

**Twenty-eighth Report on the
Status of the Petroleum Cleanup Fund**

10 VSA § 1941

January, 2016

This report includes a review of Petroleum Cleanup Fund receipts and disbursements for the fiscal year 2015, an evaluation of the effectiveness of the fund in meeting its legislative intent, and a review of the reasonableness of remediation costs is also included. This report also includes recommendations to address funding shortfalls in the heating fuel account.

Prepared by: The Petroleum Cleanup Fund Advisory Committee

PETROLEUM CLEANUP FUND ADVISORY COMMITTEE MEMBERS

Deb Markowitz: Secretary, Agency of Natural Resources

Chuck Schwer: Designated representative of the Commissioner,
Department of Environmental Conservation (DEC)

Kevin Gaffney: Designated representative of the Commissioner,
Department of Financial Regulation

Joe Choquette: Vermont Petroleum Association

Senator: Mark MacDonald

Representative: Mike Marcotte

Scott Bigger: Designated representative of Lowell T. Spillane,
Retail gasoline dealer

Dick Barnes: A.R. Sandri, a licensed gasoline distributor

Matt Cota: Vermont Fuel Dealers Association

Peter Bourne: Bourne's Energy, a licensed fuel dealer

Peter Tucker: A licensed real estate broker

Executive Summary

This is the 28th annual report of the Petroleum Cleanup Fund (PCF) Advisory Committee. This report will provide a review of receipts and disbursements for fiscal year 2015, in accordance with 10 V.S.A. § 1941 and will evaluate the effectiveness of the PCF in meeting its legislative intent. This report will also highlight financial challenges within the fund and recommended solutions.

In FY15 the PCF continued to be the primary financial responsibility mechanism for Vermont underground storage tank owners. The PCF also provided financial resources necessary to remediate petroleum contamination at schools, homes, businesses, farms, churches, public works facilities and many other locations. The PCF provides a means to remediate releases that threaten public health and the environment. Petroleum releases have been discovered at more than 4,000 separate properties, with contamination discovered in drinking water wells, in the indoor air of homes and businesses, seeping into surface water bodies and at dangerous levels in public utility lines. Without the PCF many Vermont businesses, homeowners and public entities would struggle to fund expensive cleanups.

The continued success of the PCF depends upon the continued solvency of the fund. Critical site cleanup work remains at thousands of petroleum contaminated properties. An actuarial study completed in 2005 found that the fund was technically insolvent (projected liabilities exceed assets of the fund) through 2015. As a means to manage this situation, site cleanups need to be prioritized each year to account for limited funds. A \$2.8 million transfer of funds out of the PCF in FY09 further increased the gap between projected liabilities and fund assets. Since the last actuarial study was conducted more than ten years ago, the committee has approved a new actuarial analysis to be conducted in early 2016. This analysis will provide valuable financial information to determine the long-term health of the fund.

The committee is concerned with the growing costs of heating fuel cleanups. Although past efforts at prevention has helped reduce the demand on the PCF, the recent increase in heating fuel expenditures suggests more effort is needed. House Representative Connor of Fairfield has introduced H.531 to require aboveground tank inspections to help prevent tank failure. The committee supports the concept of requiring tank inspections to help prevent releases. The committee is in agreement that oil heat tank inspections are critically important and that more efforts are needed to ensure all heating oil tanks are inspected and brought into compliance with Vermont's AST regulations. The committee supports further discussion on the prevention efforts outlined in H.531 <<http://legislature.vermont.gov/bill/status/2016/H.531>>.

The committee reviewed the residential AST and UST grant programs. This program provides grant money to low income Vermonters to upgrade or replace aging high risk petroleum storage tanks, both aboveground and underground. Through 2015, a total of 2,011 ASTs have been replaced or upgraded with compliant tanks and 638 USTs have been removed, thus preventing the likelihood of a spill. Many additional tanks have been replaced through industry incentives for those not qualifying for state assistance. The committee has found that the current grant amounts do not always provide sufficient assistance for low income Vermonters to proceed with replacing their tanks, and additional funds would provide more opportunities for low income Vermonters to bring their existing heating oil tanks into compliance and lessen the likelihood of a spill. The committee recommends that we continue to support H.363. This bill was introduced in 2015 in the legislature. It was voted out of the House and resides in the Senate. This bill proposes to amend the AST and UST grant programs to increase the annual cap from \$350,000 to \$400,000 and to increase the cap of individual grants from up to \$2,000 to \$3,000 for outside ASTs and up to \$4,000 for USTs.

Description and Purpose

This is the 28th annual report on the status of the PCF. This report will look at the effectiveness of the fund in meeting its intended purpose, review the status of cleanups from motor fuel and heating oil releases from both aboveground and underground heating oil storage tanks, review the farm and residential underground storage tank (UST) and aboveground (AST) grant programs and provide future PCF projections and recommendations for changes to the program.

In 1985, the General Assembly enacted Vermont's first law to regulate the construction, maintenance and operation of underground steel tanks used for the storage of petroleum products. Act 66 of the 1985 session established standards for new construction, and set a deadline of June 30, 1998, later amended to Dec. 22, 1998, for the removal or replacement of unprotected USTs.

In 1988 the legislature created the PCF, and appointed this advisory committee to oversee the financing, effectiveness and conduct of the program. The primary purpose of the PCF is to protect public health and the environment by paying for cleanup and restoration of contaminated soil and groundwater caused by releases from underground petroleum storage tanks, and to compensate third parties for property damage and bodily injury. Many changes have been made since 1988, including the inclusion of pollution coverage for aboveground storage tanks (ASTs) and a farm and residential UST and AST grant program. The Fund also provides loans to motor fuel tank owners for tank removal, replacement, and upgrade of equipment. The current deadline for filing a claim against the fund is July 1, 2019.

The PCF provides financial assurance to UST owners, who are required by state and federal law to provide coverage for up to \$1 million for cleanup and \$1 million for third party liability. Since such affordable comprehensive insurance coverage continues to be difficult or impossible to find for tank owners, the PCF enables tank owners to meet their financial responsibility (FR) requirements. By law, the U.S. EPA must approve the operation and viability of a state fund before it may serve as a financial responsibility mechanism for UST owners. EPA accepted Vermont's fund as a financial assurance mechanism in 1990, with the requirement that a minimum balance of \$1 million be maintained.

