Language to Clarify Utility Partnerships with Energy Efficiency Utilities under Tier 3

Page 20

(ii) An energy transformation project may provide incremental support to a program authorized under Vermont statute that meets the eligibility criteria of this subdivision (a)(3) but may take credit only for the additional amount of service supported and shall not take credit for that programs' regularly budgeted or approved investments.

To that add:

For the purposes of meeting the requirements of this section, one or more distribution utilities may jointly propose with an energy efficiency utility a project or a portfolio of projects. Such proposals shall include metrics by which performance can be assessed. The distribution utility and the EEU may also propose shared metrics to meet the requirements of the Innovation project.
