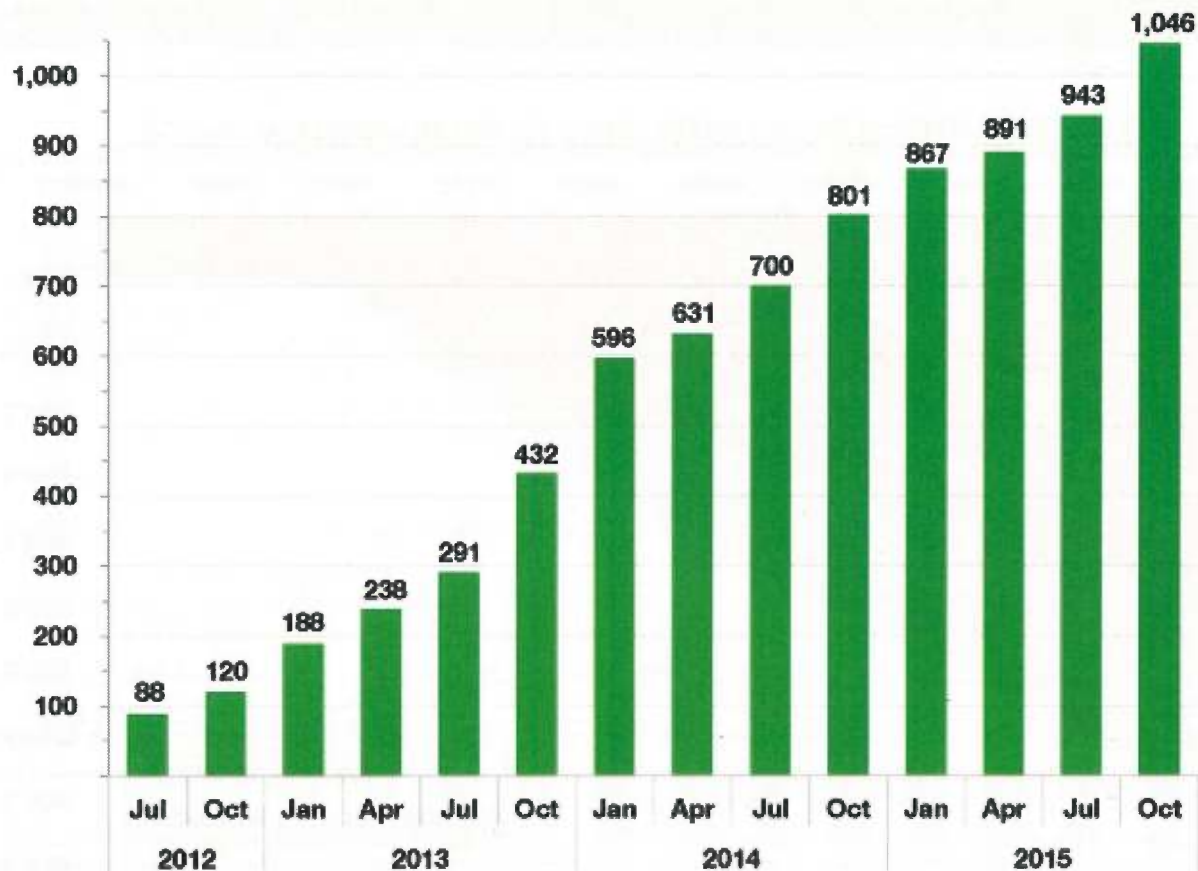

**Figure 4: Projected ZEV Compliance Scenario for Vermont**

Source: Northeast States for Coordinated Air Use Management, 2014

This graph shows ONE scenario for EV sales that would meet the requirements in the ZEV rules. It calls for 4500 in new sales of electric vehicles annually by 2025.

### Progress on EV Registrations Since 2012

From October 2012 to today, plug-in passenger EV registrations went from 120 to just over 1100; and Vermont communities with EVs more than tripled, to over 150.

Still, just over 1% of all cars on the road in VT are EVs.