In 2004, the Legislature extended coverage to homeowner heating oil tanks and enacted a fee on heating fuel to create a revenue source for the heating oil related activities covered by the PCF. The PCF was also divided into two separate accounts: a motor fuel account and a heating oil account, with both revenue and expenditures to be managed within each account. In 2010, the fee on heating fuels was increased from a ½ cent per gallon to a full cent.

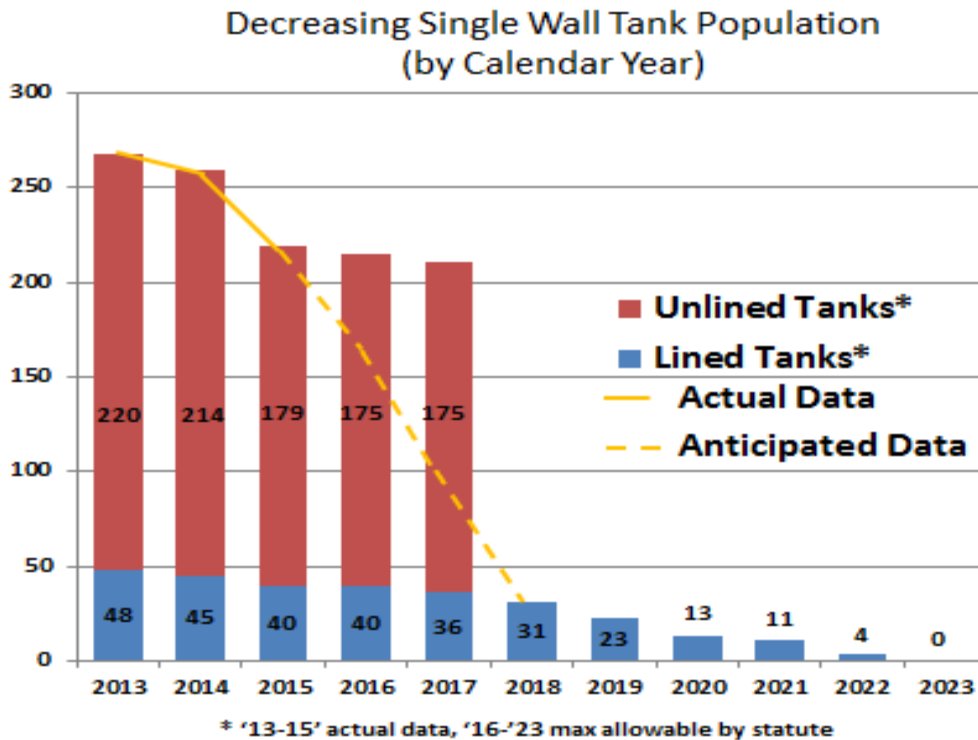

Revenue for the motor fuel account comes from an annual assessment fee of up to \$100 per tank on most underground tanks, (\$250 for combination systems where the single-walled tank is lined and \$500 for unlined combination single-walled tank systems) and a "distributor licensing fee" of one cent per gallon of motor fuel sold in the state. Additional revenue comes from the repayment of loans, recovery of some costs from responsible parties and interest accruing upon any cash balance in the fund. Revenue for the heating fuel account is generated from a licensing fee of one cent per gallon of heating oil and kerosene sold in the state. The sunset date for collection of the motor fuel and heating fuel fees is April 1, 2021.

Expenditures include the cost of cleanup, third party payments, loans to tank owners, grants to homeowners to assist in the removal of heating oil USTs and ASTs and administrative expenses. Each uninsured cleanup undertaken in the state becomes eligible for fund assistance after the party responsible for the tank meets a certain "deductible," a co-insurance payment based on the circumstances of ownership. For commercial entities, the deductible is set at \$10,000 per occurrence, although single-walled tank owners pay a higher deductible, and commercial heating oil USTs less than 1,100 gallons pay

a \$250 deductible. For homeowners, a deductible of \$250 must be met. Owners of commercial heating oil ASTs meet a \$1,000 deductible.

Risks to Fund Solvency

One of the biggest risks to the fund is the remaining population of single-walled underground storage tank systems. Beginning on July 1, 2014, owners of single-walled tanks began paying a higher annual tank assessment fee and would also be assessed a higher deductible in the event of a release. Over the past year, the number of single-walled USTs has been reduced from 254 to 225 (as of 11/6/15). This represents 11.6 percent of the current tank population. Of the 225 single-walled tanks, 175 are unlined. All unlined tanks must be closed by Jan. 1, 2018. We anticipate approximately 50 of these unlined tanks being closed in 2016. Due to lined tanks having an added level of protection, they do not require removal until Jan. 1, 2018, or by ten years from the date the tank was lined, whichever is later. The last tanks to be lined were in 2013, therefore we expect the last lined tanks to be closed by 2023. See graph below of the decreasing single-wall tank population. These tanks pose a greater risk of an undetected leak due to the lack of secondary containment, and can cause considerable harm in the environment.

The solvency of the PCF also remains at risk due to the large number of contaminated properties that are eligible for reimbursement. There are currently 2,508 properties where the PCF has made disbursements. In 2015, petroleum releases were discovered at another 154 properties that are PCF eligible. Of these, 86 releases were from above ground storage tanks (ASTs), 80 from heating fuel and six from motor fuel. Of the 80 heating fuel AST releases, 31 were from outdoor kerosene tanks and the rest were predominately indoor basement tanks. The other 68 releases were from UST releases: eleven were from permitted motor fuel tanks and the other 57 were from heating oil tanks. This large number of contaminated properties will result in continued disbursements from the PCF. A number of older sites remain that require remediation and hence future PCF disbursements. These older sites tend to be the most expensive sites to clean up in part due to the size and complexity of the release. The USEPA Office of Underground Storage Tanks has made addressing the site backlog a priority. Of the approximate 1,000

