

A caring partnership to help seniors and individuals with special needs stay at home and healthy

SASH is a population based care management model that harnesses the strengths of social service agencies, community health providers and non-profit housing organizations to work together to support Vermonters to live safely and healthfully at home.

Interprofessional Team Approach

"The major SASH program implementation success has been the linkages the program has created among different community organizations."

Research TriangleInternational (RTI)

RTI Evaluation Results

 For Vermonters receiving care from a medical home, supplemented by SASH services provided by experienced, well-established panels, the growth in annual total Medicare expenditures was \$1,756 - \$2,197 lower than the growth in expenditures among Medicare fee-for-service beneficiaries in the two comparison groups.
