

# Fuel Mix

AAA

**We are working hard to make our fuel mix one of the cleanest in New England and we're very proud of that.**

As residents of Vermont, we care about keeping it beautiful and safe just as much as the people we serve. We make a serious effort to maintain the cleanest fuel mix possible, and are focused on low cost, low carbon, and reliability. This chart shows our anticipated fuel mix for 2015, after the sale of Renewable Energy Credits (RECs).