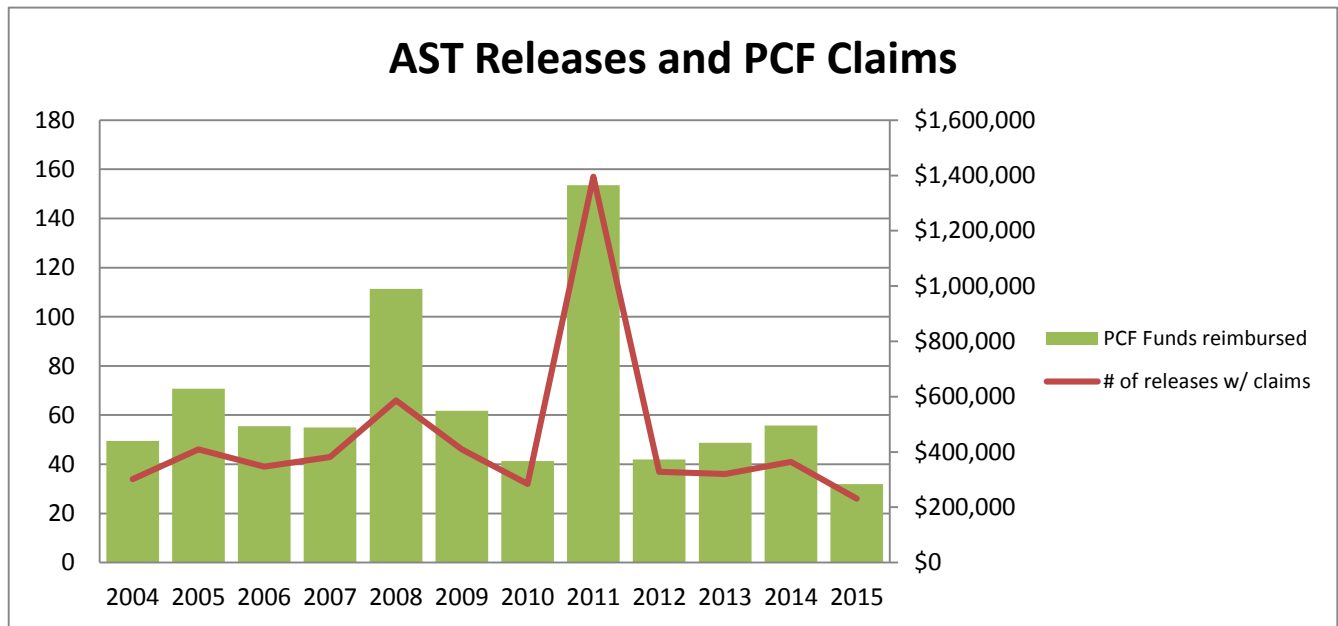

sites remaining in an active status where PCF eligible work needs to be completed, 679 are leaking motor fuel UST sites. Attachment two provides a detailed list of properties that have received reimbursements from the PCF for motor fuel releases.

The table below details disbursements from the fund from both the motor fuel account and the heating fuel account. This table highlights the shortfalls in the heating oil account from 2005 until the present, as years 2005 -2009 required a transfer of \$3,400,000 from the motor fuel account. This table also displays transfers of funds by the legislature since the fund was established in 1989. An actuarial study completed in 2005 found that the fund was technically insolvent (projected liabilities exceed assets of the fund) through 2015. A \$2.8 million transfer of funds out of the PCF in FY09 has further increased the gap between projected liabilities and fund assets.

Annual Petroleum Cleanup Fund Income (through December 2015)							
Year	License Fee	Tank Fee	Interest	Loan payment	Heating Oil Fee	Cost Recovery	General Fund
1988		\$441,300					\$700,000
1989	\$1,851,595	\$571,800	\$68,864				
1990	\$3,305,119	\$518,005	\$174,126	\$46,562			
1991	\$3,414,485	\$539,000	\$204,167	\$168,290			
1992	\$3,581,656	\$561,700	\$116,667	\$240,924			
1993	\$3,478,742	\$535,025	\$111,584	\$319,607			
1994	\$3,604,046	\$475,550	\$130,118	\$245,669		\$323,674	
1995	\$3,487,733	\$462,242	\$218,385	\$330,432		\$225,696

2015	\$3,951,463	\$366,950	\$6,507	\$257,474	\$1,359,213	\$22,779	
Total	\$102,845,850	\$10,124,381	\$2,906,160	\$7,436,338	\$11,633,468	\$6,044,849	\$3,730,000

Annual Petroleum Cleanup Fund Expenses							
(through December 2015)							
Year	Motor Fuel (MF)	Heating Fuel (HF)	3rd Party (MF)	UST Loans (MF)	UST/AST Grants	MF to HF Transfers	Legislative Transfers
1989	\$954,767			\$104,725			(\$700,000)
1990	\$854,456			\$1,091,742			\$1,000,000
1991	\$1,667,352		\$91,356	\$568,875			\$1,975,000
1992	\$2,735,743		\$246,653	\$473,567			\$750,000
1993	\$3,338,482		\$163,207	\$254,550			
1994	\$4,134,140	\$440,183	\$128,579	\$669,144			
1995	\$3,500,732	\$345,593	\$201,995	\$524,100			
1996	\$3,310,563	\$488,150	\$102,564	\$428,431			\$700,000
1997	\$3,214,204	\$204,487	\$183,473	\$989,125			
1998	\$3,522,001	\$229,284	\$180,275	\$208,740	\$6,412		(\$700,000)
1999	\$3,738,822	\$409,768	\$548,796	\$349,800	\$20,600		
2000	\$5,118,522	\$813,761	\$229,195	\$80,000	\$52,000		
2001	\$5,257,006	\$676,352	\$394,092	\$234,245	\$80,665		
2002	\$3,106,777	\$297,238	\$216,969	\$322,418	\$120,211		\$1,776,000
2003	\$4,207,188	\$467,880	\$313,835	\$114,170	\$79,860		
2004	\$4,252,202	\$904,078	\$184,517	\$132,596	\$116,502		(\$530,000)
2005	\$2,903,051	\$1,314,386	\$201,811	\$64,591	\$165,201	\$750,000	
2006	\$2,395,493	\$1,226,169	\$263,432	\$40,000	\$133,652	\$750,000	
2007	\$3,133,207	\$1,186,023	\$390,125	\$103,298	\$96,938	\$750,000	
2008	\$4,140,308	\$1,788,703	\$228,681	\$384,680	\$192,131	\$750,000	\$2,807,618
2009	\$4,576,012	\$1,330,821	\$687,895	\$103,730	\$281,101	\$400,000	(\$750,000)
2010	\$4,644,337	\$1,271,377	\$258,278	\$401,494	\$181,284		(\$300,000)
2011	\$3,029,500	\$1,257,481	\$263,049	\$161,312	\$332,908		
2012	\$2,425,452	\$1,345,474	\$364,641	\$30,850	\$297,945		(\$750,000)
2013	\$3,838,131	\$982,446	\$319,623	\$10,900	\$389,704		
2014	\$3,203,625	\$1,028,485	\$312,522	\$481,371	\$334,880		
2015	\$4,117,293	\$1,414,817	\$178,063	\$831,025	\$315,597		
Total	\$91,319,366	\$19,422,956	\$6,653,626	\$9,159,479	\$3,197,591	\$3,400,000	\$5,978,618

