Good Morning Geoff,

It has been another two months since our last correspondence and we still do not have an update on the CNMP. You stated in your last email that you had re-assigned this task but neglected to pass on that information. This plan was only put in place for one year and now we are six months into that year and nothing has been shared as of yet. Does GMP have access to the results?

Just a reminder we do have experts who we can depend on to read these reports. Don't feel as though you need to cater to the non-experts.

Hope to hear from you soon,
Robbin Clark

Hello Robbin,

Yes, you have been more than patient with this process, and I owe you an apology for not responding sooner. The pace of renewable energy development in Vermont has been brisk and increasing, and DPS staff are working hard to keep up with the flow of applications and issues to be addressed. I understand that this is no comfort to you and your neighbors, but it is the situation we are dealing with.

The KCW continuous monitoring program is underway, as is a status report to the Board and parties. I have re-assigned this task to ensure that it keeps moving forward to a report, and it is my intent and hope that we will be filing a report soon. As shown by our recent filing with the PSB regarding the Sheffield wind project, the subject matter is complex and nuanced, and significant effort is required to make a presentation that is both technically accurate and useful to non-experts who will be reading it. We will complete and file a report on KCW as quickly as we can, and all parties to the docket will receive it.

Thank you again for your patience. I hope to have a better response for you

soon.

Subject: 7628 CNMP update

Good Evening Geoff,

I sent this to you on 9/24 and am still waiting for a response. I feel that I have been very patient and understanding but my patients is being tested. The change of seasons is upon us and several members of the LMG are having issues with noise. Will you please send me an update on the CNMP for KCW.

Back in June you had emailed and said that you would be filing a status report soon; I have received nothing to this day 11/12/15.

Thank you,
Robbin Clark

Good Morning Geoff,

I have been waiting for months for a status report. As you can see your last communication was back in June. Many of the KCW neighbors have been having problems with noise and we would really appreciate an update on the CNMP.

I know that you must be very busy with the renewable gold rush going on but I

hope to hear from you soon.

Thank you,
Robbin Clark

Good morning Robbin,

The monitoring equipment has been set up at the former Nelson residence, and is currently in a testing or “shakedown” status – meaning that Acentech is ensuring that everything functions properly including equipment, communication links, etc. We intend to file a status report on the CNMP effort with the PSB and parties to Docket 7628 in the near future.

I hope you’re well and again, my apologies that this is taking so long.

Best regards,
Geoff

Good morning Geoff,

Could you please give me an update on the Continuous Noise Monitoring Plan.

Thanks,
Robbin Clark