After modest numbers for AST releases and expenditures for 2012 and 2013 releases, there was an uptick in the number of releases in both 2014 and 2015. This translated into increased cleanup costs for 2014 releases. For 2015, the data is not final since additional claims are still being made, but we anticipate that overall 2015 data will be in line with 2012 and 2013. This is notable given heating oil demand, which was up over the last two winters, the coldest winters since 1994, whereas 2012 and 2013 were both mild winters. Looking longer term, we anticipate a decrease in both cost and number of releases given our efforts at prevention through both the AST residential grant program and the adoption of AST rules in 2011. As more and more tanks are upgraded to the new standards, fewer and fewer tank releases will occur. However, transition of old tanks to the new standards will remain a slower process until either more fuel distributors are proactive about red tagging substandard tanks or the agency's legislative authority is amended so red tagging substandard tanks may be required. The figure below also highlights the vulnerability of the fund. In 2011, Tropical Storm Irene caused more than 90 AST releases costing the PCF more than \$800,000 in cleanup expenses. The legislature provided \$750,000 in funds to cover these costs. Without this additional income the fund could not have absorbed these higher costs.

The PCF has provided cleanup funds for heating oil contamination at schools, homes, businesses, farms, churches, public works facilities and many other locations. Attachment 3 provides a detailed list of properties that have received reimbursements from the PCF for heating fuel releases. The farm and residential grant program for heating fuel tanks continues to remain very successful, as hundreds of tanks are removed each year.

The PCF’s highest priority is to protect human health and the environment from exposure to petroleum from tank releases. This was highlighted at a Barre site where explosive gasoline vapors were discovered in the fall of 2012 in the town’s sewer system and in people’s homes causing unhealthy exposure to the residents. In addition, hundreds of people were at risk of severe injury and death had there been an explosion in the sewer system. Immediate corrective action eliminated this significant risk to public health.

More than 4,000 separate properties have been discovered with contamination and many of these have affected drinking water wells, contaminated indoor air of homes and businesses, have migrated into surface water bodies and have been found at dangerous levels in public utility lines. For example, more than 200 separate sites have been discovered where nearly 1,000 public or private drinking water wells have been contaminated. Attachment 4 provides a list of the number of sites discovered each year that have had a direct effect on a sensitive receptor. To address human health and environmental exposures to releases the fund has authorized proactive measures which include rapid initial response to releases, providing bottled water and point-of-entry treatment for contaminated drinking water, aggressively recovering free product, protecting surface water bodies, indoor air remediation and mitigation of dangerous petroleum vapors.

Sites that have a direct effect on public health and the environment are the program’s most critical priority and demand the greatest level of effort. These same sites also present the greatest risk to fund solvency. Over the history of the program, the sites that have affected public water supplies or sensitive environmental areas have required extensive remediation at a high cost to the PCF. A site discovered in Killington had more than 80 private wells that were contaminated with a gasoline additive, MTBE. One home even had to endure significant disruption to the use of its well, as the well was so contaminated that at one point it was used as a remediation well. It is important to maintain a sufficient balance in the PCF,

in excess of the required \$1 million federally mandated reserve, to ensure there are adequate funds to provide an immediate and effective response where public health is at risk.

Legislative transfer of funds continues to be a risk to fund solvency. In FY09, \$2.8 million was transferred out of the PCF and as a result some cleanups had to be delayed. According to a 2005 actuarial study, the Fund was “**projected to be technically insolvent (projected liabilities exceed assets of the fund) through 2011.**” This actuarial assessment was prior to the subsequent increases in covered AST heating oil releases and it did not foresee any potential legislative transfers of assets from the fund. Maintaining a healthy cash balance above the federally mandated \$1 million reserve is important to the long-term success of the fund. The \$2.8 million legislative transfer of PCF funds expands the gap between projected liabilities and fund assets.

The last actuarial study was performed in 2005; one year after the legislature extended PCF coverage to homeowner heating oil tanks and enacted a fee on heating fuel. There is now an additional decade of data under this new funding and expenditure framework, and the PCF Advisory Committee supports ANR moving forward with an updated actuarial study in 2016.

Review of Receipts to the Fund

A review of fund receipts for FY15 is summarized in Attachment 1. In FY15, total fund receipts for the motor fuel account were \$4,340,525. This represents an increase in revenue of \$112,275 as compared to FY14. The distributor licensing fee, a one cent per gallon assessment of all motor fuels sold in the state, contributed \$3,841,674, a decrease of \$8,604 over last year’s income. Other than interest income on the account, all other sources of income increased over the prior fiscal year. Most notably, owners of “Category One” storage tanks paid \$230,275 in tank assessment fees, which was an increase of \$52,175 over past years tank assessment fees. This increase reflects the higher tank fees for those tank systems that are not fully double walled to incent their removal. Repayment of loan income totaled \$239,711, an increase of \$60,071 over FY14. In addition, the state successfully recovered funds totaling \$19,886, an increase of \$6,369 over FY14.

In FY15, total fund receipts for the heating fuel account were \$1,322,921. This was a significant decrease of \$638,000 compared to FY14. This decrease was the result of the FY14 revenue being artificially inflated by funds for FY13 not being collected and transferred into the PCF until FY14. This anomaly is also apparent given that heating fuel usage increased in FY15 due to a record cold winter. Looking forward to FY16, we will start receiving \$75,000 annually from the Vermont Fuel Assistance Program for supplementing the residential tank removal grant program. Interest on the PCF account totaled \$5,305, a slight decrease compared to FY14.

Review of Disbursements from the Fund

A review of fund disbursements for FY15 is summarized in Attachments 1, 2, and 3. In FY15, motor fuel account disbursements totaled \$3,870,726 and heating fuel disbursements totaled \$1,415,199; these are respective decreases of \$556,187 and \$108,728 over FY14.

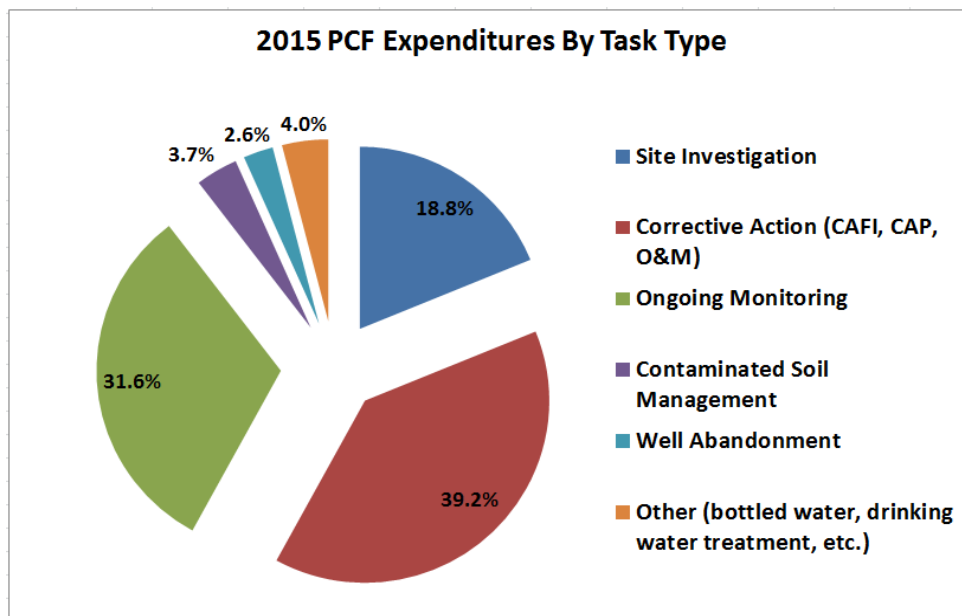

Expenditures from the motor fuel account included \$3,317,580 for remedial action at UST motor fuel sites, \$434,000 for the UST replacement loan program, and \$243,807 for third party claims. Disbursements from the heating oil account included \$664,697 for remedial action for UST heating fuel sites, \$67,168 for the residential UST removal program, \$699,380 for remedial action for AST heating fuel sites and \$281,628 for the residential AST removal grant program.

Disbursements for remediation represented a total of 2,508 different properties (Attachment 2 & 3), which includes sites where remediation occurred in prior years. The figure below provides a breakdown of the types of PCF reimbursement sites. These sites are located throughout Vermont in 232 different towns. Attachment 5 shows the distribution of these sites throughout the state.

Third party claims continue to represent a small portion of overall disbursements (<5 percent). At the end of FY15 the PCF has paid \$5,603,664 for all third party claims, with \$119,146.18 paid out in FY15.

Expenditures from the PCF recently began to be tracked by the type of work performed and have been broken out by task type in the chart below. The majority of expenditures are for cleanup (39 percent). Although monitoring costs comprise a significant share, 32 percent, these will be further broken out in the future to differentiate between monitoring to help determine the cleanup remedy, and “monitored natural attenuation,” which is an actual remedy when biodegradation, dilution, dispersion and other natural processes are adequate for bringing a site to closure. The other major expenditure type is “site investigation,” which accounts for 19 percent of expenditures. Approximately 10 percent of expenditures are on other minor categories: soil management (four percent), well abandonment (three percent) bottled water and drinking water treatment (four percent).

Investing in Prevention Activities

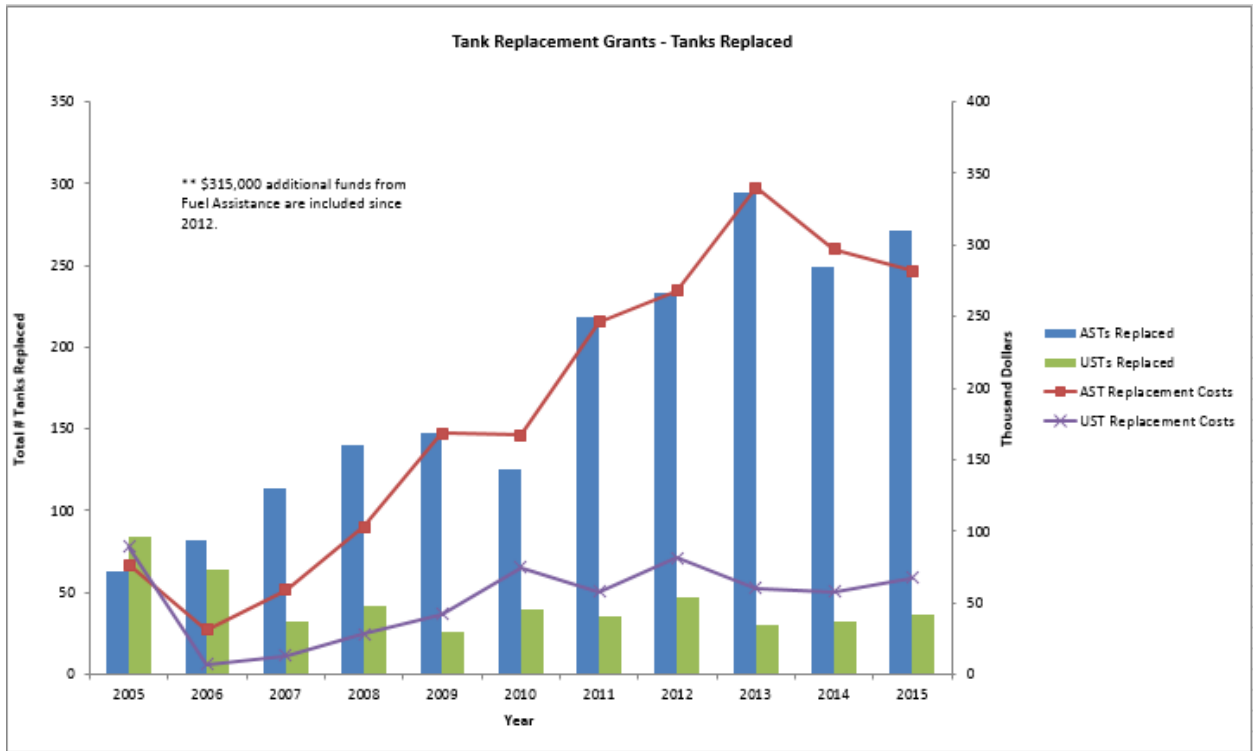

The AST Rules were updated Feb.10, 2014. In response to this update, DEC created an online list of red-tagged tanks, which records tanks that should not receive deliveries due to high risk of a release. DEC also created an online “red tag” form for dealers to add to this list. DEC has started tracking the fuel dealer at all AST releases for targeted prevention efforts in the future. There has been ongoing dialogue with heating fuel suppliers, heating service providers, property owners and realtors on the intent of the rules. There have also been direct communications with homeowners by fuel dealers and a tremendous amount of outreach to the media to educate the public on the state's AST regulations. This outreach has occurred without taxpayer expense, thanks to the partnerships with businesses and non-profits such as VFDA, VPA and the VT Association of Realtors.

Important leak-prevention activities have been funded by the PCF over the years that have helped to mitigate risks and reduce future costs. These include providing grants to farm and residential properties to remove and replace aging aboveground and underground heating oil tanks, and providing interest free loans to upgrade underground storage tanks. With the adoption of new AST regulations in October 2011 which requires routine inspection of old tanks there has been an increase in demand for the AST replacement grant. In addition, the new requirements have increased the cost of the installation. This includes installing a concrete pad and a roof for outside tanks.

The home heating oil tank removal grants were implemented (for USTs in 1998 and AST in 2004) to encourage the repair or removal and replacement of non-compliant tanks before leaks and releases occur. The average cleanup cost for home heating USTs is \$15,470, and AST cleanup costs have averaged \$11,097. The committee believes these grants have been an excellent investment, as millions of dollars on cleanup costs have been avoided by removing these tanks before they leak. In total, 36 grants were approved in FY15 for the closure of residential heating oil USTs. Total reimbursement in FY15 for UST grants was \$67,168 which brings the total amount awarded for USTs since the program began to \$901,849. In addition, 271 grants were approved in FY15 for the replacement of residential heating oil ASTs. Total reimbursement in FY15 for AST grants was \$281,628 which brings the total amount awarded since the program began to \$1,681,536 in AST grant funds. In addition to these funds, the Vermont Fuel Assistance program provided an additional \$40,000 to be used for AST replacement at residential properties with low income homeowners. The current annual demand for the grant program is approximately \$450,000. The authorized budget of \$350,000 for FY15 has already been fully awarded. The committee recommends that \$50,000 in additional funds be appropriated to cover the current demand for the program. In total the UST and AST grant program has funded the removal, replacement and/or upgrade of 2,649 aging petroleum storage tanks. The figure below depicts the annual number of tanks removed and funds awarded from 2005-2015.

In FY15 three UST motor fuel loans were closed in the total amount of \$434,000. The agency continues to contract for services of a certified accountant to review tank owner’s financials for determination of ability to repay and suggested collateral for each loan. Interest in the loan program has increased and more applications are expected in FY16 to assist tank owners with the removal with or without replacement of their single-wall combination tank systems. As of June 30, 2015 the amount of \$1,320,418 was the outstanding loan balance due to the Fund. Unfortunately, in FY 15 two loan balances were written off. The foreclosure of a country store by the first mortgagee resulted in the store being sold for far less than the amount owed on the first mortgage resulting in the Court cancelling the state’s mortgage. The amount was \$40,277.37. Another country store was by

agreement of all mortgagees finally sold under its value resulting in all mortgagees (two Banks and the state) receiving less than owed or nothing. The balance owed on that loan was \$2,333.71 and was written off. Total loan balance written off in FY 2015 was \$42,611.

The UST Program has received a number of inquiries from owners of commercial buildings, churches and schools (public and private) who are seeking funding sources for the replacement of their large on-premises heating oil tank. To date one school district, two private school and one town Library has received the interest-free loans.

Effectiveness of the Fund in Meeting Its Purpose

The fund was effectively able to meet its purpose of funding cleanups and providing financial assurance for **underground** gasoline storage tank owners in Vermont in FY15. Throughout the year there was an adequate balance in the motor fuel and heating fuel account and claims were processed in a timely manner. However, a number of motor fuel contaminated sites have approved corrective action plans on hold due to the limited resources in the fund. Also, the heating oil account will reach a negative balance if current trends continue.

Reasonableness of the Cost of Cleanup

In past years, the committee has reviewed the written policies and procedures of the DEC related to UST replacement, eligible costs and reimbursement procedures. In assessing the reasonableness of the cost of cleanup, the committee has reviewed national averages and comparative data from other states. The PCF Advisory Committee has concluded that agency staff responsible for this program has exercised prudent cost containment measures. A review of an annual survey conducted by the Association of State Underground Storage Tank Cleanup Funds shows that Vermont's cost of cleaning up contaminated sites is below those of other states. The continued efforts of Agency staff have helped to maintain reasonable cleanup costs in Vermont.

Recommended Statutory Changes to Chapter 59

The Committee makes the following recommendations:

1. Support H.363 as passed by the Vermont House of Representatives in 2015. Attachment 6 is a copy of the Bill as passed by the House.
2. The Committee supports efforts to ensure the inspection of residential heating fuel tanks and red tagging substandard tanks to reduce the number of releases. The Committee supports further discussion on the prevention efforts outlined in H.531 <<http://legislature.vermont.gov/bill/status/2016/H.531>> to ensure compliance with Vermont's existing AST regulations. Attachment 7 is a copy of the Bill as introduced.

For each site with an affected receptor the number of actual Vermonters exposed to contamination can vary. The actual users for public water supplies can be as low as 25 people per system to as high as many thousands of users. For sites with affected private water supplies, the number of contaminated wells depends on the specific conditions of the site. On average there are approximately three contaminated wells discovered per site, with an average of 3 users per household. However, one of the 161 sites listed above involved contamination to over 80 wells affecting approximately 240 users, and a site discovered in 2002 involves contamination to over 30 wells, including a public water supply, affecting hundreds of users. Surface water impacts can affect both public health and the environment. High concentrations of petroleum in a stream can cause detrimental affects to biota, and lead to an increased exposure to stream users. Lastly, sites with indoor air impacts can lead to the greatest risk to public health. Petroleum vapors entering a home can be at levels that are explosive. More often petroleum vapors reach levels that pose a serious health risk. Of the 141 sites with indoor air impacts, the number of exposed individuals varied from site to site. An average site involves three homes affected with approximately three persons per home.

PCF Sites by Town '15

This map represents the distribution of sites in Vermont that have received PCF funding through the 2015 fiscal year. Towns are labeled by the number of sites that have received such funding. Statewide, there have been a total of 2,508 properties that have received PCF funding, in 232 different towns.

*A small number of sites were removed from this list as part of a data cleanup from 2012 to 2013.

1 H.363

2 Introduced by Representative Marcotte of Coventry

3 Referred to Committee on

4 Date:

5 Subject: Conservation and development; underground storage tanks;

6 aboveground storage tanks; Petroleum Cleanup Fund

7 Statement of purpose of bill as introduced: This bill proposes to amend the
8 Petroleum Cleanup Fund requirements in order to specify the amount of grants
9 available from the Fund for different aboveground storage tanks or
10 underground storage tanks. The bill also increases from \$350,000.00 to
11 \$400,000.00 the amount of assistance the Secretary of Natural Resources may
12 authorize from the Heating Fuel Account of the Fund for underground and
13 aboveground heating fuel tanks in any one fiscal year.

14 An act relating to the Petroleum Cleanup Fund

15 It is hereby enacted by the General Assembly of the State of Vermont:

16 Sec. 1. 10 V.S.A. § 1941(g) is amended to read:

17 (g) The owner of a farm or residential heating fuel storage tank used for on-
18 premises heating or an underground or aboveground heating fuel storage tank
19 used for on-premises heating by a mobile home park resident, as defined in
20 section 6201 of this title, who desires assistance to close, replace, or upgrade

1 the tank may apply to the Secretary for such assistance. The financial
2 assistance may be in the form of grants of up to: \$2,000.00 or the costs of
3 closure, replacement, or upgrade, whichever is less for an aboveground storage
4 tank located inside a structure; up to \$3,000.00 or the costs of closure,
5 replacement, or upgrade, whichever is less for an aboveground storage tank
6 located outside a structure; and up to \$4,000.00 of the costs of closure,
7 replacement, or upgrade, whichever is less for an underground storage tank.
8 Grants shall be made only to the current property owners, except at mobile
9 home parks where a grant may be awarded to a mobile home park resident. To
10 be eligible to receive the grant, an environmental site assessment must be
11 conducted by a qualified consultant during the tank closure, replacement, or
12 upgrade if the tank is an underground heating fuel storage tank. In addition, if
13 the closed tank is to be replaced with an underground heating fuel storage tank,
14 the replacement tank and piping shall provide a level of environmental
15 protection at least equivalent to that provided by a double wall tank and
16 secondarily contained piping. Grants shall be awarded on a priority basis to
17 projects that will avoid the greatest environmental or health risks. The
18 Secretary shall also give priority to applicants who are replacing their
19 underground heating fuel tanks with aboveground heating fuel storage tanks
20 that will be installed in accordance with the Secretary's recommended
21 standards. The Secretary shall also give priority to lower income applicants.

1 To be eligible to receive the grant, the owner must provide the previous year's
2 financial information, and, if the replacement tank is an aboveground tank,
3 must assure that any work to replace or upgrade a tank shall be done in
4 accordance with industry standards (National Fire Protection Association, or
5 NFPA, Code 31), as it existed on July 1, 2004, until another date or edition is
6 specified by rule of the Secretary. The Secretary shall only authorize up to
7 ~~\$350,000.00~~ \$400,000.00 in assistance for underground and aboveground
8 heating fuel tanks in any one fiscal year from the Heating Fuel Account for this
9 purpose. The application must be accompanied by the following information:

10 (1) proof of ownership, including information disclosing all owners of
11 record of the property, except in the case where the applicant is a mobile home
12 park resident;

13 (2) for farm or residential aboveground heating fuel storage tank
14 owners, a copy of the federal income tax return for the previous year;

15 (3) identification of the contractor performing any heating fuel storage
16 tank closure, replacement, or upgrade;

17 (4) an estimated cost of tank closure, replacement, or upgrade;

18 (5) the amount and type of assistance requested;

19 (6) a schedule for the work;

20 (7) description of surrounding area, including location of water supply
21 wells, surface waters, and other sensitive receptors; and

1 (8) such other information and assurances as the Secretary may require.

2 Sec. 2. EFFECTIVE DATE

3 This act shall take effect on passage.

1 H.531

2 Introduced by Representative Connor of Fairfield

3 Referred to Committee on

4 Date:

5 Subject: Conservation and development; aboveground storage tanks;
6 inspection; design

7 Statement of purpose of bill as introduced: This bill proposes to require the
8 inspection of aboveground storage tanks every three years. The bill also
9 requires newly installed aboveground storage tanks installed in structures to be
10 fitted with a drip pan or other secondary containment system. The bill
11 proposes to amend the Petroleum Cleanup Fund requirements in order to
12 specify the amount of grants available from the Fund for different aboveground
13 storage tanks or underground storage tanks. The bill also increases from
14 \$350,000.00 to \$400,000.00 the amount of assistance the Secretary of Natural
15 Resources may authorize from the Heating Fuel Account of the Fund for
16 underground and aboveground heating fuel tanks in any one fiscal year.

17 An act relating to aboveground storage tanks

1 It is hereby enacted by the General Assembly of the State of Vermont:

2 Sec. 1. 10 V.S.A. § 1929a is amended to read:

3 § 1929a. STANDARDS FOR ABOVEGROUND STORAGE TANKS

4 (a) ~~No later than~~ On or before December 31, 2011, the ~~secretary~~ Secretary
5 shall adopt rules addressing the design and proper installation of aboveground
6 storage tanks.

7 (b) After January 1, 2012, no person shall offer for sale, install, or
8 substantially improve an aboveground storage tank that does not meet the
9 standards adopted by the secretary under subsection (a) of this section.

10 (c) A person installing an aboveground storage tank in a structure after
11 July 1, 2016 shall attach a tag or mark to the tank indicating the date of tank
12 installation. An aboveground storage tank installed in a structure after July 1,
13 2016 shall be fitted with a drip pan or other secondary containment system.

14 (d)(1) A fuel supplier shall inspect an aboveground storage tank prior to the
15 first delivery of fuel to the tank on or after January 1, 2017 and at least every
16 three years thereafter. A fuel supplier shall inspect an aboveground storage
17 tank prior to delivery to the tank if the tank has not received a delivery of fuel
18 within two or more years. An inspection of an aboveground storage tank shall
19 be conducted according to the requirements of this chapter and the rules
20 adopted under the chapter. A tank inspector shall be certified under section
21 1.13 of the Vermont Fire and Building Safety Code.

1 (2) Upon determination by a tank inspector that an aboveground storage
2 tank complies with the requirements of this chapter and the rules adopted
3 under the chapter, the tank inspector shall attach a tag to the tank in order to
4 verify the date and result of the inspection. If a tank inspector determines that
5 a tank is noncompliant with the requirements of this chapter or the rules
6 adopted under this chapter, the tank inspector shall attach a red tag to the tank
7 fill pipe. The tank inspector shall report to the Agency of Natural Resources
8 any tank that is red-tagged and shall identify the requirements of this chapter or
9 the rules adopted under this chapter for which the tank is noncompliant.

10 (3) The Secretary shall maintain a database of “red-tagged” tanks that
11 shall be accessible to the public.

12 (4) The Secretary of Natural Resources shall adopt by rule the protocol
13 to be followed and criteria to be reviewed in the performance of an inspection
14 required by this subsection. The rule shall include an updated inspection
15 checklist.

16 (e)(1) No person shall deliver heating fuel to an aboveground storage
17 tank that:

18 (A) is visibly designated as noncompliant with the tank inspection
19 requirement of this chapter or the rules adopted under this chapter; or

20 (B) has not been inspected within the timeframe required under
21 subdivision (d)(1) of this subsection.

1 (2) A person that delivers heating fuel to a tank in violation of this
2 subsection shall be responsible for any abatement of a release or threatened
3 release and for the costs of investigation, removal, and remedial actions
4 necessary to protect the public health or the environment as a result of the
5 violation.

6 (f) If the owner of an aboveground storage tank in a structure converts the
7 type of fuel used for home heating purposes from a petroleum product to
8 another type of fuel, the aboveground storage tank used to store petroleum
9 products shall be retired from use and removed from the structure and the fill
10 pipe shall be removed or sealed.

11 (g) As used in this subsection, “structure” means any assembly of materials
12 that is intended for occupancy or use by a person and that has at least three
13 walls and a roof.

14 Sec. 2. 10 V.S.A. § 1941(g) is amended to read:

15 (g) The owner of a farm or residential heating fuel storage tank used for
16 on-premises heating or an underground or aboveground heating fuel storage
17 tank used for on-premises heating by a mobile home park resident, as defined
18 in section 6201 of this title, who desires assistance to close, replace, or upgrade
19 the tank may apply to the Secretary for such assistance. The financial
20 assistance may be in the form of grants of up to: \$2,000.00 or the costs of
21 closure, replacement, or upgrade, whichever is ~~less~~ least for an aboveground

1 storage tank located inside a structure; up to \$3,000.00 or the costs of closure,
2 replacement, or upgrade, whichever is least for an aboveground storage tank
3 located outside a structure; and up to \$4,000.00 or the costs of closure,
4 replacement, or upgrade, whichever is least for an underground storage tank.

5 Grants shall be made only to the current property owners, except at mobile
6 home parks where a grant may be awarded to a mobile home park resident. To
7 be eligible to receive the grant, an environmental site assessment must be
8 conducted by a qualified consultant during the tank closure, replacement, or
9 upgrade if the tank is an underground heating fuel storage tank. In addition, if
10 the closed tank is to be replaced with an underground heating fuel storage tank,
11 the replacement tank and piping shall provide a level of environmental
12 protection at least equivalent to that provided by a double wall tank and
13 secondarily contained piping. Grants shall be awarded on a priority basis to
14 projects that will avoid the greatest environmental or health risks. The
15 Secretary shall also give priority to applicants who are replacing their
16 underground heating fuel tanks with aboveground heating fuel storage tanks
17 that will be installed in accordance with the Secretary's recommended
18 standards. The Secretary shall also give priority to lower income applicants.
19 To be eligible to receive the grant, the owner must provide the previous year's
20 financial information, and, if the replacement tank is an aboveground tank,
21 must assure that any work to replace or upgrade a tank shall be done in

1 accordance with industry standards (National Fire Protection Association, or
2 NFPA, Code 31), as it existed on July 1, 2004, until another date or edition is
3 specified by rule of the Secretary. The Secretary shall ~~only~~ authorize only up
4 to ~~\$350,000.00~~ \$400,000.00 in assistance for underground and aboveground
5 heating fuel tanks in any one fiscal year from the Heating Fuel Account for this
6 purpose. The application must be accompanied by the following information:

7 (1) proof of ownership, including information disclosing all owners of
8 record of the property, except in the case where the applicant is a mobile home
9 park resident;

10 (2) for farm or residential aboveground heating fuel storage tank
11 owners, a copy of the federal income tax return for the previous year;

12 (3) identification of the contractor performing any heating fuel storage
13 tank closure, replacement, or upgrade;

14 (4) an estimated cost of tank closure, replacement, or upgrade;

15 (5) the amount and type of assistance requested;

16 (6) a schedule for the work;

17 (7) description of surrounding area, including location of water supply
18 wells, surface waters, and other sensitive receptors; and

19 (8) such other information and assurances as the Secretary may require.

1 Sec. 3. 10 V.S.A. § 8003(a) is amended to read:

2 (a) The Secretary may take action under this chapter to enforce the
3 following statutes and rules, permits, assurances, or orders implementing the
4 following statutes, and the Board may take such action with respect to
5 subdivision (10) of this subsection:

6 * * *

7 (8) 10 V.S.A. chapter 59, relating to underground storage tanks and
8 aboveground storage tanks;

9 * * *

10 Sec. 4. EFFECTIVE DATES

11 This act shall take effect on July 1, 2016, except that 10 V.S.A.
12 § 1929a(d)(1)-(3) (aboveground storage tank inspection) shall take effect on
13 January 1, 2017.
